## HORACE HAYMAN WILSON, Esq.

RODEN PROFESSOR OF SANSKRIT, ASSOCIATE OF THE INSTITUTE OF FRANCE ETC.

This Work is Inscribed

AS A TOKEN OF ADMIRATION AND GRATITUDE
BY HIS PUPIL AND FRIEND

MAX MÜLLER.

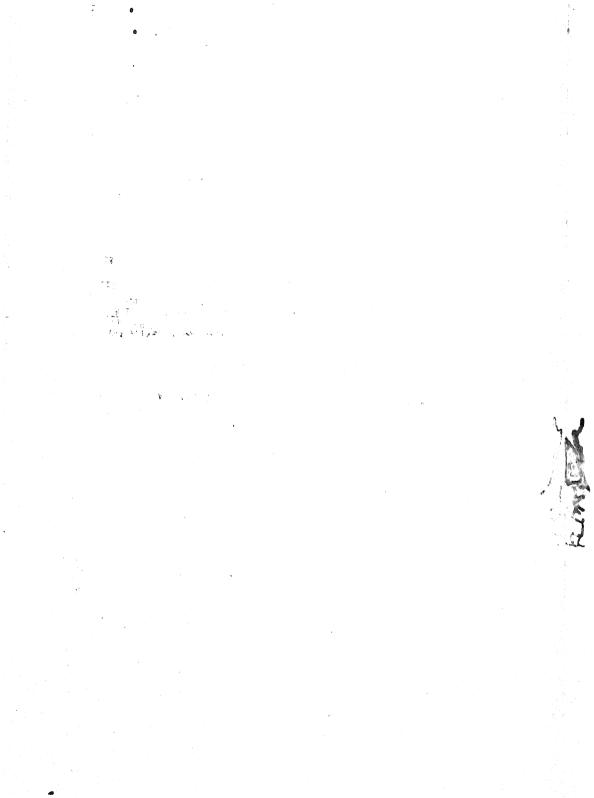

: ¥

FEW words of personal explanation are due to those who may have seen, in the Preface to the First Volume of my edition of the Rig-Veda,\* a note announcing as ready for publication an Introductory Memoir on the Literature of the Veda. Ten sheets of this Memoir were printed when, in the beginning of the year 1851, I was appointed Deputy Professor, and, after the death of my lament. ed friend, Francis Trithen, in the year 1854, Professor of Modern European Languages and Literature in the University of Oxford. In compliance with the statutes for the Foundation of Sir Robert Taylor. I had to write "Three Courses of Lectures in every year, on the Philology or Literature of some of the principal Languages of Europe." These new and unexpected duties rendered it necessary for me to discontinue for a time my favourite studies. And when, after the first years of my new office, I was able to employ a greater amount of leisure on the prosecution of Sanskrit studies, I felt that I should better serve the interests of Sanskrit Philology by devoting all my spare time to editing the text and commentary of the Veda. than by publishing the results, more or less fragmentary, of my own researches into the literature, language, and religion of the ancient Brahmans.

In resuming now, after the lapse of nearly ten years, the publication of these Essays, I may regret that on many points I have been anticipated by others, who during the interval have made the Veda the special subject of their studies. But this regret is fully balanced by the satisfaction I feel in finding that, in the main. my original views on the literature and religion of the Vedic age have not been shaken, either by my own continued researches or by the researches of others; and that the greater part of this work could be printed, as it now stands, from the original manuscript. It will be seen, however, that in the notes, as well as in the body of the work, I have availed myself, to the best of my ability, of all the really important and solid information that could be gathered from the latest works of Sanskrit philologists. The frequent references to the works of Wilson, Burnouf, Lassen, Benfey, Roth, Boehtlingk, Kuhn, Regnier, Weber, Aufrecht, Whitney, and others,

<sup>\*</sup> Rig-Veda-Sanhitâ, the sacred songs of the Brahmans, together with the Commentary of Sâyanâcharya, edited by Max Müller, Vol. I., 1849; Vol. II., 1854; Vol. III., 1856. There will be three more volumes, the first of which is to be published next year. The first volume of Professor Wilson's Translation was published 1850; the second 1854; the third, 1857; and he is carrying on, at the present moment, his valuable translation of the next volume.

will show where I have either derived new light from the labours of these eminent scholars, or found my own conclusions confirmed by their independent testimony. Believing, as I do, that literary controversy is more apt to impede than to advance the cause of truth, I have throughout carefully abstained from it. Where it seemed necessary to controvert unfounded statements or hasty conclusions, I have endeavoured to do so by stating the true facts of the case, and the legitimate conclusions that may be drawn from these facts.

My readers have to thank Dr. Bühler, a pupil of Professor Benfey of Göttingen, for the alphabetical index at the end of this volume.

MAX MÜLLER.

Ray Lodge, Maidenhead, Aug. 3, 1859.

#### INTRODUCTION.

Full seventy years have passed since Sir William Jones published his translation of Sakuntala1, a work which may fairly be considered as the starting point of Sanskrit philology. The first appearance of this beautiful specimen of dramatic art created at the time a sensation throughout Europe. and the most rapturous praise was bestowed upon it by men of high authority in matters of taste. 2 At the same time the attention of the historian, the philologist, and the philosopher was roused to the fact that a complete literature had been preserved in India, which promised to open a new leaf in the ancient history of mankind, and deserved to become the object of serious study. And although the enthusiasm with which works like Sakuntala were at first received by all who took an interest in literary curiosities could scarcely be expected to last, the real and scientific interest excited by the language, the literature, the philosophy, and antiquities of India has lasted, and has been increasing ever since. England, France, Germany, Italy, Denmark, Sweden, Russia and Greece have each contributed their share towards the advancement of Sanskrit philology, and names like those of Sir W. Jones, Colebrooke, Wilson, in England, Burnouf in France, the two Schlegels, W. von Humboldt, Bopp, and Lassen, in Germany, have secured to this branch of modern scholarship a firm standing and a universal reputation. The number of books that have been published by Sanskrit scholars in the course of the last seventy years is but small3. Those works, however, represent large and definite results, important not

1 "Sacontala or the Fatal Ring, an Indian drama, translated from the original Sanskrit and Prakrit, Calcutta, 1789." There have since appeared three editions of the Sanskrit text, and translations in French, German Italian, Danish, and Swedish.

A new and very elegant English version has lately been published by

Professor Williams. Hertford. 1856.

<sup>2</sup> Goethe was one of the greatest admirers of Sakuntalâ, as may be seen from the lines written in his Italian Travels at Naples, and from his well-known Epigram:

"Willt Du die Bluthe des fruhen, die Fruchte des spateren Jahres,

Willt Du, was reizt und entzuckt, willt Du was sattight und nahrt,

Willt Du den Himmel die Erde mit einem Namen begreifen,

Nenn ich, Sacontala, Dich, und so ist Alles gesagt."

"Wilt thou the blossoms of spring and the fruits that are later in season,

Wilt thou have charms and delights, wilt thou have strength and support,

Wilt thou with one short word encompass the earth and the heaven.

All is said if I name only, Sacontala, thee."

3 Professor Gildemeister in his most laborious and accurate work, "Bibliothecæ Sanscritæ Specimen, Bonnæ, 1847," brings the number of books that have been published up to that time in Sanskrit philology to 603, exclusive of all works on Indian antiquities and Comparative philology. During the last twelve years that number has been considerably raised.

only in their bearing on Indian antiquities, but, as giving birth to a new system of Comparative philology, of the highest possible importance to philology in general. In little more than half a century, Sanskrit has gained its proper place in the republic of learning, side by side with Greek and Latin. The privileges which these two languages enjoy in the educational system of modren Europe will scarcely ever be shared by Sanskrit. But no one who wishes to acquire a thorough knowledge of these or any other of the Indo-European languages,—no one who takes an interest in the philosophy and the historical growth of human speech,—no one who desires to study the history of that branch of mankind to which we ourselves belong, and to discover in the first germs of the language, religion, and mythology of our forefathers, the wisdom of Him who is not the God of the Jews only,—can, for the future, dispense with some knowledge of the language and ancient literature of India.

And yet Indian philology is still in its infancy, and the difficulties with which it has had to contend have been great, much greater, indeed, than those which lay in the way of Greek philology after its revival in the fifteenth century. Seventy years after the fall of Constantinople, the elassical works of Greek literature were not only studied from manuscripts: they had been edited and printed. There were men like Reuchin, Erasmus, and Melanchthon, who had investigated the most important documents in the different periods of Greek literature, and possessed a general knowledge of the historical growth of the Greek mind. Learned Greeks who were taking refuge in the west of Europe, particularly in Italy, had brought with them a sufficient knowledge to teach their language and literature; and they were able and ready to guide the studies of those who were afterwards to contribute to the revival of classical learning in Europe. Men began where they ought to begin, namely, with Homer, Herodotus, and Thucydides and not with Anacreontic poetry or Neo-Platonist philosophy. But when our earliest Sanskrit scholars directed their attention to Indian literature, the difficulties they had to struggle with were far greater. Not to mention the burning and enervating sky of India, and the burden of their official occupations, men like Halhed, Wilkins, and Sir W. Jones could hardly find a single Brahman who would undertake to teach them his sacred idiom. When after some time, learned Pandits became more willing to impart their knowledge to Europeans, their own views of Indian history and literature were more apt to mislead their pupils than to guide them, in a truly historical direction. Thus it happened that, at the beginning of Sanskrit philology, preference was given either to works which still enjoyed amongst the Hindus themselves a great, but frequently undeserved, popularity, or to those which by

<sup>1</sup> Professor Lassen, in his work on Indian Antiquities, now in course of publication, is giving a resume of the combined labours of Indian philologists during the last seventy years, sifted critically and arranged scientifically by a man of the most extensive learning, and of the soundest principles of criticism. His work may indeed be considered as bringing to its conclusion an important period of Sanskrit philology, which had taken its beginning with Sir W. Jones's translation of Sakuntala. Indische Alterthums-Kunde, von Christian Lassen. Bonn, 1847-1858.

their poetical beauty attracted the attention of men of taste. Everything Indian, whether Manu's Code of Laws, the Bhagavadgîtâ, Sakuntalâ, or the Hitopades'a, was at that time considered to be of great and extravagant antiquity, and it was extremely difficult for European scholars to form a right opinion on the real merits of Indian literature. The literary specimens received from India were generally fragments only of larger works: or, if not, they had been chosen so indiscriminately from different and widely distant periods, that it was impossible to derive from them an adequate knowledge of the rise and fall of the national literature of India.

Herder, in other respects an excellent judge of ancient national poetry. committed himself to some extraordinary remark on Indian literature. In his criticism on Sakuntalâ, written in the form of letters to a friend, he says: "Do you not wish with me, that instead of these endless religious books of the Vedas, Upavedas and Upangas, they would give us the more useful and more agreeable works of the Indians, and especially their best Poetry of every kind? It is here the mind and character of a nation is best brought to life before us, and I gladly admit, that I have received a truer and more real notion of the manner of thinking among the ancient Indians from this one Sakuntalâ, than from all their Upnekats and Baga. vedams."1 The fact is that at that time Herder's view on the endless religious books of the Veda, could only have been formed from a wretched translation of the Bagavedam, as he calls it,—that is, the Bhagavatapurâna,—a Sanskrit work composed as many centuries after as the Vedas were before Christ; or from the Ezour-vedam, a very coarse forgery, if, indeed, it was intended as such, written, as it appears, by a native servant. for the use of the famous Jesuit missionary in India, Roberto de Nobilibus.2

Even at a much later time, men who possessed the true tact of an historian like Niebuhr, have abstained from passing sentence on the history of a nation whose literature had only just been recovered, and had not yet passed through the ordeal of philological criticism. In his Lectures on Ancient History, Niebuhr leaves a place open for India, to be filled up when the pure metal of history should have been extracted from the ore

of Brahmanic exaggeration and superstition.

Other historians, however, thought they could do what Niebuhr had left undone; and after perusing some poems of Kâlidâsa, some fables of the Hitopades'a, some verses of the Ananda lahari, or the mystic poetry of the Bhagavadgîtâ, they gave, with the aid of Megasthenes and Apollonius of Tyana, a so-called historical account of the Indian nation without being aware that they were using as contemporary witnesses, authors as distant from each other as Dante and Virgil. No nation has, in this respect, been more unjustly treated than the Indian. Not only have general conclusions been drawn from the most scanty materials, but the most questionable and spurious authorities have been employed without the least historical investigation or the exercise of that critical

<sup>&</sup>lt;sup>1</sup>Herder's Schriften, vol. ix. p. 226. Zur schonen Literature und Kunst. Tubingen, 1807.

<sup>&</sup>lt;sup>2</sup> Of. Account of a Discovery of a Modern Imitation of the Vedas with Remarks on the genuine works, by Fr. Ellis; Asiatic Researches, xiv, p. 1—59: Calcutta, 1822.

ingenuity, which, from its peculiar character, Indian literature requires more than any other.1

There is another circumstance which has retarded the progress of Sanskrit philology: an affectation of that learned pedantry which has done so much mischief to Greek and Latin scholarship. We have much to learn, no doubt, from classical scholars, and nothing can be a better preparation for a Sanskrit student than to have passed through the school of a Bentley or a Hermann. But in Greek and Latin scholarship the distinction between useful and useless knowledge has almost disappeared, and the real objects of the study of these ancient languages have been well nigh forgotten. More than half of the publications of classical scholars have tended only to impede our access to the master-works of the ancients; and a sanction has been given to a kind of learning, which however creditable to the individual is of no benefit to the public at large. A similar spirit has infected Sanskrit philology. Sanskrit texts have been edited, on which no rational man ought to waste his time. Essays have been written on subjects on which it is folly to be wise. These remarks are not intended to disparage critical scholarship or to depreciate the results which have been obtained by minute and abstruse erudition. But scholars who devote all their time to critical niceties and recondite subtleties are apt to forget that these are but accessories. Knowledge which has no object beyond itself is, in most cases, but a pretext for vanity. It is so easy, even for the most superficial scholar to bring together a vast mass of information, bearing more or less remotely on questions of no importance whatsoever. The test of a true scholar is to be able to find out what is really important, to state with precision and clearness the results of long and tedious researches, and to suppress altogether lucubrations. which, though they might display the laboriousness of the writer, would but encumber his subject with needless difficulty.

The object and aim of philology, in its highest sense, is but one,—to learn what man is, by learning what man has been. With this principle for our pole-star, we shall never lose ourselves, though engaged in the most minute and abstruse inquiries. Our own studies may seemingly refer to matters that are but secondary and preparatory, to the clearance, so to say, of the rubbish which passing ages have left on the monuments of the human mind. But we shall never mistake that rubbish for the monuments which it covers. And if, after years of tiresome labour, we do not arrive at the results which we expected,—if we find but spurious and unimportant fabrications of individuals, where we thought to place ourselves

<sup>1</sup> Professor H. H. Wilson, in the preface to his translation of the Vishnu-Purana. remarks: "It is the boast of inductive philosophy that it draws its conclusions from the careful observation and accumulation of facts; and it is equally the business of all philosophical research to determine its facts before it ventures upon speculation. This procedure has not been observed in the investigation of the mythology and traditions of the Hindus. Impatience to generalise has availed itself greedily of whatever promised to afford materials for generalisation; and the most erroneous views have been confidently advocated, because the guides to which their authors trusted were ignorant or insufficient."

face to face with the heroes of an ancient world, and among ruins that should teach us the lessons of former ages,—we need not be discouraged nor ashamed, for in true science even a disappointment is a result.

If, then, it is the aim of Sanskrit philology to supply one of the earliest and most important links in the history of mankind, we must go to work historically; that is, we must begin, as far as we can, with the beginning, and then trace gradually the growth of the Indian mind, in its various manifestations, as far as the remaining literary monuments allow us to follow this course. What has been said with regard to philosophy, that "we must acquire a knowledge of the beginning and first principles, because then we say that we understand any thing when we believe we know its real beginning," applies with equal force to history. Now every one acquainted with Indian literature, must have observed how impossible it is to open any book on Indian subjects without being thrown back upon an earlier authority, which is generally acknowledged by the Indians as the basis of all their knowledge, whether sacred or profane. This earlier authority, which we find alluded to in theological and philosophical works, as well as in poetry, in codes of law, in astronomical, grammatical, metrical, and lexicographic compositions, is called by one comprehensive name, the Veda.

It is with the Veda, therefore, that Indian philology ought to begin if it is to follow a natural and historical course. So great an influence has the Vedic age (the historical period to which we are justified in referring the formation of the sacred texts) exercised upon all succeeding periods of In lian history, so closely in every branch of literature connected with Velic traditions, so deeply have the religious and moral ideas of that primitive era taken root in the mind of the Indian nation, so minutely has almost every private and public act of Indian life been regulated by old traditionary precepts, that it is impossible to find the right point of view for judging of Indian religion, morals and literature without a knowledge of the literary remains of the Vedic age. No one could furly say that those men who first begin to study Sanskrit, now seventy years ago, ought to have begun with reading the Veda. The difficulties connected with the study of the Veda would have made such a course utterly impossible and useless. But since the combined labours of Sanskrit scholars have now rendered the study of that language of more easy access, since the terminology of Indian grammarians and commentators, which not long ago was considered unintelligible, has become more familiar to us, and manuscripts can be more readily procured at the principal public libraries of Europe. Sanskrit philology has no longer an excuse for ignoring the Vedic age.

It might be inferred from the very variety of subjects upon which as has been just observed, the Veda is quoted as the last and highest authority, that by Veda must be understood something more than a single work. It would be, indeed, much nearer the truth to take "Veda" as a collective name for the sacred literature of the Vedic age which forms, so to speak, the background of the whole Indian world. Many of the works which belonged to that period of literature have been irrecoverably lost. With regard to many of them, though their existence cannot be doubted, it is even uncertain whether they were ever committed to writing. A large number, however, of Vedic works does still exist; and it will require many

years before they can be edited together with their commentaries. then it will be impossible to arrive at definite results on many questions connected with Vedic literature, and it would not be safe to take a comprehensive view of the whole Vedic age before all the sources have been exhausted from which its history and character can be studied. Nothing could be farther from the purpose of this historical essay than to attempt anything of this kind at present. What I have to offer are but Prolegomena to the Veda, or treatises on some preliminary questions connected with the history of the Vedic age. There are points which can be settled with complete certainty, though it may be impossible to bring, as yet, the whole weight of evidence to bear upon them; and the general question as to the authenticity, the antiquity, and the different periods of Vedic literature, ought to be answered even before beginning, an edition of Vadic works. Again, there are many questions of special interest for Sanskrit literature, in which even now, with the materials that have been published, and with the help of manuscripts that are accessible in the public libraries of Europe, it is possible to arrive at certain results; while other points are such that even after the complete publication of all Vedic texts and commentaries, they will remain open to different views, and will necessarily become the subject of literary discussions. The principal object of the following essays will be to put the antiquity of the Veda in its proper light. By antiquity, however, is meant, not only he chronological distance of the Vedic age from our own, measured by the revolutions and the progress of the heavenly bodies, but also and still more, the distance between the intellectual, moral, and religious state of men as represented to us during the Vedic age, compared with that of other periods of history, - a distance which can only be measured by the revolutions and the progress of the human mind.

No one who is at all acquainted with the position which India occupies in the history of the world, would expect to find many synchronisms between the history of the Brahmans and that of other nations before the date of the origin of Buddhism in India. Although the Brahmans of India belong to the same family, the Aryan or Indo-European family, which civilised the whole of Europe, the two great branches of that primitive were kept asunder for centuries after their first separation stream of the Aryan nations has always flowed towards the north-west. No historian can tell us by what impulse those adventurous Nomads were driven on through Asia towards 'the isles and shores of Europe. The first start of this world wide migration belongs to a period far beyond the reach of documentary history; to times when the soil of Europe had not been trodden by either Celts, Germans, Slavonians, Romans, or Greeks whatever it was, the impulse was as irresistible as the spell which, in our own times, sends the Celtic tribes towards the prairies or the regions of gold across the Atlantic. It requires a strong will, or a great amount of inertness, to be able to withstand the impetus of such national, rather ethnical movements. Few will stay behind when all are going. But to let one's friends depart and then to set out ourselves to take a road which, lead where it may, can never lead us to join those again who speak our language and worship our gods -is a course which only men of strong individuality and great self-dependence are capable of pursuing. It was the course adopted

by the southern branch of the Aryan family, the Brahmanic Aryas of India and the Zoroastrians of Iran.

At the first dawn of traditional history we see these Aryan tribes migrating across the snow of the Himalaya southward toward the "Seven Rivers" (the Indus, the five rivers of the Panjab and the Sarasyati), and ever since India has been called their home. That before that time they had been living in more northern regions, within the same precincts with the ancestors of the Greeks, the Italians. Slavonians, Germans, and Celts, is a fact as firmly established as that the Normans of William the Conqueror were the Northmen of Scandinavia. he evidence of language is irrefragable, and it is the only evidence worth listening to with regard to antehistorical periods. It would have been next to impossible to discover any traces of relationship between the swarthy natives of India and their conquerors, whether Alexan er or Clive, but for the testimony borne by language. What other evidence could have reached back to times when Greece was not peopled by Greeks, nor India by Hindus? Yet these are the times of which we are speaking. What authority would have been strong enough to persuade the Grecian army, that their gods and their hero ancestors were the same as those of King Porus, or to convince the English soldier that the same blood was running in his veins and in the veins of the dark Bengalese? And yet there is not an English jury now a days, which, after examining the hoary documents of language, would reject the claim of a common descent and a legitimate relationship between Hindu, Greek, and Many words still live in India and in England, that have witnessed the first separation of the northern and southern Aryans, and these are witnesses not to be shaken by cross-examination. The terms for God, for house, for father, mother, son, daughter, for dog and cow, for heart and tears, for axe and tree, identical in all the Indo-European idioms, are like the watchwords of soldiers. We challenge the seeming stranger; and whether he answer with the lips of a Greek, a German, or an Indian, we recognise him as one of ourselves. Though the historian may shake his head, though the physiologist may doubt, and the poet scorn the idea, all must yield before the facts furnished by language. There was a time when the ancestors of the Celts, the Germans, the Stavonians, the Greeks, and Italians, the Persians and Hindus, were living together within the same fence, separate from the ancestors of the Semitic and Turanian races.

It is more difficult to prove that the Hindu was the last to leave this common home, that he saw his brothers all depart towards the setting sun, and that then, turning towards the south and the east, he started alone in search of a new world. But as in his language and in his grammar he has preserved something of what seems peculiar to each of the northern dialects singly, as he agrees with the Greek and the German where the Greek and the German seem to differ from all the rest, and as no other language has carried off so large a share of the common Aryan heirloom—whether roots, grammar, words, myths, or legends—it is natural to suppose that, though perhaps the eldest brother, the Hindu was the last to leave the central home of the Aryan family.

The Aryan nations who pursued a north-westerly direction, stand before us in history as the principal nations of north-western Asia and Europe. They have been the prominent actors in the great drama of history, and

have carried to their fullest growth all the elements of active life with which our nature is endowed. They have perfected society and morals, and we learn from their literature and works of art, the elements of science, the laws of art, and the principles of philosophy. In continual struggle with each other and with Semitic and Turanian races, these Aryan nations have become the rulers of history, and it seems to be their mission to link all parts of the world together by the chains of civilisation, commerce, and religion. In a word, they represent the Aryan man in his historical character.

But while most of the members of the Aryan family followed this glorious path, the southern tribes were slowly migrating towards the mountains which gird the north of India. After crossing the narrow passes of the Hindukus or the Himâlaya, they conquered or drove before them, as it seems without much effort, the aboriginal inhabitants of the trans-Himalayan countries. They took for their guides the principal rivers of Northern India, and were led by them to new homes in their beautiful and fertile valleys. It seems as if the great mountains in the north had afterwards closed for centuries their Cyclopean gates against new immigrations, while, at the same time, the waves of the Indian Ocean kept watch over the southern borders of the peninsula. None of the great conquerors, of antiquity—Sesostris, Semiramis, Nebuchadnezzar, or Cyrus, who waged a kind of half-nomedic warfare over Asia, Africa, and Europe, and whose names, traced in characters of blood, are still legible on the threshold of history<sup>1</sup>, disturbed the peaceful seats of these Aryan settlers. Left to themselves in a world of their own, without a past, and without a future before them, they had nothing but themselves to ponder on. Struggles there must have been in India also. Old dynasties were destroyed, whole families annihilated, and new empires founded. Yet the inward lite of the Hindu was not changed by these convulsions. His mind was like the lotus leaf after a shower of rain has passed over it; his character remained the same, passive, meditative, quiet, and full of faith.

The chief elements of discord amongst the peaceful inhabitants of this rich country were, the struggle for supremacy between the different classes

<sup>1</sup> Thus Strado says, xv. 1. 6. 'Ημιν δε τις αν δικαια γενοιτο πιστις περι των 'Ινδικων εκ της τοιαυτης στρατείας του Κυρου η της Σεμιραμιδος; Συναποφαινεται δε π ως και Μεγασθενης τω λογω τουτω, κελευων α π ιστειν ται ς αρχαιαις π ερι 'Ινδων ιστοριαις' ουτε γαρ π αρ' 'Ινδων εξω σταληναι π οτε στρατιαν ουτ' επ ελθειν εξωθεν και κρατησαι, π λην της μεθ' 'Ηρακλεους και Λιονυσου, και της νυν μετα Μακεδονων. Καιτοι Σεσωστριν μεν τον Αιγυπτιον και Τεαρκωνα τον Αιθισπα εως Ευρωπ ης π ροελθειν Ναβ οκοδροσορον δε τον π αρα Χαλδαιοις ευδοκιμησαντα 'Ηρακλεονς μαλλον και εως Στηλων ελασαι' μεχρι μεν δη δευρο και Τεαρκωνα αφικεσθαι' εκειγον δε και εκ της 'Ιβηριας ει ς την Θρακην και τον Ποντον αγαγείν την στρατίαν. 'Ίδανθυρσον δε τον Χ κυθην επιδραμείν της 'Ασιας μεχρι Αιγυπτου' της δε 'Ινδικης μηδενα τουτων αψασθαι. Και Σεμιραμιν δ' αποθανείν προ της επιχειρησεως. Περσας δε μισθοφορούς μεν εκ της 'Ινδικης μεταπεμφασθαι Υδρακας' εκει δε μη στρατευσαι, αλλ' εγγυς ελθείν μονον, ηνικά Κυρος ηλαυνεν επι Μασσαγετας. With regard to the expoditions of Herakles and Dionysos, Strabo adds: Και τα περι Ηρακλεούς δε και Διονυσού Μεγασθενης μεν μετ' ολιγων πίστα ηγείται των δ'. αλλων ει πλείους, ων εστι και Έρατοσθενης, απιστα και μυθωδη. καθαπερ και τα παρα τοις Ελλησίν, κ.τ.λ. Cf. Megasthenis Indica, ed. Sohwanbook. Bonnæ, 1846.

of society, the subjugation of the uncivilised inhabitants, particularly in the south of India, and the pressure of the latest comers in the north upon the possessors of the more fertile countries in the south.

These three struggles took place in India at an early period, and were sufficiently important to have called forth the active faculties of any but the Indian nation. In these struggles we may recognise almost the same elements by which the Greek character was perfected and matured. But how different have been the results upon the Indian mind! The struggle for supremacy between the different classes, which in Greece ended with the downfall of the tyrannies and the rising of well-organised republics, has its counterpart in India in the extirpation of the Kshatriya race and the triumph of the Brahmans through Paras'u-Râma.'

The second struggle, or the war against the uncivilised inhabitants of the south, is represented by the Indian poet of the Râmâyana as the battle of a divine hero against evil spirits and uncouth giants. What this is to India, the war of Persia was to Greece; the victory of patriotic valour over brute force. The Muses of Herodotus are the Râmâyana of Hellas.

In the third of these parallel struggles the contrast is no less striking. We follow, with a mournful interest, the narrative of international jealousies between the different states of Greece; we see how one tries to crush the power of the other, while all are preparing the common ruin of the country. But what characters are here presented to our analysis, what statesmanship, what eloquence, what bravery! In India the war of the Mahabharata was, perhaps, more bloody than the Peloponnesian war: but in the hands of the Brahmans the ancient epic has been changed into a didactic legend.

Greece and India are, indeed, the two opposite poles in the historical development of the Aryan man. To the Greek, existence is full of life and reality; to the Hindu it is a dream, an illusion. The Greek is at home where he is born; all his energies belong to his country: he stands and falls with his party, and is ready to sacrifice even his life to the glory and independence of Hellas. The Hindu enters this world as a stranger; all his thoughts are directed to another world he takes no part even where he is driven to act; and when he sacrifices his life, it is but to be delivered from it.

No wonder that a nation like the Indian cared so little for history; no wonder that social and political virtues were little cultivated, and the ideas of the Useful and the Beautiful scarcely known to them. With all this,

<sup>1&</sup>quot;Paras'u-Rāma cleared the earth thrice seven times of the Kshtriya caste, and filled with their blood the five large lakes of Samanta-panchaka, from which he offered libations to the race of Bhrigu. Offering a solemn sacrifice to the King of the gods, Parasu-Rāma presented the earth to the ministering priests. Having given the earth to Kas'yapa, the hero of immeasurable prowess retired to the Mahendra mountain, where he still resides; and in this manner was there enmity between him and the race of the Kshatriyas, and thus was the whole earth conquered by Paras'u-Rāma.'' (Vishnu-Purāṇa, p. 403.) In the Mahâbhârata the earth is made to say, "The fathers and grandfathers of these Kshatriyas have been killed by the remorseless Rāma in warfare on my account."

however, they had what the Greek was as little capable of imagining as they were of realising the elements of Grecian life. They shut their eyes to this world of outward seeming and activity, to open them full on the world of thought and rest. Their life was a yearning after eternity; their activity a struggle to return into that divine essence from which this life seemed to have severed them. Believing as they did in a divine really existing eternal Being (το οντωςον), they could not believe in the existence of this passing world. If the one existed, the other could only seem to exist; if they lived in the one, they could not live in the other. existence on earth was to them a problem, their eternal life a certainty. The highest object of their religion was to restore that bond 1 by which their own self (Atman) was linked to the eternal Self (paramatman); to recover that unity which had been eluded and obscured by the magical illusions of reality, by the so-called Mâyâ of creation. It scarcely entered their mind either to doubt or to affirm the immortality of the soul, 'except in later times, and then only for philosophical and controversial purposes.3 Not only their religion and literature, but their very language, reminded them daily of that relation between the real and the seeming world. The word atman for instance, which in the Veda occurs often as tman, means life, particularly animal life. Thus we read, (Rv. i. 63. 8), "Increase, O bright Indra! this our manifold food, like water all over the earth; by which, O Hero! thou givest us life, like sap, to move everywhere." Here tman means the vital principle and is compared with the juice that circulates in plants. In another hymn, addressed to the horse which is to be sacrificed (Rv. i. 162. 20.), the poet says, "Mâtvâ tapat priya âtmâpiyantam," literally, "Let not thy dear self burn or afflict thee as thou approachest the sacrifice." priva atma corresponds to the Greek φιλου ητορ But we find atman used also in a higher sense in the Veda For instance, (Rv. i. 115. 1.), "Sûrva âtmâ jagatas tasthusha's cha:" "the sun is the soul of all that moves and

In one of the old hymns of the Rig-veda this thought seem to weigh upon the mind of the poet, when he says:

## सता बंधुमसति निरिबंदन् हिंद् प्रतीष्य कवयो मनीषा

"Poets discovered in their heart, through meditation, the bond of the

existing in the non-existing."-Rv. x. 129. 4.

<sup>2</sup>In the Veda life after death is not frequently alluded to, and it is more for the goods of this world, for strength, long life, a large family, food, and cattle, that the favour of the gods is implored. One of the rewards for a pious life, however, consists in being admitted after death to the seat of the gods. Thus Kakshîvan says, (Rv. i. 125. 5.) "He who gives alms goes and stands on the highest place in heaven, he goes to the gods." Thus Dîrghatamas (Rv. i. 150. 3.), after having rebuked those who are rich, and do not give alms, nor worship the gods, exclaims, "The kind mortal, O Sage, is greater than the great in heaven; let us worship thee, O Agni, for ever and ever!"

3The technical term "pretvabhava," which occurs so frequently in Indian philosophy, and has generally been rendered by "condition of the soul after death." means really the state in which we are while living on earth. Our present life, according to Indian notions, is "bhava," birth

and growth, "pretya," after a previous death.

IL

rests." Most frequently, however, tman and atman are employed for self, just as we say, My soul praises, rejoices, for I praise, I myself rejoice. This is the most usual signification of atman in the later Sanskrit, where it is used like a pronoun. Yet atman means there also the soul of the universe, the highest soul or Self (paramatmin) of which all other souls partake, from which all reality in this created world emanates, and into which every Thus a Hindu speaking of himself (atman) spoke also, thing will return though unconsciously, of the soul of the universe (atman); and to knowhimself was to him to know both his own self and the universal Self, or to show himself in the divine Self The Sanskrit, "âtmanam âtmana pa'sya," "see (thy) self by (thy) self," had a deeper signification than the Greek γνωθισεαυτον, because it has not only a moral, but also a metahysical meaning. How largely this idea of the Atman, as the Divine spirit, entered into the early religious and philosophical speculations of the Indians, may be seen from the following dialogue between Yainavalkya and Maitreyi, which forms part of the Brihadaranyaka.

1 In the same sense the sun is called jivo asuh, "the vital spirit," cf. Rv. i. 113. 16,:

## उदोध्वं जीवो असुनं आगाद्य प्रागात्तल आ ज्योतिरेति

"Rise! our life, our spirit, came; the darkness went off; the light approaches - Rv. ii. 3. 14.:

## को दद्श प्रथमं जायमानमस्थन्वतं यदनस्था विभिति । भूम्या असुरस्गातमा क स्विनको विद्वासमुपगात्मण्डमेतत्॥

"Who has seen the first born, when he who has no bones (i. e., form) bore him who had bones? Where was the life, the blood, the sole (self) of the world? who went to ask this from any that knew it?"

<sup>2</sup> It is difficult to find a satisfactory etymology for atma (nomin.), particularly in its older, and possibly more original form, tma. Bopp (Comp. Gram. mar, i. § 140.) says, "if atma, stand for ahma, and be derived from a lost root, ah, to think (when it must be remembered that the root nah also changes. its final h sometimes into t, upanah and upanat), it might be compared with the Gothic ahma, soul." This root, ah, is afterwards traced by Bopp in the Sanskrit ala, "he said;" and he observes that to speak and to think are in the Indo-European languages sometimes expressed by one and the same word. The last observation, however, is not quite proved by the example taken by Bopp from the Zend, manthra, speech. For although the Sanskrit mantra is derived from man, to think it receives its causal meaning by the termination tra, and has therefore the signification of prayer, hyman, advice, speech (i. e., what makes us think). If atma come from a root ah, the meaning of this root is more likely that of breathing, which would account for Gothic ahma (πνευμα), as well as for Sanskrit aha, Greek  $\eta$  and  $\eta \chi \omega$ , Latin ajo and nego, and similar words. If we derive atma, spirit, soul, self, from this root, ah, we may also derive from it a-ham. I (cuneiform inscript. adam, ego, εγω, ich). But there always remains a difficulty as regards the elision of a in the old Vedic form tind. instead of atma, and the Zend thmanangh, which, according to Prof. Burnouf's conjecture, is the Sans. tmanas (Commentaire surle Yasna.p. 509.); a difficulty which neither European etymologists (Pott, Etymologische Forschungen, i. 196.; Benfey, griechisches Wurzellexicon, i. 265.) nor Indian Aunâdik scholars (Unâdi Sûtras, 4. 152.) has yet explained.

"Maitreyî," said Yâjnavalkya, "I am going away from this my house (into the forest) Forsooth, I must make a settlement between thee and my other wife Kâtyâyanî."

Maitreyî said, "My Lord, if this whole earth full of wealth belonged to me, should I be immortal by it?"

"No," replied Yajnavalkya; "like the happy life of rich people will be thy life. But there is no hope of immortality by wealth."

And Maitreyi said, "What should I do with that by which I do not become immortal? What my Lord knoweth (of immortality) may be tell that to me."

Yâjnavalkya replied, "Thou, who art truly dear to me, thou speakest dear words Sit down, I will explain it to thee, and listen well to what I say." And he said, "A husband is loved, not because you love the husband, but because you love (in him) the Divine Spirit (âtmâ, the absolute Self). A wife is loved, not because we love the wife, but because we love (in her) the Divine Spirit. Children are loved, not because we love the children, but because we love the Divine Spirit in them. This spirit it is which we love when we (seem to) love wealth, Brahmans, Kshatriys, this world, the gods, all beings, this universe. The Divine Spirit, O beloved wife, is to be seen, to be heard, to be preceived, and to be meditated upon. If we see, hear, perceive, and know him, O Maitreyî, then this whole universe is known to us."

"Whosoever looks for Brahmahood elsewhere than in the Divine Spirit, should be abandoned by the Brahmans. Whosoever looks for the Kshatria-power elsewhere than in the Divine Spirit, should be abandoned by the Kshatras. Whosoever looks for this world, for the gods, for all beings, for this universe, elsewhere than in the Divine Spirit, should be abandoned by them all. This Brahmahood, this Kshatra-power, this world, these gods, these beings, this universe, all is the Divine Spirit."

"Now, as we cannot seize the sound of a drum externally by themselves, but seize the sound by seizing the drum, or the beating of it, —as we cannot seize the sounds of a conch-shell by themselves, but seize the sound by seizing the conch-shell, or the shell-blower,—as we cannot seize the sounds of a lute by themselves, but seize the sounds by seizing the lute, or the lutanist, so is it whith the Divine Spirit."

"As clouds of smoke rise out of fire kindled with dry fuel, thus, O Maitreyî, have all the holy words been breathed out of that Great Being."

"As all the waters find thir centre in the sea, so all sensations find their centre in the skin, all tastes in the tongue, all smells in the nose, all colours in the eye, all sounds in the ear, all thoughts in the mind, all knowledge in the heart, all actions in the hands, and all the Holy Scriptures in speech,"

<sup>&</sup>lt;sup>1</sup> Brihadâranyaka, 2d Adhyâya, 4th Brâhmana, p. 28. edit. poley; 4th Prapâthaka, 4th Brâhmana, p. 444. edit. Roer.

<sup>&</sup>lt;sup>2</sup> Instead of जिया बतारे न: सती Dr. poley reads जियाबतारे न: सती which he may have meant for "thou Avatar, or incarnation of our love." Not to speak however, of the grammatical difficulties of this construction, the commentary leaves no doubt that we ought to read, जिया (इष्टा) वत (इत्वनुकांच्याइ) करें ( नैकेंगि ).

"It is with us, when we enter into the Divine Spirit, as if a lump of salt was thrown into the sea; it becomes dissolved into the water from which it was produced), and is not to be taken out again. But wherever you take the water and taste it, it is salt. Thus is this great, endless, and boundless Being but one mass of knowledge. As the water becomes salt, and the salt becomes water again, thus has the Divine Spirit appeared from out the elements and disappears again into them. When we have passed away, there is no longer any name. This I tell thee, my wife," said Yâjnavalkya.

Maitreyî said, "My Lord, here thou hast bewildered me, saying that

there is no longer any name when we have passed away."

And Yajnavalkya replied, "My wife, what I say is not bewildering, it is sufficient for the highest knowledge For if there be as it were two beings, then the one sees the other, the one hears, perceives, and knows the other. But if the one Divine Self be the whole of all this, whom or through whom should he see, hear, perceive, or know? How should he know (himself), by whom he knows every things (himself)? How, my wife, should he know (himself) the knower?1 Thus thou hast been taught, Maitreyî; this is immortality." Having said this Yjanavalkya left his wife for ever, and went into the solitude of the forests.

It must be observed that the work from which this dialogue is taken belongs to a later period of Vedic literature. In the earlier times which are represented to us in the hymns of the Veda, these mystic tendencies are not yet so strongly developed. In the songs of the Rig-veda we find but little of philosophy, but we do occasionally meet with wars of kings, with rivalries of ministers, with triumphs and defeats, with war-songs and imprecations. The active side of life is still prominent in the genuine poetry of the Rishis, and there still exists a certain equilibrium between the two scales of human nature. It is only after the Aryan tribes head advanced southward, and taken quiet possession of the rich plains and beautiful groves of Central India, that they seem to have turned all their energies and thoughts from the world without them to that more wonderful nature which they perceived within.

Such was their state when the Greeks first became acquainted with them after the discovery of India by Alexander. What did these men, according to Megasthenes, most think and speak about? Their most frequent conversation, he says, were about life and death. This life they considered as the life of an embryo in the womb; but death as the birth to a real and happy life for those who had thought, and had prepared themselves to be ready to die 2 Good and bad was nothing to them; not that

1 This last sentence is taken from the fifth Brâhmana of the fourth Adbyaya, where the same story is told again with slight modifications and additions.

2·Strabo, xv. 59.: Πλειστους δ' αυτοι ς ει ναι λογους π ερι του Davaτου νομιξειν γαρ δη τον μεν ενθαδε βιον ως αν ακμην κυομενων ει ναι τον δε Dανατον λενεσιν εις τον οντως βιον και τον ευδαιμονα τοι ς φιλοσοφησασι· διο τη ασκησει π λειστη χρησθαι π ρος το ετοιμοθανατον. "Nay, for aught we know of ourselves, of our present life, and of death; death may immediately, in the natural course of things, put us into a higher and more enlarged state of life, as our birth does."—Bishop Butter.

they denied the distinction between good and bad in a moral sense. They recognised law and virtue, as we see in their sacred poetry, as well as in their codes of law. But they denied that anything that happened to men in this life could be called either good or bad, and they maintained that philosophy consisted in removing the affections of pleasure as well as of pain. Liking pain and hating pleasure was what they considered the highest state of indifference that man could arrive at.

We are told by the same author that the Indians did not communicate their metaphysical doctrines to women; thinking that, if their wives understood these doctrines, and learned to be indifferent to pleasure and pain, and to consider life and death as the same, they would no longer continue to be the slaves of others : or, if they failed to understand them, they would be talk tive, and communicate their knowledge to those who had no right to it This statement of the Greek author is fully borne out by the later Sanskrit authorities We find, for instance, in the ceremonial Sûtras (s'rauta and grihya-sûtras), that women were not allowed to learn the sacred songs of the Vedas, the knowledge of which constituted one of the principal requirements for a Brahman before he was admitted to the performance of the sacrifices. Indeed, the whole education of a Brahman consisted in learning the old sacred literature by heart, and many years were spent for this purpose by every Brahmacharin in the house and under the severe discipline of his Guru, or of an Acharya. As it was necessary,3

<sup>1</sup>The notion of sin is clearly expressed, for instance, in a song of Gritsamada's—(Rv. ii. 28. 5.):

वि मण्ड्याय रशनामिवाग ऋध्यम ते वरुण खामृतस्य। मा तंतुरछेदि वयतो धियं मे मा मात्रा शायंपसः पुर ऋतोः॥ अपो सु म्यक्ष वरुण भियसं मरसम्रालतावीऽनु मा गृभाय। दामेव वरसाद्विमुमुग्ध्यंदो न हि त्वदारे निमिषश्च नेरो॥

"Deliver me from sin, as from a rope; let us obtain thy path of righteousness. May the thread not be torn while I am weaving my prayer; may the form of my pious work not decay before its season.

"Varuna, take all fear away from me, be kind to me, O just king! Take away my sin like a rope from a calf; for afar from thee I am not the master even of a Twinkling of the eye."

And again, (Rv. ii. 29. 1.):

## भूतव्रता आदित्या इषिरा आंरे मत्कर्त रहसूरिवागः

- "You quick Adityas, ye who never fail in your works, carry away from me all sin as a woman does who has given birth to a child in secret."
- 2 Strabo, xv. 59.: 'Αγαθον δε η κακον, μηδεν ει ναι των συμβαινοντων ανθρωποις' ου γαρ αν τοι ς αυτοι ς τοι ς μεν αχθεσθαι, τους δε χαιρειν, ενυπνιωδεις υ ποληψεις εχοντας, και τους αυτοις τοι ς αυτοι ς τοτε με ν αχθεσθαι, τοτε δ' αυ χαιρειν μεταβαλλομένους. id xv 65.: Τα γουν λεχθεντα είς τουτ' εφη συντεινειν, ως ε ιη λογος αριστος ος ηδονην και λυ π ην ψυχης αφαιρησεται' και οτι λυπη και πονος διαφερει' το μεν γαρ πολεμιον, το δε φιλον αυτοι ς' τα δε σωματα ασκουσι π ρος π ονού, ιν' αι γνωμαι ρωννυοιντο, αφ' ων και στασεις π αυοιεν, και συμβουλι π ασιν αγαθων π αρει εν, και κοινη και ιδια.
- 3Sâyana, in his commentary on the Rig-Veda, i. 131. 3., explaining the words वि त्वा ततस्त्र नियुत्। अवस्वतः "Couples wishing for protection have

however, for a husband to perform sacrifices together with his lawful wife, and passages of the hymns, 1 as well as of the Brahmans, speak clearly of man and wife as performing sacrifices in common, it was laid down in the Sûtras that the husband or the priest should, at the sacrifice itself, make his wife recite those hymns which were necessary for the ceremony. But although women were thus allowed to participate in the sacrifices of their husbands, they were not initiated, still less were they admitted to the highest knowledge, the knowledge of the Atman or the Brahman2. Cases like that of Maitreyî were exceptions, not the rule.

Thus the account which Megasthenes gives of the Indians shows us the same abstract and passive character which we find throughout the whole classical or post-Vedic literature of the Brahmans, and which, to a great extent, explains the absence of anything like historical litera-

ture among this nation of philosophers.

A people of this peculiar stamp of mind was never destined to act a prominent part in what is called the history of the world. exhausting atmosphere of transcedental ideas could not but exercise a detrimental influence on the active and the moral character of the Indians. But if we admire in classical history even those heroes in whom the love of country was driven to the highest pitch of fanaticism, we have scarcely a right to despise a nation, in whom the love of a purer and higher life degenerated sometimes into reckless self-sacrifice. No people certainly made a more favourable impression upon the Greeks than the Indians. And when we read the account of their moral and intellectual condition at the time of Alexander, we are obliged to admit that if some of their good qualities are no longer to be met with among the Indians of later times, this is owing not entirely to an original detect of character, but to that continual system of oppression exercised upon them by foreign conquerors, to whose physical power they submitted, while they could not help despising their masters as

magnified thee, O Indra!" quotes passages from the Brahmanas, the Sûtras, and the Smritis, in support of the law laid down in the Pûrvamîmânsâ, that man and wife should perform sacrifices in common. From the Brâhmanas he quotes the begining of the Agnyadhana, where it is said that man and wife are to place the sacred fire in common : जायापती ऋग्निमादधीयीतां। From the Sûtras he quotes a rule, वेदं पत्नये मदाय वाचयेत्। This seem to mean, "Let him, after giving the Veda to his wife, make her recite it." The passage is taken from the As'valâyana Srauta-sûtras, i. 11. If the word veda, used by As'valayana, meant the Veda, this passage would be most important, as proving the existence of the Veda, as a written book, at the time of As'valayana. Veda, however, is used here in the sense of "a bundle of grass," and is connected with vedih, an altar made of grass (Root ve, Lat. viere). Lastly, Sâyana quotes from the Smritis, Manu, V. 155., "Women cannot sacrifice without their husbands." नास्ति स्रोणां प्रयन्त्र

1 The piety and happiness of a married couple is well described in a

hymn ascribed to Manu Vaivasvata, Rv. viii. 31. 5—9.

Manu, ix. 18., translated by Sir W. Jones, "Women have no business with the texts of the Veda, thus is the law fully settled; having, therefore, no evidence of law, and no knowledge of expiatory texts, sinful women must be as foul as falsehood itself; and this is a fixed rule."

barbarians. Of the demoralising influence of a foreign occupation we have an instance in the time of Alexander, in the story of Kalânas (Kalyâna), who yielded to the flattering offers of the European conqueror, and left his sacred home to follow his royal master as a piece of curiosity. But Megasthenes was afterward informed that the behaviour of Kalânas was strongly disapproved of by his friends, as ambitious and servile; while Mandanis was praised for his manly answer to Alexander's messengers, not only by his countrymen, but by Alexander himself. It was not long before Kalânas repented his unworthy ambition, for he burnt himself soon after at Pasargada, in the same manner as the only other Brahman who reached Europe in ancient times burned himself at Athens to the astonishment of the Greeks, who erected a tomb to him, with the inscription, "Here lies the Indian Sarman Cheya (Sarman Achârva?), from Barygaza, who sought immortality after the old custom of the Indians."

The genius of the Greek nation owes its happy and healthy growth to liberty and national indepedence. The Homeric songs were addressed to a people, proud of his heroes, whether read or legendary. If Persia had crushed the chivalry of Greece, we should never have heard the names of Herodutus, Æschylus, Sophoeles, Phidias, and Pericles. Where the feeling of nationality has been roused, the poet is proud to be listened to by his nation, and a nation is proud to listen to her poet. But in times of national degradation the genius of great men turns away from the realities of life, and finds its only consolation in the search after truth, in science and philosophy. Socrates, Plato, and Aristotle arose when the Greek nation began to decline; and, under the heavy grasp first of Macedonian sway, then of Roman tyranny, the life of the Greek genius ebbed away, while its immortal productions lived on in the memory of other and freer nations. The Indian never knew the feeling of nationality, and his heart never trembled in the expectation of national applause. There were no heroes to inspire a poet, -no history to call forth a historian. The only sphere where the Indian mind found itself at liberty to act, to create, and to worship, was the sphere of religion and philosophy; and nowhere have religious and metaphysical ideas struck roots so deep in the mind of a nation as India. The Hindus were a nation of philosophers. Their struggles were the struggles of thought; their past, the problem of creation; their future, the problem of existence. The present alone, which is the real and living solution of the problems of the past and the future, seems never to have attracted their thoughts or to have called out their energies. The shape which metaphysical ideas take amongst the different classes of society, and at different periods of civilisation, naturally varies from coarse superstition to sublime spiritualism. But, taken as a whole. history supplies no second instance where the inward life of the soul has so completely absorbed all the practical faculties of a whole people, and, in fact, almost destroyed those qualities by which a nation gains its place in history.

It might, therefore, be justly said that India has no place in the political history of the world. While other nations, as the Egyptians, the Jews, the Babylonians, Assyrians, Persians, the Greeks, the Romans, and the Teutonic races, have during certain periods, culminated on the

political horizon of the world, India has moved in such a small and degraded circle of political existence that it remained almost invisible to the eyes of other nations. An expedition like that of Alexander could never have been conceived by an Indian king, and the ambition of native conquerors, in those few cases where it existed, never went beyond the limits of India itself.

But if India has no place in the political history of the world, it certainly has a right to claim its place in the intellectual history of mankind. The less the Indian nation has taken part in the political struggles of the world, and expended its energies in the exploits of war and the formation of empires, the more it has fitted itself and concentrated all its powers for the fulfilment of the important mission reserved to it in the history of the East. History seems to teach that the whole human race required a gradual education before, in the fulness of time, it could be admitted to the truths of Christianity. All the fallacies of human reason had to be exhausted, before the light of a higher truth could meet with ready acceptance. The ancient religions of the world were but the milk of nature, which was in due time to be succeeded by the bread of life. After the primeval physiolatry, which was common to all the members of the Aryan family, had, in the hands of a wily priesthood, been changed into an empty idolatry, the Indian alone, of all the Aryan nations, produced a new form of religion, which has well been called subjective as opposed to the more objective worship of nature. That religion, the religion of Buddha, has spread, far beyond the limits of the Aryan world. and, to our limited vision, it may seem to have retarded the advent of Christianity among a large portion of the human race. But in the sight of Him with whom a thousand years are but as one day, that religion. like all the ancient religions of the world, may have but served to prepare the way of Christ, by helping, through its very errors, to strengthen and to deepen the ineradicable yearning of the human heart after the truth of God.

Though the religion of Buddha be of all religions the most hostile to the old belief of the Brahmans,—the Buddhists standing to the Brahmans in about the same relation as the early Protestants to the Church of Rome,—yet the very bitterness of this opposition proves that Buddhism is peculiarly Indian. Similar ideas to those proclaimed by Buddha were current long before his time, and traces of them may be found even in other countries. But for the impressive manner in which these ideas were first proclaimed and preached throughout India, for the hold which they took on the Indian mind, for the readyness with which they were received, particularly by the lower classes, till at last they were adopted by the sovereign as the religion of state, -in a word, for the historical and universal character which this doctrine there assumed, the cause must be sought in the previous history of the Indian nation. There is something in the doctrines of Buddhism that is common to all systems of philosophy or religion, which break with the traditions of an effecte idol-worship and a tyrannical hierarchy. There is some truth in Bud hism as there is in every one of the false religions of the world. But it was only in India, where people had been prepared by centuries of thought and meditation, as well as by the very corruption of the old Brahmanical system, to embrace and nurture the religious ideas of Buddha Sakya Muni;

it was only in India, that those new doctrines took an historical shape, and grew into a religion which, if truth depended on majorities, would be the

truest of all forms of faith.

Upto the present day there is no religion of the world more extensively prevalent than the religion of Buddha; and though it has been banished from the soil of India, and no living follower of this creed is now to be met within that country, 2 yet it has found a refuge and second home in Ceylon, Siam, Ava, Pegu, the Birman Empire, China, Tibet, Tatary, Mongolia and Siberia, and is, even in its present corruption, looked upon and practised as the only true system of faith and worship by many millions of human beings. Truly, then, the moment when this religious doctrine took its origin in India is an era in the intellectual history of the world; and, from a historical point of view, India may be considered, at that time, as passing through the meridian of history. The most accurate observers of the progress of the Indian mind have, therefore, chosen this moment as the most favourable for fixing, historically and chronologically, the position of India: Professor Wilson in his "Vishnu-Purana," Professor Burnouf in his "Introduction to the History of Buddhism," and Professor

Lassen in his "Indian Antiquities."

It would be out of place to discuss at present all the arguments by which the historical origin of the Buddhistic religion has been fixed chronologically in the works here mentioned. The date of Buddha's death. in the middle of the sixth century B. c., and the beginning of the Ceylonese era, 543 B. c., will have to be considered hereafter. For the present, it will be sufficient to keep in mind that the Buddhistic era divides the whole history of India into two parts, in the same manner as the Christian era divides the history of the world. It is therefore of the greatest importance, with regard to the history of Vedic literature. The rise of a new religion so hostile to the hierarchical system of the Brahmans is most likely to to have produced a visible effect on their sacred and theological writings. If traces of this kind can be discovered in the ancient literature of India. an important point will be gained, and it will be possible perhaps to restore to this vast mass of Brahmanie lore a certain historical connection. After the rise of a new religious doctrine in the first centuries after Buddha, it could not be expected that the Brahmanic literature should cease at once. On the contrary, we should expect at first a powerful reaction and a last effort to counteract the influence of the rising doctrine. And, as in India the religion of Buddha addressed itself more especially to the lower classes of the people, and found its strongest support amongst those who had

<sup>1</sup> M. Troyer, in his valuable edition of the Badjatarangini (ii. 599). gives the following data as to the extent of the Buddhistic religion: "La population de la terre est evaluee par M. Hassel à 921 millions: par Malte-Brun, à 642 millions; par d'autres, à 737 millions d'habitants. Le Buddhisme est professe dans presque tout l'empire de la Chine, qui soul d'apres differents computs, contient de 184 à 300 millions d'habitants. Ajoutons y les Buddhiste de plusieursîles de 1' Est, de la Cochinchine, du Siam du pays des Birmans, de l'Inde, du Nepal, du Tibet, et dela majeure partie de la Tartarie, etc., et l'on trouveraque je n'exage re pas trop le nombre des Buddhistes actuels."

<sup>2</sup> See J. Bird, Historical Researches on the Origin and Principles of the Buddha and Jaina Religion. Bombay, 1847.

to suffer from the exclusiveness of the Brahmanic system, a period of transition would most likely be marked by a more popular style of literature,—by an attempt to simplify the old complicated system of the Brahmanic ceremonial, till at last the political ascendency, secured to the new doctrine through its adoption by the reigning princes, like Asoka, would cause this effort also to slacken.

Before it can be shown, however, that this really took place in India, and that traces of this religious crisis exist in the Vedic literature of the Brahmans, it seems necessary to point out what Sanskrit works can be included within that literature, and what other books are to be excluded altogether when we look for evidence with regard to the

true history of the Vedic age.

Let us begin by the negative process, and endeavour to separate and reject those works which do not belong to the genuine Vedic cycle. If we examine the two epic poems of India, the Râmâyana and Mahabharata, we shall find it impossible to use them as authorities for the Vedic age, because we are not yet able to decide critically which parts of these poems are ancient, and which are modern and post-Buddhistic, or at least retouched by the hands of late compilers and editors. There are certainly very ancient traditions and really Vedic legends in both of these poems. Some of their heroes are taken from the same epic cycle in which the Vedic poetry moves. These, however, only form subjects for episodes in the two poems, while their principal heroes are essentially different in their character and manners. fact, though there are remains of the Vedic age to be found in the epic poema, like the stories of Urvasî and Pûrurayas, of Sakuntala and Dushmanta, of Uddalaka, Sunahs'epha, Janaka Vaideha, and particularly of the Vedic Rishis, like Vasishtha, Vis'vamitra, Yajnavalkya, Dîrghatamas, Kaksîvat, Kavasha, and many others, yet this would only prove that the traditions of the Vedic age were still in the mouth of the people at the time when the epic poetry of the Hindus was first composed, or that they were not yet for rotten in after times, when the Brahmans began to collect all the remains of epic songs into one large body, called the Mahabharata. If we compare the same legends as exhibited in the hymns and Brahmans of the Veda, and as related in the Mahabharate, Râmayana, or the Purânas, the Vedic version of them will mostly be found to be more simple, more primitive, and more intelligible than those of the epic and paurânic poems. This is not meant as a denial, that real epic poetry, that is to say, a mass of popular songs celebrating the power and exploits of gods and heroes, existed at a very early period in India, as well as among the other Aryan nations; but it shows, that, if yet existing, it is not in the Mahabharata and Ramayana we have to look for these old songs, but rather in the Veda itself. In the collection of the Vedic hymns, there are some which may be called epic, and may be compared with the short hymns ascribed to Homer. In the Brahmans passages occur, in prose and werse, celebrating the actions of old kings,

The following extract from the Sankhayana-satras (xvi. I.), throws some light on the literature which the Brahmans possessed, in addition

to what we are accustomed to call the Veda1:-

The same account is given in the Âs'valâyana-sûtras, x. 7, and in the Satapatha brâhmaṇa, xiii 3. 1. 1.

to the lute (vînâganaginas), end invites them to celebrate the king, who then performs the sacrifice, together with other virtuous kings of old. On the first day of the sacrifice, the priest tells the story which begins with Manu Vaivasvata. As the people of Manu were men, and there are men present at the sacrifice, the priest teaches these, the householders, by telling this story. He then says, "The Rich-verses are the Veda, this is the Veda," and recites a hymn.

"On the second day he tells the story which begins with Yama Vaivasvata (from the Satapatha). As the people of Yama were the fathers, and there are fathers present, he teaches the elders by this story. He then says, 'The Yajurveda is the Veda; this is the Veda,'

and recites an Anuvaka (as'vamedhika) of the Yajush.

"On the third day he tells the story which begins with Varuna Aditya. As the people of Varuna were the Gandharvas, and as they are present, he teaches the young and fair youths by this story. He then says, 'The Atharva veda is the Veda; this is the Veda,' and recites the Bishaja, 'I a work on medicine.

"On the fourth day he tells the story which begins with Soma Vaishnava (from the Satapatha). As the people of Soma were the Apsaras, and as these are present, he teaches the young and fair maids by this story. He then says, 'The Angirasa veda is the Veda; this is the Veda,' and recites the Ghora, 2 another work of the Atharvanikas.

"On the fifth day he tells the story which begins with Arbuda Kadraveya. As the people of Arbuda were the Sarpas (snakes), and as these are present, he teaches the Sarpas, or the snake-charmers, by this story. He then says, 'The Sarpaviddya is the Veda; this is the

Veda, and recites the Sarpavidya.3

"On the sixth day he tells the story which begins with Kuvera Vais'rav na. As the people of Kuvera were Rakshas, and as these are present, he teaches Selagas, or evil doers, by this story. He them says, "The Rakshovidya is the Veda, this is the Veda,' and recites the Rakshovidya 4

"On the seventh day he tells the story which begins with Asita Dhan-vana.<sup>5</sup> As his men were the Asuras, and as these are present, he teaches the usurers (Kusîdin) by this story. He then says, 'I'he Asuravidya is the Veda, this is the Veda,' and performs a trick by sleight of hand.<sup>6</sup>

"On the eighth day he tells the story which begins with Matsya Sanmada. As his men were the creatures of the water, and as these

are present, he teaches the Matsyas (fishes), or the fishermen by this story. He then says, 'The Ithâsa-veda is the Veda, this is the Veda,' and recites an Itihâsa.'

"On the ninth day he tells the story which begins with Tarkshya Vaipas'yata. As his men were the birds, and as these are present, he teaches the birds, or the young students (brahmacharin), by this story. He then says, 'The Purana-veda is the Veda, this is the Veda,' and recites the Purana.

"On the tenth day he tells the story which begins with *Dharms* Indra (from the Satapatha). As his men were the gods, and as these are present, he teaches the young, learned and poor priests by this story. He then says, 'The Sâmaveda is the Veda, this is the Veda, and sings the Sâma. 6"

This extract shows that epic poetry, traditional as well as improvised on

the spur of the moment, existed during the Vedic age.

In several parts of the Brahmanas, and Aranyakas, when an account is given of the literature, known to the ancient Hindus, we meet with the names of Gatha, Narasansi, Itihasa, and Akhyana (songs, legends, epic poems, and stories) as parts of the Vedic literature. The occurrence of titles of literary works like these, has been made use of to prove the existence, at that early period, of the writings which afterwards were designated by the same names. But though the Mahabharata is called an Itihasa, and the Ramayana an Akhyana, and though many works have in later times become famous under

Brahm. xi. 7. 1. ; Atharv. Sanhitâ, xv. 6. : ま行表で思い प्राणं च गाथाश्च नारशंसोश्च ॥ Cf Aufrecht, Indische Studien p. Sayana himself is sometimes doubtful, and in his Commentary on the Taittirîya-âranyaka, for instance, he says that, by purâna might be meant the Brahmanda, &c.; and by Itihasa, the Mahabharata. This, however, is a mistake, and it would bring Sayana into contradiction with himsaf. He has fully proved in his Introduction to the Rig-veda that in thlis passage of the Taittirîya-aranyaka, no works separate from the Veda cou d be understood. Cf. Rig-veda sanhitâ, p. 23. Dr. Weber, in his extlacts from Panini (iv. 2 60.), shows that vyakhyana, akhyana katrhâ, âkhyâyikâ, itihâsa, and Purâna, were titles of literary works known at the time of Kâtyâyana But he inclines to the opinion that Kâtyâyana did not mean the Mahabharata, Ramayana, and the Puranas, as we now possess them, by these general names. Cf. Indische Studien, i. p. 147.

8 In the later literature also, names like Itihasa, Akhyana and Purana are by no means restricted to the Mahabharata, Ramayana, and the

the name of Puranas yet these enumerations of literary works in the Brahmanas do not refer to them. They contain only general names of titles, which have been applied to certain parts of the sacred literature, containg either stories of gods or men, or cosmogonic traditions. There is no allusion to any of the titles of the Puranas or to the Ramayana in Vedic works whether Brahmanas or Satras. But as in the Satras of Asvalalayana the name of the Bharata, and according to some MSS. even the name of the Mahabharata, is mentioned, this may be considered as the earliest trace, not merely of single epic poems, but of a collection of them. The age of Asvalayana, which will be approximately fixed afterwards, would, therefore, if we can rely on our MSS., furnish a limit below which the first attempt at a collection of a Bharata or Mahabharata ought not

Purânas. The Mahâbhârata is called Purâna, Âkhyâna, and Itihâsa Cf. M. Bh. 1. 17—19. Vyâsa himself calls his poem, the Mahâbhârata a Kâvya; and Brahma sanctions this as its proper title. Cf. M. Bh. 1. 72. This passage modifies Professor Lassen's opinion as to Kâvya being the distinctive title of the Râmâyana. Cf. Indian Antiquities, I. 485. The Mahâbhârata is also called the fifth Veda, or the Kârshna veda; that is, the Veda composed by Krishna Dvaipâyana Vyâsa. Cf. M. Bh. 1. 2300. Burnouf. Bhâg III. pref. xxi. Lassen, Ind. Antiq I. 789.

1 Cf. Sâyana, Introduction to the Rig-veda sanhitâ, p. 23.

2 Grihya-Sûtas, in. 4. MS. 1978, E. I. H., reads, भरतवर्गावार्याः instead of भारतमहाभारत धर्मावार्याः the reading adopted by Dr. Roth (Zur Literatur, p. 27). Unfortunately the Commentary to this passage is very scanty, which is so much the more to be regretted, as the text itself seems to contain spurious additions. According to the MSS. the passage reads, अथ ऋष्यः शतिकी माध्यमा गृत्समदी विश्वामित्रो वामदेवोऽत्रिभरहाजो विस्मित्रायः पावमान्यः श्रुद्धस्ता महास्त्रा इति । प्राचीनावोतो सुमतुजीमिनिवेशायनपैत्रस्त्रभाष्यमारतधर्माचार्या जानंतिबाह्विगार्ग्यगीतमशाकल्यवाभ्रयमांद्रयमांद्रयमारतधर्माचार्या जानंतिबाह्विगार्ग्यगीतमशाकल्यवाभ्रयमांद्रयमांद्रयमारतधर्माचार्या जानंतिबाह्विगार्ग्यगीतमशाकल्यवाभ्रयमांद्रयमांद्रयमारतधर्माचार्या जानंतिबाह्विगार्ग्यगीतमशाकल्यवाभ्रयमांद्रयमांद्रयमारतधर्माचार्या जानंतिबाह्विगार्ग्यगीतमशाकल्यवाभ्रयमांद्रयमांद्रयमार्थे सुग्रवंशां बायनमैतरेयं सहैनरेयंशा कलं बाष्करं सुजानतबक्त्रत्रीदवाहि सीजावि शिनक्षाश्र्व अथ्रतं ये चान्ये आचार्यास्ते सर्वे तप्यांत्विवाहि सीजावि शिनक्षाश्र्व अथ्रतं ये चान्ये आचार्यास्ते सर्वे तप्यांत्विवाहि सीजावि श्रीनक्षाश्र्व अथ्रतं ये चान्ये आचार्यास्ते सर्वे तप्यांत्विवाहि सीजावि श्रीनक्षाश्र्व अथ्रता ये चान्ये आचार्यास्ते सर्वे तप्यांत्विवाहि सीजावि श्रीनक्षाश्र्व अथ्रते ये चान्ये आचार्यास्ते सर्वे तप्यांतिवाति ॥

According to the commentator we have first, 12 Rishis, who, as Rishis. are to be invoked, when the Brahmanical thread is suspended round the neck (nivîti). These are indeed the Rishis of the Rig-veda: first the Satarchins, the common title of the poets of the first Mandala: then Gritsamala (2d Manlala), Visvámitra (3rd M.), Vamadeva (4th M), Atri (5th M.), Bh walvaja (6th M.), Vasishtha (7th M.); then follow the poets of the Prigatha hymns (8th M.), the poets of the Pavamanis (9th M), and flually the authors of the 10th and last Mandala, who are called Kshudrasûktas and Mahâsûktas, authors of short and long hymns. The next class comprises twenty-three invocations, according to the Commentary, and they are to be made, when the Brahmanical cord is suspended over the right shoulder (prachinaviti). The text. however, contains more than twenty-three names, and it is likely that some of them have been added afterwards, while others are perhaps to be taken collectively. भारतधर्मानार्याः may also be taken as one word, in the sense of the legal authorities of the Baharata.

to be placed. But, here is no hope that we shall ever succeed by critical researches in restoring the Bharata to that primitive form and shape in which it may have existed before or at the time of Asvalavana. Much has indeed been done by Professor Lassen who, in his Indian Antiquities. has pointed out characteristic marks by which the modern parts of the Mahabharata can be distinguished from the more ancient; and we may soon expect to see his principles still further carried out in a translation of the whole Mahabharata, which, with the help of all the Sanskrit commentaries, has been most carefully prepared by one of the most learned and laborious scholars of Germany. If it were possible to sift out from the huge mass of Indian epic poetry as we now possess it in the Mahabharata and Ramayana, those old stories and songs which must have been living for a long time in the mouth of the people before they were collected, enlarged, arranged and dressed up by later hands, a rich mine of information would be opened for the ancient times of India, and very likely also for the Vedic age. But the whole frame of the two apic poems as they now stand, their language and metre, as well as the moral and religious system they contain, show that they were put together at a period when the world of the Veda was living by tradition. only, and moreover, partly misunderstood, and partly forgotten. The war between the Kurus and Pandavas, which forms the principal object of our Mahabharata, is unknown in the Veda. The names of the Kurus and Bhâratas are common in the Vedic literature but the names of the Pandayas have never been met with. It has been observed, 1 that even in Panini's grammar the name Pandu or Pandava does not occur, while the Kurus and Bhâratas are frequently mentioned particulary in rules treating of the formation of patronymics and similar words.2 If. then. As'valâyana can be shown to have been a

<sup>1</sup> Dr. Weber, Indische Studien, p 148. Kâtyâyana, however, the immediate successor of Panini, knows not only Pandu, but also his descen-2 The names of the two wives of Pandu, Kunta and dants, the Pandvas. Madrt, occur in the commentary on Pânini. [Cf. i. 2. 49., iv. 1. 176 text) for Kuntî, and iv. 177.for Mâdrî). But both these names are geographical appellatives, Kuntî signifying a woman from the country of the Kuntas. Madrî a Madra-woman. Pritha, another name of Kuntî, stands in the Gana sivadi. As to the proper names of the Pandava princes, we find Pudhishthira, Pan. vi. 1. 134, vi. 3. 9., viii 3. 95. (text); Arjuna, Pan. iii.1. 119., iv. 3. 64., v. 4. 48., vi, 2. 131.; Bhêma, pan vi. 1. 205.; Naturely, Pan. vi. 3.75. The name of Sahadeva does not occur; but his descendants, the Sahadeva, are mentioned as belonging to the race of Kuru, together with the Nakulas, Pan iv. 1. 114. In the same way we find the descendants of Yudhishthira and Arjuna mentioned as members of the eastern Bhâratas, Pân ii. 4. 66. Draupadi's name does not occur in Pânini, but Subhidra, the sister of Krishna and the wife of Arjuna, is distinctly mentioned, Pan iv. 2. 56. Another passage in the commentary on Panini (iv. 3. 87.) proves even the existence of a poem in praise of Subhadra, which, if we remember the former mention of a war about Subhadra (iv. 2. 56.), seems most likely to have celebrated this very conquest of Subhadra by Arjuna. In the Mahabharata this story forms a separate chapter, the Subhadrå-harana parva (Adiparva, p. 288.), which may be the very work which

contemporary, or at least an immediate successor, of Pânini, the Bharata which he is speaking of must have been very different from the epic peem which is known to us under the name of the Mahâbharata, cele-

brating the war of the Kurus and Pandavas.1

In the form in which we now possess the Mahabharata it shows clear traces that the poets who collected and finished it, breathed an intellectual and religious atmosphere, very different from that in which the heroes of the poem moved. The epic character of the story has throughout been changed and almost obliterated by the didactic tendencies of the latest editors, who were clearly Brahmans, brought up But the original traditions of in the strict school of the Laws of Manu. the Pandavas break through now and then, and we can clearly discern that the races among whom the five principal heroes of the Mahabhârata were born and fostered, were by no means completely under the sway of the Brahmanical law. How is it, for instance, that the five Pandava princes, who are at first represented as receiving so strictly Brahmanic an education, -who, if we are to believe the poet, were versed in all the sacred literature, grammar, metre, astronomy, and law of the Brahmans, -could afterwards have been married to one

Pâṇini, according to his commentator, is alluding to. That the chapter in the Mahâbhârata belongs to the oldest parts of this epic, may be seen from its being mentioned in the Anukramanî of Dhritarâshtra (i. 143). "When I heard that Subhadrâ, of the race of Madhu, had been forsibly seized in the city of Dvarakâ, and carried away by Arjuna, and that the two heroes of the race of Vrishni had repaired to Indraprashtha, I then, O Sanjaya, had no hope of success." The Mahâbhâshya, however, does not explain the former Sûtra, (iv. 2. 56.), and for the latter it gives example: for the exceptions only, but not for the rule. The word grantha, used in the Sûtra, (iv. 3. 87.), is always somewhat suspicious. "hat some of the Sûtras which now form part of Pâṇini's grammar, did not proceed from him, is acknowledged by Kaiyyaṭa, (cf. iv. 3. 131, 132.) अवाजितीयः सूत्रेषु पाट ईस्टाइइति कैयाः।

# कीपिंजलहास्तिपादादित्यस्यापाणिनीयत्वात् इति कैय्यटः॥

Krishna Vasudeva, who is considered as peculiarly connected with the tradition of the Paūdavas, is quoted as Vasudeva, of the race of Vrishni (Pan. iv. 1. 114.); as Vasudeva, together with Siva and Aditya (Pan. v. 3. 99.); as Vasudeva, together with Arjuna (iv. 3. 98. text. In the commentary to Pan. iii. 3. 156., and ii. 3. 72., we have proof of Krishna's being worshipped as a god; in i. 4. 92. he is mentioned as a hero. His residence, Dvaraka, however, does not occur in Paṇini.

<sup>1</sup>That Pârini knew the war of the Bhâratas, has been rendered highly probable by Prof. Lassen (Ind, Alterthumskunde, i. 691. 837). The words which called forth Pâṇini's special rule, (iv. 2. 56), can scarcely be imagined to have been different it was impossible to teach or to use Pâṇini's Sutras without examples, which necessarily formed part of the traditional gram matical literature long before the great Commentary was written, and are, therefore, of a much higher historical value than is commonly supposed. The coincidences between the examples used in the Prâtisâkhyas and in Pâṇini, show that these examples were by no means selected at random, but that they had long formed part of the traditional teaching. See also

wife? This is in plain opposition to the Brahmanic law, where it is said, they are many wives of one man; not many husbands of one wife." Such a contradiction can only be accounted for by the admission, that, in this case, epic tradition in the mouth of the people was too strong to allow this essential and curious feature in the life of its heroes to be changed. However, the Brahmanic editors of the Mahabharata, seeing that they could not alter tradition on this point, have at least endeavoured to excuse and mitigate it. Thus we are told in the poem itself, that at one time the five brothers came home, and informed their mother that they had found something extremely precious. Without listening further, their mother at once told them they ought to divide it as brothers. The command of a parent must always be literally obeyed; and as Draupadî was their newly discovered treasure, they were obliged, according to the views of the Brahmans, to obey, and to have her as their common wife. Indian law givers call this a knotty point; they defend the fact, but refuse to regard it as a precedent.

Neither does the fact that Pandu is lawfully married to two wives. harmonise with the Brahmanic law. That law does not prohibit polygamy, but it regards no second marriage as legal, and it reserves the privilege of being burnt together with the husband to the eldest and only lawful wife. Such passages in the ancient epics are of the greatest interest. We see in them the tradition of the people too far developed, to allow itself to be remodelled by Brahmanic Diaskenastes. There can be little doubt that polygamy, as we find it among the early races in their transition from the pastoral to the agricultural life, was customary in India. We read in Herodotus (v. 5.), that amongst the Thracians it was usual, after the death of a man, to find out who had been the most beloved of his wives, and to sacrifice her upon his tomb. Mela (ii. 2) gives the same as the general custom of the Getæ. Herodotus (iv. 71.) asserts a similar fact of the Scythians, and Pausanias (iv. 2.) of the Greeks, while our own Teutonic mythology is full of instances of the same feeling.2 And thus the customs of these cognate nations explain what at first seemed to be anomalous in the epic tradition of the Mahabharata, that at the death of Pandu, it is not Kunti. his lawful wife, but Madri, his most beloved wife, in whose arms the old

Pan vi. 2. 38., where the word" mahabharat" occurs, but not as the title of a poem.

² वेदे ऽप्येवं श्च्यते एकस्य बह्वयो जाया भवंति नैकस्या एव बहवः प्तयः सन्ति ॥

Of. Såyana's Com. on Parås'ara, MS Bodl. 172, 173. Another explanation is given by Kumårila:

यौत्रनस्थैव कृष्णा हि वेदिमध्यात्समुत्थिता । सा च श्री श्रीश्च भूयोभिर्मुज्यः माना व दुष्यति॥

<sup>2</sup> Cf. Grimm, History of the German Language, p. 139.

<sup>े</sup> धर्मा द्विविधः स्थूलः स्थमश्च। मंदमितिभिरिष सुखेन बुध्यमानः स शै।चासमन् संध्यावंदनादिः स्थूलो धर्मः। शास्त्र गरंगतैः पंडितैरेव बोद्धं योग्य इतरषामधर्मन् भ्रांतिविषये। द्रौपदोविवाहादिः सूक्ष्मो धर्मः)

king die and who successfully claims the privilege of being burnt with

him, and following her husband to another life. 1

The same remark applies to the Râmâyana. In this second epic also, we see that the latest editors were shocked by the anomalies of the popular tradition, and endeavoured to impart a more Brahmanic polish to the materials handed down to them from an earlier age. Thus king Das'aratha kills the son of a Brahman, which would be a crime so horrible in the eyes of the Brahmans, that scarcely any penance could expiate it.2 This is the reason why the young Brahman is represented as the son of a Südrâ woman, and tells the king so himself, in order to relieve him from the fear of having killed the son of a Brahaman. singular relation, too, between Râma and Paras'u-Râma, was probably remodelled by the influence of the Brahamans, who could not bear the idea of their great hero, the destroyer of all the Kshatriyas, being in turn vanquished by Râma, who was himself a Kshatriya.

The Vedic literature, by the very sacredness of its character, has fortunately escaped from the remodelling puritanism of the later Brah-There must, from the first, have been as great a variety in the intellectual, religious and moral character, of the Indians, as there is in the geographical and physical character of India. If we look at Greece, and consider the immense diversity of local worship, tradition, and customs, which co existed within that small tract of country, and then turn our eyes to the map of India, barred as it is by mountainranges and rivers, it becomes, clear that the past ages of such a country cannot be represented in their fulness and reality by the traditions of the later Brahmans, which as we now possess them in the epic and paurânic poetry of the Hindus, are all tinged with the same monotonous culouring. Such a uniformity is always the result of an artificial system. and not of a natural and unimpeded development. It is indeed acknowledged by the Brahmans themselves that different customs prevailed in different parts of India. Some were even sanctioned by them notwithstanding their policy of monopolising and (so to speak) brahmanising the whole Indian mind, Although, for instance, in the liturgie works annexed to the Vedas (Srauta-sûtras), an attempt was made to establish a certain unity in the sacrifices of the people all over India. vet in the performance of these sacrifices there existed certain discrepancies, based on the traditionary authority of the wise of old, between family and family. This is still more the case in the so-called domestic ceremonies of baptism, confirmation, marriage, &c, described in the Grihva-sutras, which connected as they were with the daily life of the people, give us much more real information on the ancient customs of India than those grand public or private sacrifices which are prescribed

2 Cf. Manu, viii. 381. "No greater crime is known on earth than slaying a Brahman, and the king, therefore, must not even form in his

mind an idea of killing a priest."

<sup>1</sup> Other instances of Dharmavyatikrama are:

कृष्णद्वे पायनस्य गृहोतनैष्ठिकब्रह्मचर्यस्य विचित्रवीयंदारेष्वपत्यातपादनप्रसंगः॥ बुधि छिरस्य कनीयोनिर्जितञ्चातृज्ञायापरिणयनं ॥ वासुर्देवार्ज्जनयोनिषिद्धमातुलः-दहित्रकृमिणोसुमद्रापरिणयनं अ—Kumarila Bhatta.

in the Srautasútras, and could only have been kept up by sacerdotal influence. In these domestic ceremonies everybody is allowed, as a general law, to follow the customs of the family to which he belongs, or of his village and country, provided these customs do not too grossly

insult the moral and religious feelings of the Brahmans,

Although these domestic ceremonies were fully sanctioned by the Brahmanic law, the authority upon which they are founded does not lie directly in the sacred revelation of the Brahmans (Sruti), but in tradition (Smriti), a difference, the historical importance of which will have to be pointed out hereafter. As to the customs of countries and villages, there can be no doubt that in many cases they were not only not founded upon Brahmanic authority, but frequently decidedly against it. The Brahmanic law, however, is obliged to recognise and allow those customs, with the general reservation that they must not be in open opposition to the law. Thus As'valâyana in his Grihya-sūtras, says:—
"Now the customs of countries and places are certainly manifold. One must know them as far as marriage is concerned. But we shall explain what is the general custom."

Here the commentator adds:—"If there be contradiction between the customs of countries, &c., and those customs which we are going to describe, one must adopt the customs as laid down by us, not those of the country. What we shall say is the general law, this is our meaning. Amongst the Vaidehas, for instance, one sees at once that loose

Thus it is said, for instance, in the Commentary to Paras'ara's Grihya-sûtras, that it is wrong to give up the customs of one's own family and to adopt those of others:

शाखांतरीयकर्मकरणे दोषमाह वसिष्ठः॥ न जातु परशाखोक्तं कर्म वुषः समाचरेत् - आचरनपरशाखोक्तं शाखारंडः स उच्यते॥ यः स्वशाखोक्तमृतस्त्रज्य परशाखोक्तमात्व। रेत्। अप्रमाणमृषि कृत्वा सोऽधे तमसि मज्जते॥ स्मृत्यंतरऽपि॥ स्वकर्म पर्युतस्त्रज्य तु यदन्यत्कुरुते नरः। अज्ञानाद्यवा छोभात्स हतः पतितो भवेत्॥ छंदोगपरिशिष्ठेऽपि॥ स्वशाखाश्रयमुतस्त्रज्य परशाखाश्रयं तु यः। कर्तुं मिच्छति दुर्मेधा मोघं तस्य च यत्कृतं॥

"Vasishtha declares that it is wrong to follow the rules of another Sakha. He says, 'A wise person will certainly not perform the duties prescribed by another Sakha, he that does is called a traitor to his Sakha. Whosoever leaves the law of his Sakha, and adopts that of another, he sinks into blind darkness, having degraded a sacred Rishi.' And in another law book it is said: 'If a man gives up his own customs and performs others, whether out of ignorance or covetousness, he will fall and be destroyed.' And again, in the Paris'ishta of the Chhandogas: "A fool who ceases to follow his own Sakha, wishing to adopt another one, his work will be in vain."

Only in case no special rule is laid down for certain observances in some

Grihyas it is lawful to adopt those of other families:

स्वशास्त्रज्ञमण्यविरुद्धं प्रशास्त्रोक्तंत्राद्यं ॥तथा च कात्यायनः ॥ यन्नास्तातं स्वशास्त्रायं परोक्तमविरोधि च । विद्वद्भिस्तद्नुष्ठेयमग्निहोत्राद्किमेवत् ॥ स्वांतरानुकः मणि स्मृत्युकं म्राह्यं ॥

<sup>2</sup> As'v S. i. 7.,

अथ बल्चाबना जनपद्धर्मा प्रामधर्माश्च तान्त्रिवाहे प्रतीयाद्यतु समाने तद्व-स्यामः। habits prevail. But in the domestic laws continence is prescribed; therefore there is no doubt that the domestic and not the national cus-

toms are to be observed."1

In the Sûtras of Gautama, too, a similar line of conduct is traced out. After it has been said that the highest authority by which a povernment ought to be guided consists in the Vedas, Vedângas, Sâstras, and old traditions, it is added (Adhy. 11. Sûtra 20.), that in cases where the customs of countries, classes and families are not expressly founded upon a passage of the Veda, they are, notwithstanding, to be observed, if they are not clearly against the principles of the sacred writings, such as would be, for instance, marrying the daughter of a maternal uncle.<sup>2</sup>

There is an interesting passage in the Grihya-sangraha-paris'ishta, composed by the son of Gobbila, which Dr. Roth quotes in his Essays on the Veda, p. 120:—"The Vâs'ishthas wear a braid on the right side, the Âtreyas wear three braids, the Angiras wear five locks, the Bhrigus have their head quite shaved, others have a lock of hair on the top of

the head."3

Another peculiarity ascribed to the Vas'ishthas is that they exclude

meat from their sacrifices.4

A similar notice of the customs of neighbouring nations, is found in Raghunandana's quotation from the Harivans'a,—that the Sakas (Scythians) have half their head shorn, the Yavanas (Greeks?) and

ा जनपदादिधर्माणां वश्यमाणानां धर्माणां च विरोधे सित वश्यमानं धर्ममेव कुर्यात्र जनपदादिधर्ममिति । यद्वश्यामस्तत्सर्वत्र समानमित्येवार्थः । वैदेहेषु सद्य एव व्यवाया दृष्टः । त्रह्येषु तु ब्रह्मवर्यं विहितं । तत्र गृह्योक्तमेव कुर्यात्र देशधर्ममिति सिद्धं ॥

The commentator Haradatta here mentions the following as customs that prevailed in certain territories, and which had no sanction in the Veda:—When the sun stands in Aries (mesha), the young girls would paint the Sun which his retinue, on the soil, with coloured dusts, and worship this in the morning and evening. And in the month Margasırsha (November-December) they roam about the village nicely dressed, and whatever they receive as presents they give to the god. When the sun stands in Cancer (karkata) in Pûrvâ Phâlgunî (February), they worship Umâ, and distribute sprouting kidney beans and salt. When the sun stands in Aries in Uttarâ Phalgunî (?), they worship the goddess \$rî.

As customs of classes he mentions that at the marriage of Sudras, they fix posts in the ground, put thousands of reflecting lamps upon them, and

lead the bride round by the hand.

As enstoms of families, again, he remarks that some wear the s'ikhâ (lock of hair) in front, some behind, and that passage of the Veda (pravâ chanas) allow both according to different times.

ः दक्षिणकपर्दा वासिष्ठा आत्रेयास्त्रिकपर्दिनः। अगिरसः पंचचूदा मुंडा भृगवः शिखिने।ऽन्ये॥

4 This we learn from the Karma-pradips, a supplement to the Sûtras of Gobbils, i. 18.: विस्ञाको विधिः इत्स्नो द्रष्टव्योऽत्र निरामिषः ॥ Kambojas the whole, that the Paradas (inhabitants of Paradene) wear

their hair free, and the Pahlavas (Persians) wear beards.1

In the same way, then, as different traditions were current in India relative to such observances, it is probable that different families had their own heroes, perhaps their own deities, and that they kept up the memory of them by their own poetic traditions. It is true that such a view is merely conjectural. But when we see that in some parts of the Veda, which are represented as belonging to different illustrious and noble families, certain gods are more exclusively celebrated; that names which in Vedic poetry are known as those of heroes and poets (Purûravas, Kutsa) are afterwards considered as names of infidels and heretics, we have a right to infer that we have here the traces of a widely extended practice.

In the hymns of the Rig-veda we meet with allusions to several legendary stories—afterwards more fully developed by the Brahmans in their Brahmans—by which laws that were in later times acknowledged as generally binding, and as based upon the authority of the Veda, are manifestly violated. It is an essential doctrine of the Brahmans, that the religious eduction, and the administration of sacrifices, as well as the receiving of rewards for these offices, belong exclusively to their own caste. Kakshivat, however, whose hymns are found in the first and ninth mandala of the Rig-veda, and who, whether on account of his name or for some better reason, is said to have been a Kshatriya, or of royal extraction, is represen-

अर्द्ध शकानां शिरसे मुंडियत्वा व्यसर्जयेत्।
 यवनानां शिरः सर्वं कंबेजानां तथैव च ॥
 पारदा मुक्तकेशाश्च पह्नवाः श्मश्रु धारिणः।
 नि:स्वाध्यायवषद्काराः कृतास्तेन महात्मना ॥

See also Pân. gaņa mayuravyansakādi.

<sup>2</sup> In latter times, when the sects of Vishnu and Siva had sprung up, and the Indian world was divided between them, it seems as if different deities had been ascribed to different castes. Thus it is said in the first Adhyaya of the Vasishthasmriti:

चतुर्वेदी च ये। विशे वासुदेवं न विद्ति । वेदभारेभयाकांतः स वै व सणगर्दभः ॥ तस्माद्वेष्णवत्वेन ब्राह्मएयादि विद्वीयते । वैष्णवत्वेन संसिद्धिं लभते नात्र संशयः ॥ नारायणं परं ब्रह्म ब्रह्मणानां हि दैवतं । से।मसूर्याद्ये। देवाः क्षत्रियाणां विशामिष ॥ शूद्रादीनां तु रदाद्या अर्चनीयाः प्रयत्नतः । यत्र रद्राचनं प्रोक्तं पुराणेषु स्मृतिष्विष ॥ तदब्रह्मण्यविषयमेवमाह प्रजापितः । रुद्राचनं त्रिपुंड्ं च पुराणेषु च गीयते ॥ क्षत्रविद्शूद्रजातीनां नेतरंषां तदुच्यते । तस्मात् त्रिपुंड्ं विप्राणां न धार्यं मुनिसत्तमाः ॥

"A Brahman versed in the four Vedas, who does not find Våsudeva, is a donkey of a Brahman, trembling for the heavy burden of the Veda. Therefore, unless a man be a Vaishnava, his Brahmahood will be lost; by being a Vaishnava one obtains perfection, there is no doubt. For Nårayana

ted as receiving from King Svanaya presents, which, according to Manu. it would have been unlawful for him to accept. In order to explain this. away, a story is told, that although Kakshîvat was the son of King Kalinga. yet his real father was the old Rishi Dîrghatamas, whose hymns have likewise been preserved in the first mandala of the Rig-veda. This poet had been asked by the king to beget offspring for him, according to ancient Indian customs. The queen, however, refused to see the old sage, and sent her servant maid instead. The son of the servant and the Rishi Dirghatamas was Kakshîvat, and as the son of a Rishi he was allowed to perform sacrifices and to receive presents. This story shows its purpose very clearly, and there can be little doubt that it owes its origin to the tender conscience of the Brahmans, who could not bear to see their laws violated by one of their own sacred Rishis. It is a gratuitous assumption to suppose that the piets of the Veda should have been perfect in the observance of the Brahmanic law. That law did not exist when they lived and composed their songs, for which in later times they were raised to the rank of saints. Whether Kakshîvat was the son of a Brahman or a Kshatriya, of a servantmaid or of a queen, is impossible to determine. But it is certain that in the times in which he lived, he would not have scrupled to act both as a warrior and priest, if circumstances required it. This becomes still more evident, if we accept Professor Lassen's view, who considers Dîrghatamas, the father of Kakshivat, as one of the earliest Brahmanic missionaries in the southern parts of Bengal, among the Angas and Kalingas.2 Now, under circumstances of this kind, when the Brahmans were still labouring to establish their supremacy over different parts of India, it can

(Vishnu) the highest Brahma, is the deity of the Brahmans; Soma, Sûrya, and the rest, are the gods of Kshatriyas and Vais'yas; while Rudra and similar gods ought to be sedulously worshipped by the Sûdras. Where the worship of Rudra is enjoined in the Puranas and law books, it has no reference to Brahmans, as Prajapati declared. The worship of Rudra and Tripundra (the three horizontal marks across the forehead) are celebrated in the Puranas, but only for the castes of the Kshatriyas, Vais'yas, and Sûdras, and not for the others. Therefore, ye excellent Munis, the Tripundra must not be worn by Brahmans.'

¹ Cf. Manu, x. 76.; and Rig-veda-bhashya, ii., p. 30. Rosen, who has quoted this passage to Rv. i 18. 1., reads याजनाध्यापनेचेच चिशुद्धाश प्रतिग्रहात् which he translates by "abstinere jubet a dirigendis sacrificies, ab institution sacret ab impuris donis," referring to Manu. x. 103-110. चिशुद्ध however, does not mean impure, but pure. The reading of the commentary ought to be चिशुद्धाश प्रतिग्रह: for thus the very words of Manu, x. 76., are restored.

<sup>2</sup> In this case, the name of the queen also, Sudeshnå, would be significant, for Sudeshnå is the name of one of the nations in Bengal. See Vishnu-Puråna. p. 188. The word "gedharma," which occurs in the story of Dirghatamas, in the Mahâbhârata, i. 4,195., and which Prof. Lassen translates by "pastoral law," must have an opprobrious sense, and Indian Pandits explain it by "open and indiscriminate concupiecence."

hardly be believed that the different eastes and their respective duties and privileges should have been establised as strictly as in later times. In later times it is considered a grievous sin to recite the humas of the Veda in place where a Sudra might be able to hear them. In the Rig-veda we find hymns which the Brahmans themselves allow to be the compositions of the son of a slave. Kavasha Ailusha is the author of several hymns in the tenth Book of the Rig veda; yet this same Kavasha was expelled from the sacrifice as an imposter and as the son of a slave (dâsyâh putra), and he was re-admitted only because the gods had shown him special favour. This is acknowledged by the Brahmans of the Aitareyins! and Kaushitakins, and in the Mahâbharata also Kavasha is called a Nishâda.

The marked difference between the Vedic and epic poetry of India has been well pointed out by Professor Reth of Tubingen, who for many years has devoted much time and attention to the study of the Veda. According to him, the Mahâbhârata, even in its first elements, is later than the time of Buddha.<sup>2</sup> "In the epic poems," he says, "the Veda is but imperfectly known; the ceremonial is no longer developing, it is complete. The Vedic legends have been plucked from their native soil, and the religion of Agni, Indra, and Varuna has been replaced by an altogether different worship. "The last fact," he says, "ought to be the most convincing. There is a contradiction running throughout the religious life of India, from the time of the Râmâyana to the present day. The outer form of the worship is Vedic, and exclusively so; but the eye of religious adoration

1 Aitareya-Brâhmana, II. 19.:

<sup>2</sup> Zur Litteratur and Geschichte des Veda. Drie Abhandlungen von R.

Roth, Doctor der Philosophie. Stuttgart, 1846.

The worship of the Hindus at the present day cannot be called exclusively Vedic, though Vedic remains may be traced in it. In the Introduction to the edition of the Rig-veda, by the Tattvabodbinî-sabhâ, it is said, on the contrary,

আুদ্যকালিক বৈদিক ধর্মের সহিত ইদানীস্তন প্রচলিত ধর্মের বিভিন্নতা উজ্জ্বলরূপে

প্রতীত হইবেক।

is turned upon quite different regions. The secondary formation, the reliagion of Vishnu and Brahma, began with the epic poetry, and remained afterwards as the only living one, but without having the power to break through the walls of the Vedie ceremonial, and take the place of the old ritual."

And if it be unsafe to use the epic poems as authorities for the Vedic age, it will readily be admitted that the same objection applies with still greater force to the Purânas. Although one only of the eighteen Purânas has as yet been completely published, enough is known of their character, partly by Professor Burnouf's edition of the Bhâgavat-purâna, partly by extracts given from other Purânas by Professor Wilson, to justify our discarding their evidence with reference to the primitive period of Vedic literature. Even the Mânavadharmas'âstra, the law-book of the Mânavas, a sub-division of the sect of the Taittirîyas, or, as it is commonly called, the laws of Manu, cannot be used as an independent authority. It cannot be said that the compilers of these laws were ignorant of the tradition of the Vedic age. Many of their verses contain a mere paraphrase of passages from the hymns, Brâhmanas, and Sûtras: but they likewise admitted the rules and customs of a later age, and their authority is therefore valid only where it has been checked by more original and genuine texts.

The Code of Manu is almost the only work in Sanskrit literature which, as yet, has not been assailed by these who doubt the antiquity of everything Indian. No historian has disputed its claim to that early date which had, from the first, been assigned to it by Sir William Jones. It must be confessed, however, that Sir William Jones's proofs of the antiquity of this Code cannot be considered as conclusive, and no sufficient arguments have been brought forward to substantiate any of the different dates ascribed to Manu, as the author of our Law-book, which vary, according to different

writers from 880 to 1280 B. C.

If the age of Manu or of the epic poems could be fixed, so as to exclude all possible doubt, our task with regard to the age of the Veda would be an easy one. The Veda is demonstrably earlier than the epic poetry and the legal codes of India. We do not, however, advance one step by saying that the Veda is older than the author of the Manava-dharma sastra, whose date is altogether unknown, or even than the Mahabharata, if it can be doubted whether that poem in its first elements be anterior to the Buddhistic reli-

<sup>1</sup> Professor Burnouf has treated the same subject in his Review of Prof. Wilson's Translation of the Vishnupurana, Journal des Savants, 1840,

May, p. 296.

<sup>&</sup>quot;the difference between the present received law and the early Vedic law, will clearly be perceived by this edition." And again,

পুরাণবিহিত নর, পশু, পক্ষী, সর্প, মৎসাদি নানা অবয়ববিশিষ্ট দেবগণের পৌরাণিক অর্চ্চনা এবং লোকবিখ্যাত আধুনিকতম তান্ত্রিক-ক্রিয়ার বিস্তারিত পদ্ধতির সহিত বেদ বিহিত যজ্ঞসুষ্ঠানের কি পর্য্যন্ত ভিন্নতা তাহা সম্যক্ রূপে দৃষ্ট হইবে ক।

<sup>&</sup>quot;It will be seen exactly what difference there is between the Pauranic worship of the gods, who, according to the Puranas, are exhibited with the different bodies of men, animals, birds, serpent, and fishes; the widely spread custom of tantric ceremonies, which are the most modern and famous on earth; and the performance of sacrifices as prescribed in the Veda."

gion or not; while it is said, at the same time, that the last elements which have been incorporated into this huge work allude to historical events later than the Christian era. Here, then, we must adopt a new course of procedure. We must try to fix the age of the Veda, which forms the natural basis of Indian history; and we must derive our knowledge of the Vedic age from none but Vedic works, discarding altogether such additional evidence as might be obtained from the later literature of India. Let some Vedic dates be once established, and it will probably be possible to draw lines of connection between the Vedic and the rest of the Indian literature. But the world of the Veda is a world by itself; and its relation to all the other Sanskrit literature is such, that the Veda ought not to receive but ought to throw light over the whole historical development of the Indian mind.

The Veda has a two-fold interest: it belongs to the history of the world and to the history of India. In the history of the world the Veda fills a gap which no literary work in any other language could fill. It carries us back to times of which we have no records anywhere, and gives us the very worlds of a generation of men, of whom otherwise we could form but the vaguest estimate by means of conjectures and inferences. As long as man continues to take an interest in the history of his race, and as long as we collect in libraries and museums the relics of former ages, the first place in that long row of books which contains the records of the Aryan branch of mankind, will belong for ever to the Rig-veda.

But in the history of India, too, the Veda is of the greatest importance. It has been a standing reproach against our studies that it is impossible to find anything historical in Indian literature.<sup>2</sup> To a certain extent that reproach is well-founded; and this accounts no doubt for the indifference with which Sanskrit literature is regarded by the

public at large.

We may admire the delicate poetry of Kâlidâsa, the philosophical vigour of Kapila, the voluptuous mysticism of Jayadeva, and the epic simplicity of Vyâsa and Vâlmîki, but as long as their works float before our eyes like the mirage of a desert, as long as we are unable to tell what real life, what period in the history of a nation they reflect, there is something wanting to engage our sympathies in the same manner as they are engaged by the tragedies of Æschylus, or the philosophical essays of Cicero. We value the most imperfect statues of Lycia and Ægina, because they throw light on the history of Greek art, but we

¹ That the principal part of the Mahâbhârata belongs to a period previous to the political establishment of Buddhism, has been proved by Prof. Lassen, Ind. Ant., i. 489—491. Much has been said since to controvert his views with regard to the age of the Mahâbhârata, but nothing that is really valuable has been added to Prof. Lassen's facts or reasonings. "It is not at all difficult," as Prof. Lassen remarks," to look at this question from one single point of view, and to start a confident assertion. But in doing this, many persons commit themselves to inconsiderate judgments, and show an ignorance of the very points which have to be considered."

should pass by unnoticed the most perfect mouldings of the human frame, if we could not tell whether they had been prepared in the studio of Phidias, or in the dissecting-room of a London hospital.

In the following sketch of the histery of Vedic literature, I cannot promise to give dates such as we are accustomed to find in the literary histories of other nations. But I hope I shall be able to prove that there exist in that large mass of literature which belongs to the Vedic age, clear traces of an original historical articulation; and it is possible to restore something like chronological continuity in the four periods of the Vedic literature. If this can be achieved, if we can discover different classes of literary works, and vindicate to them something of a truly historical character, the reproach that there is nothing historical to be found in India will be removed, as far as the peculiar nature of that literature allows.

The modern literature of India, though not yet grouped in chronological order, will find in the literature of the Vedic age something like a past, some testimony to prove that it did not spring up in a day, but clings by its roots to the earliest strata of Indian thought. The Laws of the Manavas, though no longer the composition of a primeval sage, will at least be safe against the charge of being the invention of some unemployed Indian lawgiver. Plays like Sakuntala and Urvas'î, though no longer regarded as the productions of a Periclean age, will be classed among the productions of what properly be called the Alexandrian period of Sanskrit litera-But whatever we may have to surrender with regard to the antiquity claimed by these and other Sanskrit works, that portion of the literature of India which alone can claim a place in the history of the world, and which alone can command the attention of those who survey the summits of human intellect, not only in the East but over the whole civilised world, will we hope, for the future, be safe against the doubts which I myself have shared for many years. It is difficult, no doubt, to believe that the most ancient literary work of the Aryan race, a work more ancient than the Zendavesta and Homer, should, after a lapse of at least three thousand years, have been discovered, and for the first time published in its entirety, not in one of the Parishads on the borders of the Ganges, but in one of the colleges of an English University. It is difficult to believe that sufficient MSS. should have been preserved, in spite of the perishable nature of the material on which they are written, to enable an editor to publish the collection of the Vedic hymns in exactly that form in which they existed at least 800 years before the Christain era; and, still more, that this collection, which was completed at the time of Lyeuragus, should contain the poetical relies of a pre-Homeric age; an age in which the names of the Greek gods and heroes had not yet lost their original sense, and in which the simple worship of the Divine powers of nature was not yet supplanted by a worship of personal gods. It is difficult to believe this; and we have a right to be sceptical. But it is likewise our duty to inquire into the value of what has been preserved for us in so extraordinary a manner, and to extract from it those lessons which the study of mankind was intended to teach to man,

### HISTORY OF VEDIC LITERATURE.

In taking a survey of the works which belong to the Ved'c literature of India, our task would be greatly facilitated if general and characteristic features could be pointed out by which Vedic and non-Vedic works might at once be distinguished. Without entering into a minute analysis of the individual character of a work, -a mode of criticism which with our present knowledge of the earliest Indian literature, must be very uncertain,—it will often happen that some external mark presents itself, determining at once the age or class of writing to which it belongs. It is true that there are certain grammatical forms and orthographical peculiarities which Indian grammarians restrict to the Veda, and which, therefore, might be used as distinguishing marks of works belonging to But Manu, or rather the author of the Manava-dharma-s'astra, has also employed several Vedic forms; because in transforming Vedic verses into epic Slokas, he is sometimes obliged to retain words and forms which are not in strict accordance with the general character of his language; a fact which accounts in some degree for the strange appearance of many of his verses, which are stiff and artificial, and very inferior in fluency to the older strains which they paraphrase.

There is a strongly marked character in Vedic prose, and no attempt has been made to imitate it in later times. But in order to distinguish Vedic from non-Vedic poetry, we must attend more closely to the metre. Several Vedic metres have been imitated by later poets, but there are metres which never occur in Vedic works, and which may be used as

criteria for distinguishing ancient from more modern poetry.

That difference of metre should form a broad line of demarcation between two periods of literature, is not at all without an analogy in the literary history of other nations, particularly in older times. If once a new form of metre begins to grow popular by the influence of a poet who succeeds in collecting a school of other poets around him, this new mode of utterance is very apt to supersede the other more ancient forms altogether. People become accustomed to the new rhythm sometimes to such a degree, that they lose entirely the taste for their old poetry on account of its obsolete measure. No poet, therefore, who writes for the people, would think of employing those old-fashioned metres; and we find that early popular poems have had to be transfused into modern verse in order to make them generally readable once more.

Now it seems that the regular and continuous Anushtubh-s'loka is a metre unknown during the Vedic age, and every work written in it may at once be put down as post Vedic. It is no valid objection that this epic Sloka occurs also in Vedic hymns, that Anushtubh verses are frequently quoted in the Brahmanas, and that in some of the Satras the Anushtubh-s'loka occurs intermixed with Trishtubhs, and is used for the purpose of recapitulating what had been explained before in prose. For it is only the uniform employment of that metre 2 which constitutes

<sup>1</sup> Sangrah-s'lokas. Cf. Weber, Indische Studien, i. p. 47.

<sup>&</sup>lt;sup>2</sup> It is remarkable that in Panini also, the word s'loka is always used in opposition to Vedic literature (Pan. iv. 1. 66., iv. 3. 103., 1., iv. 3.

the characteristic mark of a new period of literature. Thus rhyme occasionally occurs in English poetry before the Norman period; yet, when we find whole poems written in rhyme and without the old Teutonic system of alliteration, we are sure that they cannot have been composed in an Ante-Norman period. The elegiac measure seems to have been used before Callinus; yet Callinus and Archilochus are always mentioned. as the inventors of it :- that is they were the first to sanction the uniform employment of this metre for entire poetical compositions. Hence no elegiac poem can be previous to the close of the 8th century B. c. The same applies to the iambus, the invention of which is commonly ascribed. to Archilochus; although iambics occur interspersed in the Margites, a poem ascribed to Homer by no less an authority than Aristotle. In the history of German literature we have several instances where poems of the 12th century2 had to be recast as early as the 13th, on account of their metre and language; which during this period of rapid transition, had already become obsolete and unreadable.

Excluding, then, from the Vedic period the Mahabharata, Ramayana, Manu, the Puranas, all the Sastras and Dars'anas, we have now to see what remains of literary works belonging to the Vedic age.

There are in that age four distinct periods, which can be established with sufficient evidence. They may be called the *Chaandas period*, *Mantra period*, *Brahamana period*, and *Sutra period*, according to the general form of the literary productions which give to each of them its peculiar historical character.

In order to prove that these four periods follow each other in historical order, it is necessary to show that the composition of Sûtra works presupposes the existence of a Brâhmana literature; that the Brâhmana literature again is only possible with the presupposition of a Mantra literature; and lastly, that the form in which we possess the Mantra literature presupposes a period of Vedic history preceding the collection and final arrangement of the ancient Mantras or hymns.

<sup>107.).</sup> S'lokas, even if ascribed by Indian tradition to the same author, who is considered as the Rishi of Vedic hymns or Brâhmanas, are quoted by a name different from that of his other works. The hymns or Brâhmanas ascribed to Katha, for instance, are always to be quoted as "Kathâh" (οι περι Κατθον); an expression which could never apply to poetical compositions ascribed to the same Katha, if written in S'lokas. Verses written in this modern style of poetry must be quoted as "Kathic Ślokas" (Kâthâh s'lokâh). The Brâhmana promulgated by Tittiri, and kept up in the tradition of the Taittirîyas, is queted by the name of "the Taîttirîyas," but Ślokas composed by Tittiri are never included under this title. (Pâṇ. ii. 4.21.) Vâlmîki-s'lokas are mentioned.

<sup>1</sup> See Mure's Critical History, vol. iii. ch. i.

<sup>&</sup>lt;sup>2</sup> For instance, "Reinhard the Fox," an old High-German poem of the 13th century, is a new edition of the same poem written in the 12th century, of which fragments have been found by Grimm. Other poems which are supposed to have been remodelled in the 13th century are "Crescentia," "Duke Ernst." and the "Roland Song." Lachmann supposed the same to have taken place with the "Nibelungen Klage."

#### THE SUTRA PERIOD.

The Stitra period, with which we have to begin, is of peculiar importance to the history of Indian literature, inasmuch as it forms the connecting link between the Vedie and the later Sanskrit. While on the one hand we must place several works written in Sûtras under the head of the post-Vedie or modern Sanskrit, we shall also find others which, although written in continuous Anushtubh-s'lokas, or, more frequently, intermixed with Trishtubh and other verses (as, for instance, some of the Pratis'akhyas and Anukraman's, and the still more modern Paris'ishtas), must be considered as the last productions of the Vedicage, trespassing in a certain degree upon the frontier of the later Sanskrit.

It is difficult to explain the peculiarities of the style of the Sûtra literature to any one who has not worked his way through the Sûtras themselves. It is impossible to give anything like a literal translation of these works, written as they are in the most artificial, elaborate, and enigmatical form. Satra means string; and all the works written in this style, on subjects the most various, are nothing but one uninterrupted string of short sentences, twisted together into the most concise form. Shortness is the great object of this style of composition, and it is a proverbial saying (taken from the Mahabhashya) amongst the Pandits<sup>1</sup>, that "an author rejoiceth in the economising of half a short vowel as much as in the birth of a son." Every doctrine thus propounded, whether grammar, metre, law, or philosophy, is reduced to a mere skeleton. All the important points and joints of a system are laid open with the greatest precision and clearness, but there is nothing in these works like connection or development of ideas. " Even apparent simplicity of the design vanishes, "as Colebrooke remarks, " in the perplexity of the structure. The endless pursuit of exceptions and limitations so disjoins the general precepts, that the reader cannot keep in view their intended connection and mutual relation. He wonders in an intricate maze, and the clew of the labyrinth is continually slipping from his hands." There is no life and no sprit in these Sûtras, except what either a teacher or a running commentary, by which these works are usually accompanied, may impart to them.

Many of these works go even further: they not only express their fundamental doctrines in this concise form of language, but they coin a new kind of language, if language it can be called, by which they succeed in reducing the whole system of their tenets to mere algebraic formulas. To understand these is quite impossible without finding first what each algebraic x, y, and z, is meant to represent, and without having the key to the whole system. This ker is generally given in separate Sûtras, called Paribhasha, which a pupil must know by

Benares Magazine, Oct. 1849-

heart, or always have present before his eyes, if he is to advance one step in the reading of such works. But even then it would be impossible to arrive at any real understanding of the subject, without being also in possession of the laws of the so-called Anuvritti and Nirvritti. To explain the meaning of these technical words, we must remember that the Sûtras generally begin by putting forward one proposition (Adhikara), which is afterwards never repeated, but always to be understood, till a new subject of the same kind is introduced. After the statement of subject, the author goes on by giving a first rule, which may extend its influence over the next following rules, whether these be restrictions or amplification of it. These restrictive rules exercise again their influence to a certain extent over other rules, so that the whole becomes one continuous chain, each link held and modified by the others, and itself holding to and modifying the rest. The influence of one rule over the others is called Anuvritti, its cessation, Nirvritti. Without knowing the working of these two laws, which can be only learnt from commentaries, the Sûtras become very much confused. This is particularly the case in those works where the so-called Mîmânsâ method of Pûrva-paksha (reasons contrá), Uttarapaksha (reasons pro), and Siddhanta (conclusion), is adopted. Here the concatenation of pros and cons is often so complicated, and the reasons on both sides defended by the same author with such seriousness, that we sometimes remain doubtful to which side the author himself leans, till we arrive at the end of the whole chapter. It is indeed one of the most curious kinds of literary composition that the human mind ever conceived; and though altogether worthless in an artistic point of view, it is wonderful that the Indians should have invented and mastered this difficult form, so as to have made it the vehicle of expression for every kind of learning. To introduce and to maintain such a species of literature was only possible with the Indian system of education, which consisted in little else except implanting these Sûtras and other works into the tender memory of children, and afterwards explaining them by commentaries and glosses. An Indian pupil learns these Sûtras of grammar, philosophy, or theology by the same mechanical method which fixes in our minds the alphabet and the multiplication-table; and those who enter into a learned career spend half their life in acquiring and practising them, until their memory is strengthened to such an unnatural degree, that they know by heart not only these Sûtras, but also their commentaries, and commentaries upon commentaries. Instances of this are found among the learned in India up to the present day.

These numerous Satra works which we still possess, contain the quintessence of all the knowledge which the Brahmans had accumulated during many centuries of study and meditation. Though they are the work of individuals, they owe to their authors little more than their form; and even that form was, most likely, the result of a long-continued system of traditional teaching, and not the invention of a few individuals.

There is a great difference, according to the notions of the Hindus themselves, between a work composed previous to the Sûtra period, and a Sûtra composition. The difference of style between a Brâhmana and a Sûtra work (with the exception of some Kalpa-Sûtras, to be mentioned hereafter) would strike every body at first sight, although, as regards the grammatical forms, Vedic irregularities are, according to Sanskrit grammarians, allowed in Sûtras also. But there is another, and more important difference. Literary works, belonging to the preceding periods, the Brâhmanas as well as the Mantras, are considered by Indian theologians as forming the Sruti, or divine revelation, in contradistinction to the Sûtras and all the rest of their literature. In the dogmatical language of orthodox Hindus, the works, which contain the Sruti, have not been composed, but have only been seen or perceived by men, i.e., they have been revealed to men. The Sûtras, on the contrary, although based upon the Sruti, and therefore in some instances also called Srauta Sûtras, are yet avowedly composed by human authors. Whenever they appear to be in contradiction with the Sruti, their authority is at once overruled, and only in cases where anterior evidence is wanting from the Sruti, can they have any claim to independent authority.

Now, even if we had no other means of proving that the Sûtras could have been composed only after the composition of the Brâhmnas, there would be no reason to consider this distinction, drawn by the Indians themselves between their sacred and profane literature, as altogether artificial and devoid of historical meaning, particularly if it can be shown how great an influence that very distinction has exercised on the religious

struggles of India.

It is clear that this distinction has ever been the stronghold of the hierarchical pretensions of the Brahmans. We can understand how a nation might be led to ascribe a superhuman origin to their ancient national poetry, particularly if that poetry consisted chiefly of prayers and hymns addressed to their gods. But it is different with the prose compositions of the Brahmnas. The reason why the Brahmnas, which are evidently so much more modern than the Mantras, were allowed to participate in the name of Sruti, could only have been because it was from these theological compositions, and not from the simple old poetry of the hymns, that a supposed divine authority could be derived for the greater number of the ambitious claims of the Brahmans. But, although we need not ascribe any weight to the arguments by which the Brahmans endeavoured to establish the contemporaneous origin of the Mantras and Brahmanas, there seems to be no reason why we should reject as equally worthless the general opinion with regard to the more ancient date of both the Brahmanas and Mantras, if contrasted with

¹Vedic forms occur in the Prâtis'âkhya-Sûtras, and are pointed out as such by the commentators. For instance, I. Prâtis'âkhye, iv. 33. ता वशंगमानि instead of तानि वशंगमानि ! The Commentator says, तानिश्इट्लोपी द्रष्ट्यः। छंदोवत्स्त्राणि भवंति ! The same applies also to the Sâmayâchârika-Sûtras, for instance, those of pastamba, i. 53., where we read अधासनशायी ! The Commentator explains this irregular form by अधःशब्दस्य सवर्णदोर्घश्छांदसा प्रपाठा वा ! Again, i. 93. we find अग्लास्त explained by the Commentary as तत्रानुस्वारपाठश्छांदसः । अपारठा वा ! Gautama-Sûtras, p. 40. 1. 20., we read सकारांतपाठ आर्षः सुमेधसा दुर्मधस द्रशाद्यु द्रश्नात् ॥

the litras and the profane literature of India. It may easily happen. where there is a canon of sacred books, that later compositions become incorporated together with more ancient works, as was the ease with the Brahmanas. But we can hardly imagine that old and genuine parts should ever have been excluded from a body of sacred writings, and a more modern date ascribed to them, unless it be in the interest of a party to deny the authority of certain doctrines contained in these rejected documents. There is nothing in the later literature of the Satras to warrant a supposition of this kind. We can find no reason why the Satras should not have been ranked as Sruti, except the lateness of their date, if compared with the Brahmanas, and still more with the Mantras. Whether the Brahmans themselves were aware that ages must have elapsed between the period during which most of the poems of their Rishis were composed, and the times which gave rise to the Brahmanas, is a question which we need hardly hesitate to answer in the affirmative. But the recklessness with which Indian theologians claim for these Brahmanas the same title and the same age as for the Mantras, shows that the reasons must have been peculiarly strong which deterred them from claiming the same divine authority for the Sûtras.

To ascribe to literary compositions such as the Mantras and Brâhmanas a divine origin, and to claim for them a divine and absolute authority, is a step which can hardly pass unnoticed in the intellectual history of a nation, whether for the circumstances which led to it, or for the results which it produced. Now, in India the results of that fatal step are palpable. It may have heen intended as a check on religious reforms, but it led to a religious revolution. Buddhism would be unintelligible, unless as the overthrow of a system which had tried to maintain its position by an appeal to a divine revelation; and we may be certain that the distinction between Sruti and Smiti, between revealed and profane literature, was established by the Brahmans, previous to the schism of Buddha.

If the belief was once established, that not only the simple effusions of the Rishis, but the pointed doctrines of the Brahmanas also emanated from a Divine source, and could not therefore be attacked by human reasoning, it is clear that every opposition to the privileges which the Brahmans claimed for themselves, on the sacred authority of the Veda, became heresy; and where the doctrines of the Brahmans were the religion of the people, or rather of the king, such opposition was amenable to the hierarchical laws of the state. The Brahmans themselves cared much more to see the divine authority of the Sruti as such implicitly acknowledged, than to maintain the doctrines of the Rishis in their original simplicity and purity. In philosophical discussions, they allowed the greatest possible freedom; and, although at first three philosophical systems only were admitted as orthodox (the two Mî-mânsâs and the Nyâya), their number was soon raised to six, so as to include the Vais'eshika, Sânkhya, and Yoga-schools. The most

¹Kumârila quotes Sânkhya and Yoga, together with other heretical systems. सांख्ययोगपांचरात्रपाशुपतशाक्य निर्भथपरिगृहीतधर्माधर्मनिबंध-नानि॥ As to the Vais'eshikas, see page 843.

conflicting views on points of vital importance were tolerated as long as their advocates succeeded, no matter by what means, in bringing their doctrines into harmony with passages of the Veda, strained and twisted in every possible sense. If it was only admitted that besides the perception of the senses and the induction of reason, revelation also, as contained in the Veda, furnished a true basis for human knowledge, all other points seemed to be of minor importance. Philosophical minds were allowed to exhaust all possible views on the relation between the real and transcendental world, the Creator and the created, the divine and the human nature. It was not from such lucubrations that danger was likely to accrue to the caste of the Brahmans. Nor was the heresy of Buddha Sakya Muni found so much in his philosophical doctrines, many of which may be traced in the orthodox atheism of Kapila. His real crime lay in his opposition to the exclusive privileges and abuses of the Brahmans. These abuses were sanctioned by the divine authority of the Veda, and particularly of the Brahmanas. In attacking the abuses. Buddha attacked the divine authority on which they were founded, and the argument was short: he is a heretic; anathema esto.

Baddha was a Kshatriya. He was of princely origin, and belonged to the nobility of the land. He was not the first of his easte who opposed the ambition of the Brahmans. Several centuries before Buddha, Visvâmitra, who, like Buddha, was a member of the royal easte, had to struggle against the exclusiveness of the priests. At that early time, however, the position of the Brâhmans was not yet impregnable; and Vis'vâmitra, although a Kshatriya, succeeded in gaining for himself and his family the rights for which he struggled, and which the Brahmans had previously withheld from all but their own easte. King Janaka of Videha again, whose story is given in the Brâhmans, refused to submit to the hierarchical pretensions of the Brâhmans, and asserted his right of performing sacrifices without the intercession of priests.

<sup>1</sup>The Buddhists say that the three Vedas were propounded originally by Maha Brahma, at which time they were perfect truth; but they have since been corrupted by the Brahmans and now contain many errors. Cf. R. Spence Hardy, Eastern Monachism, p. 185.

<sup>2</sup>Kumarila always speaks of Buddha as a Kshatriya who tried to be-

come a Brâhman. For instance,

स्वधर्मातिरेकेण च क्षत्रियेण सता प्रवक्तत्वप्रतिग्रहै। प्रतिपन्नी।

And again, बुद्धादेः पुनरयमेवातिकमाँ ऽलंकारबुद्धी स्थितः। येनैवमाह कलि-कलुष्कतानि यानि लेकि मयि निपतंतु विमुच्यतां तु लोक इति सं किल लोक-हितार्थं अत्रियधर्ममतिकम्य बाह्यणवृत्तिं प्रवक्तृत्वं प्रतिपद्य प्रतिषेधातिकप-समर्थेर्बाह्मणे निनुशिष्टं धर्मं बाह्यजनानुशास्तिं धर्मपीडामण्यातमनों ऽगीकृत्य परानुग्रहं कृतवानित्येवं विधेरेव गुणैः स्तूयते ॥

"And this very transgression of Buddha and his followers is represented as if it did him honour. For he is praised because he said, 'Let all the sins that have been committed in this world fall on me, that the world may be delivered.' It is said that if he thus transgressed the duty of a Kshatriya, and entered the life of a Brahman and preached, it was merely for the good of mankind; and that in adopting for the intruction of excluded

However great the difference may have been between the personal character of these two men and of Buddha, the first principle of their opposition was the same All three were equally struggling against the

over-weening pretensions of a selfish priesthood.

But while Vis'vâmitra contented himself with maintaining the rights of his tribe or family, and became reconciled as soon as he was allowed to share in the profits of the priestly power, while King Janaka expressed himself satisfied with the homage paid to him by Yajnavalkya and other Brahmans,—while, in short, successive reformers as they appeared were either defeated or gained over to the cause of the Brahmans,—the seeds of discontent were growing up in the minds of the people. There is a dark chapter in the history of India, the reported destruction of all the Kshatriyas by Paras'u-râma. It marks the beginning of the hierarchical supremacy of the Brahmans. Though the Brahmans seem never to have aspired to the royal power, their caste, as far as we know the history and traditions of India, has always been in reality the ruling caste. Their ministry was courted as the only means of winning divine favour, their doctrines were admitted as infallible, their gods were worshipped as the only true gods, and their voice was powerful enough to stamp the simple strains of the Rishis, and the absurd lucubrations of the authors of the Brahmanas. with a divine authority. After this last step, however, the triumph of Brahmanism was preparing its fall. In India, less than in any other country, would people submit to a monopoly of truth; and the same millions who were patiently bearing the yoke of a political despotism threw off the fetters of an intellectual tyranny. In order to overthrow one of the oldest religions of the world, it was sufficient that one man should challenge the authority of the Brahmans, the gods of the earth (Bhûdeva), and preach among the scorned and degraded creatures of God the simple truth that salvation was possible without the meditation of priests, and without a belief in books to which these very priests had given the title of revelation. This man was Buddha S'akya Muni.

Now if we inquire how Buddha's doctrines were met by the Brâhmans, it is true that here and there in their philosophical works they have endeavoured to overthrow some of his metaphysical axioms by an appeal to reason. An attempt of this kind we have, for instance, in Vâchaspati Mis'ra's commentary on the Vedânta Sûtras. In commenting on the tenet of Buddha, that "ideas like those of being, and not being, &c., do not admit of discussion," Vâchaspati observes that the very fact of speaking of these ideas, includes the possibility of their conception; nay, that to affirm they do not admit of reasoning involves an actual reasoning on them, and proves that the mind can conceive

the idea of being as different from that of not-being.

Such, however, were not the usual weapons with which Brahmanism fought against Buddhism. The principal objection has always been, that Buddha's teaching could not be true, because it did not derive its sanction from Sruti or revelation. The Brahmans, as a caste, would readily have allowed being and not being, and the whole of

¹सदादीनामन्यतमद्विचारं न सहते॥

people a law which had not been taught by the Brâhmans, he took the sin upon himself and was benefitting others."

Buddha's philosophy, as they did the Sankhya philosophy, which on the most important points is in open opposition to the Vedanta. But while Kapila, the founder of the Sankhya school, conformed to the Brahmanic test by openly proclaiming the authority of revelation as paramount to reasoning and experience, Buddha would not submit to this, either for his philosophical (abhidharma), or for his much more important moral and religious doctrines (vinaya). No doubt it would have been easy for him to show how some of his doctrines harmonised with passages of the Veda, as in the Veda all possible shades of the human mind have found their natural reflection. If he had done so only for some of his precepts, such, for instance, as, "Thou shalt not murder," " "Thou shalt not drink," "Thou shalt eat standing," the Brahmans would readily have passed over other doctrines, even such as came into practice after Buddha's death, like "Who longs for heaven, shall worship the holy sepulchre,"4 "He shall pull out his hair." 5 &c. As he refused to do so, the line of a argument taken by the Brâhmans was simply confined to an appeal to revelation, in disproofs of the possibility of the truth of Buddha's doctrines.

There must be something very tempting in this line of argument, for we see that in later times the Buddhists also endeavoured to claim. the same divine character for their sacred writings which the Brahmans had established for the Veda. A curious instance of this is given in. the following discussion, from Kumarila's Tantra-varttika. Here the opponent (pûrva-paksha) observes, that the same arguments which prove that the Yeda is not the work of human authors, apply with. equal force to Sakya's teaching. His authority, he says, cannot be ouestioned, because his precepts are clear and intelligible; and as Sakya is not the inventor, but only the teacher of these precepts, and no name of an author is given for Sakya's doctrines, the frailities inherent in human authors affect them as little as the Veda.6 thing, in fact, he concludes, which has been brought forward by the Mîmânsakas to prove the authority of the Veda, proves in the same way the authority of Buddha's doctrine. Upon this, the orthodox Kumarila grows very wroth, and says: "These Sakyas, Vais'eshikas, and other heretics, who have been frightened out of their wits by the faithful Mîmânsâkâs, prattle away with our own words as if trying to

<sup>&</sup>lt;sup>1</sup> न हन्याता।

<sup>6</sup> अकर्त कतया नापि कर्तृ दोषेण दुष्यति । वेद्वद्बुद्ध बाक्यादि कर्तृ समरणवर्जणात् ॥ बुद्धवाक्यसमाख्यापि प्रवक् त्वनिबंधना । तद्द एत्वनिमित्ता वा काठकांगिरसादिवत् ॥ यावदेवोदितं किचिद्धे दमामाण्यसिद्धये । तत्सर्वं बुद्धवाक्यानामतिदेशेन गम्यते ॥

lay hold of a shadow. They say that their sacred works are eternal; but they are of empty minds, and only out of hatred they wish to deny that the Veda is the most ancient book. And these would be logicians declare even that some of their precepts (which they have stolen from us, like that of universal benevolence, are not derived from the Veda, because most of Buddha's other sayings are altogether against the Veda. Wishing, therefore, to keep true on this point also, and seeing that no merely human precept could have any authority on moral and supernatural subjects, they try to veil their difficulty by aping our own argument for the eternal existence of the Veda They know that the Mimansakas have proved that no sayings of men can have any authority on supernatural subject; they know also that the authority of the Veda cannot be controverted, because they can bring forward nothing against the proofs adduced for its divine origin, by which all supposition of a human source have been removed. Therefore, their hearts being gnawed by their own words, which are like the smattering of children, and having themselves nothing to answer, because the deception of their illogical arguments has been destroyed, they begin to speak like a foolish suitor who came to ask for a bride, saying, 'My family is as good as your family.' In the same manner, they now maintain the eternal existence of their books, aping the speeches of others. And if they are challenged and told that this is our argument, they brawl, and say that we, the Mimansakas have heard and stolen it from them. For a man who has lost all shame, who can talk away without any sense, and tries to cheat his opponent, will never get tired, and will never be put down !" Towards the end of this harangue, Kumarila adds, what is more to the point, that the Bauddhas, who ascribe to everything a merely temporary existence, have no business, to talk of an eternal revelation.

Now, it ought not to be overlooked, that in all these discussions the distinction between Sruti (Mantras and Brâhmanas) and Smriti (Sûtras) is always taken for granted. If, at the time of the first controversies between Bauddhas and Mîmânsakas, the authors of the Mantras or Brâhmanas and particularly the founders of the so-called ancient Brâhmanas, had still been alive, or their names generally known, even a Brâhman could not have ventured to stand up for the divine and eternal origin of this part of the Sruti. On the other hand, nothing could have prevented the Brâhmans from ascribing the same supernatural origin to the Sûtras, if at the time of the rising power of Buddhism their authors also had been lost in oblivion. The distinction, therefore, between Sruti (revelation) and Smriti (tradition) which is a point of such vital importance for the whole Brâhmanic system will also be found significant in an historical point of view.

It must be observed, however, before we proceed farther, that what is called Smriti includes not only Sûtras, but also Śloka works, such as the laws of Manu, Yājnavalkya, and Parâs'ara (the Mânava, Yājnavalkya, and Parâs'ara dharma-s'āstras), which sometimes are called the Smritis, in the plural. Most of these, if not all, are founded on Sûtras; but the text of the Sûtras have mostly been superseded by these later metrical paraphrases.

How then did the Brâhmans, after they had established the distinction between Sruti and Smriti, defend the authority of the Smriti, including Sûtras and the later Sloka works?

That the Smriti has no claim to an independent authority, but derives its sanction from its intimate connection with the Sruti, is implied by its very name, which means recollection. For, as Kumarila remarks (in the purva-paksha), "Recollection is knowledge, the object of which is some previous knowledge; and if Manu and other authors of Smritishad not originally been in possession of an authoritative knowledge, its would be impossible to appeal to their recollection as an authority. It would be as if a man, omitting his son or daughter, was to appeal to the son of a barren daughter. For the original knowledge of Manu might be compared to his son, but his recollection would only be like a grandson. Now as people, if they have reason to doubt the existence of a daughter, would disbelieve every mention of the son of a daughter, thus the recollection (smriti) of Manu would be futile, if he himself had not possessed some means of authoritative knowledge."

The following extract from Sâyana's Commentary on Parâs'ara's Code<sup>2</sup> will show the use which the Brâhmans made of this argument, in order to substantiate the authority of their legal text-books.

"Does it not seem after all," he says, "as if this Smriti (containing as it does the laws of men) hardly deserved a commentary of its own, inasmuch as it is difficult to make out on what grounds it claims any authority? For, if we appeal to a Sûtra of Jaimini's (the founder of the Pûrva-mîmânsâ) where he has proved that the Veda possesses an authority irrespective of anything else, these arguments can hardly apply to books which are evidently the work of men, and entirely dependent on the authority of their sources. These sources again, if they be considered as the life and strength of that authority, are often very indistinct. First, they could never fall under the cognizance of the senses, because the very nature of duty or law is transcendental. Nor can this ultimate reason or source be found in induction, inasmuch as induction is only possible after observation. Neither can it be looked for in the sayings of other men, because min is exposed to error, and cannot even express things as he has really perceived them. But even if man was free from error, there would always be room for doubt and opposition. And as to finding the authority for these laws in direct precepts of the Sruti (Mantras and Brahmanas) this is out of the question, because such precepts are not to be found there. We have never seen a passage in the Veda where precepts like those of the Smriti, to keep the body clean, &c., are given. To admit the right of induction

<sup>ा</sup> पूर्वविज्ञानविषयं विज्ञानं स्मृतिहरूयते। पूर्वज्ञानाद्विना तस्याः प्रामाण्यं नाव-धार्यते ॥ And again, मन्वादीनामणि यदि पथमं किनित्रमाणं संभाष्यते ततः स्मरणं भवेत्रान्यथा। कस्मात्पुनः पुत्रं दुहितरं चाधिकस्य बंध्यादै।हित्रोदाहरणं। छतं। स्थानतुख्यत्वात्पुत्रस्थानीयं हि मन्वादेः पूर्वविज्ञानं। दे।हित्रस्थानीयं स्मरण्। अतश्च यथा दुहितुग्भावं परामृश्य दे।हित्रस्मृतिं भ्राति मन्यते तथा मन्वादिभिः प्रत्यक्षाद्यसंभवपरामर्शाद्ष्यकादिस्मरणं मिथ्येति मंतव्यं॥

<sup>2</sup>MS, Bodl. 172, 173.

for laws of this kind would be most dangerous, for it would apply with equal force to the precepts of Buddha, to worship the holy sepulchre, &c.

"However, there is an answer to all these doubts. A great difference exists between the Smritis of Manu and the Smritis of Buddha, because Manu's authority is asserted by the undeniable Veda itself. It is said in the Veda, Whatever Manu said, was medicine; but there is no passage there in any way favourable to the Smriti of Buddha, and therefore the right of applying induction eannot be considered dangerous,

because it never could be extended to Buddha's doctrines.

"Quod non," says the opponent. "This passage of the Veda, 'Whatever Manu said, was medicine,' is only an Arthavâda (an explanatory remark), and has no evidence by itself. It only serves to illustrate or recommend another precept, viz., that two verses of Manu's are to be used at a certain sacrifice. Therefore, there is no passage in the Veda to warrant the authority of the Smriti; and if Sâkya's, i.e., Buddha's, Smriti be exceptionable, the same applies to the Smriti of Manu. Thus it is said, As men speak often untruth and are exposed to error, as no divine precept is given, faith only can be authority.' But further, even admitting that there was a shadow of authority for Manu, what could be said in favour of Parâs'ara's Smriti, which is now to be explained? For, although the Veda may praise Manu, it never does the same for Parâs'ara, and thus Parâs'ra's authority at least can hardly be defended.

"Against all this our answer is: the Smritis are an authority, because that they should have authority is understood by itself; and there is no reason why they should not be considered as having authority. Three reasons are given why Manu and the rest could not claim any authority, viz, 'that men speak untruth, that they are exposed to error, and that no divine precept is given.' These objections, however, are entirely out of order, because nobody would ever think that Manu and Paras'ara, who have been perfect from their very birth, could have spoken untruth, and could have erred. So much for the first two objections. And whoever denied that these sages were perfect from their very birth, as Mantras, Arthavadas, Itihasas, and Puranas, prove distinctly not only the existence of Paras'ara and others, but also their perfection? Nay, even if we had not the testimony of the Mantras, how could the perfection of Paras'ara and others be denied, which is involved in their very existence? A difference of opinion is quite impossible. And has it not been proved in the chapter on the gods in the

तथा च मने। ऋंचः सामियेन्ये। भवंति खस्य विधेर्वाक्यरोषे श्रूयते मनुर्वे यतिकं-चिरेव वरे सङ्ग्रेषजं भेषजताया इति ॥

Mahâdeva, in his Commentary on the Hiranyakes'i sûtras, says that the Sruti bears witness to the authority of the Smritis by declaring that whatever Manu said was medicine.

श्र तिरपि स्मृतीनां वेदम् छत्वमाह यह्नै किंच मनुरवद्त्त हों पत्रिमिति भेषजं यथा हितमेवं मनुवचनमपि प्रमाणत्वेन हितमित्यर्थः॥

As dhayyas at the Somaraudra Charu, in the middle of the Samidheni, or firekindling hymns. The same argument occurs in Kumarila's Tantravarttika, i. 3.,

<sup>2</sup> If this refers to the Sankarshanakanda, which is ascribed to Jaimini,

Uttara mîmansâ, that the Mantras do not require any further proof for what they say? It is true that in the chapter on the Arthavâdas it has been admitted that what the Arthavadas contain is not always to be believed. But this is only on account of some impossible things which are occasionally mentioned therein. Therefore an Arthavada like this, 'Whatever Manu says is medicine,' although it only serves to recommend another rule, must yet be considered as true in itself. With regard to Sakva, nothing similar can be brought forward; and thus it is well said elsewhere, 'May a man scorn all the erroneous doctrines of Arhat, Chârvâka, and Buddha.' As regards Parâs'ara in particular, it is wrong to say that his fame is not equally founded on the Veda, for it is said in the Srati, 'Thus spoke Vyasa, the son of Paras'ara.' If. therefore, the famous Veda-Vyasa is praised as the son of Paras'ara, how much more famous must not Parâs'ara, his father, have been! In the genealogical Brâhmana of the Vâjasanevi-s'âkhâ, the son also and the grandson of Paras'ara are mentioned in the succession of pupils and teachers who handed down the Vedal, 'Ghritakaus'ika received from Pârâs'aryâyana, Pârâs'aryâyana from Pârâs'arya, Pârâs'arya from Jatukarnya, &c' Therefore Paras'ara stands quite on a level with Manu; and the same applies to all the other Rishis, like Vasishtha and Yajnavalkya, who are authors of Smritis, and are mentioned in the Sruti. Thus we read, 'The Rishis did not see Indra clearly, but Vasishtha saw him clearly.'2 'Atri gave his children to Aurva, who longed for a son.'3 'Yajnavalkya had two wives.'4 Therefore one must not think of attacking the Smritis of Manu and others by any means.

and forms an appendix to the Karmamîmânsâ-sûtras (cf Prasthânabheda),

we ought to read Pûrva-mîmânsâ instead of Uttara-mîmânsâ.

े Brihadaranyaka, 5. 6. 3. 2 Taittirîya-Sanhitâ, 3. 5. 2. अस्वया वा इंद्र प्रत्यक्ष नापश्यन् तं विसष्टः प्रत्यक्षमपश्यत् सा प्रज्ञवीत् ब्रह्मणं ते वक्ष्यामि यथा त्वत्पुरोहिताः प्रजाः प्रज्ञनिष्यंते प्रथ मेतरेभ्य ऋषिभ्या मा प्रवाच इति । तस्मा पतान् स्तोमभागानव्रवीत् ततो विसष्ठगुरोहिताः प्रजाः प्राजायंत तस्माद्वासिष्ठो ब्रह्मा कार्यः ॥

"The Rishis did not see Indra clearly, but Vasishtha saw him clearly. Indra said, 'I shall tell you a Brâhmana, so that all men that are born will have thee for Purohita; but do not tell of me to the other Rishis' Thus he told him these parts of the hymns; and ever since, men were born having Vasishtha for their Purohita. Therefore a Vasishtha is to be chosen as Brahman."

Cf. Tândya Brâhmana, xv. 5., where it is said of the Bharatas that they will always have a Vasishtha as Purchita. The Commentator there observes, that Bharata may either mean the kings of that name, or men in general.

³ Taittirîya-Senhitâ, 7. 1. 8. अत्रिरद्दादेश्वांय प्रजां पुत्रकामाय स रिरिचाने। ऽमन्यत निर्वीयः शिथिलो यात-यामा स एतं चत्रात्रमपश्यत्तमाहरत्तेनायज्ञत ततो वै तस्य चत्वारो वीरा अजायंत सहोता सद्गाता स्वध्वयुः सुसभेयः ॥ "Atri gave his children to the son of Urva, who longed for a son. Then he felt lonely, and saw that he was without power, weak, and decrepit. He saw this Chatûrâtra; he took it and sacrificed with it. Four sons were born to him from it,—a good Hotri, a good Udgâtri, a good Adhvaryu, and a good Brahman."

<sup>4</sup> Satapatha-brâhmana, xvii. 4. 5.

"The third reason also which was brought forward against the authority of the Smriti, viz that the precepts given there are not based upon passages of the Sruti, does not hold good, because passages are met with which are the source of all the laws given in the Smriti. Thus we read, 'These five great sacrifices are every day commenced and every day performed: the Devayajna (to the gods, the Pitriyajna (to the fathers, the manes), the Bhûtayajna (to all beings), the Manushyayajna (to men), the Brahmayajna (to Brahman, the divine Self).' And although there is no distinct precept in the Veda for ablutions &c, yet all this is implied. Thus the Bhattâchâryâs say. 'It is right to respect the Smritis, because they are delivered by Vedic authors, because their origin is well established, and because they derive their authority from the Veda, if but rightly understood.' The Munis see the Sruti, and they deliver the Smriti; therefore the authority of both is proved on earth by full evidence. A man who despises these two, and adopts fallacious doetrines, is to be avoided by good men as a heretic and Veda-blasphemer.

"But one might object that if these precepts can be learnt from the Sruti, the Smriti would be unnecessary, because that only which cannot be learnt from other sources forms a fit object for a new work. Here then we say that these precepts, though they can be learnt from the Veda, are nevertheless put together in the Smritis for the purpose of making the order of their performance more easy, by leaving out the Arthavadas, and by taking from some Sakhas of the Veda particular facts omitted in others. Now it might again be objected that this is done in the Kalpa-sutras, and that therfore there was no necessity for the Smritis. But this is wrong, because there are two different kinds of duties to be performed, called S'rauta (based on Sruti) and Smarta (based on Smriti). The S'rauta ceremonies consist in sacrifices like the Dars'apûrnamâsa, &c, which can only be performed after the sacred fire has been placed in the house, and they are clearly based upon the Veda, as we read it The Smarta sacraments and traditional customs, on the contrary, consists in ablutions, rinsing the month, &c., and they are to be considered as based upon a Sakha of the Veda which is hidden, but the existence of which must be inferred. Although, therefore, those precepts which regard the placing of the sacred fire, &c., are put together in the Kalpa-sûtras, yet as other duties, such as ablutions, rinsing, &c., are not included in them, the Smritis have still their legitimate object."

This discussion has been given here at full length because it is a genuine specimen of Indian orthodox dialectics. Whatever may be thought of this style of argument, we see at all events how great an importance has always been attached by the Brâhmans to the distinction between Sruti and Smriti.

It may also have been observed in this extract, that it is not quite in accordance with the language of Sâyana to speak of Sûtra works as Smritis in the plural. He applies this term to metrical codes only, like Manu, Yâjnavalkya, and Parâs ara, but not to Sûtras or

<sup>&</sup>lt;sup>1</sup> Taittirîya-âranyaka, ii. 10.

Vedångas. This, however, does not affect our present question, because even Såyana, though he does not call the Sûtras by the name of Smritis, places them notwithstanding in the same category with the codes of law, and separates them from the Sruti, upon which they are founded, but with which they are not to be confounded. The Kalpasûtras are called by him s'rauta, i. e., based on revelation, but not Sruti (revelation), because although they treat of the same subjects as the S'ruti, they are themselves extracts only from the sacred writings. They are arranged by authors whose names are given, while, according to Indian notions, Mantras and Brâhmanas were only seen by the Rishis,

but neither composed nor arranged by them.2

That sûtras, even where they contain Vedanga-doctrines, are distinctly excluded from the Sruti, may be seen from the following passage. In the Tantravârttika (1. 3.), Kumârila says, "There is a great difference between the Kalpa-sûtras, which teach the performance of sacrifices enjoined by the Vedas, such as we now possess them, and the Smritis, which derive their authority from parts of the Veda that have either disappeared or are dispersed, or the existence of which can be proved by induction only. It is easier, therefore, to establish the authority of the Kalpa-sûtras than that of the Smritis. The objections which have been raised against the authority of the Smritis, and which had to be removed by us before, cannot be thought of with regard to the Kalpa-sûtras, not even if it were only for argument's sake. The question, therefore, is only this, whether the Kalpa-sûtras have the same authority as the Veda, or whether they merely derive their authority from it. As the Veda is called 'shadanga,' 'having six members,' these six members, and amongst them the Kalpa-sûtras might seem to be implied by the common name of Veda. This, however,

Mahâdeva, in his Commentary on the Hiranyake și-sûtras, says distinctly, सूत्रेषु स्मृतित्वं स्मृत्यधिकरणे स्थितं। तत्सूत्रकारणे शक्तं न्यायवित्समय इति मीमांसासिद्धांतस्वीकारदर्शनेन॥

<sup>1</sup> Kumârila remarks that, although the six Velângas are not called by the name of Smriti, they are Smriti in the same sense as the Dharmasûtras, i. 3. 9. स्मृतित्वं दियंगानां धर्मसूत्राणां चाविशिष्टं ॥ यद्यपि स्मृतिशब्देन नांगानामभिधेयता । तथाप्येषां न शास्त्रत्वप्रमाणत्वनिराक्रिया ॥

<sup>2 &</sup>quot;When we spoke of this (the authorship of Madhuehhandas) to a learned Hindu friend, he exhibited very marked dissatisfaction and distress, begging us to write and tell Professor Wilson that the hymn had no author; that it had existed from everlasting; and that Madhuehhandas was only the fortunate seer to whom, on the last occasion of its revelation, it had been revealed."—Benares Magazine for June 1851, "On Müller's Edition and Wilson's Version of the Rig-Veda."

अप्रमाण्यं स्मृतीनां च यदशब्दतये।दितं । पूर्वपक्षे न तद्वकुं करुपस्त्रेषु शक्यते ॥ प्रत्यक्षवंदशब्दत्वात्तदुक्ता नापशब्दता । न ह्यत्यंतानृतं वक्तुं शक्यते पूर्वपक्षिणा ॥

would be wrong; 1 for the Kalpa-sûtras, as is well-known, are composed by human authors like Mas'aka, &c. They do not take their names, like the Kathaka and other Sakhas of the Veda, from those by whom they were proclaimed, but from their real authors. It is true, no doubt, that the authors of the Kalpa sûtras have the name of Rishis, and it might be said that as Sis'u Angirasa was not the author of the Sais'ava hymns in the Samaveda, the Kalpa-sûtras too were not composed, but only proclaimed, by those whose names they bear, particularly as there are even Brâhmanas, for instance those of the Aruna and Paras'ara s'akha, which have nearly the same form as the Kalpa-sûtras. Nevertheless, nothing can be more mistaken than the opinion of those who would put the Kalpa-sûtras on the same footing as the Veda, because people who teach and learn the Kalpa-sûtras know that there was a time when these works did not exist, and that they were composed by certain authors like Mas'aka Baudhâyana, Apastamba, As'valâyana, Kâtyâyana, and others."2 They are drawn as he observes in another place, partly from the Veda, but partly also from other sources; and the same applies, according to him, to all the Vedangas and Smritis; nay, even to later works, such as the epic and pauranic poems.3

### वद्दवं करूपसत्राणां ने। वक्तव्यं मनागपि।

<sup>2</sup> Kumārila expressly observes that these names signify certain individuals, and not Charanas (sects), like those of Katha, by which certain Sākhās of the Veda were promulgated.

यथा च कठादिचरणैरनादिभिः प्रोच्यमानानामनादिचेदशाखानामनादिसमाख्या-संभवो नैवं नित्यावस्थितमशकादिगात्रचरणप्रवचननिमित्तसमाख्योपपत्तिः । मशकबौधायनापस्तंबादिशब्दा ह्यादिमदेकद्रव्योपदेशिन इति न तेभ्यः प्रकृति-भूतेभ्या ऽनादिग्रंथविषयसमाख्याव्युत्पादनसंभवः॥

"The branches of the Vedas which were proclaimed by the sects of Katha and others from all eternity, have a fair claim to be called eternal. But this does not apply to works handed down by the sects or families of Mas'aka and others, however long they may have been established. For names like Mas'aka, Baudhâyana, and Apastamba, imply an individual being which had a beginning, and therefore it is impossible that a title derived from these names should ever belong to an eternal work."

And again:

यथैव हि करुपसूत्रग्रंथानितरांगस्मृतिनिबंधनानि चाध्येत्रध्यापयितारः सरित

तथाश्वलायनवैधायनापस्तंबकात्यायनप्रभृतोन् प्रथकारत्वेन ॥

"For teachers and pupils do not only know by heart the Kalpa-sútra books, and the other Vedanga and Smriti compositions, but they also remember As'valâyana, Baudhâyana, Apastamba, Kâtyâyana, and others, as the authors of these books."

ै तत्र यावद्धर्ममाक्षसंबंधि तद्धे दप्रभवं। यच्वर्थसुखविषयं तह्योक्वयवहारपू-वंकमिति विवेक्तव्यं। एषैवेतिहासपुराणयारप्युपदेशवाक्यानां गतिः॥

"All that has reference to virtue and final beatitude is taken from the Veda, while other matters, the purpose of which consists in pleasure and gain, are according to the customs of men. This distinction applies not

It might therefore be best to distinguish between Smriti or tradition in general, and the Smritis or law-books in particular. We might then speak of s'rauta and smarta-sûtras, comprehending by the former name all Sûtras, the source of which can be traced in the Sruti; by the latter those of which no such source exists, or at least, is known to exist. The title of Smritis in the plural (or Smriti-prabandhås) might be left, for convenience sake, to such works as Sâyana is speaking of, which are composed not in Sûtras but in S'lokas. It ought to be remembered, however, that the same subjects which are treated in the metrical Smritis of Manu and others, had similarly been treated in Sûtras (s'rauta, grihya, and sâmâyâchârika), and that the principal difference between the two lies, not in their matter, but in their age, and their

style.

An objection against this division and terminology, not unknown to the Brâhmans themselves, is that it is difficult to say whether certain Smârta-sûtras may not be based upon some lost S'âkhâ of the Veda. The S'rauta portions of the Kalpa-sûtras, there can be no doubt, are founded on S'ruti, if by this name we understand not only the hymns, but also the Brâhmanas of the Veda But there are only few allusions, even in the Brâhmanas, the ceremonies described in the Grihya-sutras; and the few passages which are quoted from the S'ruti in their support, are chiefly taken from the Aranyakas and Upanishads, the latest branches of Vedic literature. As to the Achâras, or the established rules of conduct with regard to particular temporal duties, even Indian writes admit that there are only very vague allusions to them in the S'ruti, and they try to prove that these laws are based on parts of the Veda which no longer exists. This is a view which is taken for instance by Haradatta in his commentary on Âpastamba's Sâmayâchârika-sûtras

only to the Vedangas, but also to authoritative passages in the Puranas and Itihasas."

Uvata, in his commentary on the S'akala Prátis'akya, takes the same view. He says, "that as the Veda was too difficult to be used by itself, learned men have extracted from it different doctrines on the ceremonial, the metre, and grammar, and brought them into a more intelligible form in the Sûtras"

यसात्के गळवें द्वाक्येन शक्यते ऽनुष्ठातुं विक्षिप्तत्वाहें द्वाक्थानां ग्रहार्थत्वाश्च अतः कविभिरावार्येवेंद्र्यंकु रालेवेंद्र्यंभ्या निष्कृष्य कर्मार्थं सुखावबोधनानीमानि विद्यास्थानानि प्रवर्तितानि । शिक्षा कर्गो व्याकरणं निरुक्तं छंद्रो ज्योतिषमिति धर्मशास्त्रं पुराणं न्यायविस्तरो मीमांसादौंनि ।

And again:

अत आचार्यो भगवान् शौनको वेशर्थवित् सुहङ्गृत्वा ब्रह्मणेभ्ये। ऽर्थवादानुतस्य

विधि समाहत्य पुरुषहितार्थमृग्वेदस्य शिक्षाशास्त्रं कृतवानिति॥

<sup>1</sup> Thus smartam karma is well defined by Shadgurus'ishya in the Sarvanukramanîbhashya, as 'nishekadi s'mas'anantam smriti-grihyavihitam-karma.' In the Commentary on As'valayana's S'rauta sû tras it is said, that, if observances. like rinsing the mouths,&c., are prescribed in the S'rauta Sûtres (as they are for instance As'val i. 1. 3.), this is only done in order to show that such observances are acknowledged and presupposed by the

and it deserves to be examined more closely. On the first Sûtra, 1 \*Therefore let us now explain the Samayacharika duties," he makes

the following observations.

"The word 'Therefore' implies a reason, which is that as the s'rauta (sacrificial) and garhya (domestic) ceremonies have been explained, and as these ceremonies presuppose other observances, these other observances must now be explained too. For when it was said before (in the Srauta and Grihya sûtras), that such and such an act was to be performed by a man after he had rinsed his mouth, by a man who is clean, who holds a pavitra in his hand, who is invested with the sacred thread. &c, an acquaintance with all these things, such as rinsing, &c., is presupposed. The twilight prayers, too, are referred to in the preceding Sûtras, when it is said, that a man who does not perform his twilight prayers is impure, and unworthy of every sacrifice. Several other instances occur; and it is therefore necessary to explain now immediately those other precepts called samayacharika (temporal). Samayacharika is derived from samaya (agreement) and achara (custom). Samaya, a human agreement is of three kinds: vidhi, injunction: niyama, restriction; pratishedha, prohibition. Rules founded upon samaya are called samayacharas, from which the adjective samayacharika. Dh. ma (virtue) is the quality of the individual self, which arises from action, leads to happiness and final beatitude, and is called aparva, supernatural. But, in our Sûtra, dharma means law, and has for its object dharma as well as adharma: things to be done and things to be avoided.

"It might be said, however," continues the Commentator Haradatta alluding to the same controversy which we saw before treated of by Sâyaṇa, "that if samaya (human agreement) be the authority for the law, it would be difficult to deny the same authority to the Bauddhas and their laws, to worship the holy sepulchre, &c., and therefore

Apastamba has added the next Sûtra 2

'Those agreements are of authority which were made by men who knew the law.'

"We do not say," Haradatta remarks, with regard to these words, "that every agreement becomes of authority, but those only made by men like Manu, &c., who knew the law. But then it might be asked, how it can be found out that Manu knew the law, and Buddha did not? People answer, that Buddha could not have had a knowledge of the divine law. But the same might be said also of Manu; and if a knowledge of divine things be ascribed to Manu, on account of the excellence which he acquired by his virtue, then, again, it would be the same for Buddha. There is a known verse: "If Buddha know the law.

S'rauta-sûtras though they belong to the province of the Grihya ceremonies. स्मातांनां स्नानाचमनयज्ञोगवीतादोनां श्रीतकर्माविरद्धानामस्मिन् शास्त्रे प्राप्ति-प्रदर्शनार्थमिद्माचमनं कर्मागं विधीयते। श्रीचार्थस्य गृहप्रवेशात्प्रागेव कृतत्वात्। तदुक्तं। मनःप्रसाहात्सस्योक्यातमसा स्नानकर्मणा। आचांत्या चात्मनः शुद्धि कृत्वा कर्म समारभेदिति॥

ेश्र शतः सामयाचारिकान्धर्मान्व्याख्यास्यामः ॥ १ ॥ वैधर्मञ्चसमयः प्रमाणं ॥ २ ॥

<sup>3</sup>सुगतो यदि धर्मज्ञः कपिलो नैति का प्रमा।

and Kapila does not, what is truth? If they were both omniscient, how could there be difference of opinion between them?' If this be not so, a distinction must be made; and this has been done by Apastamba in his

next Sûtra: 'And the Vedas (are of authority).'1

This Sûtta is explaind by Haradatta in the following manner:—
"The Vedas are the highest authority for good and bad; and none of the objections made before could apply to the Vedas, which are faultless from all eternity, evident by themselves, and, as they were revealed, unaffected by the faults of human authors. Therefore, while to us those agreements are of authority which were made by men who knew the law, the Vedas, again, were the authority for those men themselves, like Manu, &c. And although we have not before our eyes a Veda, which is the source of these laws, we must still conclude that Manu and the rest had."<sup>2</sup>

ताबुभौ यदि सर्वज्ञौ मतिमेदः कथं तयाः॥

Dr. Weber, in his dissertation on the Upanishads, thinks it is not impossible that Kapila, the founder of the Sankhya, and Buddha were in fact one and the same person. (Indische Studien, i. 436.) He afterwards qualifies this conjecture, and calls it not very probable. It is true that the Indians themselves observed a certain similarity between the doctrines of Kapila, and Buddha. But this would rather show that the two were different persons. Nor would the legend that Buddha was born at Kapila. vastu, the town of Kapila, or rather of the Kapilas, seem to prove the identity of Kapila and Buddha. By another conjecture, the same ignenious scholar makes the founder of the Sankhya (Panchas'ikha Kapileya) the same person with Kapya Patanjala, who occurs in the Satapathabrâhmana; while, in a former article (i. 84.), both Kapila and Patañjali together, the former as the founder of the Sankhya, the latter as the author of the Yoga system, are merged into Kapya Patanjala. Afterwards, however, this opinion also is retracted, because Dr. Weber thinks that the Yoga system might be a later development of the Sankhya.

<sup>1</sup> वेदाश्य ॥३ ॥

<sup>2</sup> Somes'vara, who calls himself a son of Madhava, and of whose work "Tantravarttikatîka" there is a manuscript at the E. I. H. (No. 1030), dated Samvat, 1552, goes even a step farther, and says that, although rules of the Smritis may be against the sacred law, the Veda must not withstanding be considered as their source, because the Smritis themselves maintain that the Veda is the highest authority, an admission which the followers of Buddha protest. Cf. p. 80 against. नन् याज्ञवल्क्यादिभिर्णिप यदुच्यते द्विजातीनां शूद्राद्दागेपसंग्रहः न तन्ममं मतं यस्मात्तत्रात्मा जायते स्वयं तेन पनरित्यादिहेतुद्रशेनपूर्वकं धर्माधर्मीपदेशनान्न तन्मात्रेण वेदमूलत्विनरा-करणं यक्तमित्याशंक्य वेद एव द्विजातीनां निःश्रयसकरः पर इत्यादिना तैः प्राधान्येन वेर्मूलत्वामिश्रानात् &c. Cf. Yâjnavalkya, ed. Stenzler, i. 56., i. 40.; Manu, iii. 12, 13., where the Commentator mentions Vasishtha as having spoken of the marriage of a Brahman with a S'ûdrâ, the ceremony not being accompanied by sacred hymns, as a kind of morganatic marriage, kâmato vivâhaḥ, वासिष्ठोऽपि श्रद्धामप्येके मंत्रवर्जमिति मंत्रवर्जितं श्रद्धावि-वाहमाह॥

It is matter of considerable interest to know whether this opinion of Haradatta's, as to the previous existence of a larger number of Vedic works, deserves credit or not. The opponent of the orthodox Kumarila in the Tantra-varttika remarks very truly, that to invoke the testimony of lost parts of the Veda is like calling a dead person as a witness.1 And if we had no better authority for this opinion than so late a commentator as Haradatta, we should hardly be justified in mentioning it as an argument Anybody, however, who is acquainted with the character of Indian commentators, will admit that they seldom commit themselves to novel theories, but almost always repeat what existed before in the tradition of their schools; a fact which at once increases and diminishes the usefulness of their works. Thus we find in the case before us, that Apastamba himself, whose sûtras Haradatta explains, entertained a similar opinion on this subject. In the twelfth section of his Sûtras, when speaking of some rules on the Svâdhyaya (praying), he says2, "that certain rules must be considered as given in Brahmanas of which the tradition or reading has been destroyed. Their former existence," he says, "must be inferred from the simple fact, that these rules are still followed by men; the only exception being where customs can be proved to depend on selfish motives. this case, a man who follows such unauthorised customs, shall go to hell."

With regard to the hymns, it is in itself very unlikely that no more should have existed than those which happen to be collected in the Rig-veda; and even in the Rig-veda we see that the number of hymns varied in different communities. The ancient poetry of India, however, would hardly have furnished authoritative passages for legal and ceremonial questions; and there is no doubt that the lost tradition which is appealed to by later writers, refers only to Brâhmanas. A

े मृतसाक्षिकव्यवहारवच प्रलीनशाखामूलत्व कल्पनायां यस्मै यद्रोचते स तत्प्रमाणीकुर्यात् ।

"If a man maintain a lost tradition to have been a source, he may prove what he pleases, for it is like appealing to a dead witness." And again: येन यत्ने न मन्त्राचौरात्मवाक्यं प्रपादितं कस्मात्तेनैत्र तन्मूळं चोदना न समर्पिता॥ यस्यैव यदभिप्रेतं स एवःतत्मळीनशाखामस्तके निश्चिष्य प्रमाणोक्क्यांत्॥

"Why has a divine precept not been established by Manu and the others as the source of their teaching, which would not have cost them more labour than to proclaim their own doctrine? Anybody may throw whatever he likes into the skull of a lost tradition, and then invoke it as an authority."

ेश्राह्मणोक्ता विधयस्तेषामुरसन्नाः पाठाः प्रयोगाद्तुनीयंते। यत्रतु प्रीत्युपळ-ब्थितः प्रवृत्तिर्न तत्र शास्त्रमस्ति तद्गुवर्तनाना नरकाय राघ्यति॥

The Commentator says: उत्सन्नाः गठा अध्येतृदौर्वल्यात् ॥

"The original passages were lost by the negligence of the students."

Kumarila observes: शाखानां विप्रकीर्णत्वात्पुरुषाणां प्रमाद्त:।

नानाप्रकरणखत्वात्स्मृतेर्मुलं न दूश्यते॥

number of these dogmatic works are still in existence; but others. which are always quoted along with them, are now lost, or known by extracts only. There existed a considerable number of ancient sages who embodied their doctrines, whether on philosophical or ceremonial, on metrical or grammatical questions, in independent works, which were handed down by tradition among their descendants. But, as Kumarila observes, through the carelessness and forgetfulness of men, and also by the extinction of families, these works were necessarily lost; and it is, indeed, less surprising that many of these Brahmanas should have been lost, than that so many should still have been saved, if we remember for how long a time oral tradition was in India the only means of preserving them. Kumarila, however, was too keensighted not to perceive the danger of admitting lost Sakhas of the Veda as authorities, and he makes several reservations in order to guard against a promiseuous use of this argument. The Buddhists also might appeal to a lost S'akha, and thus upset all the arguments. of the orthodox philosophers. But in spite of the bug-bear of the Buddhists, the general fact that some Sakhas had perished was admitted by Kumarila, as well as by Apastamba, both endeavouring to prop up the authority of the Smriti by the broken pillars of the S'ruti. I

The evidence which has been brought together is sufficient to establish the fact, that the distinction between Sruti and Smriti, revelation and tradition, had been established by the Bråhmans previous to the rise of Buddhism, or, at all events, previous to the time when the Sûtra style began to be adopted in Indian literature. There existed, previous to the Sûtra period, a body of literary works propagated by oral tradition, which formed the basis of all later writings on sacred subjects, and which by the Bråhmans was believed to be of divine origin. The idea expressed by the verb s'ru, to hear, i. e. to receive by inspiration, is known in the Bråhmanas. The name of Smriti seems to occur for

"The original text from which the Smriti was derived cannot always be found, because the S'akhas are scattered about, students are negligent, and because these rules stand under different heads."

And again: दूर्यते हाद्यत्वे ऽप्यर्थ (वि) स्मरणं प्रथनाशश्च ॥

"As if we did not see in our own time that subjects are forgotten and works lost."

# न च प्रलयो न संभाव्यते । दृश्यते हि प्रमादालस्यादिभिः पुरुषक्षयाञ्च।

"And it must not be said that their destruction is impossible, for we see it takes place every day, whether by negligence, idleness, or by the death of men."

¹ येश्च मन्वादिस्मृतीनामप्युत्सन्नवेदशाखामूलमभ्युपगतं ताम्प्रत्प्रति सुतरां शावयादिभिरिप शक्यं तन्मूलत्वमेव वक्तुं। को हि शक्षुं यादुत्सन्नानां वाक्यविषये-यत्तानीयमं कर्तु। ततश्व यावित्कचित्कियंतमिष कालं कैश्चिदादियमाणं प्रसिद्धिं गतं तत्प्रत्यक्षशाखाविसंवादे ऽप्युत्सन्नशाखाम्लत्वावश्वामनुभवत्तुस्यकक्षतया प्रतिभायात्। अत एव विरोधि त्वनपेक्ष्यं स्यादिति॥ the first time in the Taittirîya-âranyaka¹, though it is said to be used there in the sense of S'ruti. In the Sûtras, however, the distinction between S'ruti and Smriti is distinctly stated. We find it in the Anupada-sûtras,² which we have reason to reckon amongst the earliest specimens of this class of literature. In the Nidâna-sûtras also, ancient tradition is mentioned by the name of Smriti ³; and although in Pâṇini the technical distinction between S'ruti and Smriti is not mentioned, it would be wrong to draw any conclusions from this, as there can be little doubt that Pâṇini is later than the Anupada-sûtras.

The Six Velangas.

We shall now proceed to an examination of those works which belong to the Sûtra-literature of India, as far as they have reference to the Veda.

The Brâhmans say there are six members of the Veda, the six Vedângas. This name does not imply the existence of six distinct books or treatises intimately connected with their sacred writings, but merely the admission of six subjects the study of which was necessary either for the reading, the understanding, or the proper sacrificial employment of the Veda. Manu calls the Vedângas by the name of Pravachanas, which is a title not unusually applied to the Brâhmanas. And indeed, instead of looking for the Vedângas to those small and barren tracts which are now known by this name, it is in the Brâhmanas and Sâtras that we have to look for the Vedânga doctrines in their

<sup>2</sup> Anupada-sûtra, ii. 4. श्रुतिस्मृतिदृष्टसंगन्नैः Cf. Indische Studient, i. p. 44. <sup>3</sup> Nidâna-sûtra, ii. 1. आचार्यस्मृतीनां । याज्ञिकाः स्मृती । Cf. Indische i. p. 45.

4 Manu, iii. 189. : अग्रयाः सर्वेषु वेदेषु सर्वश्रवचनेषु च।

"Those priests must be considered as the purifiers of a company who are most learned in all the Vedas and all their Angas."—Sir W. Jones. Kulluka: प्रक्षणीवाच्यते वेदार्थ एभिरिति प्रवचनान्यंगानि॥

"Because the meaning of the Veda is proclaimed by them, therefore are the Angas called Pravachanas."

<sup>5</sup> काळविनामपि प्रयचनविहितः खरः खाष्ट्याये । प्रवचनशब्देन ब्राह्मणमुक्यते । प्रोच्यत इति प्रवचनं ।

Com,

¹ Taitt. År. i. 1, 2.: स्मृतिः प्रत्यक्षमैतिह्यमनुमानश्चतुष्यं ॥ The Commentator explains Smriti by अनुमेयश्च तिमूलं मन्वादिशास्त्रं । "the laws of Manu and others whose source is a revelation the existence of which must be inferred." Pratyaksha (sensuous impression) is, according to Sâyaṇa सर्वपुरुषाणां श्रोतिये श्राह्म वेद्वावयं, "the word of the Veda which all men can perceive in their teacher." Aitihya (tradition) is explained by इतिहासपुराणमहाभारतब्राह्मणादिकं, "legends, Purâṇas, the Mahâbhârata, and the Brâhmaṇas." Lastly Anumâna, if we believe Sâyaṇa, does not here mean inference, but customs of good men, by which or from which the existence of an authority, that is, of S'ruti and Smriti, as the source of these customs, is inferred. अनुमानः शिष्टाचारः। तेन हि मूलभूतं श्चारम्मनुमीयते।

original and authentic form. The short Vedângas which are generally added to the manuscripts of the Veda, and which by several scholars were mistaken for the real Vedângas, represent only the last unsuccessful attempts to bring the complicated and unintelligible doctrines of former sages into an easy and popular form, and to preserve at the same time the names which had been sanctioned by antiquity.

A very clear and rational statement as to the character of the Vedângas in early times, is given in the Brihadâranyaka and its commentary. According to them the different doctrines of the Vedângas are to be considered as integral parts of the Brâhmanas in the same manner as the Purânas and Itihâsas. These, as we saw before, were to be taken in the sense of epic or paurânic stories, incorporated in the Brâhmanas, as illustrations of ceremonial questions. By Itihâsa, as the commentator says, (Brih. Ârany. ii. 4.) we have to understand stories like those of Urvas'î and Pururavas in the Satapatha-brâhmana; by Purana, passages on creation and the like, for instance, "in the begining there was nothing," &c. He then proceeds to quote passages from the Brâhmanas which he calls Upanishads (mysteries), Ślokas (verses), Sûtras (rules), Anuvyâkhyas (explanations), and Vyâkhyas (comments). It is under these heads that the Vedângas had their original place.

It is more difficult to determine where and when the Vedângas were first mentioned as six. In the Mundaka-upanishad the number of the Vedângas is given as six, but in a line which is not unlikely to have been interpolated. Yâska (Nir. i. 20.) quotes only the Vedângas, but not the six Vedângas. The number of six occurs in the Charaṇavyūha, where we meet with the well-known versus memorialis, containing the titles of the six Vedângas. The same number occurs in Manu

"Among the Kâlabavins also the accent exists in the perusal of the Veda enjoined by the Pravachanas. Com. By the word pravachana is meant the Brâhmana, and it is called so because it is proclaimed."

There is a passage in the Prasthanabheda,

एवं प्रवचनभेदात्प्रतिवेदं भिन्ना भूयस्यः शाखाः।

"For each Veda there are several Sakhas the difference of which arises from different Prayachanas."

Here pravachana means Brâhmana, because the difference of the Brâhmana-s'âkhâs does arise from Brâhmanas peculiar to each. It is possible, however, that Madhusûdana used pravachana in the sense of pronunciation, the difference of pronunciation being the chief cause of the Sanhitâ-s'âkhâs. Pravachana is used in the Kathopanişad, ii. 23., in the sense of "reading."

¹ शिक्षा कर्गो व्याकरणं निरुक्त छंशे ज्योतिषं ॥ Åpastamba, who occasionally quotes Slokas in his Sûtras, does not seem to have known this verse. His words are (ii. 4. 8.), षडंगो वेश कर्गे व्याकरणं ज्योतिषं निरुक्त शिक्षा। What follows, in the only MS. I know, is eaten away by worms; but then comes the wordछंशोविचित, which was the title of a metrical treatise, and is quoted as much before Pingala, in the Sabda-Kalpa-druma, s. v. तस्य प्रथाः छंशोविचितिर्पिगळ छंशोमंत्ररी श्रुतबोधाद्यः संति॥ One of the Paris'ishtas of the Sûmaveda begins with the words

53 SIKSHA.

(iii. 185). There is a passage in the Chhândogya-Upanishad where a mention of the six Vedângas might be expected, at the beginning of the ninth Prapâthaka. The number six, however, does not occur there, although Vedânga doctrines are clearly implied under somewhat unusual names. The earliest mention of the number six in reference to the Vedângas seems to be contained in one of the Brâhmanas of the Sâmaveda. But there again, though the number six is given, the titles of the several Vedângas are not mentioned. It is said there (Shadvins'a-Br. iv. 7.) of Svâhâ, that her body consists of the four Vedas, and that her limbs are the six Angas, or members of the Veda. It is possible, however, that more ancient Brâhmanas allude to the number of six; at all events we see that it was sanctioned for the Vedângas before the end of the Brâhmana period.

The six doctrines commonly comprehended under the title of Vedângas, are Sikshâ (pronunciation). Chhaudas (metre), Vyâkarana (grammar), Nirukta (explanation of words), Jyotisha (astronomy), and Kalpa (ceremonial). The first two are considered necessary for reading the Veda, the two next for understanding it, and the last two for employing it at

sacrifices.

अथातश्छद्सां विचयं व्याख्यास्यामः। The Paris ishtas, however, are later than Apastamba and Pingala; for the author of the Paris ishta declares that he made use of Pingala's work: ब्राह्मणात्तंडिनश्चेन पिगलाच महात्मनः। निदानादुक्थशास्त्राच छद्सां ज्ञानमुद्धत्॥ The title छद्दोचिचित refers, therefore, most likely to the Nidâna-sûtra, which also begins with अथात र्छंद्सां विचयं Cf. MS. Berol. 95. In the Commentary on the Sâkala-prâtis'âkhya, at the end of the 14th Book, the Vedângas are enumerated as follows:

व्याख्यास्यामः । कर्षा व्याकरणं निरुक्तं शिक्षा छंदोविचितिज्योतिषामयनं ॥ 1 This passage has been pointed out and translated by Colebrooke (Miscellaneous Essays, i. 12.). "Narada, having solicited instruction from Sanatkumara, and being interrogated by him as to the extent of his previous knowledge, says, I have learnt the Rig-veda, the Yajur-veda. the Sâma-veda, the Atharvana (which is) the fourth, the Itihâsa and Purana (which are) a fifth, and (grammar, or) the Veda of Vedas, the obsequies of the manes (पिज्यं), the art of computation (राशि), the knowledge of omens (देवं), the revolution of periods (निधि com. महाकालादिनिधिशास्त्रं), the intention of speech (or art of reasoning) (वाकावलिया), the maxims of ethics (एकायनं), the divine science (or construction of scriptures) (देवविद्यां, com. निस्क ), the sciences appendant on holy writ (or accentuation, prosody, and religious rites) (ब्रह्मचियां), the adjuration of spirits (भूतविद्यां, com. भूत तंत्र), the art of the soldier (अत्रविद्यां, com. घनुवेंद्) the science of astronomy (तक्षत्रविद्यां), the charming of serpents (सर्पविद्यां), the science of demigods (or music and mechanical arts, गारुड see page 39.) : all this I have studied; yet do I only know the text, and have no knowledge of the soul."

2 नत्वारो ऽस्ये वेदाः शरीरं षडंगान्यंगानि । ओषधिवनस्पतया लोमानि ॥
"The four Vedas are her body; the six Angas her limbs; herbs and trees
her hair." See also the text frequently quoted from the Veda, ब्राह्मणेन
पडंगा वेदो निष्कारणोऽ ध्येयो इ यश्च ॥ "The Veda, with its six members,

SIKSHA, OR PHONETICS.

Sâyana, in his Commentary on the Rig-Veda, defines Sikshâ as the science of the pronunciation of letters, accents. &c.; and he quotes from a work of the Taittirîyas, who have devoted a chapter of their Âranyaka to this subject. New in the seventh book of the Taittirîya-Âranyaka we still find the following headings: "Let us explain the Sîkshâ," "On Letters," "On Accents." "On Quantity," "On the Organs of Pronunciation," "On Delivery", "On Euphonic Laws."

Unless we admit that the rules on Sikshâ had formerly their place in this chapter of the Taittirîya-Āraṇyaka, it would be difficult to explain why all the principal subjects of the Sikshâ should be mentioned here, why the whole chapter should be called the Sikshâ chapter tityuktah s'ikshâdhyâyah), and why it should begin with the words "Let us now explain the S'ikshâ." Sâyaṇa, who was certainly acquainted with the Vedic tradition, takes the same view in his Commentary on the Sânhitî-upanishad. He states that the Taittirîya-upanishad consists of three parts, of the Sânhitî, Yâjnikî, and Vârunî-upanishad. Of these the last is the most important, because it teaches the knowledge of the Divine Self. The first serves as an introduction or preparation, in order to bring the mind of the pupil into a proper state for receiving the doctrines on the highest subjects. Now immediately after the first invocation, the Upanishad begins with the Sikshâ chapter; and in order to explain this, Sâyaṇa remarks that this doctrine is necessary here, in order to enable the pupil to read and pronounce the sacred texts

ought to be known and under-stood by a Brahman without any induce-

¹ शिशां व्याख्यायाम: The i in S'ikṣû is short (hrasva), though it is strong (guru). It is only in the Âranyaka that S'îkshû occurs instead of S'ikshû. S'ikshû is derived from s'ak, to be able, and means originally a desire to know. From the same root we have s'akta, a teacher (Rv. vii. 103. 5.); s'ikshamana, a pupil (Rv. vii. 103. 5.). S'ishya, a pupil, comes from a different root. Sâyana says, शिस्पंत चेदनाये।पदिश्यते खरवणांद्यो यत्रासी शिक्षा। सेव शोक्षा॥ The other headings are, वर्णः। सरः। मात्रा। बळं। साम। संतानः।

<sup>2</sup> I owe a copy of this Commentary of Sâyana's to the kindness of Dr. Röer, at Calcutta. Seeing, in the catalogus of manuscripts puolished by the Asiatic Society of Calcutta, a work of Sâyana's, called S'ikshâbhâshya, and imagining this to be a commentary on the Sikshâ-vedânga or one of the Prâtis'âkhyas, I wrote to Dr. Röer for a copy of it. Though I was untimately disappointed when I found that it had nothing to do with the Prâtis'âkhyas, I still consider the Commentary of great interest, particularly Sâyana's introduction to the Vedânta system in it. Dr. Röer has since published the whole Taittirîya-uyanıshad, with the Commentaries of S'ankara and Ânanda Giri, in No. 22 of the Bibliotheca Indica.

³ सेयं तैत्तिरोये।पनिषत् त्रिविधा । साहिती याशिको वारुणी चेति । तत्र प्रथमे प्रपाठके संहिताध्यानस्योक्तत्वात् जपोपनिषत्सांहिती । द्वितीयतृतीययोाः प्रपाठकयोगां ब्रह्मविद्या विहिता तस्यां । & . . तासां तिसूणां मध्ये वारुणोमुख्या । correctly, and thus to understand their real meaning. It might be objected, Sâyana remarks, that as a correct pronunciation is equally required for the earlier ceremonial portion of the Veda (Karma-kânda), the S'ikshâ ought to have been inserted there. But then, he says, this chapter in its present place stands between the ceremonial and the philosophical portion of the Veda, like a lamp on the threshold of a door giving light to both. He adds, that a right pronunciation and understanding is of greater importance for the philosophical part; because mistakes in the sacrifices and the ceremonial can be made good by penance, while there is no penance for a wrong understanding of philosophical principles.

If then there is reason to believe that the doctrine of the Siksha was formerly embodied in the Aranyakas, perhaps even in the Brahmanas, the question is, why it afterwards lost this place. This can only be accounted for by the appearance of more scientific treatises, which embraced the same subjects, but in a much more systematic style than anything which we could expect to meet with in the Brahmanas and

Aranyakas.

These were the Prâtis'âkhyas, a branch of literature which will claim our particular attention for more than one reason. If we compare the Prâtis'âkhyas with Brâhmaṇas and Āraṇyakas, they evidently indicate a considerable progress of the Indian mind. They were written for practical purposes; their style is free from cumbrous ornaments, and unnecessary subtleties. It is their object to teach and not to edify; to explain, not to discuss. Where the Brahmanas or Aranyakas allude to grammatical, metrical, or etymological questions they give nothing but i heological and mystical dreams. So far from receiving elucidation. the points in question generally become involved in still greater darkness It is not unlikely that teachers appealed to these passages of the Brâhmanas in order to derive from them the highest possible sanction for their doctrines. But these doctrines, if they were intended for use and instruction, must have been delivered in a more homely and more intelligible form. The origin of the Prâtis'akhyas may therefore be accounted for in the following manner :- During the Brahmana period the songs of the Veda were preserved by oral tradition only and as the spoken language of India had advanced and left the idiom of the Veda behind as a kind of antique and sacred utterance, it was difficult to preserve the proper pronunciation of the sacred hymns without laying down a certain number of rules on metre, accent, and pronunciation in

<sup>े</sup> तस्माहिद्यायामवैकल्याय यथाशास्त्रं बोद्घुमुपनिषत्पाठे प्रयत्नातिशयं विधातुमत्रेव शिक्षाध्याया ऽभिधीयते॥ तस्य च प्रथस्यार्थज्ञानप्रधानत्वात्पाठे मा भूदौदासीन्यमित्येतद्थे द्वितीयानुवाके शिक्षाध्याया ऽभिधीयते।

<sup>2</sup> The passage from the Pushpa-sûtras (viii. 8.) which was quoted before, काल्यविनामाप प्रवचनविद्धितः स्वाः स्वाध्याये, does not prove that the rules on the accent were laid down in the Brâhmana of the Kâlabavins, because it may also mean that the accented delivery of sacred texts was enjoined in the Brâhmana.

ŧ,

general. The necessity, however, of such a provision could hardly have been felt until certain differences had actually arisen in different seats of Brahmanic learning. Thus, when the attempt was made to prevent a further corruption, a certain number of local varieties in accent and pronunciation, and in the recital of the hymns, had actually crept in and become sanctioned by the tradition of different families or schools. These could not be given up, nor was there any means of determining which was the ancient and most correct way of reciting the sacred songs of the Veda. Discussion having arisen on this subject, we find in the Brâhmanas occasional mention of verses which, if improperly pronounced, become changed in their meaning. But even where the sense of the Veda was not affected, the respect paid by each teacher, by each family, and by each Brahmanic community to its own established oral tradition, was sufficient to give an imaginary value to the slightest peculiarities of pronunciation, accent, or metre.

A twofold advantage was gained when the rules and exceptions of the old sacred dialect were first reduced to a system. ancient dialectical differences, many of which are not so much attributable to corruptions as to the freedom of the old spoken language. were carefully preserved, and even apparent irregularities and exceptions were handed down as such, instead of being eliminated and forgotten. Secondly, a start was made towards a scientific study of language; by the collection of a large number of similar passages. general laws were elicited which afterwards served as the phonetic hasis of a grammar like that of Panini;—a work which, although ascribed to one author, must have required ages of observation and collection before its plan could be conceived or carried out by one individual. Even the Pratis'akhyas, though they do not refer to grammar properly so called, but principally to the phonetic laws of language, presuppose a long-continued study of grammatical subjects previous to the time of their composition. The best proof of this lies in the great number of authors quoted in the Pratis'akhyas, whose opinions are frequently at variance with the precepts contained in the Pratis'akhvas themselves. Though we are not now in possession of the works of these earlier authors, yet we have a right to assume that their doctrines existed formerly in the shape of Prâtis'âkhyas. In the same way as one only of the different S'akhas or recensions of the Rig-veda has been preserved to us in manuscript, the S'akalas'akha, which was followed by S'aunaka, we may understand how one only of the Prâtis'akhyas of the Rig-veda has come down to us: particularly as its composition is ascribed to the same S'aunaka who is said to have united the Bashkala and the Sakala-s'akhas, and who, as far as the Sanhita is concerned, was a follower of the Sais'ira-s'akha. Saunaka's Piâtis'âkhya of the S'âkalas, being one of the latest compositions of this kind, was probably also the most perfect and complete. As Saunaka states the different opinions of Sakala grammarians on important points, where he himself differs from them, his work was the more likely to supersede previous Prâtis'akhyas, particularly at the time when the Vedic religion was on its decline, and Brahmanic doctrines daily losing influence. Though it is true that as yet only one Pratis'akhya belonging to each Veda has been found in manuscript,

yet they all belong not to one of the four Vedas in general, but to one Sakha of each of them. Pratis'akhya, therefore, does not mean, as has been supposed, a treatise on the phonetic peculiarities of each Veda, but a collection of phonetic rules peculiar to one of the different branches of the four Vedas, i. e., to one of those different texts in which each of the Vedas had been handed down for ages in different families and different parts of India. The differences between the S'akhas of the same Veda, as far as the words of the hymns are concerned seem certainly not to have been very great, if we may judge from the few instances to which different Sakhas of the same Veda have been preserved in manuscripts. Most Sakhas do not differ in the general arrangement or the Sanhitas, or collections of hymns, but merely in single words or verses. In a few cases only one Sakha contains some hymns more than another. The Sakhas were not independent collections of the old hymns, but different editions of one and the same original collection, which in the course of a long continued oral tradition had become modified by slight degrees: The texts of the Veda as they existed and lived in the oral tradition of various sets of people became Såkhås differing from other Såkhås somewhat in the same way as the MSS. of the New Testament differ from each other The Prâtis'akhyas, besides giving general rules for the proper pronunciation of the Vedic language in general, were intended to record what was peculiar in the pronunciation of certain teachers and their schools. Even in cases where these schools had become extinct, we find the names of their founders, preserved as authorities on matters connected with the pronunciation of certain letters or words.

The real object of the Prâtis'âkhyas, as shown before, was not to teach the grammar of the old sacred language, to lay down the rules of declension and conjugation or the principles of the formation of words. This is a doctrine which, though it could not have been unknown during the Vedic period, has not been embodied, as far as we know, in any ancient work. The Prâtis'âkhyas are never called Vyâkaraṇas, grammars¹, and it is only incidentally that they allude to strictly grammatical questions. The perfect phonetic system on which Pâṇini's grammar is built, is no doubt taken from the Prâtis'âkhyas; but the sources of Pâṇini's strictly grammatical doctrines must

be looked for elsewhere.

Although, then, there is no necessity to suppose that every one of the numerous Vedic Sakhas possessed full and complete Pratis'akhyas, like that belonging to the Sakhas, which was finally collected by Saunaka, yet the great number of previous authorities quoted in our Pratis'akhyas makes it likely that a large number of similar works did actually exist

<sup>1</sup> According to the first Prâtis'âkhya, i. 58, पादवज्ञेव प्रेशन्। their rules would seem to affect passages of the Brâhmanas too, like होता यस्त्। &c. and the Commentator adds, ऋद्ध यञ्जभा तद्येष्ट्विप। Most of these Praishas, however, are taken from the hymns; as, for instance, the words होता यस्त्। Rv. i. 139. 10. This is different for the Yajur-veda where the general rules of the prâtis'âkhya extend their influence to the sacrificial in vocations.

for the principal Sakhas that are mentioned in earlier writings. In the Pratijnaparis ishtal it is stated that there were fifteen codes of law for the fifteen Sakhas of the Vajasaneyius: and Kumarila says that the text of these Codes of law and of the Grihyas was peculiar in each Charana in the same manner as the formal rules of the Prâtis'âkhyas. 2 Madhusûdana Sarasvati's definition of Prâtis'âkhya is perfectly in accordance with this view of the subject. He says: -"The: Veda3 consists of two parts: one teaching the sacrifice, the other teaching Brahman, or the Supreme Being. As there are three different branches of the ceremonial, the Veda is, for the better performance of the sacrifices, divided into three: the Rig-Veda, Yajur-Veda, and Sama-Veda. The ceremonial of the Hotri priests is performed with the Rig-Veda; that of the Adhvaryu priests with the Yajur-Veda; that of the Udgatri priests with the Sama Veda. The duties of the Brahman priests, and of him for whom the sacrifice is offered, are also contained in these three Vedas. The Atharva-Veda is not used for solemn sacrifices, and is very different from the others, as it teaches only expiatory preservative, or imprecatory rites. For each Veda there are several Sakhas, and their differences arise from various readings."4 Afterwards he goes on to observe that "the rules of pronunciation (s'iksha), which apply to all the Vedas in general, have been explained by Panini but that the same rules as they apply to the Sakhas of each Veda, have been taught by other sages under the title of Pratis'akhyas."5 If we here take the word

<sup>1</sup>MS. Bodl. w. 500.:

तेषां पंचदश यथास्वरं प्रतिष्ठाः प्रतिशाखं च कुलधर्माः।

The meaning of "Yathâsvaram pratishthâs" is doubtful. Should it mean "rules with reference to accents?" If so, they would be the rules of Prâtis'âkhyas. That the Sâkhâs differed about the accents is seen in the case of the Mândukeyas and Sâkalas. Prâtis'akhya I.200. Kātyâyana, as the author of a Prâtis'âkhyas is called स्वरसंस्कारप्रतिष्ठाप्रायता॥

<sup>2</sup>Tantra V. I. 3. (MS. Bodl. W. 325. p. 15 b.)

धर्मशास्त्राणां गृह्यग्रंथानां च प्रातिशाख्यळक्षणवत्वित्रिचरणं पाठव्यवस्थोपळभ्यते । 

<sup>8</sup> Veda is taken here in the general sense of sacred literature, as Uvața says, 
सर्वकालं सर्वदेशेषु प्रतिचरणमविभागेनैकैका मंत्रराशिवेद इत्युच्यते ।

"Every single collection of hymns which existed at any time and in any place, without reference to the divisions in each Charana (seet), is called Veda."

<sup>4</sup>According to Madhusûdana, the Brâhmaṇa part of the Veda, by which he can only mean the Upanishads, is not affected by the peculiarities of the Sâkhâs. if this were true, it would only prove the late origin of the Upanishads. Some Upanishads, however, show traces of various readings, which must properly be attributed to various Sâkhâs. This is admitted, for instance, by Sâyaṇa in his Coommentary on the Yâjnikî or Nârâyaṇîyâ-upanishad. 'Tadî yapâthasampradâyo des'avisesheshu bahnvs'dho dṛis'yate; tatra yadyapì s'âkhâbhedaḥ kâraṇam tathâpi Taittirîyâdhyâyakais tattaddes'anivasibhiḥ s'ishṭair âdṛitatvât, sarvo'pi pâṭha upâdeya eva." Ind. Stud. i 76.

<sup>5</sup> See also Somes vara's Tantra-varttika tika. (MS. E. I. H. 1030, p. 95.) साधारणो विशेषविषया च द्विविधा शिक्षा । तत्र साधारण्या वेदांगत्वेन धर्मप्रा-माण्ये ऽपि कात्यायनादिवणोताया विशेषविषयायाः प्रतिवाक्यं प्रतिपदं चोचा- s'âkhâs (branches) in the sense of different traditionary texts of the four Vedas, Madhusûdana's words do not require any alteration; they would become obscure if, as has been proposed, we took s'âkhâ either in the sense of "a sensol" or of "a portion of the Veda."

The word s'akha is used, however, by some writers in so vague a manner that we need not wonder if its meaning has sometimes been misapprehended. "Traditional text (recension) of the Veda" is perhaps the nearest approach to its real meaning.

The word is sometimes applied to the three original Sanhitâs, the Rig-veda-sanhitâ, Yajur-veda-sanhitâ, and Sâma veda-sanhitâ¹, in their relation to one another, and without any reference to subordinate s'âkhâs belonging to each of them. They may be called the original branches or the three stems of the Veda-tree, each of them branching off again in a number of other s'âkhâs. The "branches," as Kumârila says, have all the same root, revelation (s'ruti), and they bear all the same fruit, the sacrifice (karma). If otherwise, they would be different trees, not different branches². In the same acceptation the word is used for instance by Âpastamba, where he is giving rules as to the time and place where the Veda ought not to be read. He says there (Sâm. Sûtra, 3. 44, 45,) that it ought not to be rehearsed where music or Sâma-hymns are performed, and he adds, that Sâma-hymns ought not to be practised in the neighbourhood of another s'âkhâ, that is, as the commentator observes, of another Veda.

## रणं नियच्छंत्या धर्मश्रमाणाभावाशंकानिराकरणार्थं पृथगुपादाने ऽपि शिक्षात्वेनै-क्यान्नातिरेकापत्तिः।

"There are two kinds of Sikshâ, a general and one which has regard to particulars. It is true that the authority of the general Sikshâ is established, on account of its belonging to the Vedângas; but in order to remove all doubt as to the authority of the particular Sikshâs, published by Kâtyâyana and others, which determine the pronunciation of each sentence and each word, it is clear that it is not different from the other, inasmuch as both are one by their common character of Sikshâ, although they are spoken of separately.

It is said of Sâyana that he wrote commentaries on each of the Sâkhâs of the Rich, Yajush and Sâma.

# ऋग्यजुःसामशाखानामेकेका व्याकृता त्वया। तावता तत्समानार्था ज्ञातुं शक्यास्ततः पराः॥

Ekaika could hardly mean "one from among the Śākhās of each Veda."

2 यदि प्रतिशाखं कर्मभेदः स्यात् तत एकमूलाभावादादित एवारभ्य भिद्यमान-त्वात् समस्तकर्माख्यफळांतरत्वात् वृक्षांतरवद्वे दांतराएयेवाच्येरन् न शाखांत-राणि॥

³ गीतिशब्दाश्च सामशब्दाश्च एते श्रूयमाणा अनध्यायहैतवः ॥ शाखाँतरे च साम्नामनध्यायः ॥ ४४ ॥ वेदांतरसकाशे साम नाध्येयं ॥ The first Sûtra is paraphrased by the Mânavas, iv. 123. सामध्त्रना वृग्य द्वषी नाधोयीत कदाचन i More frequently, however, s'akha is used to signify the various editions, or, more properly, the various traditions, that branched off from each of the three original branches of the Veda. In this latter sense s'akha seems sometimes synonymous with charana. But there was originally an important difference in the meaning of these two terms.

In order to appreciate the difference between s'âkhâ and charaṇa, it need only be remembered that we find "s'âkhâm adhîte," "he reads a certain recension of the Veda," but never "charaṇam adhîte," still less "parishadam adhîte," "he reads a Charaṇa or a Parishad." Hence it is clear that s'âkhâ means originally a literary work, and that Charaṇa does not. If s'âkhâ is sometimes used in the sense of charaṇa or sect, this is because in India the s'âkhâs existed in reality not as written books, but only in the tradition of the Charaṇas, each member of a Charaṇa representing what, in our modern times, we should call the copy of a book.

The Brahmans themselves were fully aware of this difference between s'akha and charana. In a Varttika to Panini, iv. 1. 63., we find charana explained by s'akhâdhyetri, &c., the readers of a s'akhâ." In a passage of Jagaddhara's Commentary on Mâlatîmâdhava, Charana is said to mean "a number of men who are pledged to the reading of a certain s'akha of the Veda, and who have in this manner become one body."1 Pânini2 speaks of Charanas as constituting a multitude, that is to say, as comprising a number of followers. In Apastamba's Sâmayâchârikasûtras, where rules are given as to the relative age of persons who ought to be saluted, the Châranas or members of the same Charana are mentioned immediately after the Pauras'akhyam, or town acquaintances: and in the third place stand the Srotriva-Brahmans. Panini speaks of the Kathaka and Kalapaka as works belonging to the Charanas of the Kathas and Kalapas.4 In a Varttika to iv. 1.63., women are mentioned as belonging to a Charana; for Kathî is the wife or daughter of a Brâhman who belongs to the Charana, or reads the Sákha, of the Kathas. A s'akha, which is always a portion of the Sruti, cannot properly include law books. But followers of certain Sakhas might well, in the course of time, adopt a code of laws, which, as it was binding on their Charana only, would naturally go by the name of their Charana. That this actually took place may be seen from a Vârttika to Pân. iv. 3. 120., where it is said that Kathaka may be used not only for the sacred traditions. but also for the laws of the Kathas Thus the Pratis'akhyas also were called by the name of the Charanas, because they were the exclusive property of the readers of certain s'akhas, and even more so than the Kuladharmas or family-laws.

<sup>&</sup>lt;sup>1</sup> चरणशब्दः शाखाविशेषाध्ययनपरैकतापन्नजनसंघवाचो । Cf. Zur Litteratur, p. 57.

² Pâṇ. iv. 2. 46. चरणेभ्याधर्मबत् seil. समूहार्थे.

³ Åp. i. 4. 4. The Commentator says that चारणशब्दः शाबाध्यागिषु कृतः। Châraṇa, therefore, means a member of a Charaṇa. Lassen (Ind. Alterthumsk. i. 640.) takes Châraṇa in the sense of wandering poets, so named still in Western India.

<sup>4</sup> Pan. iv. 3. 126. गोत्रचरणाद्भ आ scil इद्मर्थे.

As a s'âkhâ consisted of a Sanhitâ as well as a Brâhmana, at all events in later times, differences in the text of the hymns, as well as discrepancies in the Brâhmanas, might lead to the establishment of new Charanas, founded as they were on sacred texts peculiar to themselves. I Sâkhâs of this kind, which differed through the various readings of the Sruti, were considered by the Brahmanas as eternal s'âkhâs, and the Charanas, to which they belonged, were not supposed to have been founded by human authors. It will be seen hereafter that the Brâhmans admitted another class of s'âkhâs, which were founded on Sûtras 3 and derived their names from historical personages. They were confessedly of a later date.

But although, after a careful examination of these passages, we cannot doubt that there was an original difference between s'âkhâ and charaṇa, it is not the less certain that these two words were frequently used synonymously; in the same way as we may speak of the Jews when we mean the Old Testament, or of the Koran when we mean the Mohammedans.

After having established the difference between s'âkhâ and charaṇa, we have still to inquire how both differ from parishad, in order to determine the meaning of Pârshada, another title which is frequently applied to the Prâtis'âkhyas. Here it is important to observe that although every Prâtis'âkhya may be called a Pârshada, 5 i.e., a work belonging to a Parishada, not every Pârshada can be called a Prâtis'âkhya, but those only which contain the rules of pronunciation for a particular s'âkhâ or text of the Vedic hymns, studied and taught in certain Pârishads. 6 Amara explains parishad by sabhâ or goshthi, an assembly; but the codes of law lay down more accurately the number, age and qualifications

<sup>1</sup> Mahâdeva's Hiranyakes'ibhâshya:

स्वाध्यायै तदेशो मत्रबाह्मणातम्कः शांखेत्युच्यते । तये। मंत्रबा ग्रणयोरन्य तर-

भेदेन वेदे ऽवांतरशाखाभेदः स्यादिति चेत् संत्यं॥

"Any portion of oral tradition consisting of Mantras and Brâhmanas is called a s'âkhâ, and it is clear that differences of either the Mantras or Brâhmanas will necessarily lead, in the Veda, to a variety of subordinate s'âkhâs."

<sup>2</sup> अध्ययनभेदाच्छाखाभेदो ऽनादि:। "The various s'âkhâs which arise from various readings are eternal."

and Pân. ii. 4. 3. चरण: शाजा। Pân. vi. 3. १6.

5 Parshada, instead of Parishada. Cf. Pan. iv. 3, 123.

6 I doubt the existence of word like माध्यादिनपाई which Dr. Roth mentions (Zur Litteratur, p. 16.). One may speak of पंचालानां परिषद् or वत्सानां परिषद् &c, and a Prâtis'âkhya current in one of these Parishads may, perhaps, be called वत्सपायदं But माध्यदिन is not the name of a Parishad, but of a Sâkhâ; and therefore the Commentary on Gobhila

be competent to give decisions on all points on which the people, or, if we may say so, the parishioners, might demand advice. That such Parishads or Brahmanic settlements existed in old times, we see in the Brihadâranyaka 1, where it is said that Svetaketu went to the Parishad of the Panchâlas, and many similar passages. character of a Parishad is described in Manu's Code of Laws, xii. 110-173, and by Yajnavalkya, i. 9., where we have the contracted form Parshad instead of Parishad. According to the ideas of these modern writers a Parishad ought to consist of twenty-one Brahmans well versed in philosophy, theology, and law.2 This number, however, can be reduced according to circumstances, as will be seen from passages of Paras'ara's Dharmas'astra. It must not be supposed that the rules laid down in these law-books have always been observed in the formation of a Parishad, particularly as regards the early times of India; yet we may be able to form some conception of their original character, by seeing what has become of them in later times. Paras'ara says:3 "Four, or even three able men from amongst the Brahmans in a village, (grâmamadhye) who know the Veda, and keep the sacrificial fire, form a Parishad.

"Or, if they do not keep the sacrificial fire five or three who have studied the Vedas and Vedangas and know the law, may well form a Parishad.

"Of old sages who possess the highest knowledge of the Divine Self, who are twice born, perform sacrifices, and have purified themselves in the duties of the Veda, one, also, may be considered as a Parishad.

"Thus, five kinds of Parishads have been described by me: but if

they all fail, three independent men may form a Parishad."

Mâdhava, in his Commentary on Parâs'ara, quotes a similar passage 4 from Brihaspati's Code:—"Where seven, five, or three Brâhmans, who know the customs of the world, the Vedângas (or the Vedas and the Angas), and the law, have settled, that assembly is like a sacrifice." The real difference, therefore, between a Charana and a parishad, seems to be that the former signifies an ideal succession of teachers and pupils who learn and teach a certain branch of the Veda; of the Brahmans, necessary to form such an assembly as should

speaks of a माध्यदिनशाखीयप्रातिशाख्यं। but could not well have spoken of a वत्सशाखीयप्रातिशाख्यं॥

¹ Bṛih, Âr. vi. 2. श्वेतकेतुई वा आरुणेयः पंचालानां परिषद्माजगाम॥ ² ए इविश्रतिसंख्याकेर्मीमांसान्यायपारगैः। वेदांगकुश्लेश्चैव परिषस्वं प्रकल्पयेत्॥

³ चत्वारा वा त्रया वापि वेद्वंतो ऽग्निहोत्रिणः । ब्राह्मणानां समर्था ये प्रिष्ट्सा विधीयते ॥ अनाहिताग्नयो ये उन्ये वेद्वेद्ांगपारगाः । पंच त्रयो वा धमझाः परिषट्सा प्रकीर्तिता ॥ मुनीनामात्मविद्यानां द्विज्ञानां यञ्चयायिनां । वेद्वतेषु स्नातानामेका ऽपि परिषद्भवेत् ॥ पंच पूर्वे मया प्रोक्तास्तेषां वा संभवे त्रयः । स्ववृत्तिपरिपुष्टा ये परिषट्सा प्रकीर्तिता ॥ 4 लोकवेदांगधमंज्ञाः सप्त पंच त्रया वापि । यत्रोपविष्टा विप्राः स्युः सा यज्ञसादृशी सभा ॥ while the latter means a settlement of Brahmans, a community or college to which members of any Charana might belong. Thus members of the same Charana might be fellows of different Parishads, and fellows

of the same Parishad might be members of different Charanas.1

Now as Pårshada may be used as the title of any work that belonged to a Parisad, or formed, so to say, the traditional library of the Pårishadyas, it is clear that this title could not be confined to the Pråtis'åkhyas, though it would necessarily include them. If a follower of the S'åkala-charana was a fellow of the Vatsa-parishad, the Såkala-pråtis'åkhya would necessarily be one of the Pårshada works of the Vatsas, and the Parishad of the Vatsas would through this fellow be connected with the Sakala charana. This is what Durga means when in the Commentary on the Nirukta<sup>2</sup> he says "that those Pårshadas only are called Pråtis'åkhyas which are adopted in a Parishad of one's own Charana for teaching certain grammatical doctrines connected with the reading of the Veda according to one or the other Såkhå." The Pråtis'åkhyas are in fact a sub-division of the Pårshada books, and in this sense it might well be said that Pråtis'åkhya is an adjective to Pårshada.<sup>3</sup>

After the true meaning of Sakha, Charana, and Parishad, of Pratis'akhya and Parshada, has thus been determined, we have still to inquire about those other works, which together with the Pratis'akhyas were mentioned as the peculiar property of the Charanas. I mean the Kula-dharmas, or law books. They of course could not be called Pratis'akhyas, but they might claim the title of Charanas, (a name which has not been met with,) or Parshadas. Now we saw before that Apastamba actually refers to the Parishads in his Samayacharika-sutras (1. 11.), where, after having pointed out the days on which the Veda ought not to be repeated, he remarks, that farther particulars on this point are to be found in the Parishads. What does this mean? All that Haradatte has to say in the commentary on this very passage, is that by Parishads

<sup>&</sup>quot;Those Pårshada books by which in a Parishad (parish or college) of one's own Charana (sect), the peculiarities of accent, Sanhitâ and Kramareading, of Pragrihya-vowels and separation of words, are laid down as enjoined for and restricted to certain Såkhâs (branches or recensions of the Veda) are called Prátis'âkhyas."

<sup>3</sup> See Dr. Roth, Zur Litteratur, p. 58.

<sup>&</sup>lt;sup>4</sup> अन्यद्तः परिषत्सु ॥

must here be understood the Manava. Vasishtha, and other Dharmas'astras. These Dharmas'astras, however, as we now possess them, betray their comparatively modern origin by their form and metre, and occasionally by their matter also. As many of them have been printed at Calcutta, it may be seen that the majority of these small Sloka works are utterly worthless. They were probably made up only in order to fill the gap which had been occasioned by the loss of ancient legal works. This loss was felt the more severely because the names of the old authors retained their celebrity, and were still quoted in common practice and courts of law. I have succeeded, however, in recovering in manuscript large portions of the Kula-dharmas, which are written in Sûtras, as might be expected in works contemporaneous with the Prâtis'âkhyas. It has been thought that the sources of Manu and other Dharmas'astras must be looked for in the Grihya-sûtras. This is not quite correct. The Grihya-sûtras are concerned chiefly with the Sanskaras, or domestic sacraments, extending from the birth to the marriage of a man, and in so far only as these sacraments form a portion of the subjects treated in the Dharmas'astras, the Grihva-sûtras might be considered as their original sources. But then the same might be said of the Srauta-sûtras, because the solemn sacrifices prescribed by them are likewise alluded to in the Codes of Law. By far the greater portion, however, of these codes is taken up with Achâra, i. e., laws, manners, and customs. The difference between these observances and the ceremonies laid down in the other two branches of Sûtras is this: the domestic sacraments (grihya), as well as the solemn sacrifices (s'rauta), are administered by parents or priests for the good of their children and pupils, while the Achara comprises all the duties which are to be performed by an individual on his own behalf.2 These duties refer to the different castes, and to the respective occupatious of each. The rules of discipline for the young student, the occupations of the married man, the law of inheritance, the duties of the king, the administration of the law, are accurately detailed in these Sûtras. They are of great importance for forming a correct view of the old state of society in India, and the loss of the larger number of them is greatly to be regretted. Their general title is Samayacharika-sûtras or Dharmasûtras, and they form the third part to the Srauta and Grihva. sûtras. Thus we have, beside the Srauta and Grihya-sûtras of Apastamba, a collection of Sâmayâchârika-sûtras belonging to the same charana of the Apastambas, the members of which, as Kumârila tells us, followed one of the Sakhas of the Taittiriyaveda. Another collection

"Baudhayana says, the highest law is that contained in each Veda, which we shall follow in our explanation; the second is the traditional law; the third, the customs of eminent sages,"

² The threefold division of Dharma is pointed out by the Prayogavaijayantî. (MS. Bodl. W. 68, p. 16. a.) तैः प्रत्येकं मितो धर्मस्त्रिविशः परिकीर्तितः॥ ४३ ॥ अनेनैवाभिप्रायेणाह वैध्यायनः। उपरिष्ठो धर्मः प्रतिवेदं तस्यानु व्याख्याम्यामः (sio)। स्मार्तो द्वितोयः। शिष्टाचारस्तृतीय इति॥

of Dharmasûtras, which, however, is liable to critical doubts, belongs to the Gautamas, a Charana of the Sâma-veda. It has been printed at Calcutta. A third one bears the name of Vishnu, and has been printed at Calcutta, enlarged by modern additions written in S'lokas. The Vâsishtha-dharma-s'âstra, printed at Calcutta, belongs likewise, at least in part, to this class of Dharmasûtras. Whether we shall succeed in finding still more of these Sûtra-works is questionable, though prose quotations from other Dharmas'astras would justify this expectation. There can be no doubt, however, that all the genuine metrical Dharmas'âstras which we possess now, are, without any exception, nothing but more modern texts of earlier Sûtra-works or Kula-dharmas belonging originally to certain Vedic Charanas.

To return to those works of the Parshada literature which are known by the name of Pratis'akhyas, I may refer for further particulars to Dr. Roth's valuable observations on this branch of literature. To him belongs the merit of having first pointed out in manuscript four of these works. The first is ascribed to S'aunaka, and belongs to the S'akala-s'akha of the Rig-veda. I call it the Sakala-pratis'akhya, not the S'ais'ira-pratis'akhya, though it pretends to follow, like S'aunaka's Anukramanî, the Sanhita of the S'ais'irîya-s'akha, which is itself a subordinate branch of the Sakala-s'akha. S'is'ira, however, is never mentioned in this or any other Pratis'akhya, as an authority on grammatical questions

It is doubtful how far the rules given by S'aunaka in his Pratis'âkhya, can be considered as representing the general opinion of the S'âkalas. S'aunaka, no doubt, wrote for the S'âkalas, to whom he likewise addresses his Anukramanî. But the author of the Prâtis'âkhya occasionally quotes the opinions of the S'âkalas as different from his own, and speaks of them in the same manner as he alludes to the opinions of other grammarians. He mentions (i. 65) the S'âkalas as observing a certain peculiar pronunciation out of respect for their master, who seems to have sanctioned it in his own rules. Who this master was is difficult to say. But it is most likely the same who (i. 52) is called the Master, Vedamitra (friend of the Veda), and who (i. 223.) is called S'âkalyapitâ, the father of S'âkalya. His opinions, if we may judge by i. 232., differed from those of the younger S'âkalya. In i. 185, we meet with him again under the name

<sup>&</sup>lt;sup>1</sup> See Prof. Stenzler's Introduction to his edition of Yâjnavalkya, and his remarks on Indian Law-books in Indische Studien, i. 232.

² इदं शास्त्रं पार्षदाख्यमिखलं संपूर्णमुत्तरत्र वक्ष्ये वक्ष्याम इत्यर्थः। शैशि रीये पारायणपाठ इति वावयशेषः। शैशिरीयायां संहितायामित्यर्थः। शैशिरी संहिता शिशिरदृष्टत्वात्। तथा पुराण उक्तं। मुद्गलो गोकुलो वात्स्यः शैशिरः शिशिरस्त्वा। पंचैते शाकलाः शिष्याः शाखाभेद्प्रवर्तका इति। तथा च अग्वेदे शेशिरीयायां संहितायामिति। यथा अग्वेदे पारायणाम्नाये शाकल्ये शैशिरीयकमिति वा। The verses to which the commentary refers are not in the MS. of Såkalya Sthavira, Såkalya the elder, and he is there represented as advocating a pronunciation from which Saunaka, the author of the Prâtis'âkhya, dissents. In i. 199, S'aunaka adopts the opinion of S'âkalya and in i. 208, he likewise mentions him with approbation. But all this would only tend to show that S'aunaka does not consider himself

bound to follow either S'akalya, implicitly.1

There is not a single MS. at present existing of the Rig-veda in which the rules of our Prâtis'âkhya are uniformly observed, and the same applies to the MSS. of the other Vedas. The rules of the Prâtis'âkhyas were not intended for written literature, they were only to serve as a guide in the instruction of pupils who had to learn the text of the Veda by heart, and to repeat it, as part of their daily devotions. As S'aunaka was himself a member of the S'âkalas, we may quote his Prâtis'âkhya as the Sâkala-prâtis'âkhya. But strictly speaking it could only be called one of the Sâkala-prâtis'âkhyas, preserved by the pupils of Saunaka, who, soon after, formed themselves into a new Charana, under the name of Saunakîyas.

The second Prâtis'akhya belongs to the ancient text of the Yajurveda. There is only one MS. of it at the Bodleian Library, together with a considerable portion of the Commentary, the Tribhashyaratna. Professor Wilson, in his catalogue of the Mackenzie Collection (i. 7. No. xxxiii.) mentions another MS., "The Prâtis'âkhya of the Yajurveda, with a Bhâshya or comment, entitled Tribhâsyaratna, from its being said to be the substance of the works of three celebrated sages, Atreya, Mahisha, and Vararuchi." To what particular S'akha of the Black Yajur-veda this Prâtis'âkhya belonged it is difficult to determine. It quotes several of the Charanas, belonging to the Black Yajur-veda, such as Taittirîyakas, Ahvarakas, Ukhya, the founder of the Aukhîyas, and Bhâradvâja, the founder of the Bhâradvâjins. It also alludes to Mîmânsakas, a school of philosophers, mentioned in none of the other Prâtis'âkhyas. Until we receive some more complete MSS, of this Work we can only say that it belongs to some S'akha of the Taittiriya or Black Yajur-veda. Its grammatical terminology, as might be expected, is less advanced and less artificial than that of the Prâtis'âkhya of the modern or White Yajur-veda.

The third Prâtis âkhya is ascribed to the S'âkhâ of the Mâdhyandinas, one of the subdivisions of the Vâjasaneyins; though, perhaps, on the same grounds as those stated above with regard to the Sâkhâ-prâtis âkhya, it might seem more correct to call it the Prâtis âkhya of the Kâtyâyanî yas, a sub division of the Mâdhyandinas. It was composed by Kâtyâyana, and shows a considerable advance in grammatical technicalities. There is nothing in its style that could be used as a tenable argument why Kâtyâyana, the author of the Prâtis âkhya should not be the same as Kâtyâyana, the contemporary and critic of Pâṇini. It is true that Pânini's rules are intended for a language which was no longer

<sup>2</sup> This Prâtis'âkhya has lately been edited by M. A. Regnier, in the "Journal Asiatique."

<sup>&</sup>lt;sup>1</sup> In xiii. 12. Śākalya is mentioned as one of three Achâryas, Vyâli, Śākalya, Gârgya.

<sup>3</sup> It has been edited by Prof. Weber, Indische Studien, vol. iv.

the pure Sanskrit of the Vedas. The Vedic idiom is treated by him as an exception, whereas Kâtyâyana's Prâtis'âkhya seems to belong to a period when there existed but one recognised literature, that of the Rishis. This, however, is not quite the case. Kâtyâyana himself alludes to the fact that there were at least two languages "There are two words," he says (i. 17.)1, "om and atha, both used in the beginning of a chapter; but om is used in the Vedas, atha in the Bhâshyas." As Kâtyâyana himself writes in the Bhâshya or the common language, there is no reason why he should not have composed rules on the grammar of the profane Sanskrit, as well as on the pronunciation of the Vedic idiom.

Some of Kâtyâyana's Sûtras are now found repeated ipsissimis verbis in Pâṇini's grammar. This might seem strange; but we know that not all the Sûtras now incorporated in his grammar came from Pâṇini himself, and it is most likely that Kâtyâyana, in writing his supplementary notes to Pâṇini, simply repeated some of his Prâtis'âkhya-sûtras, and that, at a later time, of these so-called Vârttikas become part

of the text of Pânini.

The fourth Prâtis'âkhya belongs to the Atharva-veda. It is called Saunakîya Châturâdhyâyikâ, and was, therefore, no doubt the property of the Saunakiyas, a Charana of the Atharva-veda. The name of the author is unknown, and we possess as yet but one MS., and that a very imperfect one, in the Royal Library at Berlin. That it belongs to a Såkhå of the Atharvana, is indicated by its very beginning,<sup>2</sup> and one of its first rules is quoted by the commentator on the Såkala-pråtis'åkhya as belonging to an Åtharvana-pråtis'åkhya.<sup>3</sup> Besides, in the fourth chapter of the fourth and last book special reference is made to Atharvana sacrifices.4 We can hardly suppose that Saunaka, the author of the Pratis'akhya of the Rig-veda, was at the same time the author of this Saunakîyâ Châturâdhyâyikâ. S'aunaka, whose name never occurs in the Sakala-prâtis'âkhya,5 is quoted in the Châturâdhyâyikâ, i. 1. 8.6 The grammatical terminology of this little tract is far in advance of technical terms used by Saunaka. Yet there is a certain connection between the two books, and it is most likely that the author of the Châturâdhyâyikâ was a member of the Saunakîya-charana, founded by the author of the Sakala-pratis'akhya. Nay it seems as if its author had retained something of the allegiance which S'aunaka owed to Sakalya and the S'akalas. In one instance, where Panini quotes the opinions of Sakalya, the original is found in the Châturâdhyâyikâ, and not in the Sâkala-prâ-We are told by Panini, that S'akalya pronounced the o of the

<sup>4</sup>आथवणेषु च कर्मसु यागवर्जितेषु मणिबंधनादिषु ॥

6 The quotation refers to S'akala-pr. i. 114.

<sup>&</sup>lt;sup>1</sup> Indische Studien, iv. p. 103.

<sup>&</sup>lt;sup>2</sup> नमेा ब्रह्मवेदाय । अथांगिरसः॥

³ तथा चाथर्वणप्रातिशाख्य **इद्मेव प्रयोजनमुक्त** । एवमिहेति च विभाषाप्राप्त' सामान्येन ॥

<sup>&</sup>lt;sup>5</sup> I still doubt the genuineness of the first verse of the S'âkala-prâtis'â-khya where Saunaka's name has been foisted in at the end. The emendation which I proposed in my edition of the S'âkala-prâtisâkhya, requires the admission of a so-called iyâdipûrana in tvadi.

vocative to be unchangeable (pragrihva), if followed the particle iti.1 Exactly the same rule, and in the very same words, is given in the Atharvana-prâtis'âkhya,2 whereas the S'âkala-prâtis'âkhya teaches first, that the o of the vocative is pragrihya (i. 69)3; secondly, that it is liable to certain changes (i. 132, 135); and lastly, that all pragrihya vowels are unchangeable, if followed by iti (i. 155). In none of these Sûtras do we find the exact words which Panini quotes, and which are found in the Atharvana-prâtis'âkhya. Again, Pânini (viii, 3. 19.) ascribes the dropping of y and v in Vishna tha instead of Vishna tha, in hara chi instead of haray ehi, to S'akalya. Now it is true that this process is not unknown in the S'âkala prâtis'âkhya, but it there assumes quite a different aspect (i. 129. 132. 135): whereas, in the Châturâdhyavikâ the explanation is very much the same as in Panini.4 Panini quotes in the same place (viii. 3. 18.) the spelling adopted in these cases by S'akatayana. This is mentioned likewise in immediate connection with the rules which precede it in the Atharvana prâtis'âkhya; it is not mentioned at all in the Sakala-pratis'akhya. It has been supposed that a rule, which in Kâtyâyana's Prâtis'âkhya is ascribed to S'aunaka, was taken from the Châturâdhâyikâ, and that therefore Kâtyâyana's Prâtis'âkhya was later than that of the Atharva-vedas. But the rule ascribed to S'aunaka by Kâtyâyana is, that a final tenuis, if followed by a sibilant of a different class, is changed into the aspirate, whereas according to the Châturâdhyâyikâ (II. 1. 6.) a tenuis, followed by a sibilant of its own class would have to be aspirated. It must be admitted, however, that no such rule as that ascribed by Kâtyâyana to S'aunaka is found in the S'âkala prâtis'âkhya, and, in other respects, the Pratisakhya of Katyayana shows traces of more modern origin than the Châturâdhyâvikâ.

The following list gives the names of the principal authorities quoted in the S'akala-prâtis'akhya, the Taittirîya-prâtis'akhya, the Kâtyâyanîya-prâtis'akhya the Châturâdhyâyika, the Nirukta and Pânini. I have availed myself of the lists given by Roth, Weber, and Böhtlingk; and though I do not pretend that my own list is complete, it will be sufficient to show the active interest which was taken in

grammatical subjects at that early period :--

For the Sâma-veda no Prêtis'âkhya has as yet been discovered There is a small treatise which I found in the same manuscript of th Bodleian Library which contains the Taittirîya-prâtis'âkhya, and which might be called a Prâtis'akhya of the Sâma veda. But it is so badly written, and so unintelligible without a commentary, that little use can be made of it at present. It is called Sama-tantra, and evidently

64.

Hârîta. T.

¹ It begins (MS. Bodl W. 505.) श्रीगणेशाय नम्: ॥ स्वरोऽनंत्यः। मीचानां।उपांत्यं। उपांत्ये । त्रिषु । आदिः । उपांत्यं च । द्वितीयं । अंतश्च । उपांत्ये ॥ १ ॥ आद्ये । अंत्ये । मध्यं । विपरीत्स्वराणां । जारा माहङ् । शश्म्यु । ऊता। पारिब्बु। दि ॥ २ ॥ वि पिबा दिधिविद्पूर्वा। जरा परा चे। सुरुवा। ईयाङ । अत्ये । शता । तिपीगु॥ &c. From my notes taken in the Royal Library of Berlin, I see that the same work exists there with a commentary (?) in 13 Prapâthakas, समाप्तमिदं छंदोगसंबंधिकं सामतंत्राभिधानं व्याकरणं। The same work I find mentioned in Dr. Weber's interesting article on the Sâma-veda. (Indische Studien, i. 48.) It is curious that this Sâmatantra is called Vyakarana, grammar. The same name is also given to the Riktantra, a small Sikshâ treatise, MS bodl. W. 375. This MS. contains several small treatises on S'ikshâ matters connected with the Sâma-veda, but more in the form of Paris'ishtas : one on Avagraha, or division of words ; another

treats of the same subjects which usually occur in the Pratis'akhyas. Its authenticity is supported by the Charanavyaha', where a Sama-

tantra is mentioned, but without any further particulars.

If it be asked now why all these works, so different in appearance are to be assribed to one period of literature, the Sutra-period, the reasons for it are as follows: first, that the style of the majority of these works is the old Satra style, for instance, in the Taittirivapratis'akhya, the Katyayanîya-pratis'akhya, and the Chaturadhyayika 1: secondly, that the manuscripts call these works Sûtras; thirdly, that even works, written in mixed S'lokas, like those of S'aunaka, are quoted as Sûtras, 2 a title which would never be given to works like the Mânava-dharmas'âstra, &c.; and fourthly, that the same men to whom these works are ascribed are known to have composed other works generally written in the style of Sûtras. That the Prâtis'âkhya of the S'akalas should be written in Slokas and yet be ascribed to S'aunaka, the teacher of Kâtyâyana, is no objection. It would have to be excluded from the Sûtra period, if written in regular Anushtubhs'lokas like those of Manu. But the mixture of the Sloka with other ancient metres indicates better than anything else the transition from one period to another, and is quite in accordance with that position which, as will be seen. S'aunaka occupies in the literary history of India.

By comparing S'aunaka's chapters on S'ikshâ in his first Prîtis'âkhya with the small S'loka compilation which is generally quoted as the Vedânga, the difference of old and modern S'lokas will at once be perceived. This modern tract which has been printed in India, contains scarcely more than the matter of the S'iva or S'amkara-sûtras brought into S'lokas. It mentions the Prâkrit dialects, and represents itself as written after Pâṇini, but not, as Madhusûdana Sarasvati pretends, by Paṇini. Yet it is curious to see how great a reputation this small work must have gained, because Sâyana, who knows the Prâtis'âkhyas and quotes both from the S'âkala and Taittirîya-prâtis'âkhya, regards this small tract as the real Vedânga. In a mimânsâ work, which has been mentioned before, Somes vara's Tantravârttika tîkâ it seems even as if greater authority had been attributed to this short S'ikshâ tract than to

called Sâmasankhyâ; and a third called Stobhânusanhârâ, beginning with the words अयातो हस्बदीघट्छतमात्राएयश्चराणि व्याख्यास्यामः।

1 The title put at the end of the chapters of the Taittirîya prâtis'akh.

va is "iti prâtis'akhya-sûtre prathamah, pras'nah Samaptah, &c."

2 Shadguru s'ishya, in his Commentary on the Anukramanî, says that S'aunaka first composed a Kalpa-sûtra, consisting of 1000 parts and resembling a Brâhmana. सहस्र खंड स्वकृतं सूत्रं ब्राह्म गर्मिनमं This was afterwards destroyed by himself; but his few remaining works, which are written in verse, are equally called Sûtras, सूत्रदशकं।

<sup>3</sup> अथ शिक्षां प्रवक्ष्यामि, पाणिनीयं मतं यथा ।

and again;

शंकरः शांकरीं प्रादाहाश्चीपुत्रया घोमते। वाङ्मयेभ्यः समाहत्य देवीं वाचमिति स्थितिः॥ येनाश्चरसमाम्नायमधिगम्य महेश्वरात्। इत्स्नं व्याकरणं प्रोक्तं तस्मै पाणिनये नमः॥ the more developed and evidently older works of S'aunaka, Katyayana, and others.

Besides these works on S'ikshâ which have been enumerated, from the Taittirîyâranyaka down to the so called Vedânga, we possess another tract on S'ikshâ. called the Mândûkî-s'ikshâ.¹ But this also is probably a production later than the Sûtra period, and it is important only in so far as it bears the name of another Charana of the Rig-veda, the Mândûkâyanas,² and thus confirms what was pointed out before, that each of the old S'âkhâs had originally its own Prâtis'âkhya, although the greater number of them, as well as their Mantra texts, are now lost or preserved only under a more modern form, as may be seen in the case of this Mândûkî-s'ikshâ.

CHHANDAS, OR METRE.

The second Vedanga doctrine, Chhandas or metre, stands very much in the same position as the Siksha. Some name; which have been afterwards adopted as the technical designations of metres, occur in some of the Mantras of the Rig-veda, and there are frequent allusions to metres in the Brâhmanas. What is said, however, in the Brâhmanas with reference to metres, is generally so full of dogmatic and mystical ingredients as to be of scarcely any practical use. In the Aranyakas and Upanishads whole chapters are devoted to this subject. Yet it is again in the Sûtras only that a real attempt has been made to arrange these archaic metres systematically. We have some chapters on metres at the end of the Sakala-pratis'akhya, written in Saunaka's usual style of mixed Slokas. This treatise is anterior to that of Kâtyâyana which we find in the introduction to his Sarvânukrama, because Kâtyâyana is the pupil of Saunaka, as we shall see hereafter. For the metres of the Samaveda we have the Nidana-sûtra in ten prapathakas, which, after explaining the nature and different names of all the Vedic metres, gives a kind of index (anukramanî) to the metres as they occur in the hymns employed at the Ekâha, Ahîna, and Sattra sacrifices. As to Pingalanâga's work on Chhandas, which is most frequently quoted under the title of Vedânga, it does not pretend to be of greater antiquity than the Mahâ-

<sup>1</sup> Another work on Sikshû is mentioned by Raja Rûdhakânta in the article which he has didicated to the Vedûngas in his Subda-kalpa-druma, and for which Amara and Bharata are quoted as authorities. तत्र अकारा-दिवर्णानां स्थानकरणप्रयत्नवोधिका अकुए द विसर्जनीयाः कंट्या इत्यादिका शिक्षा The Commentary on the Sûkalaprâtis'ûkhya also seems to speak of two Sikshûs. यथा ताविच्छिशायां स्युर्मूईन्या ऋटुरणाः सामान्येन सर्वशाखासु रेफा मूईन्य इत्युक्तः। तथान्यस्यां शिक्षायां दंतमूलीय इति रेफो दंतमूलीय उक्तः। एवं सर्वा शिक्षा वर्णेषु स्थानकरणानुप्रदानादि सर्वासु शाखासु विद्याति। न तु नियतः कस्यां शाखायां रेफो मूईन्यः कस्यां दंतमूलीय इति। अत एव व्यवस्थापकमारभ्यते।दंतमूलीयस्तु तकारवर्गः सकाररेफलकारुश्च रेफ वर्ट्यमेके। शाल प्राव १४५।४६।४७। एवमस्यां शाखायां दंतमूलीया वा वर्ट्यों वा रेफ इत्येतद्वधारितं॥

<sup>&</sup>lt;sup>2</sup> Mandukeya is quoted in the Sakala-pratis'akhya, I. 200.

bhâshya, supposing it wer; admitted that Patanjali, the author of this famous commentary on Pâṇini, was the same as Pingala. There would be nothing extraordinary in the fact that Pingala treats of Prâkrit as well as Sanskrit metres. For we have the instance of Kâtyâyana-Vararuchi, who wrote the Vârttikas on Pâṇini and lived before Patanjali, and is said to be the same who wrote a grammar of the Prâkrit dialects. It must be admitted, however, that Pingalanâga's Metric is one of the last works that could possibly be included in the Sûtra period; though there is no sufficient ground for excluding it from this period altogether, merely because those rules which refer to metres not yet employed in the Veda are ascribed to the same Pingala. Besides, Pingala is quoted as an authority on metres in the Paris'ishṭas², a class of literature which does not seem to be separated from the Sûtra period by a long interval.

To the same class of Chhandas works to which Pingala's treatise belongs, and which are not restricted to certain Sakhas, but are intended for the Veda in general, two other works are added by the commentator on the Sakala-pratis'akhya, the one ascribed to Yaska, the other to

Saitava. Both these works, however, seem to be lost at present.

The difference between a Chhandas work belonging to one of the Sakhas, and those treatises which are occapied with metre in general,

may be seen from the following instance.

According to Pingala's Sûtras, a metre of seventy-six syllables is called Atidhriti, a metre of sixty-eight syllables Atyashti. Now Rv. i. 127, 6, a verse occurs of sixty-eight syllables which ought therefore to be called an Atyashti. According to Pingala himself, however, some syllables may be pronounced as two4, and if we follow his rules on this point, the same verse consists of seventy-six instead of sixty-eight syllables. In order, therefore, to remove the uncertainty attached to the metre of this verse, the Chhandas chapter in the Sâkala-prâtis'âk hya (towards the end of the 16th Paṭala) declare that according to the tradition of the Sâkala or Sais'ira-s'âkhâ, this verse is to be pronounced as an Atidhriti, i. e. with seventy-six syllables. The same direction is given in Kâtyâyana's index to the Sâkala-sanhitâ.

### VYAKARANA, OR GRAMMAR.

The third Velanga is Vyakarana or Grammar. According to the account which Indian authors give of their literature, this branch of Vedic learning would be represented by the Grammar of Panini. Here the contradiction becomes even more glaring. In Pingala's Sûtras the Vedic metres were at least treated in the same way as the non-Vedic. But in Panini, the rules which refer to Vedic grammar in particular, form only the exceptions to all the other rules which treat of the regular or classical language. Instead, therefore, of considering the third Vedanga doctrine as represented by the grammarians beginning with Pânini (Pâninyâdayah), as Indian authors do, it would be more correct to say that it is represented by the grammarians ending with Panini (Paninyantah). It unfortunately happened that Panini's work acquired by its great merits such a celebrity as to supersede almost all that had been written on grammar before him, so that, except the name and some particular rules of former grammarians, we have little left of this branch of literature, except what occurs occassionally in the Pratis'akhyas. That Panini knew the Pratis'akhyas had been indicated long ago by Professor Böhtlingk; and it can be proved now by a comparison of Panini's Sûtras with those of the Pratis'akhyas, that Panini largely availed himself of the works of his predecessors, frequently adopting their very expressions, though he quotes their names only in cases where they have to serve as authorities for certain rules.

There are two separate treatises on grammatical subjects, which belong to a period anterior to Panini: the Sutras on the Unadi affixes, and the Sûtras of Sântanâchârya on accents. The Unadi affixes are those by which nouns are formed from roots, the nouns being used in a conventional sense, and not in strict accordance with their radical meaning. They are called Unadi, because, in the Sûtras as we now possess them un is the first-mentioned affix. That Panini was acquainted with the same arrangement of these formative affixes cannot be doubted, because he uses the same technical name (unadi) for them. We do not know by whom these Unali affixes were first collected nor by whom the Unadi-sûtras, as we now possess them, were first composed. All we can say is. that, as Panini mentions them, and gives several general rules with regard to them, they must have existed before his time. But how many of the Sutras existed before the time of Panini, and how many were added afterwards, is a question that can hardly be solved. In their present form the Sutras seem to treat the Vedic words as exceptions, at least they give now and then a hint that a certain derivation applies to the Chhandas only. Nevertheless it is curious to observe that the greater number of words explained by the genuine Unadi-sûtras, are Vedic, some of them exclusively so. If the author of the Sûtras had intended his rules for the Bhasha, there would have been no reason why he should have paid such prominent regard to words of a purely Vedic character. In fact, I believe, that originally the Unadi-sutras were intended for the Veda only, and that they were afterwards enlarged by adding rules on the formation of non Vedic words. At last the non-Vedic or laukika words assumed such a preponderance that some rules, affecting Vedic words only, had actually to

be inserted as exceptions. If a clear line could be drawn between words purely Vedic, and words never used in the Veda, and if the Sûtras referring to the former were separated from those of the latter class, we might perhaps arrive at the original texts of this interesting work. This, however, is an undertaking which would require a more comprehensive and more critical knowledge of the history of the languages.

of India, than any scholar at present is likely to command.

As to Sântana's Phitsûtras we know with less certainty to what period they belong. A knowledge of them is not presupposed by Pânini, and the grammatical terms used by Sântana are different from those employed by Pânini,—a fact from which Professor Böhtlingk has ingeniously concluded, that Sântana must have belonged to the eastern school of grammarians. As, however, these Sûtras treat only of the accent, and the accent is used in the Vedic language only, the subject of Sântana's work would lead us to suppose that he was anterior to Pânini, though it would be unsafe to draw any further conclusions from this.

NIRUKTA, OR ETYMOLOGY.

The fourth Vedanga is Nirukta or Etymology. In the same way as, according to Indian authors, Grammar as a Vedânga, was represented by Panini's Grammar, we find Nirukta also represented by but one work, generally known by the name of Yaska's Nirukta. Nirukta, however, has had this advantage over. Vyakarna, that Yaska's work applies itself exclusively to Vedic etymologies. In the same way as we considered Panini's Grammar as the work where Vyakarana, as a Vedanga, took its final shape, so Yaska also would seem to be one of the last authors who embodied the etymological lexicography of Vedic terms in one separate work. Niruktakâras, or authors of Niruktas, are mentioned by Yaska; and some of them must have been as famous as Yaska himself, because we find that their merits in this respect were not forgotten even at the time of the compilation of the Puranas. For explanations of old Vedic words, for etymologies and synonymous expressions, the Brahmanas contain very rich materials, and, with the exception of the Kalp, no other Vedanga has a better claim than the Nirukta to be considered as founded upon the Brahmanas. Whole verses and hymns are shortly explained there; and the Aranyakas and Upanishadas, if included. would furnish richer sources for Vedic

शुनासिरमिद्रं याहकस्तु मेने सूर्येद्रो तु मन्यते शाकपूणिरिति पराशरः। Another Niruktakrit mentioned by Sâyana is the son of Sthûlashthîvi or, as Yâska calls him, Sthaulashthîvi.

<sup>1</sup> Cf Böhtlingk, Ein erster Versuch über den Accent im Sanskrit, p. 64, ; and Pânini, page xii.

<sup>&</sup>lt;sup>2</sup> Thus Sakapûrni is mentioned as a Niruktakrit in the Vishuupurâna (p. 277. n. 9.); but this is no reason why Sâkapúrni should be the same as Yâska as Colebrooke supposed. (Miscell. Essays, i. 15.) In fact Sâkapûrni is quoted by Yâska himself, for there can be no doubt that Sâkapûrni is the same name as Sâkapûni. In later times, also, Yâska and Skapûni are regarded as distinct persons; for instance, in a verse ascribed, to Parâs'ara (Anukr, Bh. iv. 5. 7.), which occurs in the Brihaddevatâ

etymologies than even the Nirukta itself. The beginning of the Aitareyaaranyaka is in fact a commentary on the beginning of the Rig-veda; and if all the passages of the Brahmanas were collected where one word is explained by another with which it is joined merely by the particle vai, they would even now give a rich harvest for a new Nirukta. It is important, however, not to confound Yaska's Nirukta with Yaska's Commentary on the Nirukta, although it has become usual, after the fashion of modern manuscripts, to call that commentary Nirukta, and to distinguish the text of the Nirukta by the name of Nighantu. The original Niruktas that formed an integral part of the Vedanga literature, known to Yaska himself, can have consisted only of lists of words arranged according to their meaning, like that upon which Yaska's Commentary is based. Whether the same Yaska who wrote the Commentary had some part in the arrangement of the lists of words, is unknown; probably these lists existed in his family long before his time, as Yaska implies himself (Nir. i. 20.). But, as he preserved them by his Commentary, it was natural that their authorship too, should have been ascribed to him. Sâyana gives the following account of this matter :-- "Nirukta is a work where a number of words is given, without any intention to connect them in a sentence. that book, where a traditional number of words is taught, which begin with Gauh, gmâ, and end with Vasavah, Vâjinah, Devapatnyah, there is no intention to state things which are to be understood, 1 because it is only said there that 'so many are the names of earth,' 'so many the names of gold," " &c.

This Nirukta consists of three parts, as may be seen from the Com-

mentary on the Anukramanika. Here we read:

"The first part is the Naighantuka, the second the Naigama, and the third the Daivata, and thus must this traditional doctrine be considered as consisting of three parts.

The Naighantuka begins with Gauh and goes as far as Apare. The Naigama begins with Jaha and goes as far as Ulbam Ribîs'am.

वर्णागमा वर्णावपर्ययश्च हो चापरी वर्णावकारनाशी। धातास्तद्यातिशयेन योगस्तदुच्यते पंचविध निरुक्तं॥

"A Nirukta contains the dectrine of five things; of the addition, transposition, change, and dropping of letters and of the use of one particular meaning of a root." Instances of this are given in another verse:

#### भवेद्वर्णागाद्धंसः सिंहो वर्णविषययात् । गुढोपमा वर्णविकृतेर्वर्णनाशात्पृषोद्दरं ॥

"Hans: is formed by an addition, Sinha by a transposition, Gudholma by a change, Prishodara by a dropping of letters."

2 1-3 Adhyâya.

3 4 Adhyâya.

If Såyana meane to give in these lines an etymology instead of a simple definition of Nirukta, the attempt would be very unsuccessful. Nirukta comes from nirvach, to explain. His definition, however, is right, in so far as the Nirukta does not contain a connected string of ideas, but merely an enumeration of words. There is another definition of Nirukta, which is quoted by Rådhakant in his Sabdakalpadruma and occurs as one of the Kårikås in the Kåşikåvritti (Pån. vi. 3. 109.):

The third, or Deity chapter, begins with Agni and ends with the Devapatnis. Here the gods from Agni to Devi Urjâhutî<sup>2</sup> are gods of the earth; from Vâyu to Bhaga, gods of the air; from Sûrya to the Devapatnis, gods of the sky. People learn the whole traditional number of words, from

Gauh to Devapatnyoh.

"The word Nighantu applies to works where, for the most part, synonymous words are taught. Thus, ten Nighantus are usually mentioned; and this title has been applied to such works as Amarasinha, Vaijayantî, Halâyudha, &c. Therefore, the first part of this work also has been called Naighantuko, because synonymous words are taught there. In this part there are three lectures: in the first: we have words connected with things of time and space in this and the other worlds; in the second, we have words connected with men and human affairs: and, in the third, words expressing qualities of the preceding objects, such as thinness, multitude, shortness, &c.

"Nigama means Veda. As Yaska has quoted many passages from the Veda, which he usually introduces by the words, 'For this there is also a Nigama;' and as, in the second part, consisting of the fourth Adhyaya, words are taught which usually occur in the Veda only, this

part is called Naigama.

"Why the third part, consisting of the fifth Adhyâya, is called Daivata is clear. The whole work, consisting of five Adhyâyas and three parts, is called Nirukta, because the meaning of words is given there irrespective of anything clse. A commentary on this has been composed by Yâska in twenty Adhyâyas. This also is called Nirukta, because the real meaning conveyed by each word is fully given therein."

5 Adbyâya. 2 §§ 1-3. 3 §§ 4-6 4 § 6.

<sup>5</sup> Sâyana inverts here the historical order of things, because Yâska's Nighantu must have been called by this name before the time of Amara's Dictionary. Several Koshas are quoted which have not yet been met with in manuscript: Sarva Kosha, Ranti or Rantideva Kosha, Yâdava Kosha, Bhâguri Kosha, Bala Kosha, all of which must have been in existence

as late as the Commentary on the Meghadûta.

6 I have translated this passage of Sâyana, because Dr. Roth has adopted a different division of the Nirukta in his edition, where he calls the first five books, containing the list of words, Naighantuka; the first six books of Yâska's Commentary, Naigama; and Daivata. It would have been better to preserve the old divisions, which are based not only upon the authority of Yâska himself, but also of his commentators, with this exception only that, according to them, the Naigama may also be called the Aikapadika. Thus Durga says,

पतावतः समानकर्माणे। धातवः एतावंत्यस्य सन्वस्य नामधेयानीति स एकः पदराशिनेंधंदुकं नाम प्रकरणं। यत्र तायथीं प्रायेण चित्यते प्रसंगतो उन्यत्किचित्त-देतदेवं उक्षणं नैधंदुकं नाम प्रकरणं गवादि पाहाशब्दात्॥ अथ पुनर्यत्रैतावता-मर्यानामित्यर्थः प्रायेण चित्यते अनवगतसंस्काराश्च निगमा जहादयः प्रायेण चित्यते उनुषंगता उन्यत्किचित्तदेवं उक्षणमैकपदिकं नाम । प्रकरणं जहादि प्रागग्निशब्दात्॥

The Nirukta, together with the Pratis'akhyas and Panini's Grammar, supply the most interesting and important information on the growth of gramm tical science in India. It would be out of place to enter here into this subject, but I cannot pass it over without at least pointing out the valuable materials preserved in these works, for tracing the origin of one of the most arcient branches of philosophy, Grammar.

There are only two nations in the whole history of the world which have conceived independently, and without any suggestions from others, the two sciences of logic and Grammar, the Hindus and the Greeks. Although the Arab; and Jews, among the Semitic nations. have elaborated their own system of grammar, in accordance with the peculiar character of their language, they owe to the Greeks the broad outlines of grammatical science, and they received from Aristotle the primary impulse to a study of the categories of thought and speech. Our own grammatical terms came to us from the Greeks; and their history is curious enough, if we trace them back through the clumsy and frequently erroneous translations of the literary statesmen of Rome, to the scholars and critics of Alexandria, and finally to the early philosophers of Greece, the Stoics, Aristotle, Protagoras and Pythagoras. But it is still more instructive to compare this development of the grammatical categories in Greece with the parallel, yet quite independent, history of Grammatical science in India. It is only by means of such a comparison that we can learn to understand what is organic, and what is merely accidental, in the growth of this science, and appreciate the real difficulties which had to be overcome in the classification of words and the arrangement of grammatical forms. The Greeks and Hindus started from opposite points. The Greeks began with philosophy. and endeavoured to transfer their philosophical terminology to the facts of language. The Hindus began with collecting the facts of language, and, their generalisations never went beyond the external forms of speech. Thus the Hindus excel in accuracy, the Greeks in grasp. The grammar of the former has ended in a colossal pedantry; that of the latter still invigorates the mind of every rising generation throughout the civilised world.

Again, after having defined the third part, the Daivata, Durga goes on saying तान्येतानि त्रीनि प्रकरणानि नैघंटुकमैकपदिकं देवनमिति। अनेन प्रकरणत्रयप्रपंचेनेद नचिष्यां नैस्करास्त्रमिति।

And further on:

याति पुनर्नेघंटु गिनि गवादीनि नैगमानि जहादीनि.....प्रकरणद्वये नैघंटुके चैकपदिके च व्याख्यास्याम इत्येतद्गुवर्तते॥

He afterwards seems to imply that whole may also be called Nighantu, but there is no authority whatever for calling the first part of Yaska's Commentary, as Dr. Roth does, Naigama. Devaraja also takes the same view when he says.

भगवता यासकेन लमाम्नायं नैघंडु हने गारेवताकांडकीण विविधं गवादिहेव-पत्न्यंतं निष्ठवता नेगमदेवताकांडपरिपठितानि पदानि प्रत्येकमुपादाय निरुक्तानि दक्षितानि निगमानि । च । नैघंडुचकांडपरिपठितानां तु गवाद्यपारेमंतानामेकस-

Language had become with the Hindus an object of wonder and meditation at a very early period. In the hymns of the Veda we meet with poetical and philosophical speculations of speech, and Sarasvatî, the goddess of speech, is invoked as one of the most powerful deities. The scientific interest in language, however, dates from a later period. It was called forth, no doub', by the careful study of a sacred literature, which in India, as elsewhere, called into life many an ancient science. In India the sacred strains of the Rishis were handed down with the greatest care, the knowledge of these songs constituted the only claim and hope of man for a higher life, and from a very early time they were looked upon with such a superstitious awe, that a mere error of pronunciation was supposed to mar their miraculous power.' We need not wonder, therefore, that the minutest rules were laid down as to the pronucciation of these hymns, and that the thoughts of the early teachers were led to dwell on the nature of language and its grammatical organisation. Where so much depended on letters, it was natural that words also and their grammatical variations should attract attention. A number of letters, or even a single letter, as Kâtyayana says, may form a syllable (akshara), a number of syllables or even a single syllable may form a word (pada'.2 There are many lucub rations on letters, syllables, and words in the Brahmanas, and there are numerous expressions, occuring in the Brahmanas, which mark a certain advance of grammatical knowledge.3 In the Bråhmana of the Våjasaneyins (xiii. 5. 1. 18) we meet with the names for Singular, Dual, and Plural. In the Chhandogya-upanishad (p. 135, ed. Roer) we find a classifiaction of letters, and technical terms such as spars'a, consonants; svara, vowels; ushman, sibilants. However, we must not expect in those treatises to fin anything sound and scientific. It is in the Sûtra literature that we meet with discussions on language of a purely scientific character; and what we do find in the Pratis'akhya, in the Nirukta and Panini, is quite sufficient to show that at their time the science of language was not of recent origin. I can only touch upon one point. It is well known how long it took before the Greeks arrived at a complete nomenclature for the parts of speech. Plato knew only of Noun  $(o\nu o\mu a)$  and Verb  $(\rho \eta \mu a)$  as the two component parts of speech, and for philosophical purposes Aristotle too did not go beyond that number. It is only in discussing the rules of rhetor c that he is led to the admission of two more parts of speech, the συνδεσμοι (conjunctions) and aρθρα (articles). The pronoun αντωνυμια does not come in before Zenodotos, and the preposition  $(\pi\rho o\theta e\sigma\iota s)$  occurs first in Aristarchos.

त्वरिशशतत्रयाधिकं सहस्रं सामान्येन एतावं सहय सत्त्वहय नामधेयानीति व्यख्याय तत्र प्रदश्यं कतिचिदेव निरुक्तानि तथापि कानिचिदेव दर्शितनिगमानि । अन्यानि तु ग्रंथविस्तरभीत्या सामान्येन निर्वचनळक्षणस्याकत्वाद्वुद्धिमद्भिर्निर्वक्तुं सुशक्या-नीत्यभिषेख प्राणेय चैापेक्षितानि ॥

<sup>1</sup> An analogous feeling among the Polynesians is mentioned in Sir G. Grey's Polynesian Mythology, p. 32.

<sup>&</sup>lt;sup>2</sup> K åt.-pr. viii. 98.

<sup>3</sup> Ind. Studien, iv. p. 76.

In the Pratis'akhya, on the contrary, we meet at once with the

following exhaustive classification of the parts of speech (xii. 5.)

"The noun (nama), the verb (akhyata), the preposition (upasarga), and the particle (nipata) are called by grammarians the four classes of words. The noun is that by which we mark a being, a verb that by which we mark being; the latter is called a root (dhatu). There are twenty prepositions, and these have a meaning, if joined with nouns or verbs. The rest of the words are called particles. The verb expresses an action; the preposition defines it; the noun marks a being; particles are but expletives. There are, however, besides the particles which have no meaning, others which have, for we see that some particles are used on account of their sense: but it is impossible to say how many there are of each class, whether they are used in

measured or in prose diction."2

The same division is adopted by most grammarians, and it is more fully explained by the author of the Nirukta. After stating that there are four kinds of words, Yaska says that the verb is chiefly concerned with being, nouns with beings. He then brings in a new definition which reminds us of the first introduction of the  $\pi \rho o \sigma \eta \lambda o \rho \iota \alpha$ , as distinct from the ovoµa, by the Stoics. "The verb," he says, "when it expresses being, expresses a kind of being which lasts from an earlier to a later time, such as "he walks," "he cooks," the nouns, if they express being (and not a being), express a kind of being that has become embodied in one, from beginning to end, such as "a walking," "a cooking." Here the chief difference between the verb and the noun appellative, is established on a similar ground to that on which Aristotle ascribes to the verb a temporal character, and denies it to the noun.3

The distinction of the numbers was first pointed out by Aristotle, the technical terms for singular and plural  $(\alpha\rho\iota\bar{\theta}\mu$ os  $\epsilon\nu\iota\chi$ os,  $\pi\lambda\eta\theta\nu\nu\tau\iota\chi$ os,) date from a later time. In India the terms for the three numbers Singular, Plural, and Dual were known in the Brahmana period.

Aristotle had no clear conception of cases, in the grammatical sense of the word. Ptosis, with him, refers to verbs as well as nouns.

<sup>&</sup>lt;sup>1</sup> नामाख्यातमुपसर्गो निपातश्चत्वार्याहुः पदजातानि शाब्दः। तन्नाम येनाभिद्धाति सत्त्वं तदांख्यातं येन भावं स घातुः॥ प्राभ्या परा निर्दु रच न्युपाप सं परि प्रति न्यत्यधि सुद्वापि। उपसर्गा विशतिरर्थवाच काः सहैतराभ्यामितरे निपाताः॥ क्रियावाचकमाख्यातमुपसर्गो विशेषकृत्। सत्त्वाभिधायकं नाम निपातः पादपूरणः॥ निपातानामर्थवशात्रिपातनादनर्थकानामितरे च सार्थकाः। नेयंत इत्यस्ति संख्येह वाङ्मये मिताक्षरे च ये ॥ नैयंतः is न ईयंतः ; it means तेषामियत्ता नास्ति॥

<sup>&</sup>lt;sup>2</sup> The name for pronoun, sarvanâman, occurs in the Nirukta, vii. 2, and in the Châturâdhyâyikâ.

<sup>3</sup> Poet. c. 20. ονομα δ εστι φωνη συνθετη, σημαντικη ανευ χρονου, ης μερος ουδεν εστι καθ αυτο σημαντικον ρημα δε φωνη συνθετη, σημαντικη μετα χρονου, ης ουδεν μερος σημαινεί καθ αυτο ωσπερ και επι των ονοματων.

The introduction of the five cases, in our sense of the word, is due to the Stoics. In the Prâtis'âkhyas we find not only a name for case, restricted to nouns (vibhakti, i. e.  $\chi\lambda\iota\sigma\iota\varsigma$ ) but the number of cases also is fixed at seven.

The distinction of the genders is the only point on which the Greeks may claim a priority to the Hindus. It was known in Greece to Protagoras; whereas in India the Prâtis'âkhyas seem to have passed

it over, and it appears first in Panini.1

There are some discussions in the beginning of the Nirukta which are of the highest interest with regard to etymology. While in Greece the notions of one of her greatest thinkers, as expressed in the Cratylus, represent the very infancy of etymological science, the Brâhmans of India had treated some of the vital problems of etymology with the utmost sobriety. In the Prâtis'âkhya of Kâtyâyana we find, besides the philosophical division of speech into nouns, verbs, preposition and particles, another division of a purely grammatical nature, and expressed in the most strictly technical language. "Verbs with their conjugational terminations, Nouns, derived from verbs by means of krit-suffixes, Nouns, derived from nouns by means of taddhita-suffixes, and four kinds of Compounds —these constitute language."

In the Nirukta this division is no longer considered sufficient. A new problem has been started, one of the most important problems in the philosophy of language, whether all nouns, are derived from No one would deny that certain nouns, or the majority of nouns, were derived from verbs. The early grammarians of India were fully agreed, that kartri, a doer, was derived from kri, to do: pachaka, a cook, from pach, to cook. But did the same apply to all words? S'akatayana, an ancient grammarian and philosopher, answered the question boldly in the affirmative, and he became the founder of a large school, called the Nairuktas (or Etymologists), who made the verbal origin of all words the leading principle of all their researches. They were opposed, and not without violence, by another school, emphatically called the Vaiyakaranas or Analysers, who, following the lead of Gargya, the etymologists,3 admitted the verbal origin of those words only for which an adequate grammatical analysis could be given The rest they left unexplained. Let us hear how Yaska states the arguments on both sides. After having explained the characteristic of the four classes of words, he says: "Sakatayana maintains that nouns are derived from verbs, and there is an universal agreement of all Etymologists (Nairukta) on this point. Gargya, on the contrary and some of the grammarians say, not all (nouns are derived from verbs). For first, if the accent and formation were regular in all nouns and agreed entirely with the appellative power (of the root), nouns such as go (cow), as'va (horse), purusha (man), would be in Secondly, if all nouns were derived from themselves intelligible.4

<sup>1</sup> Kâtyâyanîya Prâtisâk hya, iv. 170.

<sup>2 1. 27.</sup> तिङ्कत्तृद्धितचतुष्ट्यसमासाः शब्दमयं ॥

<sup>3</sup> निरुक्ताश्च गाग्यवर्ज । Durga.

4 This construction is against the Commentary, but, if the MS. such as we have it, is correct, it seems to me the only possible construction.

verbs, then if any one performed a certain action, he would, as a subject. be called in the same manner. For instance, if as'va, hore, were derived from as', to get through, then any one who got through a certain distance, would have to be called as va, horse. If trini, grass, were derived from tril, to pierce, then whatever pierces would have to be called tring. Thirdly, if all nouns were derived from verb, then everything would take as many names as there are qualities belonging to it. A pillar, for instance, which is now called sthun, might be called daresaya, hole-rest, because it rests in a hole : or sanjanî, joiner, because there are beams joined to it. Fourthly, people would call things in such a manner that the meaning of nouns might be at least intelligible, whatever the regular formation may be by which the actions of these things are supposed to be expressed. Instead of purusha, man, which is supposed to be formed from puris'aya, dwelling in the body, they would say puris'aya, body-dweller; instead of as'va, horse, ashiri, pervader; instead of trina, grass, tardana, piercer. Fifthly, after a noun has been formed, these etymologists begin to discuss it, and say for instance that the earth is called prithivî, broad, from prathina, stretching. But, who stretched it, and what was his resting place while he stretched the earth? Sixthly, where the meaning cannot be discovered, no modification of the root yielding any proper signification, Sakatayana has actually taken whole verbs, and put together the halves of two distinct words. For instance, in order to form satya, true, he puts together the causal of  $\hat{\imath}$ , to go, which begins with yz, as the latter half, and the participle of as, to be, which begins with sa Lastly, it is well known, that beings come before being and it is therefore impossible to derive the names of beings which come first, from being, which comes after.

Now all this arguing," Yaska continues, "is totally wrong. For how-ver all this may be, first, with regard to what was said, namely, that, if Sakatayana's opinion were right, all words would be significative, this we consider no objection, because we shall show that they are all significative. With regard to the second point, our answer is, that we see as a matter of fact that it is not so, but that of a number of people who perform the same action, some only take a certain name, and others do not. Not every one that shapes a thing is called takshan, a shaper, but only the carpenter. Not every one that walks about is called a pirivia, iki, but only a religious mendicant. Not everything that enlivens is called jîvana, but only the sap of the sugarcane. Not everything that is born of Bhûmi (earth) is called Bhumija, but only the planet Mars 'angâraka). And the same remark serves also as an answer

The Commentator translates, "even if it were so, even if some remained inexplicable, this would be no objection;" for boni grammatici est nonnulla etiam nescire.

The remarks of the Commentator on this passage are so curious, that they deserve to be copied. "You may well ask, (he says) why this is so. But, my friend go and ask the world. Quarrel with the world, for it is not I who made this law. For although all nouns are derived from verbs, yet the choice of one action (which is to be predicated in perference to others) is beyond any control. Or it may be that there is a certain law with regard to those who perform certain actions more exclusively. A man

to the third objection. With regard to the fourth objection, we reply, We did not make these words, we only have to explain them; and there are also some nouns of rare occurrence, which you, gram narians, derive by means of krit-suffixes, and which are liable to exactly the same objection. For who could tell, without some help from etymologists, that some of the words mentioned in the Aikapadika-chapter mean what they do mean? Vratati is derived by you from vrinati, he elects, but it signifies a garland. The same applies to your grammatical derivations of such words as dimûnas, jât ya, atnara, jagarûka, darvihomin. In answer to the fifth objection we say, Of course we can discuss the etymological meaning of such words only as have been formed. And as to the questions, who stretched the earth, and what was his resting-place, all we can say is, that our eyes tell us that the earth is broad, and even though it has not been stretched out by others you all men speak as they see. With respect to the sixth objection, we admit, that he who combines words without thereby arriving at their proper meaning, is to be blamed. But this blame attaches to the individual etymologist, not to the science of etymology. As to the last objection, we must again appeal to the facts of the case. Some words are derived from qualities, though qualities may be later than subjects, others not."

I doubt whether even at present, with all the new light which Comparative Philology has shed on the origin of words, questions like these could be discussed more satisfactorily than they were by Yâ-ka. Like Yâska, we maintain that all nouns have their derivation, but, like Yâska, we must confess that this is a matter of belief rather than of proof. We admit with Yâska that every noun was originally an appellative, and, in strict logic, we are bound to admit that language knows neither of homonymes nor synonymes. But granting that there are such words in the history of every language, granting that several objects, sharing in the same predicate, may be called by the same name, and that the same object, possessing various predicates, may be called by different names, we shall find it as impossible as Yâska to lay down any rule

who performs one particular action more exclusively whatever other actions he may perform, will have his name from that particular action. Nor do we say that he who at one time and in one place shapes things is a carpen. ter but he who at any time or any place is a carpenter, him we always call carpenter. This is not a predicate restricted to one, it may freely be given to others. Now and then there may be other actions, more peculiar to such persons, and they may take other names accordingly, yet their proper name remains carpenter." And with regard to the next problem the Commentator says: "A corporter may well perform other actions, but he need not therefore take his name from them. If it is said, several things might have one and the same name, and one and the same thing might have different names, all we can answer is, that this is not proved by the language such as it is. Words are fixed in the world we cannot say how (svabhavatah, by nature)." This, together with the text, shows a clearer insight into the nature of Homonyma and Synonyma, or, as the Peripatetics called the latter, Polyonyma, than anything we find in Aristotle,

88 KALPA.

why one of the many appelatives became fixed in every dialect as the proper name of the sun, the moon, or any other object; or why generic words (homonymes) were founded on one predicate rather than another. All we can say is what Yaska says, it was so svabhavatah, by itself, from accident, through the influence of individuals, of poets or law-givers. It is the very point in the history of language where languages are not amenable to organic laws, where the science of language ceases to be a strict science, and enters into the domain of history.

We leave this subject not without reluctance, and hope to return to

it in some more appropriate place.

#### KALPA, OR THE CEREMONIAL.

The most complete Vedânga is the fifth, the Kalpa for which we have not only the Brâhmanas of the different Vedas, but also their respective sûtras. The Sûtras contain the rules referring to the sacrifices, with the omission of all things which are not immediately connected with the performance of the ceremonial. They are more practical than the Brâhmanas, which for the most part are taken up with mystical, historical, mythological, etymological, and theological discussions. Thus Sâyana says, in his Commentry on the Baudhâyana-sûtras: "The whole mass of Vedic literature consists of three parts; Mantras, Vidhis and Arthavâdas. The Vidhis enjoin an act, the Arthavâdas recommend it, the Mantras record it. In order to make the understanding of the prescribed ceremonies more easy, the Reverend Baudhâyana composed the Kalpa. For the Brâhmanas are endless, and difficult to understand, and therefore have old masters adopted the Kalpa-sûtras according to different Sâkhâs. These Kalpa-sûtras have the advantage of being clear, short, complete, and correct." 2

It is true that some of the Brahmanas also have a more practical tendency, and might almost be taken for productions of the Sûtra period. We saw before that Kumarila in his Tantravarttika spoke of

एवं करास्त्रेष्वर्थवादादिमिश्वराखांतरविप्रकीर्णस्यायस्यविध्यु संहारफस्यविक्रमणं निक्राणं तत्तत्वमाणमंगीकृत्य कृतं । लोकव्यवहारपूर्वकाश्च केचिद्वत्विगादि-व्यवहाराः सुखार्थहेतुत्वेनाश्चिताः॥

"Thus the real sonse has been ascertained in the Sûtras by means of collecting the commandments which were to be obtained systematically as they were dispersed in different Sâkhâs and mixed up with Arthavâdas, &c. One or the other authority was selected, and, to afford greater facility, some performances of the priests which are connected with worldly matters were also taken in."

ैतत्र तावद्विध्यर्थवादमंत्रातमना त्रिधा व्यवस्थितो वेदराशिः। विधिविहितः मर्थवादप्ररोचितं मंत्र न स्मृत्रम्युद्यकारि भवतीति । ततश्च चोदितानां कर्मणां सु वावबोधाय भगवन् बैधायनः करूपमकरायम् । यतो ब्रह्मणानावनंत्य दुरव्बोधतयाश्रमा न तैः बुखं कर्मावबोध इति कर्पप्त्राणीमाति प्रतिनियत ताखांत-रातंनीचकुः पूर्वाचार्याः ॥ वर्षस्य वैत्यक्षधवकातस्न्यंप्रकरणशुद्धयादिभिः प्रकर्षयंकस्य ४०.

<sup>1</sup> Kumârlia Tantravârttika, i. 3. 1.

some Brâhmanas, for instance those of the Aruna and Paras'ara-sâkhas¹ as having the form of Kalpa works. Nay, there are passages in the Brâhmanas which, though properly they ought to be celled Kalpa or vidhi, are quoted by the Commentators, under the name of Sūtra.² The same name is used, in the late books of the Satapatha-brâhmana, as the title of literary compositions, which must then have formed part of the

Brâhmana literature.3

On the other hand, the Sûtras, composed by Saunaka, were called Brâhmaṇa-sannibha, "having the appearance of a Brâhmaṇa," an assertion, which to a certain extent, is true as may be seen by comparing the Rigvidhaṇa, which is ascribed to Saunaka, with the Sâmavidhâṇa-brâhmaṇa. The same might be said of the S'ânkhāyaṇa-sûtras, particularly of the last books, where we sometimes meet with considerable portions identically the same as in the Aitareya brâhmaṇa. But no orthodox Brâhman would for a moment admit that Brâhmaṇa and Sûtras belonged to the same class of literature. They fear the danger of such admission, because, as Kumârila says, If the name of S'ruti were cnce granted to the Sûtras, it would with difficulty be denied to the sacred writings of Buddhists and other heretics. It would be, as he expresses himself in his graphic language, "Like letting in the heretics on the high road, after having driven them out of the village with sticks and fists."

Originally a Brâhmana was a theological tract and it was called brâhmana, not because it treated of the Brahman, the Supreme Spirit, or of sacrifical prayers, sometimes called brahmâni, but because it was composed by and for Brâhmans. These Brâhmanas or dicta theologica, were gradually collected in different families or Parishads, and gave rise to greater works, which were equally called by the name of Brâhmana. Such a collection became a more or less comprehensive repository of

MS. E. I. H. 104. In the beginning of the Commentary on Âpastamba's Sûtras, it is said that the author is going to explain the Yâjurvaidika performance of the whole vaitânika sacrifice which is detached in many Sâkhâs and scattered in different parts of the Veda.

अत्रमगवानायस्तं वो वेदमागव्यकोणं विभक्तानेकशास्त्रायासकः च विश्वस्य वैतानिकस्य कर्मणा याज्ञवेदिक प्रयोगं व्याचिष्यासुः। श्रुतौ संक्षित्रयोर्द्शपूर्णमा-स्यार्व्याकरणेन शास्त्रातरीपसंहारादिना च विस्पष्टीकरणं व्याख्यानं।

"To explain means to separate, for instance, the new moon and the full moon sacrifices, which in the Veda are thrown together, and to make them

intelligible by comprehending different Sakhas."

ा आरूणपराशरशाखाब्राह्मणस्य कल्परूपत्वं। See also Sâyaṇa's Introduction to the Aitareya-brâhmaṇa, where he says, कल्पस्त्वारणकेतुकचयनप्रकर णेसमाद्मायते। इति मंत्राः कल्पोऽत ऊद्ध्वं यदि बलि हरेदिति। Might not the name आरूणपराज्ञो, Pâṇ. iv. 3. 105., be meant for आरूणपराशरो ?

90 KALPÁ.

theological lore, and no consideration as to practical usefulness seems to have influenced either the original contributors or the later collectors. In the course of time, however, and particularly during periods of theological controversy, these works began to assume a practical importance, and it was then that the want of proper arrangement was felt as a serious inconvenience. Hence, when new additions were made to the ancient stock of Brahmanic learning, or when, as in the case of a controversy or a schism, the founders of a new community were called upon to compose a Brahmanic code different from that which belonged to their adversaries, a more systematic and business-like spirit, such as afterwards led to the composition of Sûtras, began to show itself in the arrangement of these later Brâhmanas.

There was, however, a cartain general system which regulated the composition of the Brahmanas from the very first. Long before the different Brahmanas were composed, the sacrificial system, which they were chiefly intended to illustrate, had been definitely arranged, and the duties of the three or four classes of priests engaged at the great sacrifices, had been finally agreed upon. This division of priests and the general order of the sacrifices must have been settled previously even to the composition of the Sanhitâs of the Sâma and Yajur-vedas; for both follow the established order of the sacrifices, and are neither more nor less than collections, containing the verses which the second and third classes of priests the Chhandogas and Adhvaryus, had to employ at various sacrifices. They are liturgical song books, adapted to an already-existing sacrificial canon. The case is different with the Rig-veda. The Rig-vedasanhita was collected without any reference to sacrificial purposes. The Brahmanas, however, of all the three Vetas, the Rigveda as well as the Sama and Yajur-vedas, pre-suppose the final division of the three classes of priests. This division, to which we shall have to revert hereafter, may be shortly described as follows: - The chief part, or, as the Brahmans say, the body of each sacrifice, had to be performed by the Adhvaryu priests. The preparing of the sacrificial ground, the adjustment of the vessels, the procuring of the animals, and other sacrificial oblations, the lighting of the fire, the killing of the animal, short, all that required manual labour, was the province of the Adhvaryu priests. They stood lowest in the estimation of the Brahmans, and, as the proper pronunciation of the sacred texts required considerable study, they were allowed simply to mutter the verses which they used during the sacrifice. The recitation of Vedic verses was considered as so subordinate a part of their duty that their Sanhita, at least the most ancient Sanhita1 of the Adhvaryu Veda priests, is not a collection of

l'According to some commentaries, this ancient collection of the Adhvaryu priests was called Arishna, or the dark Yajur-veda, owing to its motley character, whereas the more recent version of the Yajur-veda was called S'ukla or bright, on account of the clear separtion of hymns and rules, or, according to others, on account of its enabling the reader to distinguish clearly between the offices belonging to the Hotri and the Adhvaryu, a more popular explanation is given by Colebrooke from Mahîdhara's Commentary on the Vâjasaneyi-sanhitâ. It occurs also in the Purânas: "The Yajush, in

hymns, but rather a complete description of the sacrifice, as performed by the Adhvaryus, interspersed with such verses and formulas as had to be muttered by the officiating priests, It was at a much later time, and probably in imitation of the Sana-veda-sanhita, that a separate collection of the hymns of the Adhvaryu priests was made, and this we possess in the various Sakhas of the Vajasaneyins, who have embodied the rules and the description of the sacrifice in a separate Brahmana, known by the name of the Sitapatha. According to the same metaphor, which assigns to the Adhvaryu priests the body of the sacrifice, its two most essential limbs fall to the lot of two other classes, the Hotri and Udgatri priests; or, as Sayana says, in his introduction to the Taittirî ya-sanhitâ: "The Rig veda and Sâma-veda are like fresco paintings whereas the Yajur-veda is the wall on which they stand." The Udgatri priests have little to do with the actual performance of the sacrifice. Their chief duty is to chant their hymns in a loud melodious voice, and these hymns, in the order in which they had to be chanted, were collected in a book of songs, called the Sama-vedasanhitâ. The third class of priests, who were equally free from purely manual labour had to recite the sacrificial hymns, according to the strict and difficult rules of the ancient pronunciation and accentuation, but without chanting. No collection, however, was made for them, containing the hymns in their sacrificial order; because the Hotri priests were supposed to be so throughly versed in the ancient Vedic poetry as contained in the Rig-veda-sanhita, that they were expected to know the whole of it, and to be able to repeat readily, without the help of a manual, whatever hymn was enjoined at any part of the sacrifice.

its original form, was at first taught by Vais'ampayana to twenty-seven pupils. At this time, having instructed Yajnavalkya, he appointed him to teach the Veda to other disciples. Being afterwards offended by the refusaof Yajnavalkya to take on himself a share of the sin incurred by Fais'amna yana, who had unintentionally killed his own sister's son, the resentfull preceptor bade Yajnavalkya relinquish the science which he had learnt. He instantly disgorged it in a tanginle form. The rest of Vaisampayana's disciples receiving his command to pick up the disgorged Veda, assumed the form of partridges, and swallowed the texts which were soiled, and for this reason termed "black;" they are also denominated Taittiriya from tittiri, the name of a partridge. Yajnavalkya, overwhelmed with sorrow, had recourse to the sun; and through the favour of that luminary, obtained a new revelation of the Yajush which is called "white" or pure, in contradistinction to the other, and is likewise named Vajasa neyin, from a patronymic, as it should seem, of Yajnavalkya himself; for the Veda declares, "these purer texts, revealed by the sun, are published by Yajnavalkya, the offspring of Vajasani." But, according to the Vishnu-purana, the priests who studied the Yajush are called Vajins, because the sun, who revealed it asssumed the form of a horse (vajin)." It is clear that these are nothing but late etymological legends. Tittiri and Vajin were proper names. Tittiri was the pupil of Yaska. the pupil of Vaisampayana, and it is through them that the old or dark Yajurveda was handed down. Yajnavalkya, of the family of the Vajasaneyin, was the founder of the more modern or bright Yajur-veda.

This distribution of the ceremonial between the three classes of priests, which, after the collection of the ancient Sanhîtâ of the Rigveda, called forth the two Sanhîtâs of the Sâma—and Yajur-vedas, regulated from the first the composition of the Brâhmaṇas. Instead of one code of theology, we find three collections of Brâhmaṇas, treating respectively of the performance of those rites, which each of the three classes of priests was more particularly concerned with. The Adhvaryu priests had orginally, as we saw, no Brâhmaṇa in the usual sense of the word, and what is called their Brâhmaṇa is in reality a mere supplement and continuation of their Sanhîtâ; originally, therefore, neither of these names was correctly applicable to the Yajurveda of the Charakas. In later times, however, the duties of the Adhvaryu were incorporated in a separate Brâhmaṇ, the S'atapatha, at the same time that their hymns were collected in a small manual, the later Sanhitâ of the Yajur-Veda. In a similar manner, the sacrificial duties of the Hotri priests were discussed in the Bahvricha-brâhmaṇas, and these of the Udgâtri priests, in the Chhandoga-brâhmaṇas.

Thus we see that the collection, if not the original composition, of the Brâhmaṇas, was not entirely without system; and that the remarks on certain parts of the sacrifice, although sometimes extremely diffuse, and mixed up with extraneous matter, were not thrown together at random. As most of the sacrifices were to be performed by two or three classes of priests in common, the same ceremony may be described in different Brâhmaṇas. The Aguishtoma, for instance, begins with the ceremony of the Ritvig-varaṇa, the election of priests. This ceremony is performed by the Adhvaryu priests alone, and it was not necessary to explain it in the Brâhmaṇa of the Hotri priests. It is wanting therefore in the Bahvricha-brâhmaṇas. The next following ceremony, the Dîkshaṇîyeshṭi, is likewise performed by the Adhvaryus together with the Chhandoga priests; but as here the Hotri priests also have to take a part (the yâjyâs and anuvâkyâs), it is described in the beginning of the Aitareya-brâhmaṇa. 1

<sup>1 &</sup>quot;The Aitareya brâhmana consists of forty Adhyâyas; the Âranyaka also is reckoned part of the Aitareya and is equally ascribe 1 to Mahîdâsa, the son of Itarâ.

<sup>&</sup>quot;In the Brâhmaṇa, the first subject is the Jyotish toma (chatuḥsamastha); then the Gavâm-ayana, the Âdityânâm-ayana, the Angirasâm-ayana and the Dvâdâs'âha. The Jyotish toma stands first among the Somayâgas, (such as the Gosh toma and Âyush toma), and it comprises seven sacrifices (saptasamstha). Four of these are the Agnish toma, Ukthya, Shodas'in and Atiratra; and among these four the Agnish toma is the model, the whole ceremony being here fully detailed, while for the other sacrifices the peculiar rules only are given, the rest being supplied from the model. The Agnish toma ought therefore to be explained first. Now it is very true, that at the beginning of the Agnishtoma the Ritvij priests are to be elected, for Âpastamba says in his Sûtras, 'he who is going to sacrifice with Soma, let him choose Ârsheya-brâhmaṇs for Ritvij;' but as the Hotri priests have nothing to do in the ceremony of this election, and as the Rig-veda is only cencerned with rules for the Hotri priests, the Dîkshanîyeshçi is explained first. For although the

The Kalpa-satras, with which we are at present concerned, follow the same system as the Brahmanas. They presuppose, however, not only the existence of three distinct collections of Brahmanas, but of different Sakhas or recensions, which, in the course of time, had branched off from each of them.

It is a characteristic peculiarity of the Sûtras, that they were intended by their authors for more than one Charana, or adapted to more than one Sakha. This is remarked upon by Kumarila, when he says: "All authors of Kalpa sûtras join with the rules of their own Sakha, the optional commandments of other Sakhas, a proceeding approved of by Jaimini." Or again, "Not one of the Sûtrakâras was satisfied with comprehending his own Sakha only."2 The same is maintained still more strongly by the author of the Hiranyakes'i-bhashya. "No single Sakha," he says, "contains a complete account of the ceremonial, and a reference to other Sakhas is absolutely necessary."3 That this means a reference to other Sákhâs of the same Veda, and not a reference to other Vedas, may be seen from a passage of Kaus'ika Râma4, where he establishes the general principle, that in a Sûtra a quotation from a different Sakha makes a rule optional, whereas a quotation from a different Veda confirms it as generally binding. It was not usual that a common Brâhman knew more than one Sakha. He might, if he liked study each of the three Vedas, but, as Kumarila says: "It is not necessary that one man should read different Sakhas. because one Sakha only is comprehended in that study of the sacred texts which every Brahman is bound to pass through. Therefore, if a very clever man should read different Sakhas of one Veda, he may do so, but he might as well, if very rich, sacrifice at the same time with rice and barley,"5 even if a Brahman had studied the Sanhitas and Brahmanas of the three Vedas, according to their various Sakhas, he would still have found it

Ishti, or the sacrifice itself, is performed by Adhvaryus, yet the Yâjyâs and Anuvâkyâs belong to the Hotri priests. In the Rig-veda we find the Yâjyâs, Puronuvâkyâs, &c.; in the Yajur-veda the Dohanas, Nirvâpas, &c.; in the Sâma-veda the Âjyastotras, Prishthastotras, &c."—Sayana.

extremely difficult to learn from them the correct performance of every sacrifice. It was, therefore, in order to obviate this difficulty, that the Sûtras were called into existence, as a kind of grammar of the Vedic

ceremonial, useful for members of all Charanas.

The Kalpa-sûtras for the Hotri priests, which were composed by As'valâyana, were intended both for the Sâkala and Bâshkala-s'âkhâs, and they contain occasional references to other Charanas also. Sâyaṇa, in his introduction to the Rig veda (i. p. 34.) says distinctly, that As'valâyana teaches the employment of hymns, which do not occur in the Sâkala-s'âkhâ. "These," he says, "have been taken from another Sâkhâ, and their employment, therefore rests on the authority of a different Brâhmâṇa, although the sacrifice itself (karma) must be considered as one and the same for all Sâkhâs, in spite of some differences in its performance (prayoga)."

There is a second, and more ancient, collection of Sûtras for the Hotri priests, written by Śânkhâyana. They were intended for members of the Kaushîtaki-s'âkhâ a Śâkhâ of which we still possess the Brâhmaṇa and the Aranyaka. The Brâhmaṇa is sometimes quoted under the name of the Śânkhâyana-brâhmaṇa, in the same manner as the Aitareya is sometimes quoted as As'valâyana-brâhmaṇa. This Śânkhâyana text of the Kaushîtaki-brâhmaṇa may be more modern than the Aitareya-brâhmaṇa, but the Sûtras of Śânkhâyana are more ancient than the Sûtras of As'valâyana. The Sûtras for the Adhvaryu priests were composed by Kâtyâyana, and adopted by the Kânva and Mâdhyandina-Sâkhâs.

The ceremonial of the Udgâtri priests who followed the Sâma-veda was likewise composed by authors who were free from the exclusive influence of one particular Sâkhâ. The Lâtyâyana-sûtras were not originally the Sûtras of a Lâtyâyana-s'âkhâ, but they were written by Lâtyâyana, and afterwards alopted by the numerous branches of the Kauthuma-s'âkhâ. Another collection of Sûtras, almost identical with the former, was composed by Drâhyâyana, and was adopted by the

This does not exclude, however, the obligation of reading different Vedas. न त्वेवं वेदांतरस्य(ध्ययनं न प्रसज्येत न वचनांतरेण प्रतिप्रस्वात् । अनया त्रया विद्ययेति तथा वेदानधीत्य वेदौ वेति मानवं ॥ See also Mitakshara, p. 17. a. b. एकशाखाध्ययनक्षमा वेदपारगः॥

Mahadeva's Commentary on the Hiranyakes'i-sûtra.

different Charanas of the Rāṇāyanīyas. <sup>1</sup> Both Sūtras follow the same authority, the Tāṇḍya-brâhmaṇa, its old as well as its more modern portion, and they quote not only the traditional literature of various Charaṇas, such as the Śāṭyâyanıns, Śálankâyanins, but the works of individuals also, such as Śāṇḍilya, Śâṇḍilyâyana, Dhânanjayya, Kautsa, Kshairakalambhin, two Gautamas, Bhâṇḍitâyana, Rāṇâyaniputra, Lâma-kâyana, Śauchivṛikshi, &c.<sup>2</sup>

But although the Sûtras were adopted by different Charanas, existing previous to the composition of the Sûtras, and although the author of a new code of Sûtras might himself become the founder of a new Charana or sect, the text of these short rules seems never to have changed. The text of the Ås'valâyana-sûtras was one and the same for a follower of the old Sâkala, Bâshkala or Aitareyi-s'âkhâs. We meet with no authorized varice lectiones as we do in the Brâhmanas. As late as the time of Sâyana the various readings of the Brâhmanas were known, and he refers to them frequently in his Commentary on the Aitareyi-brâhmana. Nothing of the kind ever occurs in the commentaries on the Sûtras; still less were the Sûtras liable to those more important changes which the Brâhmanas underwent, as they became the property of distinct Charanas or sects.

Kumarila's argument, therefore, by which he endeavoured to establish a distinction between the Brahmanas and Sûtras, 3 is fully confirmed by those traces which can still be discovered by philological criticism. We have only to translate what he calls s'ruti, or revelation, by "ancient literature handed down by oral tradition," and the distinction between Brâhmanas, as s'ruti, and Sûtras, as smriti, holds perfectly good. There is no doubt a distinction to be made between the manner in which the hymns and the Brahmanas, both included under the name of s'ruti, were preserved. But, in spite of Wolf's maxim, that prose literature marks everywhere the introduction of writing, we must claim for the Brahmanas, as well as for the hymns, a certain period during which they were preserved by means of oral tradition only. Without the admission of an oral tradition, carried on for several generations and in several places by different families and Brahmanic colonies, it would seem impossible to account for the numerous recensions of the same Brahmana, and for the various readings of each recension. How the changes, the addition, the rearrangements of the original collections of the Brahmanas were effected, we have no means of ascertaining; but we can see, that the Kanva and Madhyandina recensions of the Satapatha-brâhmana presuppose some point from whence they both

<sup>1</sup> In a MS. of the Drâhyâyana-sûtras, E. I. H. 363, they are called राणायनिशाखीयं द्राह्यायणसूत्रं॥

<sup>&</sup>lt;sup>2</sup> See Weber, Vorlesungen, p. 74. The Kauthumas seem to be a later Charana than the Rânayanîyas. Lâtyâyana quotes a Rânayaniputra; Kauthumas are quoted in the Pushpa-sûtra.

<sup>&</sup>lt;sup>3</sup> Kumârila i. 3. 7. अर्थेकत्वेन केषांचिदश्रराणां च साम्यतः। सादृश्याद् ब्राह्मणश्चातिजातिवमपनीयते॥ "The mistake of supposing the Sûtras to be Brâhmaṇas, which arose from their identity of object and occasional literal coincidences, has thus been removed.

started in common. The same applies to the Bahvricha-brahmana in the widely differing recensions of the Aitareyins, the Sankhayanios or the Kaushîtakins. There is a common stock in the Brahmanas of each Veda. The same ceremonial is described, the same doubts are raised, similar solutions are proposed, and many chapters are repeated in the same words. Before each recension took its present shape—and few only of these numerous recensions have been preserved to us—they must have rolled from hand to hand, sometimes losing old, sometimes gathering new matter; now broken to pieces, now rearranged, till at last the name of their author became merged in the name of the Charana that preserved his work. No traces of this kind can be discovered in the Sûtras. We probably read them in our MSS., exactly as they were written down at first by Katyayana, As'valayana and others. They are evidently the works of individual writers, the result of careful and systematic research. They presuppose the Sanhitas and the Sakhas of the Sanhitas; they presuppose the Brahmanas and the Sakhas of the Brâhmanas. And they also refer to individual writers, whether they had become the founders of Charanas, or whether they enjoyed an authority as teachers of law and other subjects connected with the intellectual

pursuits of the early Brahmanas.

There is, however, one fact that seems to militate against the distinction between the Brahmanas and Sûtras, in so far as it assigns a very early origin, and a traditionary character, to at least some works which were written in Sûtras. At the time of Kâtyâyana, if not at the time of Pânini, there existed Sûtras, which were not then considered as the works of modern or at least well-known authors, like As'valayana or Kâtvâyana, but indicated by their very name, that they had formed, for a time, part of the traditional literary property of a Charana, or of some learned school. Their titles are formed on the same principle as the titles of ancient Brahmanas. The affix in (nini) is added to the names of their reputed authors, and this, as we know, is a mark that their authors were considered as Rishis or inspired writers. Their works are not quoted in the singular, like all modern Sûtras (for instance, "this is the ceremonial of As'maratha" iti kalpa as'marathah), but, and this is a characteristic feature of the ancient traditional literature of India-in the masculine plural, the literary works being supposed to have their only substantial existence in the minds or memories of those persons who read or taught them. We find, for instance, "thus say the Paras'arins, the S'allalins, the Karmandins, the Kris'as'vins." whereas the work even of Panini himself is quoted as "the Pâniniyam," as it were " Panineum," not as "the Pânineyins." But although these quotations refer to Sútras, it ought to be observed

<sup>&</sup>lt;sup>1</sup> Cf. Pân. iv. 3. 103 -110. The Sûtras from 106 are not explained in the Mahabhashya according to the Calcutta edition.

<sup>&</sup>lt;sup>2</sup> Kalpa-sûtras were composed contemporaneously with Pârini, and even after his time, as, for instance, the Sûtras of As'valâyana and Kâtyâvana, which we still possess, and those of As'marathya, which are lost. The last are quoted in the commentary to Panini iv. 3. 105.). as a modern work on Kalpa; yet Âs'valâyana in his Sutras, v. 13, refers to Âs'marathya as an authority, whom he follows in opposition to other teachers whose opinion he rejects. Cf. As'v. Sûtras, v. 13.; Indische Studien, i. 45.

that not one of them refers to Kalpa, or ceremonial Sûtras. Where Pânini (iv. 3. 105.), or rather his commentator, quotes works on Kalpa in a similar, though not in exactly the same manner, we must bear in mind that expressions like "Paing? kalpah," " the ceremonial taught by the old sage Pinga," "Kaus'ikî kalpah," "the ceremonial taught by the old sage Kus'ika," may refer to portions of the Brahmanas which are called kalpa, cermonial, in contradistinction to the brahmana or the purely theological discussions; and it is nowhere said that these old Kalpas were written in Unless, therefore, a quotation can be brought forward previous to Kât yâyana, and referring to a collection of Kalpa sûtras, such quotation calling the Sûtras not by the name of their author, but by the name of a Charana, not in the singular, but in the masculine plural, Kumarila's distinction between Brâhmanas and Sûtras remains unshaken, and we are justified in maintaining that the kalpa-sûtras, in spite of some apparent similarity with the later Brahmanas, belong to a period of literature different in form and character from that which preceded it, and which gave rise to the traditionary literature of the Brahmanas.

The Kalpa-sûtras are important in the history of Vedic literature for more than one reason. They not only mark a new period of literature, and a new purpose in the literary and religious life of India, but they contributed to the gradual extinction of the numerous Brahmanas, which to us are therefore only known by name. The introduction of a Kalpa-sûtra was the introduction of a new book of liturgy. If it was adopted by different Charanas, smaller differences in the ceremonial and its allegorical interpretation, which had been kept up by the Brahmanas, of each Charana, would gradually be merged in one common ceremonial; or, if they were considered of sufficient importance, a short mention, such as we find here and there in the Sûtras, would suffice, and render the tedious discussions of the Brahmanas on the same points, superfluous. If the Sûtras were once acknowledged as authoritative, they became the most important part of the sacred literature which a Brâhman had to study. Those who had to perform the sacrifices might do so without the Veda, simply by means of the Kalpa-sûtras; but no one could learn the ceremonial from the hymns and Brâhmanas alone, without the help of the Sûtras.2 There remained, indeed, the duty of every Brahman to learn his Svadhyâya, which comprised the hymns and the Brâhmanas. But complaints were made, at least at a later time, that the hymns and the Brahmanas were neglected on account of the Sûtras, and one of the reasons why the Hotri priests were never allowed to have a prayerbook, such as the hymn-books of the Yajur-veda and Sâma-veda, was

वेदाहते ऽपि कुर्वति कल्पैः कर्माणि याज्ञिकाः । न तु कल्पैर्विना केचिन्मंत्र-

¹ The wording of the Sûtra. "Purâṇaprokteshu brâhmaṇakalpeshu" seems to confirm this interpretation. The Paingins must be considered as a Brâhmaṇa-charaṇa, for there is a Paingyam, the work of a Paingin, quoted in the Kaushîtakibrâhmaṇa, and in a doubtful passage of the Aitareya-brâhmaṇa. It is difficult to say anything equally positive about the Kaus'ikî kalpaḥ, an expression which may possibly refer to the Kaus'ika-sûtras of the Atharya-veda.

98 капра.

the fear that they would then neglect their Svådhyåya, and learn only those hymns which were enjoined for the sacrifices by the Kalpasûtras. We need not wonder, therefore, if, after a short time, the authors of Kalpa-sûtras became themselves the founders of new Charanas, in which the Sûtras were considered the most essential portion of the sacred literature; so that the hymns and Brâhmanas were either neglected, or kept up under the name of "the hymns and Brâhmanas of the new Charana," having ceased to form by themselves the foundation of an independent tradition or school

In order to make quite clear the influence which the Sûtras exercised on the final constitution of the Vedic Charanas we ought to distinguish between three classes of Charanas: 1. Those which originated with the texts of Sanhitâs; 2. Those which originated with the

texts of Brahmanas; 3. Those which originated with the Sûtras.

We need not enter here into the question, whether originally there was but one Veda, and whether this original Veda became afterwards divided into three branches or S'âkhâs, the Rig-veda, Yajur veda, and Sâma-veda. This is the view adopted by the Brâhmans, and they consider these three divisions as the three most ancient S'âkhâs, and their propagators or pravartakas as the three most ancient Charanas. This is a natural mistake. It is the same mistake which leads to the assumption of common literary language previous to the existence of the spoken dialects, whereas in fact the various dialects existed previous to the establishment of the classical language. The first collection of Vedic hymns is that which we have in the Rig-veda, a collection, not made with any reference to the threefold division of the later ceremonial, and therefore not one of three branches, but the original stock, to which the other two, the Yajur-veda and

Sâma-veda, were added at a much later period.

The most ancient S'akhas and Charanas of which we have any knowledge are those which arose from differences in the text of the Rigveda-sanhitâ, such as the Bâshkalas and S'âkalas. We never hear of either Brâhmanas or Sûtras peculiar to these s'âkhâs, and the natural conclusion, confirmed besides by native authority, is that they diverged and became separated on the strength of various readings and other peculiarities, affecting the texts of their Sanhitas. There is no evidence as to the existence of similar Sanhitâ s'âkhâs for the Yajurveda or Sâmaveda. If we take the two s'akhas of the Yajur-veda-sanhita, that of the Kânvas and that of the Mâdhyandinas, both presuppose the existence of a Vâjasaneyi-sanhitâ, and this Vâjasaneyi sanhitâ would have been perfectly useless without a Brâhmana. It was not the Sanhitâ, but the Brâhmana of the Vâjasaneyins, handed down as it was in various texts. which gave rise to the fifteen Charanas of the Vajasaneyins, and among them to the Kanva and Madhyandina-charanas. Their Sanhitas were of secondary importance, and startling as such an opinion might sound to an orthodox Brâhman, were probably not put together till after the composition of the Vajasneyi brahmana in its original and primitive form. The peculiar differences in the text of the Mantras of the Kanvas and Madhyandinas depend on the differences occurring in their respective Brahmanas, and not vice versa. On the same ground, we must doubt the existence of ancient Sanhita s'akhas for the Sama veda.

The next step which led to the formation of Charanas was the adoption of a Brahmana, and we therefore call this second class the Brahmana-charanas. When the growth of a more complicated ceremonial led to the establishment of three or four classes of priests, each performing peculiar duties, and requiring a special training for their sacerdotal office, there must have been a floating stock of Brahmanas, or dicta the logica, peculiar to each class of priest. They treated of the general arrangement of the sacrifice. They handed down the authoritative opinions of famous sages: they gave the objections raised against such opinions by other persons: and gradually they clothed these contradictory statements in the form of a logical argument. Occasionally, an allegorical interpretation was given of the meaning of certain rites, the simple and natural import of which had been forgotten. Rewards were vouchsafed to the pious worshipper, and instances were recorded of such rewards having been obtained by the ful of former ages. All these sayings and discussions were afterwards collected as three distinct Brahmanas, belonging to the three classes of priests. We still meet with the general names of Bahvricha-brâhmanas for the Rig-veda, of Adhvaryu-brahmanas for the Yajur-veda, and of Chhandoga-brahmanas for the Sama-veda, without any further reference to particular Charanas by which these Brahmanas were collected or adopted. But those Brahmanas are no longer met with in their original form. They have come down to us, without exception, as the Brahmanas of certain Charanas of each Veda. Instead of one Bahvrichabrâhmana of the Rig veda, we only find the Bahvricha-brâhmana of the Aitareyins, or the Kaushîtakins, or the Sankhayanins. Instead of one Chhandoga-brahmana or Chhandogyam, we have the Chhandog-brahmana of the Tandins or the Tandya, and we find quotations from other Charanas, such as the S'âtyâyanins or the Kauthumas. Instead of one Adhvaryu-brahmana, we have the dark code of the old Charakas, or the Taittirî yas and the Kathas, and the new Brâhmana of the Vâjasaneyins, and their descendants, the Kânvas and Mâlhyandinas. We nowhere find the original collection from which the various recensions might be surposed to have branched off and deviated in time. In most cases, where we possess the text of a Brâhmana, preserved by different S'akhâs, the variations are but small, and they point clearly to one and the same ori-

In one of the most interesting Brâhmanas of the Chhandogas, the Sâmavidhâna-brâhmana, we see how the two last in a series of teachers became the founders of a Charana, by teaching this Brâhmana, which had been handed down to them through a succession of nine or at least six masters, to a multitude of followers.

अथाह्यसामविधानस्य संप्रदायप्रवर्तकानाचार्यान तुक्रमेग संकीर्तयति । से।ऽयं प्राज्ञापत्यो विधिः । तिममं प्रजापति गृहस्यतये प्रोवाच । बृहस्यति नारद्य । तारदो विष्वकसेनाय । विष्वकतेना व्यासाय पाराशर्याय व्यासाय पाराशर्याय विष्वकसेनाय । विष्वकतेना व्यासाय पाराशर्यायणाय । पाराशर्यायणी जैमिनये । जैमिनिः पाष्टिपंड्याय । पौष्टिपंड्यः पाराशर्यायणाय । पाराशर्यायणी बादरायणस्तां डिशाड्यायनिभयां । तां डिशाड्यायनिनौ बहुभ्यः ॥ On the S'âtyâyanins and their relation to the Sâma-veda, see Indische Studien, i. 40.

ginal from which they descended. Sometimes, however, the variations are of a different kind, so much so that we are inclined to admit several independent collections of that floating stock of Brahmanic lore, which went on accumulating in different places and through various generations. If we compare the Brahmanas of the Aitareyins and the Kaushitakins, we find their wording, even where they treat of the same matters, very different. The order in which the sacrifices are described is not always the same, nor are the ceremonial rules always identical. Illustrations and legends are interspersed in the Brahmana of the Kaushîtakins of which no trace can be found in the Brahmana of the Aitarevins. And yet, with all these differences, the literal coincidence of whole chapters, the frequent occurrence of the same sentences. the same comparisons and illustrations, render it impossible to ascribe to each of these Brahmanas a perfectly independent origin. The two Brahmanas of the Kanvas and Madhyandinas, in spite of their differences, in spite of additions and omissions that have been pointed out in either, compel us to admit that they had a common starting-point. from frequent quotations, the number of Brahmanas differing from each other more or less considerably, and the number of Charanas, founded on these Brahmanas, must have been very large. We can easily imagine how this happened. The name of a famous teacher, who gathered a number of students around himself in a village, or who lived under the protection of some small Raja, was preserved by his pupils for generations. The sacred literature which he was, perhaps, the first to teach in a newly-founded colony, was afterwards handed down under the sanction of his name, though differing but slightly from the traditional texts kept up in the community from which he himself had started. He might. perhaps, add a few chapters of his own composition, a change quite sufficient, in the eyes of the Brahmans to constitute a new work, or at least to disqualify it for claiming any longer its original title. When these new Charanas had once been founded, it was but natural, though they orginated chiefly with a Brâhmana of their own, that the text of their Sanhitas also should be slightly modified. This was not the case necessarily. The Aitareyins, for instance, and the Kaushîtakins though they differed in their Brahmanas, preserved, as far as we know, the same s'akha of the Sanhita, and preserved it each with the same minute accuracy. No Sanhitâ peculiar to the Kaushîtakins and Aitarevins is ever mentioned, and the points on which they differed were from the very first, connected with the subject matter of the Brahmans. dents following different s'akhas as far as their Brahmana was concerned, might very well follow one and the same S'akha of the Sanhita, though they would no longer call it by its own original name. In most cases, however, and particularly in the Charanas of the Yajurvda, a difference in the Brahmanas would necessitate, or, at least, naturally, lead to, corresponding differnces in the Sanhita, such as we tind for instance, in the hymns of the Kânvas and Mâdhyandinas. 1

These Brahmana-charanas existed previous to the first composition of the Sûtras, and in the Sûtras belonging to the Sama-veda, which are

<sup>&</sup>lt;sup>1</sup> The differences of these schools may be seen in Weber's edition of the Yajur-veda at the end of each Adhyâya.

the earliest Sûtras we possess, they are quoted. No Sûtra is ever quoted in any of the Brâhmanas, but there is no collection of Sûtras in which the various S'âkhâs of the Brâhmanas are not referred to by name. The authorities quoted in the Sûtras on doubtful points of the vedic ceremonial, are invariably taken from the Brahmana-charanas. In the commentary on Pâṇini, such names as "the Aitareyins, the S'âtyâyanins, and Bhâllavins" are distinctly explained as supporters of ancient Brâhmânas; and the antiquity of the two last is still further confirmed by the fact of their being quoted as Brâhmanic authorities in the Satapatha brâhmanâ. 1

The third and most modern class of Charanas consists of those which derive their origin from the introduction of a new body of Sûtras. such as the Asyalayanivas, the Katyayaniyas, and many of the subdivisions of the Taittirîyas. It is not always possible to determine with certainty whether a Charana dates from the Brahmana period, or from the Sûtra period, because so many of the Brahmanas and Sûtras, have been lost, and some of the Brahmanas have been handed down to us under the names of more modern Sûtra-charanas, by which they were adopted. It is easy to determine that the Kaushîtakins date from the Brâhmana period, because there is neither a Kâushitaki-Sûtra nor a Kaushitaki-sanhitâ, but only a Kaushîtaki-brâhmana; but in other instances our knowledge of the ancient literature of India is too fragmentary to enable us to fix the age of the numerous Charanas which are quoted by later authorities. Some of the Sûtras again, as we saw before, are older than others, and seem almost to trespass on the frontiers of the Brahmana period. How are we to determine, for instance, whether the Sânkhâyanas were originally a Brâhmana-charana and had their Sûtras written by one of their own sect, or whether the foundation of their Charana rested on the text of the Sûtras, 2 a new text of the original Brahmana of the Bahvrichas being adopted by them in later times, and thenceforth quoted at the S'ankhayana-brahmana? In some instances the relative age of certain Sûtras has been preserved by the tradition of the schools. Thus the most ancient Sûtra of the Taittiriyas is said to have been that of Baudhavana, who was succeeded by Bharadvaja, Apastamba, Satyashadha. Hiranyakes'in. Vadhuna and Vaikhanasa; all of whom, with the exception of the two last, have lent their names to different Charanas of the dark Yajur-veda.

Although none of the Sûtras seem to have been written with the distinct purpose of founding a new Charana, it can easily be imagined how different communities, after adopting a collection of Sûtras as the highest authority for their ceremonial, become inclined to waive minor points of difference in the Sannitâs and Brâhmanas, and thus coalesced into a new Charana under the name and sanction of their Sutrakâra. After these new Sautra charanas had once been started, we find that the Sannitâs and Brâhmanas, current among theirs members, were designated by the name of the new Charanas. Thus we may explain the

<sup>1</sup> See Weber's Indische Studien, ii. 44.

<sup>2</sup> It should be observed that in some MSS of the Charanavyuhe the two Charanas, which belong most likely to the Sautra period, those of As'valayana and Sânkhayâna, are not mentioned.

title of As'valâyana-brâhmana given to the Aitareya-brâhmana in one of the MSS. of the Bodleian library; I and we shall not hesitate to ascribe the same meaning to an As'valâyana-brâhmana, said to be quoted by Yâjnikadeva in his commentary on Kâtyâyana, Why such a Brâhmana should not be quoted by early writers, such as the authors of Sûtras, is easily understood. Its title was necessarily of late origin, and it is important as marking the progressive changes in the nomenclature of Indian literature. We have a similar and still better authenticated instance in the so-called Âpastamba-brâhmana, which is bit a different title of the Taittirîya-brâhmana, as adopted by the followers of the Âpastamba-sûtras. It is in this mannner that the Sûtras may be said to have contributed partly to the formation of new Charanas, some of which are not mentioned in the ancient lists, as, for instance, the Kâtyayanîyas; partly to the extinction of the more ancient Brâhmanacharanas and Sanhitâ charanas, many of which are now known to us by name only.

That the introduction of the Sûtras and the foundation of Sûtra. charanas was felt as an innovation by the Brahmanas themselves, we perceive from the manner in which even modern writers speak of them; half objecting to their authority, yet glad to admit and even to defend what could no longer be prevented. The Sûtras were not, indeed, admitted as part of the S'ruti, yet they were made part of the Svadhyaya, and had to be learned by heart by the young students. They might, therefore, like the Sanhitas and Brahmanas, claim a kind of sacred character, and in time become the charter of a new Charana. Thus we read in Mahadeva's Commentary on the Hiranyakes'î-sûtras: 3 "The Kalpa sutra is sometimes different for different S'akhas, sometimes it is not. The difference of the S'akhas arises partly from the difference of the sacred text (adhyayana being used in the sense of svadhyaya, perhaps with reference to the peculiar pronunciation taught in the Prâtis'âkhyas), partly from a difference in the Sûtras. The Sûtras of As'valâyana, Kâtyâyana, for instance, are tha same for two Sakhâs whose respective texts are different, while in the Taittirîya-veda we find S'akhas with different Sûtras, but no differences in their sacred Hence it may be said, 4 that sometimes, where there is a difference in the Sûtras, there is also a difference of S'akha; and, on the other hand, where there is a difference of S'akha, there may be a difference in the Sûtras." Mahâdeva goes even further, and tries to show that, like all the revealed literature of the Brahmanas, the Sûtras also existed

¹ MS. Wilson, 473- The title is आस्वलाएनक ब्राह्मण (sic) ; it contains the fifth Book of the Aitareya-brâhmana.

² Kâtyâna, ii, 5. 18.; vi. 6, 5. Indische Studienf i. 230. ³ तत्र कल्पसूत्रं प्रतिशाखं भिन्नमभिन्नमिष क्रिवित् शाखाभेदे ऽध्ययनभेदाद्वा सूत्रभेदाद्वा । आश्वलायनीयं कात्यायनीयं च सूत्रं हि भिन्नाध्ययनयोर्द्वयोर्द्ध्योः शाखयोरकेकमेव । तैत्तिरीयके च समाम्राये समानाध्ययने नाना सूत्राणि । अनेन च सूत्रभेदे शाखाभेदः शाखाभेदे च सूत्रभेद इति प्रूस्पराश्रय इति वाच्यं ॥

<sup>4</sup> Afterwards he says again: तथा चै हस्यां तैत्तिरीयशाखायां समानपाठायां स्त्रभेदाद्वांतरशाखाभेद्श्ररणच्यूहशास्त्रे दर्शितः। "It has been shown in the Charanavyûha, that in the Taittirîya-s'âkhâ, where there is but one and the same sacred text, subordinate S'âkhâs arise from different Sûtras."

previous to the beginning of time and had no historical origin. 1 "As the various Sakhas," he says, " which arise from various readings of the sacred texts are without a beginning, or eternal, so are also the various Såkhås which arise from different Sûtras. For the titles of certain Sûtras, derived from their authors, are not modern; but being eternal, as inherent in individual Rishis, whose names occur in certain Kalpas or ceremonials, and retaining the same character when applied to the Sûtras, which have been promulgated by the Bishis, they hold good as titles for s'akhas, which apparently are marked by the names of men.2" We may now understand in what sense the same Mahâdeva gives to the word Charana the meaning both of Sakha and Sutra. "It is true," he says, "that s'akha means a part of the sacred tradition, consisting of Mantras and Brâhmanas, and that the subordinate s'âkhâs of the Veda owe their origin to the differences of either Mantras or Brahmanas. Nevertheless, as Veda means the sacred tradition, together with the Angas or subsidiary doctrines, a s'âkhâ may include the Angas and yet remain Veda, and as such become different from other s'akha, owing to a difference in the Angas. If, therefore, the Sûtra, which is an Anga, differs, there will be difference in the sacred tradition; and thus a difference in the Sûtras may well become the cause of a different name of a Sâkhâ."2

The following list, though far from being complete, contains some of the Kalpa-sûtras which are best known to us either from MSS. or

otherwise :-

# A. Old, or Dark Text.

Apastamba, text and commentary existing.
 Baudhâyana, text and commentary existing.

3. Satyashadha Hiranyakes'in, text and commentary existing.

Mânava-sûtra, large fragments of text existing.

- 5. Bhârdavâja-sûtra, quoted.6. Vâdhûna-sûtra, quoted.
- 7. Vaikhânasa-sûtra, quoted.
- 8. Laugâkshi-sûtra, quoted.
- 9. Maitra-Sûtra, quoted. 10. Katha-sûtra, quoted.
- 11. Vârâha-sûtra, quoted.

े यथाध्यथनभेदाच्छाखाभेदो ऽनाद्दिरं सूत्रभेदाद्पि। न हि सूत्राणां कर्तृ-संबंधिसंज्ञाद्यतनी किंतु नानाकल्पगतासु तत्तन्नामकर्षियक्षिषु नित्या तत्प्रणीत सूत्रेषु च नित्यां जातिमवलंक्य तिष्ठति यथा पुरुषनामांकितशाखासु संज्ञा॥

"Nânakalpa-gatâsu" cannot refer to the chronological Kalpas, because

these are after the beginning of time.

### B. New, or Bright Text.

1. Kâtyâyana, text and commmentary existing.

#### II. SAMA-VEDA.

- 1. Mas'aka's Arsheya-kalpa, text and commentary existing.
- 2. Lâtyâyana-sûtra (Kauthuma), ditto.
- 3. Drahyayana sutra (Ranayaniya), ditto.

#### III. RIG-VEDA.

- 1. As'valâyana-sutra, text and commentary existing.
- 2. Sankhayana-sûtra, ditto.
- 3. Saunaka-sûtra, quoted.

#### VI. ATHARVA VEDA.

1. Kus'ika-sûtra, text existing.

Two other classes of Sûtras have already been mentioned as belonging to the same branch of literature with the S'rauta sûtras, viz. hya. and Sâmayâchârika-sûtras. Both are included under the common title of Smarta-sûtra, in contradistinction to the S'rauta-sûtras; the latter deriving their authority from the S'ruti (the Mantras and Brâhmanas), the former from Smriti, or immemorial tradition. The Grihva and Sâmayâchârika-sûtras have frequently been confounded by European scholars; but the Brahmanas distinguish strictly between the Grihva ceremonies, performed by the married house-holder, chiefly for the benefit of his family, and the Sâmayâchârika rules, which are to be observed by the rising generation, and which regulate the various relations of every-day life. It is chiefly in the Sâmayâchârika, or, as they are sometimes called, Dharma-sûtras, that we have to look for the originals of the later metrical law-books, such as Manu, Yajnavalkya, and the rest; and the statement of Megasthenes, that the Hindus at his time administered law from memory (  $\alpha \pi o \mu \nu \eta \mu \eta s$  ) an only refer to the Smarta-sutras of the Charanas, and not to the modern Smritisanhitâs of Manu, Yâjnavalkya, Parâs'ara, &c.

The Grihya-sûtras, belonging to the old Yajur-veda, are numerous. Quotations have been met with from Baudhâyana, Bharadvâja, Hiranya-kes'in, the Kâṭhaka,² and the Mairtrâyanîyas,³ all names connected with the Taittirîya-veda, and proving the existence of distinct collections of Grihya-sûtras. The number of similar Sûtras for the bright Yajur-veda seems to have been still more considerable. Every one of the fifteen

3 Weber, Vorlesungen, p. 97.

<sup>1</sup> Strabo, xv. 1. 53. seq., quotes Megasthenes: Γενομενους δ ουν εν τω Σανδροκοττου στρατο  $\pi$  εδω, φησιν ο Μεγασθενης, τετταρακοντα μυριαδων  $\pi$  ληθονς ιδρυμενου, μηδεμιαν ημεραν ιδει ν ανηνεγμενα κλεμματα  $\pi$  λειονων η διακοσιων δραχμων αζια, αγραφοις και ταυτα νομοις χρωμενοις. Ουδε γαρ γραμματα ειδεναι αυτους, αλλ απ ο μνημης εκαστα διοικει σθαι. Schwanbeck suggests that only the last words απ ο μνημης εκαστα διοικει σθαι contain the truth, μνημη being a vague interpretation of smriti, 'memory or tradition; and that the first part was a wrong conclusion of the Greeks The question whether the Hindus possessed a knowledge of the art of writing during the sûtra period, will have to be discussed hereafter.

<sup>&</sup>lt;sup>2</sup> See Stenzler "On Indian Law Books," Ind. Stud. i. 232, and iii, 159.

Charañas of the Vajasaneyins is said to have been possessed of Kuladharmas, which may have been either Grihya or Dharma-sûtras. The only collection, however, which has come down to us, is that of Paraskara. Another, ascribed to Vaijvapin, is quoted, but has not yet been discovered in manuscript. Connected with the Sâma veda. Grihyasûtras of Gobhila, adopted both by the Ranayaniyas and the Kauthumas seem to have obtained the greatest celebrity, there being but one other collection, the Khâdira grihya, which is sometimes quoted as a parallel authority of the Chbandogas. The Grihya-sûtras of the Rig-veda or the Bahvrichas were written by Sanaka, and he is quoted as an authority on legal subjects by as late a writer as the author of the Mânavadharma s'âstra (iii. 16). The only two collections, however, which have been preserved in MS. are those of As'valâyana and Sânkhâyana.

Various opinions are expressed by the Brâhmans themselves as to the meaning of grihya. Griha, according to the commentary on As'vala. yana, signifies not only house, but also wife. In support of the latter meaning he quotes a passage, eagriho griham agatah, "he is gone to the house with his wife." According to this derivation the grihya ceremonies would be those which are performed with the sacred fire, first lighted by a husband on the day of his marriage. This fire, or the altar on which it is kept, is called grihya, and the grihya sacrifices are all performed on that altar. But it is doubtful whether griha can ever mean In the passage quoted above, it rather means house or family. Besides, as the Hindus themselves admit, this domestic fire has sometimes to be lighted by a Brâhman4 before his marriage, in case his father should die prematurely.5 Grihya, therefore, probably meant originally the house or the family hearth, from griha, house; and it was in opposition to the great sacrifices for which several hearths were required, and which were therefore called vaitanika,6 the domestic ceremonies were called grihya, as performed by means of the one domestic fire. It should be stated, however, in favour of the former interpretation, that in Gobhila's Sûtra these domestic

<sup>&</sup>lt;sup>1</sup> See p 121, p. 1.

<sup>&</sup>lt;sup>2</sup> In a MS. (Wilson, 451.) Pâraskara's Grihya-sûtras are ascribed to the Mâdhyandinî s'âkhâ.

<sup>3</sup> See As'â litya in his "Commentary on the Karma-pradîpa," Ind. Stud. i. 58. This Karma-pradîpa, a work ascribed to Kâtyâyana, is intended as a supplement to Gobhila.

<sup>4</sup> भार्यादिश्विद्यादिवां तस्मिन्गृह्याणीति गीतमः This is taken from Gautama, v. 1.

<sup>5</sup> A Brahmachârin who has not yet finished his religious education, possesses no sacred fires of his own, and if he is obliged to perform ceremonies with burnt offerings, he must do so with common fire and without sacred vessels. Thus the Kâtyâyana-sûtra-paddhati says: गवेधुकचर्यकोणि-पशुश्च छै। किकेऽस्रो भवति। तत्रावकीणिपशो पुरोड! शश्रपणं भूमी भवति न क प छेषु॥

<sup>6</sup> वितानाऽस्रोनां विस्तारः तत्र भवति वैतानिकानि बह्वस्निसाध्यानि कर्मा-णोत्यर्थः ॥ Nârâyaṇa on Ās'v. Grihya-sûtra. The three fires are the Gârhapatya, Āh wanîya, and Dakshina; the one fire is the Avasathya or Grihya.

geremonies are not called grihya, but grihyâ-karmâni, and that here also the commentator admits grihyâ in the sense of housewife or tradition.

The general name of the sacrifices performed, according to the Grihyasûtras, is Pâkayajna, where paka is not to be taken in the sense of  $\operatorname{cook}$ ing, but signifies, according to Indian authorities, either small or good. That paka is used in the first sense appears from such expressions as "yo'smatpâkatarah," "he who is smaller than we." But the more likely meaning is good or excellent or perfect; because, as the commentators remark, these ceremonies impart to every man that peculiar fitness without which he would be excluded from the sacrifices, and from all the benefits of his religion. As it is necessary that the marriage ceremonies should be rightly performed, that the choice of the bride should be made according to sacred rules, prescribed in the Sûtras or established by independent tradition in various families and localities, the first ceremony described in the Grihya-sûtras is Marriage. low the Sanskaras, the rites to be performed at the conception of child. at various periods before his birth, at the time of his birth, the ceremony of naming the child, of carrying him out to see the sun, of feeding him, of cutting his hair, and lastly of investing him as a student, and handing him to a Guru, under whose care he is to study the sacred writings, that is to say, to learn them by heart, and to perform all the offices of a Brahmachârin, or religious student. It is only after he has served his apprenticeship and grown up to manhood, that he is allowed to marry, to light the sacrificial fire for himself, to choose his priests, and to perform year after year the solemn sacrifices, prescribed by the Sruti and the Smriti. The latter are described in the later books of the Grihya-sûtras, and the last book contains a full account of the funeral ceremonies and of the sacrifices offered to the spirits of the departed.

There is certainly more of human interest in these domestic rites than in the great sacrifices described in the Srauta-sûtras. The offerings themselves are generally of a simple nature, and the ceremonial is such that it does not require the assistance of a large class of professional priests. A log of wood placed on the fire of the hearth, an oblation poured out to the gods, or alms given to the Biāhmans, this is what constitutes a pāka-yajna. As'valāyana quotes several passages from the Veda, in order to show that the gods do not despise those simple offerings, nay, that a mere prayer will secure their favour, and that a hymn of praise is as good as bulls and cows. He quotes from Rv. viii. 19.5. and 6.: "The mortal who sacrifices to Agni with a log of wood, with an oblation, with a bundle of grass² with a reverence, careful in his performance, his horses will press on quickly, his fame will be the brightest; nowhere will mischief, whether wrought by the gods or wrought by men, reach him." Another verse is quoted from Rv. viii. 24.20.

<sup>े</sup> अथाता गृज्ञाकमाण्युपदेश्यामः ॥ १ ॥ गृज्ञशब्दंन समार्ताः स्चयते । तस्मिन्यानि कर्माणि तानि गृज्ञाकर्माणि । दीर्घत्व छांद्सं ॥ अथवा गृज्ञा स्मृतिः । तस्यां यानि कर्माणि ॥ अथवा गृज्ञा पत्नी । तथा सहितस्य यानि कर्माणि ॥

The Commentator explains veda as the sacred code. Such a code was not known to the authors of the hymns. On the meaning of veda, see page 14, note 3.

where men are called upon "to speak a mightly speech which is sweeter to Indra than milk (ghrita, ghee) and honey." And lastly, reference is made to a passage (Rv. 16. 47.), where the poet says: "With this hymn of praise, O Agni, we bring thee a sacrifice that is fashioned by the heart; may these be thy bulls, thy oxen, and thy cows." All these passages are more applicable to the Grihya than to the Srauta ceremonies, and though the latter may seem of greater importance to the Brahmans, to us the former will be more deeply interesting, as disclosing that deep-rooted tendency in the heart of man to bring the chief events of human life in connection with a higher power, and to give to our joys and sufferings a deeper significance and a religious sanctification."

The third class of the Sûtras, the Sâmayâchârika or Dharmasûtras, are equally interesting on account of the light which they throw on the everyday life of the early Brahmans. According to the commentaries on these works, the existence of the Dharma-sûtras is presupposed by the Srauta and Grihya-sûtras. It is said, for instance, in the former, that a certain act of the sacrifice is to be performed by a man, after he has adjusted his sacrificial cord yajnopavîtam): but in what peculiar manner a man ought to adjust that cord is not stated, but is supposed to be known from the Dharma-sûtras. The same remark is made with reference to the exact manner of rinsing the mouth (achanta), and of performing the morning and evening prayers (sandhyâvandana). These matters are spoken of as generally known from the Sûtras, and, according to Hindu commentators, they could only be known from the Dharma-sûtras. This argument, however, can hardly be considered conclusive as to the historical priority of the Dharma-sûtras. On the contrary, it seems more likely that these matters, such as adjusting the sacrificial cord, &c., were supposed to be so well known at the time when the Srauta and Grihya-sûtras were first composed, that they required no elucidation. Instead, therefore, of considering the Dharma sûtras as earlier in time, the evidence, as far as it is known at present, would rather point in the opposite direction, and make us look upon these Dharma-sûtras as the latest of the three branches of Sûtras. This impression is confirmed by other reflections. In neither of the other Sûtras is the position of the Sudra so definitely marked as in the Dharma-sûtras. Apastamba, in his Sâmayâchârika-sûtras, declares distinctly that ther are four Varnas,

¹ In addition to a list of literary names quoted in the Grihya sûtras of Âs'valâ-yana (see p. 22), I subjoin a larger list of a similar character from the Sânkhâyana-grihya-sûtras, of which a copy exists at Berlin. (Weber, "Catalogue of Sanskrit MSS." p. 33.) Sumantuh, Jaimini-Vais'ampâyana-Pailasûtrabhâshya-Gârgya-Babhru-Bâbhravya-Maṇḍu-Mâṇḍavyâh, Gârgî Vâchaknavî, Vaḍavâ Prâtitheyî, Sulabbâ Maitreyî; Kaholam, Kaushîtakim, Mahâkaushîtakim, Suyajnam, Sânkhâyanam, Âs'valâyanam, Aitareyam, Mahâtareyam, Bhâradvâjam, Jâtûkarnyam, Paingyam, Mahâpaingyam, Bâshkalam, Gârgyam, Sâkalyam, Mâṇḍûkeyam, Mahâdamatram, Audavâhim, Mahaudavâhim, Sauyâmim, Sauuakim, Gautamim, Sâkapûṇim, ye chânya âchâryâs, to sarve tripyantv iti. Seo also Karmapradipa, MS. W. 465, p. 16. b.

Brāhmaņa, the Kshatriya, the Vais'ya, the Sudra, but that the initiay rites, the Upanayana in particular, are only intended for the three at classes. The same is implied, no doubt, in the other Sûtras, which ve the rules as to the proper time when a young Brahman, a young hatriya, or a young Vais'ya should be apprenticed with their spiritual tors, but never say at what age this or similar ceremonies should be rformed for one not belonging to these three Varnas. Yet they never elude the Sûdra expressly, nor do they represent him as the born we or client of the other castes. In the Dharma-sûtras the social gradation of the Sadra is as great as in the later Law-books, and the me crime, if committed by a Brahman and a Sadra is visited with ry different punishments. Thus, if a member of the three Varnas mmits adultery with the wife of a Sûdra, he is to be banished; if a adra commits adultery with the wife of a member of the three Varnas is to be executed. If a Sadra abuses an honest member of the ree Varnas, his tongue is to be cut.3 He is to be flogged for ot keeping at a respectful distance. For murder, theft, and pillage the Sadra is executed; the Brahman, if caught in the same offences, only deprived of his eye-sight. This is the same iniquitous law, hich we find in the later Law books. But although the distinction etween the Sadras and the other Varnas is so sharply drawn by Apasamba, he admits that a Sûdra, if he obeys the law, may be born again a Vais'ya, the Vais'ya as a Kshatriya, and the Kshatriya as a Brâhan; 4 and that a Brahman, if he disregards the law, will be born gain as a Kshatriya, the Kshatriya as a Vais'ya and a Vais'ya as a Sûdra. It might be supposed that the Dharma-sûtras formed merely an ppendix to the Scauta and Grihya-sûtras, and that they should be assed with the Paris'ishta literature. But such a supposition is contraeted by the fact, that the Dharma-sûtras occasionally treat of the same bjects as the Grihya-s'atras, and employ almost the same words in plaining some of the initiatory rites, the Sanskaras. They must. erefore, be considered as independent collections of Sutras. later rhaps than the Srauta and Grihya sûtras, but enjoying the same thority on matters belonging to Smriti or tradition, as the Grihyasûtras.

We have still to mention the Ten Sûtras of the Sâma-veda.5

4 MS. p. 125b. धर्मचर्यया जघन्ये। वर्णः पूर्वपूर्वं वर्णमापद्येत जातिपरिवृत्ती

The most important among them were first noticed and described Dr. Weber, on whose authority some of our statements must rest.

Sûtras¹ do not all, strictly speaking, treat of the Kalpa, or the ceremonial. Some of them are little more than lists, such as we find in the Anukramanîs or Indices, appended to the other Vedas. Their style, however, approaches the style of the Sûtras; and, as they are quoted together as the Ten Sûtras, and, as some of them belong decidedly to the earliest productions of the Sûtra literature, it will be more convenient to place them here, than to refer them to the Paris'ishta literature, with which they have little or nothing in common. They are:

I. The Kalpa-sûtra, or Ārsheya-kalpa of Mas'aka, an index of the hymns used by the Chhandoga priests, in the order in which the sacrifices are described in the Tândya-brâhmana. Eleven Prapâthakas: 1—5, on the sacrifices called Ekâha; 6—9, on the sacrifices called Ahina; 10—12, on the sacrifices called Sattra. Commentary by Varadarâja.

II. The Anupada-sûtra, a gloss to the Tândya-brâhmana, in ten

Prapathakas.

III. The Kalpa-sûtra, alreody mentioned, either of Lâtyâyana or Drâhyâyana. Lâtyâyana quotes Mas'aka, and follows the order of the Tândya-brâhmaûa.

IV. The Nidâna-sûtra, on Metres, in ten Prapâthakas.

V. The Upagrantha-sûtra, a treatise on the performance of some of the Sâma-veda sacrifices, commonly ascribed to Kâtyâyana.<sup>2</sup>

VI. The Kshudra-sûtra or Kshaudra, in three Prapâthakas, equally treating of the ceremonial of the Sâma-veda.<sup>3</sup>

VII. The Tandâlakshana-sûtra.

VIII. The Panchavidha-sûtra,4 in two Prapathakas.

1X. The Kalpanupada, and

X. The Anustotra-sûtra, in two Prapathakas.

We miss in this list the Pushpa-sûtra, ascribed to Gobhila, and containing rules on the adaptation of the text of the hymns to their musical performance.

JYOTISHA OR ASTRONOMY.

The last of the Vedângas is called Jyotisha, or Astronomy. Its literature is very scanty, and the small treatise, generally quoted as the Jyotisha. belongs to the same class of works as the Siksha. Colebrooke

reaks of different Jyotishas for each Veda, and he calls one, which has commentary, the Jyotisha of the Rig-veda. Among his MSS., however, hich are now deposited at the East India House, there is but one work f this kind. It exists in various MSS., (Nos. 1378, 1743, 1520), and the ifferences between these MSS. are so small that we could hardly conider them as distinct works. This tract is later than the Sûtra period. nd we possess as yet no work on ancient astronomy, composed in the tyle of the early Sûtras. Notwithstanding its modern form, however, he doctrines which are propounded in this small treatise represent the earliest stage of Hindu astronomy. The theories on which it is founded, and the rules which it lays down, are more simple, less scientific, than anything we find in other astronomical treatises. Nor is it the object of this small tract to teach astronomy. It has a practical object, which is to convey such knowledge of the heavenly bodies as is necessary for fixing the days and hours of the Vedic sacrifices. It was the establishment of a sacred Calendar, which in India, as elsewhere, gave the first impulse to astronomical studies. Thus we meet in the Brahmanas and Aranayakas with frequent allusions to astronomical subjects, and even in the hymns we find traces which indicate a certain advance in the observation of the moon, as the measurer of time. The fact that the name of the moon is the same in Sanskrit, Greek, and German, and that it is derived from a root which originally means to measure, shows that even before the separation of the Indo-European family, the moon had been looked upon as the chief means of measuring time. And the close connection between the names of moon and month proves that a certain knowledge of lunar chronology existed during the same early pariol. In one passage of the Rig-veda 1 the moon is mentioned in connection with the Nakshatras, and we can hardly doubt that this is an allusion to the Nakshatras, the well-known name of the Lunar Mansions or the Lunar Zodiac. In the hymns<sup>2</sup> the phases of the moon have not only received proper names, but they have been personified, and are invoked as deities to grant progeny to their worshippers. Again, there is a passage in the first book of the Rig-veda, where, in addition to the twelve months, a thirteenth or intercalary month is mentioned. The poet says there (Rv. i. 25. 8.), "He (Varuna), firm in his work knows the twelve months with their offspring, and knows the month which is produced in addition." has been objected that the idea of an intercalary month was too scientific for the early poets of the Veda, and a different translation has been proposed: "Varuna, who knows the twelve months, and knows those which are to come." But the poet would not have used the singular of the verb, if he meant the plural. He could not have said, "the twelve months and those which are to come," if he meant to say, "the past months and those which are to come." No doubt the asquaintance with an intercalary month presupposes a certain

<sup>&</sup>lt;sup>1</sup> Rv. viii. 3. 20: 'a'tho na'kshatranam esham upa'sthe so'ma a'hitah,'' 'Soma is placed in the lap of these Nakashatras.''

<sup>&</sup>lt;sup>2</sup> Rv. ii. 32. Råkå, the full moon; Sinîvâlî, the last day before the new moon; and Gungu, the new moon, are mentioned. Rv. v. 42. 12, Råkå occurs again; and X 43. 8. we read Gungubhyah. In both these passages, however, the poet is speaking of rivers, and not of the moon.

knowledge of lunar and solar astronomy, but not more than what a shepherd or a sailor might gain in the course of his life. The whole idea expressed by the poet is, that Varuna maintains the established order of the world, and therefore knows the twelve months and also the thirteenth. In the hymns of the Yajur-veda the thirteenth month is changed already into a deity. Oblations are offered (Vâjasan-sanhitâ, vii. 30., xxii. 31.) to each of the twelve months, and at the end one oblation is made to Anhasaspati, the deity of the intercalary month. In the Brahmanas 1 likewise the thirteenth month is mentioned, and in the Jyotisha the theory of intercalation is fully explained. Two names for "an astronomer," Nakshatra-dars'a and Ganaka, occur as early as the Taittirîyaka and the Sanhitâ of the Yajur-veda2; and among the sciences of the early Brâhmanas, Nakshatra-vidyâ or Astronomy is mentioned in the Chhandogyopanishad In the Ganapatha, appended to Pânini's Grammar, 3 the title of Jyotisha occurs together with the titles of other Vedic works; and in the Charanavyûha we meet not only with the Jyotisha, but with an Upajyotisha, or a supplementary treatise on astronomy. This supplementary treatise is one of the Parisishtas, and in the same class of writings we meet with other tracts on astronomical subjects, such as the Gobhilîya Navagraha-s'ânti paris'ishta4 belonging to the Sâma-veda, and several more belonging to the Atharva-veda.5

If now we take a comprehensive view of that class of literature which we have just examined, we find some characteristic features throughout. All these works were written with a practical object, quite a new phase in the literature of such a nation as the ancient Hindus. The only authority which the Sûtrakâras, the authors of the Sûtras, claimed for their works was the authority of that ancient, and, as it was then already considered, revealed literature on which their works were founded. These men claimed no inspiration for themselves. They had made a scientific study of the literature handed down to them by former generations, and they wished to make that study easier to their contemporaries and to future generations. The style which they adopted for that purpose was business-like in the extreme. It was the curt and dry style of the Sûtras, a style peculiar to India, which can only be compared with the elaborate tables of contents, or the marginal notes, of some of our own early writers. It has its first beginnings in the Brâhmanas, where some subjects, particularly those which has given rise to early controversy, are stated with all the conciseness and neatness of the Sûtra style. But whereas the authors of the Brâhmanas screened their poverty behind

<sup>1</sup> Sâyana, in his Commentary on Rv. ii. 40. 3, says, that the thirteenth month was called the seventh season, and he quotes from a Brâhmana a passage: asti trayodas'o masa iti s'ruteh.

<sup>&</sup>lt;sup>2</sup> Taitt.-brâhm. iv. 5; Vâj.-sanh. xxx. 10.; 20.

<sup>3</sup> Gana ukthâdi. Pân. iii. 1. 143, graha, planet, is mentioned as different from grâha.

<sup>4</sup> MS. Chambers, 404.

a constant display of the most inane verbosity, the writers of the Sûtras gloried in every word they could save without endangering the practical usefulness of their manuals. In some instances, they adopted a poetical form, and they succeeded in combining the conciseness of their prose with the rhythm of their early metres, the mixed Ślokas. Thus their position is marked by the very form of their works, as intermediate between the antique style of the Brâhmanas, and the modern style of the metrical Śâstras. Their works form a distinct and compact class of literature, and if we succeed in fixing the relative age of any one of these Sûtrakâras or writers of Sûtras, we shall have fixed the age of a period of literature which forms a transition between the Vedic and the classical literature of India.

## THE ANUKRAMANIS.

Several of the works mentioned before were ascribed to Saunaka and his two pupils, Kâtyâyana and Â'valâyana. But we have not yet mentioned a number of treatises, ascribed to the same authors, and belonging to the same sphere of literature as the Sûtras, which, however, on account of their technical character, could not lay claim to the title of Vedânga, or "member of the Veda." They are known by the name of the Anukramanîs from anu, along, and kram, to step. They are systematic indices to various portions of the ancient Vedic literature.

The most perfect Anukramanî is that of the Sanhita of the Rigveda. It is ascribed to Kâtyâyana, an author chiefly known by his works on the Yajur-veda and Sâma-veda. Its name is Sarvânukramanî or Sarvânukrama. i.e., the index of all things. 1 It gives the first words of each hymn. the number of verses, the name and family of the poets, the names of the deities, and the metres of every verse. Before the time of Kâtyâyana, there had been separate indices for each of these subjects, and it was with reference to them that Kâtyâyana called his own index the general or comprehensive index. Our authority for this is Shadgurus'ishya, the author of a commentary on the Index of Kâtyâyana; a man who like Devarâjayajvan, the author of a commentary on the Nighantu, was not without a certain appreciation of the historical progress of Indian literature. He tells us in his Vedârthadîpikâ, that before Kâtyâyana, there existed one index of the poets, one of the metres, one of the deities, one of the Anuvakas, the old chapters of the Rig veda, and one of the hymns; 2 and that these indices were composed by S'aunaka. Now we know the style of Saunaka, and as by a happy accident some of these former indices have been preserved, some complete, others in fragments, we are able to test Shadgurus'ishya's accuracy.

We remarked before, as a distinctive peculiarity of the style of Saunaka, as contrasted with that of Kâtyâyana, that the Prâtis'âkhya ascribed to the former is composed in mixed Ślokas, whereas the Prâtis'âkhya of Kâtyâyana is written in prose or in Sûtras. The same

<sup>&</sup>lt;sup>1</sup> सर्वश्चेयार्थवर्णनान्सर्वानुक्रमण।शब्दं निर्ब्वति विपश्चितः ॥

<sup>े</sup> अर्थ्य तुक्रमणीत्याद्या छांदसी दैवती तथा। अनुवाकानुक्रमणी सूकानुक-मणी तथा॥

observation applies to the Anukramanîs. Those ascribed to Saunaka are composed in mixed metres, as far as we can judge from quotation; the Anukramamanî of his pupil Kâtyâyana is in prose, and exhibits all the artificial appliances of a Sûtra composition. There is one of Saunaka's Anukramanîs, the Anuvâka-anukramanî, which can be restored completely from MSS; 1 and this work bears the most manifest traces of Saunaka's style, partly in the mixture, partly in a peculiar rudeness, of its metres. The other Anukramanîs, ascribed to Saunaka are lost to us, but they must have existed at the time of Shadgurus'ishya. He quotes not only from the Anuvâka-anukramanî (Bhâshya, viii. 1.), but also from the Deva-anukrama (Bhâshya, viii. 4.), and he distinguishes this work from the Brihaddevata, another work attributed to Saunaka, of which there is one MS. in Europe at the royal Library of Berlin.2 Sayana also, though later than Shadgurus'ishya, was still in possession of Saunaka's works, and he quotes particularly the Brihaddevata, in several of his own commentaries. Saunaka's Arsha-anukramanî is quoted by Sâyana in his Commentary on the Rig-veda, i. 100. 1. If we add to these quotations a reference to Saunaka's Chhando-'nukramanî, which is found in Shadgurus'ishya's Vedârthadîpikâ (MS. E. I. H. 1823, p. 7. a.), we may consider the authenticity of these works sufficiently established; and it is hardly unreasonable to suppose that the fifth Anukramanî also, of which no quotations have as yet been met with, the Sûktânukramanî, was in existence as late as Sâyana's time.3

This would give us for the Rig-veda five Anukramanîs by Saunaka, one by Kâtyâyana, and one by an unknown author. The Brihaddevatâ is a work of too large a compass to be called an Anukramanî, and it is even doubtful whether we possess this work in the same form in which Saunaka left it. To judge from Dr. Kuhn's extracts, the author of the Brihaddevatâ follows indeed the Śákala s'âkhâ, but his text must have differed from that of our MSS. The author may have followed one of the sub-divisions of the Śâkalas, the Śais'ira-s'âkhâ, for instance, which we know was followed by Śaunaka. The division of the Sanhitâ which is adopted in the Brihaddevatâ, is that of Mandalas, Anuvâkas,

<sup>1</sup> Sevesal MSS. contain portions of the Anuvâkânukramanî; and with the help of Shadgurus'ishya's Commentary, contained in the introduction to his commentary on Kâtyâyana's Sarvânukrama, (MS. Bodl. Wilson, 379), the text might be published in a critical edition.

3 Another Anukramanî, containing the last verses of each Mandala, is quoted by Shadgurus'ishya (Anukr. Bh. viii. 1). मंडलांतानाम्चामनुक्रमणे प्रतिचक्ष्ये त्येष्विप मृद्यते॥ Cf. Rv. Mand. vii. 6. 15; Asht. v. 7. 9.

<sup>&</sup>quot;Dr Kuhn gives the following description of this MS. in Haupt's "Zeitschrift fur Deutsches Alterthum." The Brihaddevatâ (Chambers, 192.) composed in epical metre, is ascribed to Saunaka, and contains an enumeration of the deities invoked in each hymn of the Rig-veda. It gives much mythological and other information as to the character of the gods of the Veda. The text of the MS. is so corrupt that we can scarcely think of restoring it without the help of other MSS." Another MS. has since been found in India, and a distinguished sanskrit scholar is preparing an edition of it.

d Sûktas; but the other division into Ashtakas is equally known, and en the Khilas are taken into account, whereas both Saunaka and âtvâvana exclude these later hymns distinctly from their indices. Dr. uhn concludes from a passage in Shadgurus'ishya's Commentary, to hich we shall revert hereafter, that not Saunaka, but As'valayana, as the author of our Bribaddevata. This conclusion, however, is not orne out by sufficient evidence, nor is the fact that Saunaka is quoted name in the work itself a sufficient argument against Saunaka's ithorship. According to the line of argument adopted by Dr. Kuhn, would be equally objectionable to ascribe the Brihaddevatâ to As'vatyana : for in one passage, according to Dr. Kuhn's own emendations, ne name of As'valâyana also occurs in it. Other authorities which re quoted in this curious work are the Aitareyaka, the Kaushîtakins, he Bhâllavi- brâhmana, the Nidâna (nidnasanjnake granthe), Sâkalas, âshkalas, Madhuka, Švetaketu, Gâlava, Gârgya, Rathîtara, Râthantarin, âkatâvana, Sandilya, Romakâyana Sthavira, Kâthakya, Bhâgurin, Sâkaûni, Bharmyas'va Mudgala, Aurnavâbha, Kraushtukin, Mâtrin, and laska. The last is most frequently mentioned, and the whole book is edicated to him. To judge from the stlye of the Brihaddevata, the 70rk as we now possess it, though originally writtien by Saunaka, eems to have been recast by a later writer.

The following figures, taken from Saunaka's Aunkramanîs, wiil serve o give an idea of the minuteness with which the Veda was studied this time. According to Saunaka, the Śâkala-s'âkhâ of the Rig-veda-anhltâ consists of 10 Mandalas, or 64 Adhyâyas.

|              | Hymns.     | Anuvâkas. |           | Mandalas. |                 |

<sup>1</sup> Trîni s'atâni Shatkânâm chatvârins'at shatcha Vargâh.

3

64 Adhvåvas = 2.00610.417

Here we have to observe a difference between the number of verses as deduced from the Vargas, and the number stated by Saunaka. The Latter gives the sum total of verses = 10,5801, but, immediately afterwards, the sum total of half verses = 21,2321 = 10.616 verses.

How this difference arose it is difficult to say: but it shold be observed that, if we divide the sum total of half verses, 21,232, by 2, we get 10,616 verses, and this number comes very near to 10,622, which the Charanavyûha gives as the sum total of the verses of the Rig-veda. According to the Charanavyûha (MS. Ch. 785.) the 64 Adhyâyas of the Rig-veda have:-

|                      | Verse | Verses. Vargas. V |       | Vargas.        |             | ses. |
|----------------------|-------|-------------------|-------|----------------|-------------|------|
| Vargas consisting of | 1     | ==                | 1     | الار<br>الاران | 1           |      |
| ,,,                  | 2     | nes               | 2     |                | 4           |      |
| 9 9                  | 3     | =                 | 93    | 35             | <b>27</b> 9 |      |
| <b>,</b> ,           | 4     | =                 | 176   | 80             | 704         | 100  |
| 59                   | 5     | -                 | 1,228 | -              | 6,140       |      |
| **                   | 6     | Tanada<br>Tanada  | 357   | 22             | 2,142       |      |
| , ,                  | 7     | -                 | 129   | ==             | 903         |      |
| <b>)</b> 1           | 8     | ===               | 55    | ===            | 440         |      |
| 99                   | 9     | 2000              | 1     | 200            | . 9         |      |
|                      |       |                   |       |                |             |      |
|                      |       |                   | 2,042 |                | 10,622      |      |

The number of padas or words in the Rig-veda-sanhitâ is stated as 153,826, which gives an average of between 14 to 15 words to each verse. Another computation brings the number of the charch â-padas (i. e., words which are used in the Kramapatha, omitting the repeated passages or galitas) to 110,704, and the number of syllables to 432,000.

In another Anukramani, Saunaka gives a list of verses, arranged according to the metres in which they are written; and at the end he states the sum total of verses as 10, 402; but here agian, if we cast up the number of verses in each metre, according to his own statement, we get 10,409 instead of 10,402. These differences are startling if we consider the general accuracy of the exegetical works of the Brahmans; but they may arise either from faults in the MSS. of the Annkramanîs, or from the fact that some of the Khilas were included. though, according to their own professions, both Saunaka and Kâtvâyana would seem to exclude these later hymns from their Anukramanis. The following table will show the distribution of metres according to Saunaka:-

| iaka,—    |     |       |                |         |      |

Carried forward 9,793

For the Yajur veda we have three Anukramanis, one for the Atreviakha of the Taittiriyas, the other for the Sakha of the Charayaniyas. ie third for the Madhyandina-s'akha of the Vajasaneyins. The former 1 ffers from other Aunkramanis in so far as it cotains an index not of ne Sanhita only, but also of the Brahmana and the Aranyaka. Its bject is not simply to enumerate the Kandas (Ashtakas), Pras'nas, nuvâka and Kândikās as they follow in the text. but rather to indiate the chief subjects of this Veda, and to bring together the different assages where the same sacrifice with its supplements is treated. hough we do not possess a MS. of the Atreyî-s'akha, it is possible to lentify nearly the whole of the Index with the text of the Sanhitâ 2 he Brâhmaṇa,3 and the Âranyaka4 which we possess. The Âtreyî-'âkhâ though not mentioned in the Charanavyûha must be considered sa sub division of the Aukhîya-s'âkhâ; and the Aunkramanî says that Vais'ampâyana handed it down to Yâska Paingi, Yâska to Tittiri, Tittiri io Ukha, and Ukha to Atreya, who was the author of a Pada-text.5 vhile Kundina composed a Commentary (vritti) on the same Sakha. The Apastamba-s'akha, of which we possess the complete Brahmana, is subdivision of the Khandikevas.

There is a curious tradition, preserved in the Kândânukrama that, although the greater portion of the Âtreyî-s'ākhâ was originally taught by Tittiri, some chapters of it owed their origin to Katha, the founder of the Kâthaka-s'ākhâ. This assertion is confirmed by Sâyaṇa in his Commentary on the Taittirîyâraṇyaka. The chapters ascribed to Katha and called the Kâthakam are found at the end of the Brâhamaṇa and beginning of the Âraṇyaka. They contain—

1. The Sâvitrâgnichayana with the Brâhmana, Tait.-brâhm. iii. 10.

2. The Nachiketachayana, Tait.-br. iii. 11.

3. Divahs'yenaya ishtayah. Tait.-br. iii. 12. 1 & 2.

Apâdyâ ishtayaḥ. Tait.-br. iii. 12. 3 & 4.
 Châturhotrachiti. Tait.-br. iii. 12, 5.

6. Vais'vasrijachiti. Tait.-br. 12.6-9, end of Brahmana.

Arunaketukachiti. Tait âranyaka, i. 1.
 Svâdhyáya-brâhmana. Taitâranyaka, i 2.

They are given here as they follow one another in the text of the Apastkmba-Sakha, and this order is confirmed in every particular by Sayana's Commentary (MS. E. I. H. 1145) which is in fact a commentary intended for the Apastamba-s'akha of the Taittirîya-brahmana. According to his introductory remarks prefixed to each Anuvaka, the Savitrachiti occupies the tenth, the Nachikeerchiti the eleventh Prapathaka. In the twelfth Prapathaka, he remarks, the Châturhotra and

<sup>&</sup>lt;sup>1</sup>MS. E. I. H. 1623, 965.

<sup>&</sup>lt;sup>2</sup> MS. E. I. H. 1701; 1702; name of Śâkhâ unknown.

<sup>3</sup> MS. E. I. H. 293, containing the three books of the Apastamba-brahmana 4 MS. E. I. H. 1690. &c.

<sup>&</sup>lt;sup>5</sup> See MS. Bodl. Wilson, 361.

Vais'vasrija should be explained. But as the ishtis, called the Divahs'yenis and Apâdyâs, form part of the complete Châturhotra (they stand either in the middle or at the end of it), they are explained first. Thus we find in the beginning of the twelfth Propâthaka (iii. 12. 1), the pratîkas of the Yajyânuvâkyâs of the Divahs'yenîs; in iii. 12. 2. the rules for the same ishtis; and in the same manner, the Yâjânuvâkyâs of the Apâdyâs in iii. 12. 3., and the rules in iii. 12. 4. Then follows the Châturhotrachayana in iii. 12. 5, and in the last four Anuvâkas the Vais'vasrijachayana.

A different order seems to have been observed in the Atreyî-s'âkhâ of the Taittirîya-brâhmaṇa, for, although the same chapters are here ascribed to Kaṭha, their arrangement must have differed, unless we suppose that the author of the Kâṇdânukrama introduced an alteration. He writes: "Tâvat Tittirih provâcha. (Tittiris Taittirîyas'âkhâpravartako 'nyebhyo munibheyah s'ishyebhyah provâcha.) Athâshṭau Kâṭhakâni (athânantaram

Kâthakas'âkhâpravartakena Kâthakamuninâ proktâny uchyante):

1. Sâvitra, Taittirîya brâhmana, iii. 10.
2. Nâchiketa , , iii. 11.
3. Châturhotra , iii. 12. 5.

4. Vais'vasrija ,, iii. 12. 6-9.

5. Āruņa, Taittirîya-âraņyaka, i. 1.

6. Divahs'yenîs, Taittirîya-brâhmana, iii. 12. 1—9. 7. Apâdyas ,, ,, iii. 12. 3—4.

8. Svâdhyâya-brâhmana, Taittirîya-âranyaka, i. 2."

The second Anukramanî of the Yajur-veda which we possess, belongs to the Chârâyanîya sâkha, and is called the Mantrâshâdhyâya.¹ The only copy which we have of it is found in the same MS. which contains the Charak-s'âkhâ.² and it is evidently intended as an index to this s'âkhâ. Nor is there anything anomalous in this, if we remember that the Chârâyanîya-s'âkhâ is a subdivision of the Charaka-s'âkhâ. But what is less intelligible is the title given to the text, which instead of Yajur-veda, is called in the MS. Yajur-veda-kâthaka. This title, Kâthaka, cannot well refer to the s'âkhâ of the Kathas, for this is itself a subdivision of the Charakas. It must most likely be taken in the same sense in which Kâthaka was explained before, i.e., "Kâthakamuninâ proktam;" though it is strange that the very chapters which in the Âpastambas'âkhâ of the Taittirîyaka are ascribed to Katha, are wanting in our Sâkhâ, while all the other sacrifices which are described in the Taittirîyasanhitâ and Brâhmana, are laid down in very much the same order.

The third Anukramanî, that of the Mâdhyandina-s'âkhâ of the Vâja-saneyaka, is ascribed to Kâtyâyana, who is mentioned also as the author of an Anuvâkânukramanî. It gives the names of the poets, the deities, and the metres, for all the verses of the Sanhitâ, including the Khila

(Adhyâya 26-35.) and the Sukriya portions. (Adhy. 36-40.)

For the Sâma-veda we have two classes of Anukramanîs, the former more ancient, the latter more modern than those of the other Vedas which we have hitherto examined. One index to the hymns of the Sâma-veda

<sup>1</sup> See Catalogue of the Berlin MSS., No. 142.

<sup>&</sup>lt;sup>2</sup> The title is "Ekottaras'atâdhvaryus'âkhâprabhedabhinne Yajur-vedakâthake Charakas'âkhâ,"

llowing the order of the Veyagâna and Âranyagâna) has been preved under the name of Ârsheya-hrâhmana, a title by which this rk is admitted within the pale of the revealed literature of the Brâhmans. Allusions to the names of poets and deities of different hymns aur in the Brâhmanas of other Vedas also; but in none, except the ma-veda, have these scattered observations been arranged into relar Anukramanîs before the beginning of the Sûtra period, or been corporated in the body of their revealed literature. What the Brahms call Sruti or revelation, signifies, as we saw, what is more ancient an the Sûtras; and that the Arsheya-brâhmana is earlier at least an Kâtyâyana, can be proved by the fact of Kâtyâyana's quoting ssages from it. It has been pointed out as a distinguishing mark the Brâhmanas of the Sâma-veda that they are never accented, but is doubtful whether any conclusion could be drawn from this as to eir being of later origin than the Brâhmanas of the other Vedas.

But while the existence of an Arsheya-brahmana shows that the hhandogas were the first to compose an index to their sacred literature, e find that their regular Anukramanîs are more modern than those of e Rig-veda, and must be referred to a class of works known by the name They are contained in MS. Bodl. Wilson 466, where ney form the fifth and sixth of the twenty Paris'ishtas attached to the Sâmaeda. Their title is, "Naigeyanam rikshv arsham," and "Naigeyanam ikshu daivatam," and they give respectively the names of the poets and ne deities for the verses composing the Archika of the Chhandogas accordig to the Sakha of the Naigeyas, a subdivision of the Kauthumas. grees on the whole, but not in all particulars,4 with the S'akha published y Stevenson and Benfey, and it has been supposed that their text is taken om MSS. belonging to the Rânâyanîya S'âkhâ The most characteristic ifference between these Paris'ishtas and the Arsheya-brahmana seems to e in this, that the latter refers to the original prayer-books of the hhandogas, the Veyagâna, and Âranyagâna, while former follow the

Purvarchika and Uttararchika.
For the fourth Veda, the Atharvna, or Brahma veda, an Anukramanî as been discovered by Professor Whitney in a MS. of the British Museum, repared for Col. Polier. A copy of this MS. is found in MS. 2142 of the

anhita, inclding Archika and Staubhika, or as they are also called,

<sup>1</sup> See Benfey, Sâma veda p. vii.

² In the first chapter of the Årsheya-brâhmaṇa, we read: यो ह वा अविदेता पेंच छंदो देवतब्राह्मणेन मंत्रेण याजयित वाध्यापयित वा खाणं वर्छित गर्ते
भापदाते (MS. 689. गर्ते वापदाते) प्र वा मीयते पापीयान्मवित यातयामान्यस्य
छंदांसि भवंति। This passage is referred to by Kâtyâyana, when he says:
अनेवंविदो यातयामानि छंदांसि भवंति खाणुं वर्छित गर्ते वा पत्यते प्रमीयते वा
पापीयान्भवतीति विज्ञायते॥ See also Kâtyâyana's Introduction to his
Anukramaṇî of the Mâdhyandina-s'âkhâ, and Rig-veda-bhâshya, p. 40.
³Kumârila says: यन भाष्यकारेण स्वराभावादित्यसित्रयामार्थव्याख्यानं स्तं
तन्मंत्रेष्वप्यवेदत्वं कर्षाधीतेषु साध्येत्। तथा गृह्योपदिष्टेषु छांदोग्यब्राह्मणेषु
व। ब्राह्मणानि हि यान्यष्टी सरहस्यान्यधीयते छंदोगास्तेषु सर्वेषु न कश्चिक्रियतः स्वरः। तेन तेष्वप्यवेदत्वं स्वराभावात्प्रसज्येत॥

¹Cf. Sâma-veda, ed, Benfey, p. xx.

East India House. It is a complete index to the Sanhita in 10 Patalas, written in a simple and intelligible style. Its title is Brihat-sarvanukramanî.

It is evident, that if it was possible to determine the age of the Aunkramanîs, we should have a terminusad quem for the Vedic age. The index of the Rig-veda enables us to check almost every syllable of the hymns; and e may safely say that we possess exactly the same number of verses, and words, and syllables in our MSS. of the Rig-veda as existed at the time of Kâtyáyana. The index of the Âtreyi-s'âkhâ (by Laugâkshi?) authenticates our MSS. not only of the Sanhitâ, but also of the Brâhmana and Âranyaka of the Taittirîya-veda, and the index to the Kâthaka refers to a-work exactly the same as that of which we possess the text in MS. The Ârsheya-brâhmana presupposes the existence of the Gânas of the Sâma-veda, and the Anukramanîs of the Naigeyas could only have been written after the text of the more modern Ârchika had branched off into different Śâkhâs.

The only Anukramanîs of which the authors are known are, the Anukramanîs of Saunaka to the Rig-veda, and the two Sarvânukramas of Kâtyâyana, one to the Rig-veda, the other to the white Yajur-vedai We shall see whether it is possible to fix the age of these two writers.

We remarked before, that the Anukramanî of Kâtyâyana, if compared with the Anuvakanukramani of Saunaka, shows the same progress in style which we may always observe between these two writers. Saunaka writes in mixed Slokas and takes great liberties with the metre; Kâtyâyana writes in prose and introduces the artificial contrivances of the later Again, Saunaka's index follows the original division of the Rigveda into Mandalas, Anuvâkas, and Sûktas; Katyayana has adopted the more practical and more modern division into Ashtakas, Adhyayas, and Vargas. The number of hymns is the same in Saunaka and Katyayana. They both follow the united Sakha of the Sakalas and Bashkalas, and bring the number of hymns, exclusive of all Khilas, to 1017. Before this union took place, the Bashkalas counted eight hymns more than the Sakalas, i. e., 1025 instead of 1017 and they read some of the hymns in the first Mandala in a different order. The Khilas, or supplementary hymns, are omitted in the Anukramanis of Saunaka and Kâtyâyana though they were known to both; Saunaka, however, excludes them more strictly than Kâtyâyana.2 The latter has admitted the eleven Válakhilya-hymns, and thus bring the total number of hymns to 1028.

From all these indications we should naturally be led to expect that the relation between Saunaka and Kâtyáyana was very intimate, that both belonged to the same Sâkhâ, and that Saunaka was anterior to Kâtyáyaua. We know of only one other writer whose works are equally intended for the united Sâkhâ of the Śâkalas and Bâshkalas; this is

amas. ृ खेलिकानामनादेशोऽस्मिन्प्रंथेऽनुवाकानां ; or, according to MS. 502.,-ऽनुवाकाना मिह स्मृतः॥

<sup>1</sup> In the Śâkala-s'âkhá, the hymns of Gotama are followed by those of Kutsa, Kakshîvat, Paruchchhepa, and Dirghatamas; in the Bâshkala-s'â-khâ their order was, Gotama, Kakshîvat, Paruchchhepa, Kutsa, Dîrghatamas.

'valâyana, the author of twelve books of Srauta-sûtras, of four books Grihya-sûtras, and of some chapters in the Aitareyâranyaka. Let us see now, whether these indications can be supported by ler evidence.

Shadgurus'isbya in his Commentary on Kâtyâyana's Sarvânukrama,

"Sunahotra, the great Muni, was born of Bharadvaja, and of him is born Saunahotra, all the world being a witness. Indra himself ent to the sscrifice of the Rishi in order to please him. The great suras, thinking that Indra was alone, and wishing to take him, surunded the sacrificial inclosure. Indra, however, perceived it, and taking ne guise of the Rishi, he went away. The Asuras seeing the sacrificer gain, seized Saunahotra, taking him for Indra. Ha saw the god that to be worshipped, and saying 'I am not Indra, there he is, ye fools, ot I, he was released by the Asuras, Indra called and spake to him: secause thou delightest in praising, therefore thou art called Gritsanada, O Rishi; thy hymn will be called by the name of Indrasya indriam, the might of Indra. And thou, being born in the race of Bhrigu, halt be Saunaka, the descendant of Sunaka, and thou shalt see again he second Mandala, together with that hymn' He, the Muni Gritsamada, was born again, as commanded by Indra. It was he who saw the great second Mandala of the Rig-veda as it was revealed to him together with the hymn Sajaniva; it was he the great Rishi, at the twelve years' sacrifice, Ugras'ravas, the son of Romaharshana, the pupil of Vyasa recited, in the midst of the sacrifice, the story of the Mahabharata, together with the tale of the Harivans'a, a story to be learnt from Vyasa alone, full of every kind of excellence, dear to Hari, sweet to hear, endowed with great blessing. It was he who was the lord of the sages, dwelling in the Naimishîya forest; he, who to the King Satanika, the son of Janamejaya, brought the laws of Vishnu, which declare the powers of Hari. Thata Saunaka, celebrated among the Rishis as the glorious, having seen the Mandala, and heard the collection of the Mahabharata, being also the propagator of the laws of Vishnu, the great boat on the ocean of existence, was looked upon by the great Rishis as the only vessel in which worshippers might get over the Bahvricha, with its twenty-one Sakhas, like one who had crossed the Rig-veda. There was one Sakha of Sakha, another of Bâshkala: taking these two Sanhitâs and the twenty-one Brâhmanas, the Aitareyaka, and completing it with others, Saunaka, revered by numbers of great Rishis, composed the first Kalpa sûtra."

It need hardly be pointed out that this passage contains a strange and startling mixture of legendary and historical matter, and that it is only the last portion which can be of interest to us. The story of Saunahotra, the son of Sanahotra, and grandson of Bharadvâja, being born again as Gritsamada-Saunaka, may have some historical foundation, and the only way in which it can be interpreted, is, that

<sup>1</sup> Thus it is said: एतस्य (समामायस्य इतिशब्दो निवित्प्रैषपुरोरुक्कुताप-वालिक्व्यमदानाम्न्यैतरेयब्राह्मणसहितस्य शाकलस्य बाष्कलस्य चाम्नायद्य-स्यैतदाश्वलायनसूत्रं नाम प्रयोगशास्त्रमित्यध्येतृप्रसिद्धं संबंधविशेषं द्योतयति॥ Śrauta-sûtra-bhâshya, i. 1.

the second Mandala, being originally seen by Gritsamada, of the family of Bhrigu was afterwards preserved by Saunahotra, a descendant of Bharadvaja, of the race of Angiras, who entered the family of Bhrigu, took the name of Saunaka, and added one hymn, the twelfth, in praise of Indra. This is partly confirmed by Kâtyâyana's Anukramanî, and by the Rishyanukramanî of Saunaka. It would by no means follow that Saunaka was the author of the hymns of the second Mandala. The hymns of that Mandala belong to Gritsamada of the Bhrigu race. But Saunaka may have adopted that Mandala, and by adding one hymn, may have been said to have made it his own. Again, it does not concern us at present whether Saunaka, the author of the Kalpa-sûtra, was the same as Saunaka, the chief of the sages in the Naimishîya forest, to whom, during the great twelve-years' sacrifice. Ugras'ravas related the Mahabharata, and who became the teacher of Satanika, the son of Janamejaya. If this identity could be established, a most important link would be gained, connecting Saunaka and his literary activity with another period of Indian literature. This point must be reserved for further consideration. At present we are only concerned with Saunaka, the author of the Kalpa-satras and other works composed with a view of facilitating the study of the Rigveda.

Shadgurus'ishya, continues:

"The pupil of Saunaka was the Reverend As'valâyana. He, having learned from Saunaka all sacred knowledge, made also a Sûtra and taught it, thinking it would improve the understanding and please Saunaka. Then, in order to please his pupil, Saunaka destroyed his own Sûtra, which consisted of a thousand parts and was more like a Brâhmana. 'This Sûtra,' he said, 'which As'valâyana has made and taught, shall be the Sûtra for this Veda.' There are altogether ten books of Saunaka, written for the preservation of Rig veda; 1. The index of the Rishis; 2. The index of the Metres; 3 The index of the Deities; 4. The index of the Anuvâkas; 5. The index of the Sûktas; 6. The Vidhâna (employment of the Rich-verses); 7. The employment of the Pâdas; 4

<sup>ा</sup> य आंगिरसः शैति होत्रों भूत्वा भागे दः शौनके। ऽभवत्स गृतसमदो द्वितीयं मण्डलमपश्यदिति ॥

³ विपादितं means "torn," and corresponds with Sûtra, "a thread." A similar expression is विच्छिन्तं which is applied, for instance, to the Mahâbhâshya, when it fell into disuse in Kashmir. See Râjataranginî, Histoire des Rois du Kashmire, traduite at commentee par M. A. Troyer, iv. 487; and Böhtlingk, Panâni, p. xvi. The true sense seems to be that in which Devarâjayajvan uses विच्छन्न in such passages as त्याध्ययनं कित्यो प्रायेणविच्छित्रसंबद्ध्यमासीत्॥ A work was lost when the chain of the oral tradition was broken.

<sup>4</sup> I read विधान च, because these must be two different works, the Rigvidhâna and Pâdavidhâna, in order to complete the number of ten. The Rigvidhâna exists in MS. (E. I. H. 1723), and is not only written in Saunaka's mixed Slokas, but distinctly ascribed to him in the second

The Barhaddaivata; 9. The Pratis'akhya of the Saunakas; 10. His Smarta work on matters of law. 2 As'valayana having learnt all these ten Sûtras, and knowing also the Gotras, (genealogies3), became versed in all the sacrifices by the favour of Saunaka. The sage Kâtyâyana had thirteen books before him: ten of Saunaka and three of his pupil As'yalâyana.4 The latter consisted of the Sûtras in twelve chapters (Srauta-sûtra), the Grihya-sûtras in four chapters, and the fourth Aranyaka (of the Aitareyaranyaka) by As valayana. The Kâtyâyana, having mastered the thirteen books of Saunaka ands, of his pupil, composed several works himself; the Sûtras of the Vâjin 6 the Upagrantha7 of the Sama-veda, the Slokas8 of the Smriti (the armapradîpa', the Brahma-Kârikâs of the Atharvans,9 and the Mahavârttika, 10 which was like a boat on the great ocean of Panini's Grammar. The rules promulgated by him were explained by the Reverend Patanjali, 11 the teacher of the Yoga-philosophy, himself the author of the Yoga-s'astra and the Nidana, a man highly pleased by the great commentary, the work of the descendant of Santanu. Now it was Katyayana, the great sage, endowed with these numerous excellencies, who composed, by great exertion, this Sarvanukramani. And because it gives the substance of all the works composed by Saunaka and his pupils, therefore the chief among the Bahvrichas have called it the General Index."

verse; कर्मणामृषिद्वष्टानां विश्वि प्रोवाच शानकः The book ends with the words शीनकाय नमः। Nevertheless, in the form in which we have it, it is later than Saunaka. The term Rigvidhana is mentioned in the Taittiriyarunyaka.

<sup>1</sup> This must be the Prâtis'âkhya of the Rig-veda and not of the Atharva-veda, which is likewise ascribed to Saunaka, the Châturâdbyâyikam Saunakîyam.

<sup>2</sup> See Stenzler, Indische Studien i. p. 243.

3 साकृतगोत्रज्ञ: is unintelligible. Should it be ज्याकृतगोत्रज्ञ:?

4 All the works of Ås'valåyana still exist, as Shadgurus'ishya describes them. Instead of चत्रक्रमुञ्ज, it would be better to read चत्रकं मुञ्जा।

5 If this number is right, Saunuka's Srauta-sûtra could not have been destroyed at the time of Kâtyâyana.

The Kalpa-sûtras of the Yajur-veda. On the Vâjins or Vâjasaneyins,

see Colebrooke, Essays, i, 16.

<sup>7</sup> See page 107. Upagrantha is not to be taken in the sense of Paris'ishta

8 Bhrajamana, is unintelligible; it may be Parshada.

These Kârikâs have not yet been met with.
 The Vârttikas to Pâṇini,

Patanjali, the author of the Mahâbhâshya, according to tradition called by the name of Bhartrihari also, was the reputed author of the Yoga-sûtras. On these a commentary was written by Vyâsa, who might be called a descendant of Sântanu. The reading may not be quite correct, and Mahâbhâ hya is more likely to refer to Patanjali's own work; but the dental n. of the MSS. speaks rather in favour of the reading mahâbhâgyena.

योगाचार्यः स्वयं कर्ता ये।गशास्त्र निदानयोः । पवंगुणगणेयुंकः कात्यायनमहामुनिः ॥ तपोयोगान्त्रिमेमे यः सर्वानुक्रमणीमिमां । सशिष्यशानकाचार्यसर्वप्रंथार्थवर्तनात् ॥ प्राहुर्वह्नु वसिंहास्तु सर्वानुक्रमणोमिमां । &c.

If we accept this statement of Shadgurus'ishya,—and it certainly seems to agree in the main with what we might have guessed from the character of the works, ascribed respectively to S'aunaka, As'valâyana and Kâtyâyana,—we should have to admit at least five generations of teachers and pupils: first S'aunaka; after him Âs'valâyana, in whose favour S'aunka is said to have destroyed one of his works; thirdly, Kâtyâyana, who studied the works both of S'aunaka; and Âs'valâyana; fourthly, Patanjali, who wrote a commentary on one of Kâtyâyana's works; and lastly Vyâsa. who commented on a work of Patanjali. It does not follow that Kâtyâyana was a pupil of As'valâyana, or that Patanjali lived immediately after Kâtyâyana, but the smallest interval which we can admit between every two of these names is that between teacher and pupil, an interval as large as that between father and son, or rather larger. The question new arises: Can the date of any one of these authors be fixed chronologically?

Before we attempt to answer this question, it will be necessary to establish the identity of Kâtyâyana and Vararuchi. Kâtyâyana was the author of the Sarvânukramanî, and the same work is quoted as the Sarvânukramanî of Vararuchi, the compiler of the doctrines of Saunaka. In professor Wilson's Catalogue of the Mackenzie Collection, a Prâtis'âkhya is ascribed to Vararuchi, and this can hardly be anything else but the Mâdhyandina-prâtis'âkhya of Kâtyâyana. Hemachandra in his Dictionary gives Vararuchi as a synonyme of Kâtyâyana without any further comment, just as he gives Sâlâturiya as a synonyme of

Pânini.

Let us now consider the information which we receive about Kātyāyana Vararuchi from Brāhmanic sources. Somadevabhatta of Kashmir collected the popular stories current in his time, and published

¹ MS. E. I. H. 576. contains a commentary on the Rig-veda, where a passage from the Sarvânukramanî is quoted as अत्रशीनकादिमतसंत्रहोत्चंदर-चर्नकाणिका ॥ This commentary of Âtmânanda seems anterior to Sâyana. In the introduction different works and commentaries, connected with the Veda are quoted, but Mâdhava and Sâyana are never mentioned. We find the Skândabhâshya, and commentators such as Udgîtha-bhâskara mentioned. (स्काद्याद्याद्य भाष्याकार द्वायभाषकरादिमः) by Âtmânanda,, and the same works were known also to Devarâjayajvan. Devarâjayajvan, however, quotes not only Skandasvâmin and Bhaṭṭa-bhâskara mis'ra, but also Mâdhava. He therefore was later than Mâdhava. Skandasvâmin, and Bhâskara, on the contrary, were anterior to Mâdhava, being quoted in his commentary. Âtmânanda, though not quoted by Mâdhava, seems anterior to Mâdhava, and the authorities which he quotes are such as Saunaka, Vedamitra (Sâkalya), the Brihaddevatâ, Vish nudharmottara, and Yâska.

them towards the beginning of the twelfth century under the title of Kathâ-sarit-sâgara, the Ocean of the Rivers of Stories. Here we read that Kâtyâyana Vararuchi, being cursed by the wife of Siva, was born at Kaus'ambî, the capital of Vatsa. He was a boy of great talent and extraordinary powers of memory. He was able to repeat to his mother an entire play, after hearing it once at the theatre; and before he was even initiated he was able to repeat the Prâtis'âkhya which he had heard from Vyâli. He was afterwards the pupil of Varsha, became proficient in all sacred knowledge, and actually defeated Pâṇini in grammatical controversy. By the interference of Siva, however, the final victory fell to Pâṇini. Kâtyâyana had to appease the anger of Siva, became himself a student of Pâṇini's Grammar, and completed and corrected it. He afterwards is said to have become minister of King Nanda and his mysterious successor Yogananda at Pâțaliputra.

We know that Kâtyâyana completed and corrected Pânini's Grammar, such as we now possess it.2 His Vârttikas are supplementary rules, which show a more extensive and accurate knowledge of Sanskrit than even the work of Panini. The story of the contest between them was most likely intended as a mythical way of explain-Again we know that Katyayana was himself the author ing this fact. of one of the Pratis'akhyas, and Vyali quoted by the authors of the Pratis'akhyas as an earlier authority on the same subject.3 So far the story of Somadeva agrees with the account of Shadgurus'ishva and with the facts as we still find them in the works of Katyayana. It would be wrong to expect in a work like that of Somadeva historical and chronological facts in the strict sense of the word; yet the mention of King Nanda, who is an historical personage, in connection with our grammarian, may, if properly interpreted, help to fix approximately the date of Kâtyâyana and his predecessors. Saunaka and Âs'valâyana. If Somadeva followed the same chronological system as his contemporary and countryman, Kalhana Pandita, the author of the Rajaturangini or History of Kashmir, he would, in calling Panini and Katyayana, the contemporaries of Nanda and Chandragupta, have placed them long before the times which we are wont to call historical.4 But the name of Chandragupta fortunately enables us to check the extravagant systems of Indian chronology. Chandragupta, of Pâțaliputra, the successor of the Nandas, is Sandrocottus, of Palibothra, to whom Megasthenes was sent as ambassador from Seleucus Nicator; and, if our classical chronology is right, he must have been king at the turning point of the fourth and third centuries B C. We shell have to examine hereafter the different accounts which the Buddhists and Brahmans give of Chandragupta and his relation to the preceding dynasty of the

<sup>&</sup>lt;sup>1</sup> Kathâ sarit-sâgara, edited by Dr. Hermann Brockhaus. Leipzig, 1839.

<sup>2</sup> The same question with regard to the probable age of Pânini, has been discussed by Prof. Böhtlingk in his edition of Pânini. Objections to Prof. Böhtlingk's arguments have been raised by Prof. Weber in his Indische Studien. See also Rig-reda, Leipzig, 1857, Introduction.

Gf. Rig-veda, Leipzig, 1857, p. lxvii.
 Lassen, Indische Alterthumskunde, ii. 18.

Nandas. Suffice it for the present that if Chandragupta was king in 315, Kâtyâyana may be placed, according to our interpretation of Somadeva's story, in the second half of the fourth century B. C. We may disregard the story of Somadeva, which actually makes Kâtyâyana himself minister of Nanda, and thus would make him an old man at the time of Chandragupta's accession to the throne. This is, according to its own showing, a mere episode in a ghost story, l and had to be inserted in order to connect Kâtyâyana's story with other fables of the Kathâsarit sâgara. But there still remains this one fact, however slender it may appear, that as late as the twelfth century A. D., the popular tradition of the Brâhmans connected the famous grammarians Kâtyâyana and Pâṇini with that period of their history which immediately preceded the rise of Chandragupta and his Sûdra dynasty; and this, from an European point of view, we must place in the second half of the fourth century B. C.

The question now arises, can this conjectural date, assigned to Kâtyâyana, be strengthened by additional evidence? Böhtlingk thought that this was possible; and he endeavoured to show that the great Commentary of Patanjali, which embraces both the Vârttikas of Kâtyâyana and the Sûtras of Pânini, was known in the middle of the second century B. C. It is said in the history of Kashmir, that Abhimanyu, the king of Kashmir, sent for Brahmans to teach the Mahabhashya in his kingdom. Abhimanyu, it is true, did not reign, as Professor Böhtlingk supposed, in the second century B. C., but, as has been proved from coins by Professor Lassen, in the first century A, D. But even thus this argument is important. In the history of Indian literature dates are mostly so precarious that a confirmation even within a century or two is not to be despised. The fact that Patanjali's immense commentary on Pânini and Kâtyâyana had become so famous as to be imported by royal authority into Kashmir in the first half of the first century A. D., shows at least that we cannot be very far wrong in placing the composition of the original grammar and of the supplementary rules of Kâtyâyana on the threshold of the third century B. C At what time the Mahabhashya was first composed it is impossible to say. Patanjali, the author of the Great Commentary, is sometimes identified with Pingala; and on this view, as Pingala is called the younger brother, or at least the descendant of Panini,2 it might be supposed that the original composition of the Mahabhashya belonged to the third century. But the identity of Pingala and Patanjali is far from probable, and it would be rash to use it as a foundation for other calculations.

It will readily be seen how entirely hypothetical all these arguments are. If they possess any force it is this, that in spite of the conflicting statements of Brâhmanical, Buddhist, and European scholars, nothing has been brought forward as yet that would render the date here assigned to Kâtyâyana impossible. Nay more;—if we place Kâtyâyana in the second half of the fourth century, Âs'valâyana, the predecessor of Kâtyâyana, about 350, and Saunaka, the teacher of Âs'va-

<sup>&</sup>lt;sup>3</sup> According to the southern Buddhists it was Chandragupta, and not Nanda, whose corpse was re-animated. As. Res. xx. p. 167.

lâyana, about 400; and if then, considering the writers of Sûtras anterior to Saunaka and posterior to Kâtyâyana, we extend the limits of the Sautra period of literature from 600 to 200, we are still able to say, that there is no fact in history or literature that would interfere with such an arrangement. As an experiment, therefore, though as no more than an experiment, we propose to fix the years 600 and 200 B. c. as the limits of that age during which the Brâhmanic literature was carried on in the strange style of Sûtras.

In order to try the strength of our supposition we shall ourselves

attempt the first attack upon it.

There is a work called the Unadi-sûtras, which as it is quoted under this name by Panini, must have existed previous to his time. The author is not known. Among the words the formation of which is taught in the Unadi-sûtras, we find (iii. 140) dînarah, a golden ornament; (iii. 2) Jinah, synonymous with Arhat, a Buddhist saint; (iv. 184)

trîtam, a golden diadem; (iii. 25) stupah, a pile of earth.

The first of these words, dînâra, is derived by the author of the Unadi-sûtras from a Sanskrit root, dan. By other grammarians it is derived from dina, poor, and ri, to go, what goes or is given to the poor. It is used sometimes in the sense of ornaments and seals of gold. These derivations, however, are clearly fanciful, and the Sanskrit dînara is in really the Latin denarius? Now, if Pânini lived in the middle of the fourth century B. C., and if the Unadi-sutras were anterior to Pânini, how could this Roman word have found its way into the Unâdi-sûtras? The word denarius, is not of so late a date in India as is generally supposed. Yet the earliest document where it occurs is the Sanchi inscription No. I.3 Burnouf remarked that he never found the word dînâra used in what he considered the ancient Buddhist Sûtras. occurs in the Avadâna-s'ataka, and in the Divyavadâna. It would seem to follow, therefore, either that the Unadi-sutras and Panini must be placed later than Chandragupta, or that the Sûtra in which this word is explained is spurious. It would not be right to adopt the latter supposition without showing some cause for it. It is well known that in a literature which is chiefly preserved by oral tradition, corrections and additions are more easily admitted than in works existing in MS. The ancient literature of India was continually learnt by heart; and even at the present day, when MSS. have become so common, some of its more sacred portions must still be acquired by the pupil from the mouth of a teacher, and not from MSS. If new words, therefore, had

<sup>2</sup> A new and more correct edition of the Unadi-sutras has lately been

published by Dr. Aufrecht, Bonn, 1859.

<sup>1</sup> Shadgurus'ishya: तथा च सुत्र्यते हि भगवता पिंगळेत पाणिन्यनुजैन

<sup>&</sup>lt;sup>3</sup> J. Prinsep says: "The Roman denarius, from which Dinâr was derived, was itself of silver, while the Persian Dirhen (a silver coin) represents the Drachma, or dram weight, of the Greeks. The weight allowed to the Dinâr of 32 ratis, or 64 grains, agrees so closely with the Roman and Greek unit of 60 grains, that its identity cannot be doubted, especially when we have before us the actual gold coins of Chandragupta (?) (didrachmas), weighing from 120 to 130 grains, and in lubitably copied from Greek originals, in device as well as weight."

been added to the language of India after the first composition of the Unadi-sûtras, there would be nothing surprising, in a Sûtra being added to explain such words. Happily, however, we are not left in this instance to mere hypothesis. Ujjvaladatta, the author of commentary on the Unadi-sûtras, forms a favourable exception to most Sanskrit commentators, in so far as he gives us in his commentary some critical remarks on the readings of MSS, which he consulted. He states in his introduction that he had consulted old MSS. and commentaries, and he evidently feels conscious of the merit of his work, when he says, "If anybody, after having studied this commentary of mine, suppresses my n me in order to put forth his own power, his virtuous deeds will perish." I Now in his remarks on our Sûtra, Ujjvaladatta says, "Dinâra means a gold ornament, but this Sûtra is not to be found in the Sûtîvritti and Devavritti."2 If, therefore, the presence of this word in the Unadi-satras would have overthrown our calculations as to the age of Panini and his predecessor who wrote the satras, the absence of it except in one Sutra, which is proved to be of later date, must serve to confirm our opinion. Cosmas Indicopleastes remarked that the Roman denarius was received all over the world; and how the denarius came to mean in India a gold ernament we may learn from a passage in the "Life of Mahâvîra." There it is said that a lady had around her neck a string of grains and golden dinars, and Stevenson adds that the custom of stringing coins together, and adorning with them children especially, is still very common in India.

That Ujjvaladatta may be depended upon when he makes such statements with regared to MSS. or commentaries, collated by himself, can be proved by another instance. In the Unadi-satras IV. 184, we read; "krîtrîkripibhyah kîtan." Out of the three words of which the etymology is given in this Sûtra, kripîtam, water, and kirîtam, a crest, are known as ancient words. The former occurs in the Gana Kripanadi (Pân. VIII. 2. 18 1.); the other in the Gana arddharchadi. The third word, however, kirîta, a tiara, has never been met with in works previous to Pâṇini. Now, with regard to this word, Ujjvaladatta observes that it is left out in the Nyâsa. The authority of this work,

Journal A. S. B., vol. vi. p. 455. Notes on the facsimiles of the inscriptions from Sanchi near Bhilsa, by James Prinsep.

े ये।ऽम् वृत्तिं समाले।च्य स्वपौरुषसमीहया । मन्नामाच्छादनं कुर्यात्सुकृतं तस्य नश्यति ॥

² सूत्रमिदं सूतीवृत्तौ ( सतीवृत्तौ ! ) देववृत्तौ च न दृश्यते॥

3 Kalpa-sûtra, translated by Stevenson, p. 45.

4 क्रपो रो छ: (पाँ० ८. २. १८.) इत्यत्र न्यासे क्रुप्तिभयां चेति सूत्रं दृश्यते। अतस्तरित्र नास्तीति छश्यते॥ Colebrooke, Miscellaneous Essays, ii. 40, mentions this work in his list of Sanskrit grammars: "Nyâsa or Kâs'ikâvritti panjikâ by Jinendra: another exposition of the Kâs'ikâvritti, with explanatory notes by Rakshita." He adds, he vever, with his usual caution: "I state this with some distrust, not having yet seen the book. The Nyâsa is universally cited; and the Bodhinyâsa is frequently so. Vopadeva's Kâvyakâmadhenu quotes the Nyâsa of Jinendra and that of Jinendra-buddhi."

a commentary by Jinendra on the Kas'ıkavritti, would, by itself, be hardly of sufficient weight; but on referring to the MS. of Mahabhashya at the Bodleian Library, I find that there also the Sûtra is quoted exactly as Ujjvaladatta said, i.e., without the root from which kirîta is derived. Having thus found Ujjvaladatta trustworthy and accurate in his critical remarks, we feel inclined to accept his word, even where we cannot control him, or where the presence of certain words in the Sûtras might be explained without having recourse to later interpola-Thus stupah, which occurs III. 25, might be explained as simely meaning a heap of earth. Nay, it is a word which, in its more general sense, is found in the Veda. Yet the most common meaning of stupa is a Buddhist monument, and as we are told by Ujjvala, that this word does not occur in the Satîvritti, and that in the Sarvasva it is derived in a different manner, we can have little doubt that it was not added till after the general spreading of Buddhism and the erection of Topes in India: a negative argument which gives additional strength to the supposition that the original Unadi-satras were composed before that period.1

To add one more instance. In all the editions of the Unali-satras, Jina occurs as the name of the founder of a Bauddha sect. As many scholars have assigned to Jina and the Jainas a very modern date, the presence of this name might seem to throw considerable doubt on the antiquity ascribed to the Unadi satras. In a passage of Savan, however (Rv. i. 61. 4.), where he has occasion to quote the Satra containing, among other words, the etymology of Jina, all the MSS. omit the root ji, from which Jina is said to be derived. It is equally omitted in

Nrisinha's Svaramaujarî.

The test which has thus been applied to our chronological arrangement of the Sûtra literature in general, in the case of the Unâli-sûtras, so far from invalidating, has rather strengthened our argument for placing the whole literature of the Sûtras, at least of those which are connected with the Vedas, between the years 600 and 200 BC.

Parisishtas.

There is one class of works which must be mentioned before we leave the Sûtra period, the so-called Paris'ishtas. They are evidently later than the Sûtras, and their very name, Paralipomena, marks their secondary importance. They have, however, a character of their own, and they represent a distinct period of Hindu literature, which, though it is of less interest to the student, and though it shows clear traces of intellectual and literary degeneracy, is not on that account to be overlooked by the historian. Some of the more substantial Paris'ishtas profess to be composed by authors whose names belong to the Sûtra period. Thus Saunaka is called the author of the Charanavyûha by the commentator of Pâraskara's Grihya-sûtras, Râma-krishna² (MS. E. I. H. 440. 577. 912.); a writer no doubt quite untrustworthy where he gives his own opinions, but yet of some importance where he

<sup>2</sup> तित्रर्णयश्चरणव्युहे शानकेन दर्शितः॥

<sup>1</sup> The word stûpa does not occur in Pânini or the Ganapâtha Sâyana to Rv. i. 24. 7. does not quote the Unâli-sûtra, but derives stûpa from a root styai, affix pa.

quotes the opinions of others. Kîtyûyana is quotellas the author of the Chhandogaparis'ishta. The same Kus'ika, who is known as the author of the Satras for the Atharvana, is mentioned as the author of the Atharvana-paris'ishtas also. Other Paris'ishtas though not ascribed to Kâtyâyana, are said to be composed in accordance with his opinions.2 Again, while the Grihya-sûtras of the Chhandogas are acknowledged as the work of Gobhila, a Paris'ishta on the same subject is ascribed to the son of Gobhila. 3 The names of S'annak and Kâtyâyana are frequently invoked at the beginning or end of these works, and though some of them appear to us simply useless and insidid, it is not to be denied that others contain information which we should look for in vain in the Sûtras. Their style is less concise than that of the Sûtras. The simple Anushtubh S'loka preponderates, and the metre is more regular than that of the genuine Anushtubh compositions of S'aunaka. Their style resembles that of the Barhaddaivata and Rig-vidhana, works originally composed by S'aunaka, handed down to us, as it would seem, in a more modern But on the other side the Paris'ishtas have not yet fallen into that mo otonous uniformity which we find in works like the Manavadharma-s'astra, the Paddhatis, or the later Puranas; and passages from them are literally quoted in the Puranas. The Paris'ishtas, therefore, may be considered the very last outskirts of Vedic literature, but they are Vedic in their character, and it would be difficult to account for their origin at any time except the expiring moments of the Vedic age.

The following argument may serve to confirm the favourable view which I take of some of the Paris'ishtas. Besides the MSS. of the Charanavyûha, there is a printed edition of it in Râja Râdhâkânta Dava's Sabdakalpadruma. This printed text is evidently taken from more modern MSS. It quotes seventeen instead of fifteen Sikhas of the Vajasaneyins; whereas the original number of fitteen is confirmed by our MSS. of the Charanavyaha, by the Pratijna-paris'ishta, and even by so late a work as the Vishnu parana (p 281.). We may therefore suppose that at the time when the Paris'ishta, called the Charanavyûha, was originally composed, these two additional Sikhas did not yet exist. Now one of them is the Sakra of the Katyayaniyas, a Sakha, like many of those mentioned in the Puranas, founded on Satras, not on Brahmanas. The fact, therefore, of this modern Sakha not being mentioned in the original Charanavyûha sarves as an indication that at the time of the original composition of that Paris'ishta, sufficient time had not yet elapsed to give to Katyayana the calebrity of being the founder of a new Sâkbâ.

On the other hand it should be stated that Panini does not seem to have known literary works called Paris'ishtas.4

<sup>े</sup> छहे।गारिशिष्टं कात्यायतमुनिकृतं सामवेदिककर्मवेश्वकं गोमिलस्त्राणां परिशेषशास्त्रमिति स्मृतिः

<sup>&</sup>lt;sup>2</sup> MS. Bodl. W. 510. अष्टादश परिशिष्टानि तदादी यूगळक्षणं। चातुण्यं (चातुर्वण्यं) प्रवश्यामि वृक्षाणां पशुभिः सह॥ निंदाप्रशसे वेश्यामः कात्यायः नमतात्तवा॥

<sup>3</sup> MS. Bodl W. 510. 14. गृत्रसंत्रह नाम परिशिष्टिं गोमिलपुत्रकृतंश ॥

<sup>&</sup>lt;sup>4</sup> Paris'ishta occurs only as a pratyulaharana in Pan. iv. 1. 48, but it is used there as a feminine, and in quite a different sense.

The number of Paris'ishtas is frequently stated at eighteen. This may have been their number at some time, or for one particular Veda, but it is now considerably exceeded. The Charanavyûha, itself a Paris'ishta gives the same number; but it seems to speak of the Paris'ishtas of the Yajur-veda only. There is a collection of Paris'ishtas for each Veda. Works, such as the Bahvricha paris'ishta, Sankhayana-paris'ishta, As'valâyana-grihya-paris'ishta, must be ascribed to the Rig-veda. A MS. (Bodl. 466.) contains a collection of Paris'ishtas which belong to the Sâma-veda. At the end of the first treatise it is said: "iti Sâmagânâm chhandah samaptan," " here end the metres of the Sama-singers." 1 Other treatises begin with the invocation, "Namah Samavedaya." The second is called Kratusangraba, on sacrifices; the third, Viniyoga-sangraha, on the employment of hymns; the fourth, Somotpattih, on the origin of Soma. The fifth and sixth treatises contain the index to the Archika of the Sama-veda after the Naigeya-s'akha. As no pointed allusions to other Vedas occur in these tracts, there can be little doubt that the whole collection of these Paris'ishtas may be classed as Sâmaveda literature. The Chhandoga-paris'ishta, however, which is commonly ascribed to Kâtyâyana, is not found in this MS. The Paris'ishtas of the Vajur-veda are enumerated in the Charanavyuha, and will have to be examined presently. Those of the Atharvana are estimated by Professor Weber at seventy four. 2 and are said to be written in the form of dialogues, in a style similar to that of the Puranas, and sometimes, we are told, agreeing literally with chapters of the astrologicial Sanhitas.

According to the Charanavyûha3 the following are the eighteen

Paris'ish tas of the Yajur-veda:

1. The Yupalakshanam; according to Vyasa's Charanavyûha, the Upajyotisham.

2. The Chhagalakshanam; Mangalalakshanam, (Vyasa).

3. The Pratijnâ; Pratijnâ uvâkyam? (Vyâsa).
4. The Anuwâkasankhyâ; Parisankhyâ (Vyâsa).
5. The Charanavyûhaḥ; Charanavyûhaḥ (Vyâsa).
6. The Śrâddhakalpaḥ; Śrâddhakalpaḥ (Vyâsa).

7. The Sulvikâni or Sılvâni.

- 8. The Pârshadam.
  9. The Rigyajûnshî.
  10. The Ishtakâpûranam.
  - 11. The Pravarâdhyâyah ; Psavarâdhâyah (Vyâsa, No. 7)

It is also called chhandasâm vichayah, and contains quotations from the Tândya-brâhmana, Pingala, the Nidâna, and Uktha-s'âstra.

According to passages in the Charanavyûha, belonging to the Atharvana, the number of the Ksus'ikoktâni Paris'ishtâni would amount to 70.

3 Besides the MS. of the E. l. H., and collations of some of the MSS. at Berlin, I have used the printed edition of the Charanavyûha in Râ hakânta's Sanskrit Encyclopædia. The MSS. differ so much that it would be hazardous to correct the one by the other. They probably represent different versions of the ame text. The name of the author varies likewise. Sometimes he is called Saunaka, sometimes Kâtyâyana, and in Râdhakânta's edition, Vyâsa. The last is, perhaps, meant, for the same whom we found mentioned before as the author of a Commentary on Patanjali's Yoga. The text has since been published by Prof. Weber.

- 12. The Uktha-s'astram; Sastram (Vyasa, No. 8).
- 13. The Kratusankhyâ; Kratu (Vyâsa, No.9).

14. The Nigamah; Agamah (Vyasa, No. 10).

15. The Yajnapars've or pars'vam; Yajnam (Vyasa, No. 11); Pars'van Vyasa, No. 12).

16. The Hautrakam; Hautrakam (Vyasa, No. 13).

17. The Prasavotthânam; Pas'avah (Vyâsa, No. 14); Ukthâni, (Vyâsa, No. 15).

18. The Kûrmalakshanam; Kûrmalakshanam, (Vyasa, No. 16).

A similar order has evidently been followed in a collection of the Paris'ishtas, forming part of Professor Wilson's valuable collection of MSS. now deposited in the Bodician Library. The MS., however, is incomplete, and seems to have been copied by a person ignorant of Sanskrit from another MS, the leaves of which had been in confusion. Most of the MSS. of these Paris'ishtas are carelessly copied, whereas the MSS of the Sûtras are generally in excellent condition. The MSS, which Râja Râdhakântadeva usel seem to have been in an equally bad state, if we may judge from the various readings which he occasionally mentions. But although the Bodician MS. leaves much to desire, it serves at least to support the authenticity of the titles given in the MS. of the Charanavyûha against the blunders of the printed text. We find there;

1. The Yûpalakshanam, 2 a short treatise on the manner of prepar-

ing the sacrificial post.

2. The Chhagalakshanam, 3 on animals fit for sacrifice.

3. The Pratijna, begins with giving some definition of sacrificial terms, but breaks off with the fourth leaf, whereas the Pravaradhyaya (No. 11) had already been commenced on the third, and is afterwards carried on the fifth leaf. Thus we lose from the fourth to the eleventh Paris'ishta, which formed part of the original MS. if we may judge from the fact that the Pravaradhyaya is here also called the eleventh Paris'ishta

4. The Anuvakasankhyâ exists in MS. E. I. H. 965.
5. The Charanavyûhah is found in numerous copies.

6. The Śrâ idhakalpah exists in MS. E. I. H. 1201, and MS. Chambers 66. It is there ascribed to Kâtyâyana. There is also among the Chambers MSS, at Berlin (292—294) a Srâddha-kalpa-bhâshya ascribed to Gobhila.

7. The S'ulvikâni are found in MS. Chambers 66, and a S'ulvadîpikâ,

MS. E. I. H. 1678

8. The Pårshadam. This must not be mistaken for a Pråtis'akhya, nor would it be right to call the Pråtis'akhyas Paris'ishtas. The Pårshada is a much smaller work, as may be seen from a MS. in the Royal Library at Berlin, Chambers 378.

9. The Rigyajûnshi is the only Paris'ishta that connot be verified in MS.; there is no reason for supposing that it was an Arukramanî

either of the Yajur veda or Rig-veda.

- 1 For instance पारच्यानुहोत्रकमपिपाठः। instead of पार्श्वन्। है। त्रकं ॥
- <sup>2</sup> MS. Chambers, 66.
- 3 MS. Chambers, 66.
- 4 Called Prâtishthâlakshanam in MS. Chambers, 66.

10. The Ishtakâpûranam has been preserved in MS. Chambers 389 with a commentary by Karka, and in MS. Chambers 392, with a com-

mentary by Yajnikaleva.

11. The Pravarâdnyâyah is found again in onr own MS, and is followed by a small truct, the Gotranirnayah. The seven principal Pravaras are those of the Bhrigus, Angiras, Vis'vâmitras, Vas'ishthas, Kas'yapas, Atris, and Agastis. The eight founders of Gotras or families are Jamadagni, Bharadvàja, Vis'vâmitra, Atri, Gautama, Vasishtha, Kas'yapa and Agastya. The whole treatise, of which more hereafter, is ascribed to Kâtyâyana.

12. The Uktha-s'astram is found in our Mi. So is

13. The Kratusankhya, which gives an enumeration of the prin-

cipal sacrifices.

14. The Nigama-paris'ishta is the last in our MS. It contains a number of Velic words with their explinations, and forms a useful appendix to Yâska's Nirukta. It alludes not only to the four eastes, but the names of the mixed castes also, according to the Anuloma and Partiloma order, are mentioned.

The four last Paris'ishtas are wanting in our MS.

The fifteenth, however, the Yajnapârs'vam is found in MS. E. I. H. 1729, Chambers, 258; the sixteenth, the Hautrakam, exists with a commentary in MS. Chambers 639. The two last Paris'ishtas have not yet been met with in MS, but we may probably form some idea of the last, the Kûrmalakshanam, from some chapters of Varâhamihira's Brihatsanhitâ, where we find both a Kûrmavîbhâgah and a Kûrmalakshanam, the last being there followed by a chapter, called by the

same name as the second Paris'ishta Chhagalakshanam.

Although there is little of real importance to be learned from these Paris'ishtas, the fact of their existence is important in the history of the progress and decay of the Hindu mind. As in the first or Chhandas period, we see the Aryan settlers of India giving free utterance to their thoughts and feelings, and thus creating unconsciously a whole world of religious, moral, and political ideas; as we find them again during the second or Mantra period, carefully collecting their harvest; and during the third or Brahmana period busilly occupied in systematising and interpreting the strains of their for fathers, which had already become unintelligible and sacred; as in the fourth or Sûtra period we see their whole energy employed in simplifying the complicated system of the theology and the ceremonial of the Brahmanas; so we shall have to recognise in these Paris'ishtas a new phase of the Indian mind, marked by a distinct character, which must admit of historical explanation. The object of the Paris'is hias is to supply information on theological or ceremonial points which had been passed over in the Sûtras, most likely because they were not deemed of sufficient

<sup>े</sup> जमदश्चिमरहाजो विश्वामित्रोऽत्रिगौतमौ। वशिष्ठ कश्यागस्त्या मुनयो गोत्रकारिणः॥ एतेषां घान्यवत्यानि तानि गोत्राणि मन्यते॥ १ कात्यायनविर्वितो विप्राणां हितकाम्यया। प्रध्यायः प्रवरांख्योऽयं पुरा ब्रह्मविनिर्मितः॥

importance, or because they were supposed to be well known to those more immediately concerned. But what most distinguishes the Paris'ishtas from the Sûtras is this, that they treat everything in a popular and superficial manner; as if the time was gone, when students would spend ten or twenty years of their lives in fathoming the mysteries and mastering the intricacies of the Brahmana literature. A party driven to such publication as the Paris'ishtas, is a party fighting a losing battle. We see no longer that self-complacent spirit which pervades the Brahmanas. The authors of the Brahmanas felt that whatever they said must be believed, whatever they ordained must be obeyed. They are frightened by no absurdity, and the word " impossible" seems to have been banished from their dictionary. In the Sûtras we see that a change has taken place. Their au hors seem to feel that the public which they address will no longer listen to endless theological swaggering. There may have been deep wisdom in the Brâhmanas, and their authors may have sincerely believed in all they said; but they evidently calculated on a submissiveness on the part of their pupils or reiders, which only exists in countries domincered over by priests or professors. The authors of the Sûtras have learned that people will not list n to wisdom unless it is clothed in a garb of clear argument and communicated in intelligible language. Their words contain all that is essential in the Brâhmanas, but they give it in a practical, concise and definite form. These works were written at a time when the Brahmanas were fighting their first battles against the popular doctrines of Buddha. They were not yet afraid. Their language is firm, though it is no longer inflated, "Buddhism," as Burnouf says, 1 "soon grew into a system of easy devotion and found numerous recruits among those who were frightened by the difficulties of Brahmanical science. At the same time that Buddhism attracted the ignorant among the Brahmanas, it received with open arms the poor and the miserable of all classes." It was to remove, or at least to simplify, the difficulties of their teaching, that men like Saunaka and Katvayana adopted the novel style of the Sûtras. Such changes in the sacred literature of a people are not made without an object, and the object of the Sûtras, as distinct from that of the Brâhmanas. could be no other than to offer practical manuals to those who were discouraged by too elaborate treatises, and who had found a shorter way to salvation opened to them by the heretical preaching of Buddha. After the Sûtras there is no literature of a purely Vedic character except the Paris'ishtas. They still presuppose the laws of the Sûtras, and the faith of the Brâhmanas. There is at yet no trace of any difinite supremacy being accorded to Siva or Vishnu or Brahman. New gods, however, are mentioned; vulgar or popular ceremonies are alluded to. The castes have become more marked and multiplied. The whole intellectual atmosphere is still Vedic, and the Vedic ceremonial, the Vedic theology, the Vedic language seem still to absorb the thoughts of the authors of the Paris'ishtas. Any small matter that had been overlooked by the authors of the Sûtras is noted down

<sup>&</sup>lt;sup>1</sup> Burnout, Introduction á l' Histotre du Buddhisme. Roth, Abhandlungen, p. 22.

as a matter of grave importance. Subjects on which general instructions were formerly considered sufficient, are now treated in special treatises, intended, for men who would no longer take the trouble of reading the whole system of the Brahmanic ceremonial. The technical and severe language of the Sûtras was exchanged for a free and easy style, whether in prose or metre; and however near in time the Brahmans may place the authors of the Sûtras and some of the Paris'ishtas, certain it is that no man who had mastered the Sûtra style would ever have condescended to employ the slovenly diction of the Paris'ishtas. The change in the position and the characters of the Brahmans, such as we find them in the Sûtras, and such as we find them again in the Paris'ishtas, has been rapid and decisive. The men who could write such works were aware of their own weakness, and had probably suffered many defeats. The world around them was moving in a new direction, and the old Vedic age died away in impotent twaddle.

Considerations like these, in addition to what we found before in inquiring into the age of Kātyāyana, tend to fix the Sūtra period, as a phase in the literary history of Inlia, as about contemporaneous with the first rise of Buddhism; and they would lead us to recognise in the Paris'ishtas the exponents of a later age, that had witnessed the triumphs of Buddhism and the temporary decay of Brahmanic learning and power The real political triumph of Buddhism dates from As'oka aud his council, about the middle of the third century B. C., and while most af the Vedic Sūtras belong to this and the preceding centuries, none of the Paris'ishtas

were probably written before that time.

Before the Council of Pâțaliputra the Buddhists place, indeed, 300 years of Buddhist history, but that history was clearly supplied from their own heads and not from authentic documents. Buddhism, up to the time of As'oka, was but one out of many sects established in India. There had been as yet no schism, but only controversy, such as we find in the Brahmanas themselves between different schools and parties. There were as yet no Brahmanas as opposed to Buldhists, in the later sense of the word. No separation had as yet taken place, and the greatest reformers at the time of Buddha were reforming Brahmans. This is acknowledged in the Buddhist writings, though they probably were not written down before As'oka's Council. But even then Buddha is represented as the pupil of the Brahmanas, and no slur is east on the gods and the song of the Veda Buddha, according to his own canonical biographer, learned the Rig-veda and was a proficient in all the branches of Brahmanic lore. His pupils were many of them Brahmans; and no hostile feeling against the Brahmanas finds utterance in the Buddhist Canon. This forms a striking contrast with the sacred literature of the Jains, The Jains, who are supposed to have made their peace with the Brahmans, yet in their sacred works, written towards the beginning of the fifth century A. D., treat their opponents with marked disrespect. Their great hero Mahavîra, though at first conceived by a Brahman woman, is removed from her womb and transferred to the womb of a Kshatriya woman, for" surely," as Sakko (Indra) says,1" such a thing as this has never happened in past, happens not

<sup>1</sup> Kalpa sûtra, p. 35.

in present, nor will happen in future time, that an Arhat, a Chakravarti a Baladeva, or a Vasudeva should be born in a low caste family, a service family, a degraded family, a poor family, a mean family, a beggar's family, or a Brahman's family; but en the contrary, in all time, past, present, and to come, an Arhat, a Chakravarti, a Vasudeva, receives birth in a noble family, an honourable family, a royal family, a Kshatriya family, as in the family of Ikshxaku, or the Harivans'a, or some such family of pure descent." Now this is mere party insolence, intelligible in the fifth century A. D., when the Brahmans, as a party, were re-establishing their hierarchical sway. Nothing of the kind is to be found in the canonical books of the Buddhists. Buddha had his opponents, and among them chiefly the Tirthakas; but so had all eminent sages of whom we read in the Brahmanas. But Buddha had also his friends and followers, and they likewise were Brahmans and Rishis; some of them accepted his doctrines, not excluding the abolition of easte. Buddhism, in its original form, was only a modification of Brahmanism. It grew up slowly and imperceptibly and its very founder could hardly have been aware of the final results of his doctrines. Before the time that Buddhism became a political power, it had no history, no chronology, it hardly had a name. We hear nothing of Buddhas in the Brahmanas, though we meet there with dectrines decidedly Buddhictic. The historical existence of Buddhism begins with As'oka and the only way to fix the real date of As'oka is by connecting him with Chandragupta, his second predecessor, the Sandrocottus of the Greeks. To try to fix it according to the early Buddhist chronology would be as hopeless as fixing the date of Alexander according to the phronology of the Puranas.

It is possible to discover in the decaying literature of Vedic Brahmanism the contemporaneous rise of a new religion, of Buddhism. Every attempt to go beyond, and to bring the chronology of the Buddhists and Brahmans into harmony has proved a failure. The reason, I believe, is obvious. The Brâhmans had a kind of vague chronology in the different capitals of their country. They remembered the names of their kings, and they endeavoured to remember the years of their reigns. But to note the year in which an individual, such as Gautama S'âkyasinha, was born, however famous he may have been in his own neighbourhood or even in more distant Parishads, would have entered as little into their thoughts as the Romans, or even the Jews, thought of preserving the date of the birth of Jesus before he had become the founder of religion. Buddha's immediate followers may have recollected and handed down, by oral communication, the age at which Buddha died; the age of his disciples too may have been recollected, together with the names of some local Râjas who patronised Buddha and his friends; but never, until the adoption of Buddhism as the state religion by As'oka, could there have been any object in connecting the lives of Buddha and his disciples with the chronology of the Solar or Lunar Dynasties of India. When, at the time of As'oka, it became necessary to give an account of the previous history of Buddhism, the chronology then adopted for the early centuries of that faith was necessarily of a purely theoretical kind. We possess more than one system of Buddhist chronology, but none of them can be considered authentic with regard to the times previous to

As'oka, the second successor of Chandragupta. There is the system of the Southern Buddhists, framed in Ceylon; there are the various systems of the Northern Buddhists, prevalent in Nepal, Tibet, and China; and the system of the Puranas, if system it can be called, in which S'akva is made the father of his father, and grandfather of his son. To try to find out which of these chronological systems is the most plausible seems useless, and it can only make confusion worse confounded if we attempt a combination of the three. It has been usual to prefer the chronology af Ceylon, which places Buddha's death in 543 B. c. But the principal argument in favour of this date is extremely weak. It is said that the fact of the Ceylonese erabeing used as an era for practical purposes speaks in favour of its correctness. This may be true with regard to the times after the reign of As'oka. In historical times any era, however fabulous its beginning, will be practically useful; but no conclusion can be drawn from this, its later use, as to the correctness of its beginning. As a conventional era, that of Ceylon may be retained, but until new evidence can be brought forward to substantiate the authenticity of the early history of Buddhism as told by the Ceylonese priests, it would be rash to use the dates of the Southern Buddhists as a correct. ive standard for those of the Northern Buddhists or of the Brâhmans. Each of these chronological systems must be left to itself. They start from different premises, and necessarily arrive at different results. The Northern Buddhists founded their chronology on a reported prophecy of Buddha, that "a thousand years after his death his doctrines would reach the Northern countries." Buddhism was definitely introduced into China in the year 61 A. D; hence the Chinese fix the date of Buddha's death about one thousand years anterior to the Christian era. The variations of the date, according to different Chinese authorities, are not considerable, and may easily be explained by the uncertainty of the time at which Buddhism found its way successively into the various countries north of India, and at last into China. Besides 950 or 949 B. C.,2 which are the usual dates assigned to Buddha's death by Chinese authorities, we may mention the years 1130, 1045, 767, for each of which the same claim has been set up. The year 1130 rests on the authority of Tchao-chi, as quoted by Matouanlin in the annals of the Soui.3 Fahian, also, seems to have known this date; for, according to his editor, he placed the death of Buddha towards the beginning of the dynasty Tcheu, and this, according to Chinese chronology, took place in 1122.4 In another place, however, Fahian, speaking of the spreading of Buddhism towards the north, places this event 300 years after Buddha's Nirvana, or in the reign of the Emperor Phing-Wang. As this emperor reigned 770-720, Fahian would seem to have dated the Nirvana somewhere between 1070 and 1020. The date 767 rests

<sup>&</sup>lt;sup>1</sup> Lassen Indian Antiquities, ii., p. 58. Schiefner, Melanges Asiatiques, i. 436.

<sup>&</sup>lt;sup>4</sup> Neumann, Zeitschrift für die Kunde des Morgenlandes, ii. 117; Lassen, ii. 54.

on the authority of Matouanlin. I From Tibetan books no less than fourteen dates have been collected; 2 and the Chinese pilgrims who visited India found it impossible to fix on any one date as established on solid evidence. The list of the thirty-three Buddhist patriarachs, first published by Re'murat (Me'langes Asiatiques, i. p. 113), gives the date of their deaths from Chakia-mouni, who died 950 B C., to Soui-neng, who died 713 A.D., and bears, like everything Chinese, the character of the most exact chronological accuracy. The first link, however, in this long chain of patriarchs is of doubtful character, and the lifetime of Buddha, from 1029 to 950, rests on his own prophecy, that a Millennium would elapse from his death to the conversion of China. If, therefore, Buddha was a true prophet he must have lived about 1,000 BC., and this date once established, everything else had to give way before it. Thus Nâgârjuna, called by the Chinese Nâga Koshuna, or Loung-chou, is placed in their own traditional chronology, which they borrowed from the Buddhists in Northern India, 400 years after the Nirvana. The Tibetans assign the same date to him.4 In the list of the patriarchs, however, he occupies the fourteenth place, and dies 738 years after Buddha. The twelfth patriarch, Maning (Deva Bodhisatva), is traditionally placed by the Chinese 300 years after Buddha. In the list of the patriarchshe dies 618 years after the Nirvâna.

But if in this manner the starting point of the Northern Buddhist choronology turns out to be merely hypothetical, based as it is on a prophecy of Buddha, it will be difficult to avoid the same conclusion with regard to the date assigned to Buddha's death by the Buddhists of Ceylon and of Burmah and other countries which received their canonical books from Ceylon. The Ceylonese possess a trustworthy and intelligible chronology beginning with the year 161 B. c. Before that time their chronology is traditional, and full of absurdities. According to Professor Lassen, we ought to suppose that the Ceylonese, by some means or other, were in possession of the right date of Buddha's death; and as there was a prophecy of Buddha that Vijaya should land in Ceylon on the same day on which Buddha entered the Nirvâna, we

Foucaux, 1. c. According to Klaproth Matouanlin places Buddha 688 to 609.

<sup>6</sup> Mahâvanso, p. 46. The Mahâvans'a was written in Pâli by Mahânâma He was a priest and uncle of king Dasenkelleya, who reigned from A. D 459 to 477. Mahânâma made use of earlier histories, and mentions among them the Dîpavans'a. This work, also called Mahâvans'a, and written in Pâli, is supposed to be still in existence, and carries the history to the reign of Mahâsena, who died A. D. 302. Mahânâma, though he lived more than a hundred years after Mahâsena's death, does not seem to have carried the history much further. His work ends with the account of Mahâ-

are further asked to believe that the Ceylonese historians placed the founder of the Vijayan dynasty of Ceylon in the year 543, in accordance with their sacred chronology. We are not told, however, through what channel the Ceylonese could have received their information as to the exact date of Buddha's death, and although Professor Lassen's hypothesis. would be extremely convenient, and has been acquiesced in by most Sanskrit scholars, it would not be honest were we to conceal from ourselves or from others that the first and most important link in the Ceylonese, as well as in the Chinese chronology, is extremely weak. All we know for certain is, that the Ceylonese had an historical chronology after the year 161 B.C., that is to say, long before the Brahmans or Buddhists of the North can show anything but tradition. If, then, the exact Ceylonese chronology begins with 161 B. C. it is but reasonable to suppose that there existed in Ceylon a traditional native chronology extending beyond that date; and that, at all events, the first conquest of Ceylon, the establishment of the first dynasty, had some date, whether true or false, assigned to it in the annals of the country. Figaya, the founder of the first dynasty, means Co. guest, and such a person most likely never existed. But his name and fame belong to Ceylon; and even the latest tradition have never connected him with the Buddhist dynasties of India. He is called in the Mahavans'a, the son of Sinh bâhu, the sovereign of Lâla (supposed to be a subdivision of Magadha, near the Gandakî river), and he is connected by a miraculous genealogy with the kings of Banga (Bengal) and Kalinga (Northern Circars), but not with the Buddhist dynasties of Magadha. The only trace of Buddhism that can be discovered in the legends of Vijaya consists in the fact that his head, and the heads of his seven hundred companions, were shaved when they were sent adrift in a ship that was ultimately to bring them to Ceylon. But the author of the Mahavans'a takes care to say that this shaving of their heads was part of the punishment inflicted on Vijaya by his father, who, when asked by the people to execute his own son for numberless acts of fraud and violence, preferred to send him and his companions adrift on the ocean, after their heads had been shaved. Supposing then that before Dushtagamani, i. e., before 161 B. C., the Ceylonese possessed a number of royal names, and that by assigning to each of them a more or less fabulous reign, they had arrived at the year 543 as the probable date of the Conquest, we can well understand how, under the influence of the later Buddhists, exactly the same thing took place in Ceylon which took place in China. Various temples in Ceylon had their legends, by which their first foundation was ascribed to Buddha himself. Hence the Mahavans'a

sena's reign. It terminates with the 48th verse of the 37th chapter of what is now known as the Mahâvans'a, and it is only from conjecture that Turnour, the editor and translator of the first 38 chapters of the Mahâvans'a ascribes the end of the 37th, and the whole of the 38th chapter, to the pen of Mahânâma. Mahânâma's work was afterwards continued by different writers. It now consists of 100 chapters, and carries the history of Ceylon to the middle of the 11th century. He is likewise the author of a commentary on his own work, which commentary ends at the 48th verse of the 37th chapter.

begins with relating three miraculous visits which Buddha, during his lifetime, paid to Ceylon. At that time, however, it is said that Ceylon was still inhabited by Yakshas. If thus the very earliest history of the island had been brought in connection with Buddha, it is but natural that some saection of a similar kind should have been thought necessary with regard to the Conquest. A prophecy was therefore, invented. "The ruler of the word, Buddha," so says the Mahavans'a, " having conferred blessings on the whole world, and attained the exalted, unchangeable Nirvana, seated on the throne on which Nirvaça is achieved, ih the midst of a great assembly of devitas, the great divine sage addressed this celebrated injunction to Sakra, who stood near him: 'One Vijiya, the son of Sinhabâhu, king of the land of Lala, together with seven hundred officers of state, has landed on Lanka. Lorl of Dayas! my religion will be established in Lanka. On that account thoroughly protect, together with his retinue, him and Lanka.' The devoted King of Devas having heard these injunctions of the successor (of former Buddhas), assigned the protection of Lankâ to the Deva Utpalavarna (Vishnu). He, in conformity to the command of Sakra, instantly repaired to Lanka, and in the character of a parivrâjaka (devote) took his station at the foot of a tree.

"With Vijaya at their head the whole party approaching him, inquired, 'Pray, devotee, what land is this?' he replied, 'The land Lanka." Having thus spoken, he blessed them by sprinkling water on them out of his jug, and having tied (charmed) threads on their arms,

departed through the air."

At the end of the preceding Chapter, the date of the event is still more accurately fixed. "This prince named Vijaya," we read there, "who had then attained the wisdom of experience, landed in the division Tâmraparni of this land Lankâ, on the day that the successor of former Buddhas reclined in the arbour of the two delightful sal-trees, to attain Nirvâṇa." In this manner the conquest of Ceylon was invested with a religious character, and at the same time a connecton was established between the traditional chronology of Ceylon and the sacred history of Buddha. If Buddha was a true prophet, the Ceylonese argue quite rightly that he must have died in

This synchronism once established, it became necessary to accommolate to it, as well as possible, the rest of the legendary history of the Buddhists. It contained but few historical elements previous to As'oka's Council, but that council had again to be connected with the history of Ceylon. As'oka was the contemporary of Devânâmpriya Tishya, King of Ceylon. This king adopted Buddhism, and made it, like As'oka, the state religion of the island. Now, according to the traditional chronology of Ceylon, Devânâmpriya Tishya came to the throne 236 years after the landing of Vijaya, and he reigned forty years (307—267 Bc.). He was intimately connected with As'oka, as we shall see and it was necessary that the same interval which in the historical traditions of Ceylon separated Devânâmpriya Tishya from Vijaya should separate As'oka from Buddha. This was achieved

<sup>1</sup> Mahavanso, Pref. p. lii.

in the following manner: One As'oka is supposed to have come to the throne ninety years after Buldha, and a council (the second, as it is called) is supposed to have taken place in the tenth year of his reign, or just one hundred years after Buddha. At that second council a prophecy was uttered that in 118 years a calamity would befall the Buddhist religion. This refers to the reign of the so cilled second As'oka, who was at first a great enemy to religion. Now the first As oka is represented to have reigned 18 years after the Council (100 anno Buddhæ), and if we cast up these 118 years, the 22 years of As'oka's sons, the 22 years of the Nine, the 24 years 1 of Chandragupta, the 28 years of Bindusara, and the 4 years which elapsed before As'oka's inauguration, we find that As'oka's inauguration would fall just 118 years after the second Council, 218 years after Buddha, or 325 BC. The Council of this real Asoka was held in the 17th year of his reign, or 235 after Buddha. Mahendra, the son of As'oka, proceeded to Ceylon in the next year, or 236 years after Budlha; and in this manner the arrival of Mahendra in Ceylon, and the inauguration of Devanampriya Tishya as King of Ceylon, are brought together in the same year. It is true that in order to achieve this, it has become necessary to add a first As'oka,3 of whom the Northern Buddhists know nothing; it has become necessary to admit another Moggaliputto, and another Council, all equally unknown except in the traditional chronology of Ceylon. The Northern Buddhists know but one As'oka, the grandson of Chandragupta; they know but one Council, besides the Assembly following immediately on the death of Buddha, viz, the council of Pataliputra under Dharmas'oka, and this they place 110 years after Buddha's Nirvana.4 Pindola, a contemporary of Buddha, was seen as an old man by As'oka. But who was to contradiet the Ceylonese historians? They possessed, what the Buddhists of Magadha did not possess, a history of their island and their sovereigns They valued historical chronology for its own sake, forming an exception in this respect to all other nations of India. They were a colony, and like most colonies, they valued the traditions of the past. The Buddhists of Magadha, as far as we are able to judge, preserved but a few historical recollections, frequently in the form of prophecies, which they afterwards forced into the loose frame of the Brahmanic chronology. The Buddhists of Ceylon did not borrow the outlines of their history either from the Brahmans or from the Buddhists of Magadha; and this is a point which has never been sufficiently considered. Their outlines of history were not constructed originally in order to hold the Buddhist traditions of the North. They may have been slightly modified, so as to avoid glaring inconsisten-

<sup>1</sup> Not thirty-four years as printed in the Mahâvanso. See Lassen, ii. 62. n.

<sup>&</sup>lt;sup>2</sup> As Res., xx p. 167.

<sup>3</sup> This first As'oka is called Kâlâs'oka, a name which it would be too bold to explain as the chronological As'oka.

<sup>&</sup>lt;sup>4</sup> In some instances that date is changed to 200 A.B. by means of a reaction exercised by the literature of Ceylon on the chronology of the Continental Buddhists. Burnouf, Introduction, p. 436, 578.

cies between the profane history of Ceylon and the sacred history of Buddhism. But there is evidence to show that, on the other hand, the historical legends of Magadha had to yield much more considerably. -the framers of the final chronology finding it impossible to ignore the annals of their island and the reigns of their ancient half fabulous kings. The chronology of the Mahavans'a is a compromise between the chronology of Ceylon and that of Magadha, but the latter was the more pliant of the two. There is nothing to prove that the terminusa que of the chronology of Ceylon, -the date of Vijava's landing-was borrowed from the North. There were Buddhist traditions connecting Vijaya's landing with the death of Buddha, but the date 543 B.c. is never found in the sacred chronology of Buddhism, before it was borrowed from the profane chronology of Ceylon. There were similar. and, as it would seem, better founded traditions, connecting Devanampriya Tishya with the great As'oka; but the date of Devânâmpriya Tishya was not determined by the date of the great As'oka, nor was the date of As'oka's Council, as 110 af er Buddha, accepted in Ceylon. On the contrary, the interval between Vijaya and Devanampriya Tishya was allowed to remain as it stood in the Ceylonese annals, and the Buddhist traditions were stretched in order to suit that interval. An intermediate As'oka and an intermediete Council were admitted, which were unknown to the Northern Buddhists. The prophecy that Nagarjuna should live 400 years after Buddha, had been altered by the Chinese so as to suit their chronology. They placed him 800 years after Buddha. In like manner the Ceylonese Buddhists, having fixed Buddha's death at 543 BC changed the traditional date of Nagarjuna from 400 to 500 after Buddha.2 All this is constructive choronology, and whether we follow the Chinese or Ceylonese date of Buddha, we must always remember that in both the terminus a quo is purely hypothetical. This does not i terfere with the correctness of minor details, such as the number of years assigned to each king, and in particular the chronological distance between cartain events. These may have formed part of popular tradition, long before any system of chronology was established. A very old man, Pindola, was represented in a popular legend to have been a contemporary both of Buddha and of Dharmas'oka. Hence the interval between the founder and the royal patron of Buddhism would naturally be fixed at about 100 years. This is a tradition which may be used for historical purposes. Again, when we see that a date like that of Nagurjuna fixed in the North of India at 400 after Buddha, is altered to 800 and 500, so as to suit the requirements of two different systems of choronology, we may feel inclined to look upon the unsystematic date as the most plausible. But in order to make use of such indications we must first of all establish a που στω, and this can only be found in Chandragupta. Everything in Indian choronology depends on the date af Chandragupta. Chandragupta was the grandfather of As'oka, and the contemporary of Seleucus Nicator. Now, according to Chinese chronology, As oka would have

<sup>&</sup>lt;sup>1</sup> As. Res. xx. 513.

<sup>&</sup>lt;sup>2</sup> Turnour, Examination of some points of Buddhist Chronology, Journal of the As. S. B., v. 530. Lassen ii. 58.

lived, to waive minor difference, 850 or 750 B. C., according to Ceylonese choronology, 315 B. C. Either of these dates is impossible, because it does not agree with the chronology of Greece, and hence both the Chinese and Ceylonese dates of Buddha's death must be given up as

equally valueless for historical calculations.

There is but one means through which the history of India can be connected with that of Greece, and its chronology be reduced to its proper limits. Although we look in vain in the literature of the Brâhmans or Buddhists for any allusion to Alexander's conquest, and although it is impossible to identify any of the historical events, related by Alexander's companions, with the historical traditions of India, one name has fortunately been preserved by classical writers who describe the events immediately following Alexander's conquest, to form a connecting link between the history of the East and the West. This is the name of Sandracottus or Sandracopptus, the Sanskrit

Chandragupta.

We learn from classical writers, Justin, Arrian, Diodorus Siculus. Strabo, Quintus Curtius and Plutarca, that in Alexander's time there was on the Ganges a powerful king of the name of Xandrames, and that soon after Alexander's invasion, a new empire was founded there by Sandracottus or Sandrocyptus. Justin says: "Sandracottua gave liberty to India after Alexander's retreat, but soon converted the name of liberty into servitude after his success, subjecting those whom he had rescued from foreign dominion to his own authority. This prince was of humble origin, but was called to royalty by the power of the gods; for, having offended Alexander by his impertinent language, 1 he was ordered to be put to death, and escaped only by flight. Fatigue with his journey he lay down to rest, when a lion of large size came. and licked off the sweat that pourd from him with his tongue, and retired without doing him any harm. The prodigy inspired him with ambitious hopes, and collecting bands of robbers he roused the Indians to rebellion. When he prepared for war against the captains of Alexander, a wild elephant of enormous size approached him, and received him on his cack as if he had been tamed. He was a distinguished general and a brave soldier. Having thus acquired power, Sandracottus reigned over India at the time when Seleucus was laying the foundation of his greatness, and Seleucus entered into a treaty with him, and settling affairs on the side of India directed his march against Antigonus.12

Besides this we may gather from classical writers the following statements bearing on Xandrames and Sandrocyptus: "When Alexander made inquiries about the interior of India, he was told that beyond the Indus there was a vast desert of 12 (or 11, according to Curtius,) days' journey, and that at the farthest borders thereof ran the Ganges. Beyond that river, he was told, the Prasii (Prâchyas) dwelt, and the Gangaridæ Their king was named Xandrames, who could bring into the field 20,000 horse, 200,000 foot, 2,000 chariots and 4,000 (or 3,000,

<sup>1</sup> Plutarch, Vita Alex. c. 62, says that Sandracottus saw Alexander when he was a μειρακιον.

<sup>2</sup> Justini Hist. Philipp. Lib. xv. cap. iv.

Curtius,) elephants. Alexander who did not at first believe this, inquired from king Porus whether this account of the powerr of Xandrames was true; and he was told by Porus that it was true, but that the king was but of mein and obscure extraction, accounted to be a barber's son; that the queen, however, had fallen in love with the barber, had murdered her husband, and that the kingdom had thus devolved upon Xandrames." Quintus (urtius says,2 "that the father of Xandrames had murdered the king, and under pretence of acting as guardian to his sons, got them into his power and put them to death: that after their extermination he begot the son who was then king. and who, more worthy of his father's condition than his own, was odious and contemptible to his subjects." Strabo adds, 3 "that the capital of the Prasii was called Palibothra, situated at the confluence of the Ganges and another river," which arrian specifies as the Erannoboas, Their king, besides his birth-name, had to take the name of the city. and was called the Palibothrian. This was the case with Sandracottus to whom Megasthenes was sent frequently. It was the same king with whom Seleucu Nicator contracted an alliance, ceding to him the country beyond the Indus, and receiving in his stead 500 elephants.5 Megasthenes visited his court several times; and the same king, as Plutarch says,7 "traversed India with an army of 600,000 men, and conquered the whole"

These accounts of the classical writers contain a number of distinct statements which could leave very little doubt as to the king to whom they referred. Indian historians, it is true, are generally so vague and so much given to exaggeration, that their kings are all very much alike, either all black or all bright. But nevertheless, if there ever was such a king as the king of the Prasii, and usurper, residing at Pâțaliputra, called Sandrocyptus or Sandracottus, it is hardly possible that he should not be recognized in the historical tradition of India There is in the lists of the kings of India the name of Chandragupta, and the resemblance of this name with the name of Sandracottus or Sandracyptus was first, I believe, pointed out by Sir William Jones:8 Wilford, Professor Wilson. and Professor Lassen have afterwards added further evidence in confirmation of Sir W. Jones's conjecture; and although other scholars. and particularly M. Troyer, in his edition of the Rajatarangini, have raised objections, we shall see that the evidence in favour of the identity of Chandragupta and Sandrocyptus is such as to admit of no reasonable

<sup>1</sup> Diodorus Siculus, xvii. 93. The statement in Photii Bidlioth. p. 1579, that Porus was the son of a barber, repeated by Libanius, tom. ii. 632., is evidently a mistake. Plutarch, Vita Alexandri, c. 62, speaks of 80,000 horse, 8,000 chariots, and 6,000 elepha ts.

<sup>&</sup>lt;sup>2</sup> Quintus Curtius, ix. 2.

doubt. It is objected that the Greeks called the king of the powerful empire beyond the Indus, Xandrames, or Aggramen. Now the last name is evidently a mere misspelling for Xandrames, and this Xandrames is not the same as Sandracottus. Xandrames, if we understand the Greek accounts rightly, is the predecessor of Chandragupta or rather the last king of the empire conquered by Sandracottus. If, however, it should be maintained, that these two names were intended for one and the same king, the explanation would still be very easy. Chandragupta (the protected of the moon), is also called Chandra, the Moon: and Chandramas, in Sanskrit, is a synonym of Chandra. Xandrames, however, was no doubt intended as different from Chandragupta. Xandrames must have been king of the Prasii before Sannracottus, and during the time of Alexander's wars. If this Xandrames is the same as the last Nanda, the agreement between the Greek account of his mean extraction, and the Hindu account of Nand being a S'udra, would be very striking. It is not, however, quite clear whether the same person is meant in the Greek and Hindu accounts. At the time of Alexander's invasion Sandracottus was very young, and being obliged to fly before Alexander, whom he had offended, it is said that he collected bands of robbers, and with their help succeeded in establishing the freedom of India. Plutarch says distinctly that Sandracottus reigned soon after, that is soon after Xandrames, and we know from Justin, that it was Sandracottus, and not Xandrames, who waged wars with the captains of Alexander. Another objection against the identification of Chandragupta and Sandracottus was the site of their respective capitals. The capital of Chandragupta, Pâțaliputra, was no doubt the same as the Palibothra of Sandracottus, the modern Patna. But exception was taken on the ground that Patna is not situated near the confluence of the Ganges and the Sone or Erannoboas, where the ancient Palibothra stood. This, however, has been explained by a change in the bed of the river Sone, which is established on the best geographical evidence.

There are several other points on which the histories of Chandragupta and Sandracottus agree. Sandracottus founded a new empire at Palibothra. Chandragupta was the founder of a new dynasty, the Mauryas 2 at Pâtaliputra. Sandracottus gained the throne by collecting bands of robbers. Chandragupta did the same. Sandracottus was called to royalty by the power of the gods and by prodigies. So was Chandragupta, although the prodigy related by Justin is not exactly the same as the prodigies related by Hindu authors. So far, therefore, there is nothing in the Greek accounts that is not confirmed by Hindu tradition. That there should be a great deal more in Hindu tradition than was known to the Greeks is but natural, particularly as many of

<sup>1</sup> See Wilson's notes on the Mudia Rakshasa, p. 132.

<sup>&</sup>lt;sup>2</sup> The name of Maurya seems to have been known to the Greeks. See Cunningham, Journal of the As. Soc. of Bengal, xxiii. p. 680.

The wooden houses in which the tribe of the Morieis are said to have lived, may refer to the story of the Mauryas living in a forest. See Mahâvanso, p.•xxxix.

The statement of Wilford, that Maurya meant in Sanskrit the offspring of a barber and a S'udra-woman, has never been proved.

the Hindu stories were evidently invented at a later time and with a certain object. As the grandson of Chandragupta was the great patron of the Buddhists, attempts were naturally made by Buddhist writers to prove that Chandragupta belonged to the same race as Buddha; while on the other hand the Brahmanic writers would be no less fertile in inventing fables that would throw discredit on the ancestor of the Budlhist sovereigns of India. Some extracts from the writings of these hostile parties will best show how this was achieved. In the Mahâvanso we read: "Kâlâsoko had sons: these brothers (conjointly) ruled the empire righteously for twenty two years. Subsequently there were nine brothers: they also according to their seniority reigned for twenty-two years. Thereafter the Brahman Chânakko, in gratification of an implacable hatred borne towards the ninth surviving brother, called Dhana nando, having put him to death, installed in the sovereignty over the whole of Jambudipo, a descendant of the dynasty of Moriyan sovereigns, endowed with illustrious and beneficent attributes, and surnamed Chandagutto. He reigned 24 (not 34) years."

The commentary on this passage adds the following details: 2 "Subsequent to Kâlâsoko, who patronised those who hold the second convocation, the royal line is stated to have consisted of twelve monarchs to the reign of Dhammâsoko, when they (the priests) held the third convocation. Kâlâsoko's own sons were ten brothers Their names are specified in the Atthakathâ. The appellation of the nine

Nandos' originates in nine of them bearing that patronymic title.

"The Atthakatha of the Uttaravinaro priests sets forth that the eldest of these was of an extraction (maternally) not allied (inferior) to the royal family; and that he dwelt in one of the provinces; it gives also the history of the other nine. I also will give their history

succinctly, but without prejudice to its perspicuity.

In aforetime, during the conjoint administration of the (nine) sons of Kâlâs'oko, a certain provincial person appeared in the character of a marauder, and raising a considerable force, was laying the country waste by pillage. His people, who committed these depredations on towns, whenever a town might be sacked, seized and compelled its own inhabitants to carry the spoil to a wilderness, and there securing the plunder, drove them away. On a certain day, the banditti who were leading this predatory life having employed a daring, powerful, and enterprizing individual to commit a robbery, were retreating to the wilderness, making him carry the plunder. He who was thus associated with them, inquired: 'By what means do you find your livelihood?' Thou slave' (they replied) 'we are not men who submit to the toils of tillage, or eattle tending. By a proceeding precisely like the present

<sup>2</sup> Mahâv, p 38.
<sup>3</sup> It would seem that the eldest son of As'oka did not participate in the general government of the country, but received a provincial vice-royalty. But in the Burmese histories it is stated distinctly that the eldest son, named Bhadrasena, reigned with nine of his brothers during a period of twenty-two years.

<sup>&</sup>lt;sup>1</sup> Mahâvanso, p. 21. The Pâli orthography has been preserved in the following extracts.

one, pillaging towns and villages, and laying up stores of riches and grain, and providing ourselves with fish and flesh, toddy and other beverage, we pass our lives jovially in feasting and drinking. On being told this, he thought: 'This mode of life of these thieves is surely excellent; shall I, also, joining them, lead a similar life?' and then said, I also will join you, I will become a confederate of yours. Admitting me among you, take me (in your marauding excursions).' They replying

'sâdhu,' received him among them.

"On a subsequent occasion, they attacked a town which was defended by well armed and vigilant inhabitants. As soon as they entered the town the people rose upon and surrounded them, and seizing their leader, and hewing him with a sword, put him to death. The robbers dispersing in all directions repaired to, and reassembled in the wilderness. Discovering that he (their leader) had been slain; and saying, 'In his death the extinction of our prosperity is evident; having been deprived of him, under whose control can the sacking of villages be carried on? Even to remain here is imprudent; thus our disunion and destruction are inevitable: 'they resigned themselves to desponding grief. The individual above mentioned, approaching them, asked: What are ye weeping for?' On being answered by them, 'We are lamenting the want of a valiant leader, to direct us in the hour of attack and retreat in our village sacks.' 'In that case, my friends,' (said he) 'ye need not make yourselves unhappy; if there be no other person able to undertake that post, I can myself perform it for you; from henceforth give not a thought about the matter.' This and more he said to them. They, relieved from their perplexity by this speech, joyfully replied, 'sâdhu,' and conferred on him the post of chief.

" From that period proclaiming himself to be Nando, and adopting the course followed formerly (by his predecessor), he wandered about, pillaging the country. Having induced his brothers also to co-operate with him, by them also he was supported in his marauding excursions. Subsequently assembling his gang, he thus addressed them: 'My men! this is not a career in which valiant men should be engaged; it is not worthy of such as we are; this course is only befitting base wretches. What advantage is there in persevering in this career, let us aim at supreme sovereignty?' They assented. On having received their acquiescence, attended by his troops and equipped for war, he attacked a provincial town, calling upon (its inhabitants) either to acknowledge him as sovereign, or to give him battle. They on receiving this demand all assembled, and having duly weighed the message, by sending an appropriate answer, formed a treaty of alliance with them. By this means reducing under his authority the people of Jambudipo in great numbers, he finally attacked Patiliputta (the capital of the Indian empire), and usurping the sovereignty, died there a short time after-

wards, while governing the empire.

"His brothers next succeeded to the empire in the order of their seniority. They altogether reigned twenty-two years. It was on this

Pataliputra was then governed by the youngest son of As'oka, called Pinjamakh, and the robber-king who first called himself Nanda, is said to have reigned a short time under the title of Ugrasena. As. Res. xx. p. 170.

account that (in the Mahavanso) it is stated that there were nine Nandos.

"Their ninth youngest brother was called Dhana-nando, from his being addicted to hoarding treasure. As soon as he was inaugurated. actuated by miserly desires the most inveterate, he resolved within himself, 'It is proper that I should devote myself to hearding treasure:' and collecting riches to the amount of eighty kotis. and superintending the transport thereof himself, and repairing to the banks of the Ganges. by means of a barrier constructed of branches and leaves interrupting the course of the main stream, and forming a canal, he diverted its waters into a different channel; and in a rock in the bed of the river having caused a great excavation to be made, he buried the treasure there. Over this cave he laid a layer of sones, and to prevent the admission of water, poured molten lead on it. Over that again he laid another layer of stones, and p ssing a stream of molten lead (over it), which made it like a solid rock, he restored the river to its former course. Levying taxes even on skins, gums, trees, and stones, among other articles, amassed further treasures, which he disposed of similarly. It is stated that he did so repeatedly. On this account we call this ninth brother of theirs, as he personally devoted himself to the hoarding of treasure, 'Dhana-nando.'

"The appellation of 'Moriyan sovereigns' is derived from the auspicious circumstances under which their capital, which obtained the name of Moriya, was called into existence.

"While Buddha yet lived, driven by the misfortunes produced by the war of (prince) Vidhudhabo, certain members of the Sâkya line retreating to Himavanto, discovered a delightful and beautiful location, well watered, and situated in the midst of a forest of lofty bo and other trees. Influenced by the desire of settling there, they founded a town at a place where several great roads met, surrounded by durable ramparts, having gates of defence therein, and embellished with delightful edifices and pleasure gardens. Moreover that (city), having a row of buildings covered with tiles, which were arranged in the pattern of the plumage of a peacock's neck, and as it resounded with the notes of flocks of 'konehos' and 'mayuros' (pea-fowls), was so called. From this circumstance these Sâkya lords of this town, and their children and descendants, were renowned throughout Jambudipo by the title of 'Moriya.' From this time that dynasty has been called the Moriyan dynasty."

After a few isolated remarks, the Tîkâ thus proceeds in its account

of Chânakko and Chandagutto:

"It is proper that in this place a sketch of these two characters should be given. Of these, if I am asked in the first place. Where did this Chânakko dwell? Whose son was he?' I answer, he lived at the city of Takkasilā. He was the son of a certain Brahman at that place, and a man who had achieved the knowledge of the three Vedas; could rehearse the mantos; skilful in stratagems; and dexterous in intrigue as well as policy. At the period of his father's death he was already well known as the dutiful maintainer of his mother, and as a highly gifted individual worthy of swaying the chhatta.

"On a certain occasion, approaching his mother, who was weeping he inquired, 'My dear mother, why dost thou weep?' On being answered by her, 'My child, thou art gifted to sway a chhattn. Do not, my boy, endeavour by raising the chhatta, to become a sovereign Princes everywhere are unstable in the attachments. Thou also, my child, will forget the affection thou owest me. In that case, I should be reduced to the deepest distress. I weep under these apprehensions. He exclaimed: 'My mother, what is that gift that I possess? On what part of my person is it indicated?' and on her replying 'My dear, on thy teeth,' smashing his own teeth, and becaming Kandhadatto' (a tooth broken man) he devoted himself to the protection of his mother. Thus it was that he became celebrated as the filial protector of his mother. He was not only a tooth-broken man, but he was disfigured by a disgusting complexion, and by deformity of legs and other members prejudicial to manly comeliness.

In his quest of disputation, repairing to Pupphapura, the capital of the monarch Dhana-nando, (who abandoning his passion for hording, becoming imbued with the desire of giving alms, relinquishing also his miserly habits and delighting in hearing the fruits that resulted from benevolence, had built a hall of alms-offering in the midst of his palace, and was making an offering to the chief of the Brahmans worth a hundred kotis and to the most junior Brahman an offering worth a lae), this B ahman (Chànako) entered the said apartment, and taking possession of the seat of the chief Brahman, sat himself down in that

alms hall.

"At that instant Dhana-nando himself-decked in regal attire, and attended by many thousands of 'siwakâ' (state palanquins), glittering with their various ornaments, and escorted by a suite of a hundred royal personages, with their martial array of the four hosts, of cavalry, elephants, chariots and infantry, and accompanied by dancing-girls, lovely as the attendants on the devos, himself a personification of majesty, and bearing the white parasol of dominion, having a golden staff and golden tassels, with this superb retinue repairing thither, and entering the hall of alms-offering, beheld the Brahman Chânakko seated. On seeing him, this thought occurred to him (Nando): 'Surely it cannot be proper that he should assume the seat of the chief Brahman.' coming displeased with him, he thus evinced his displeasure. He inquired: 'Who art thou, that thou hast taken the seat of the chief Brahman?' and being answered (simply), 'It is I;' 'Cast from hence this cripple Brahman; allow him not to be seated,' exclaimed Nando; and although the courtiers again and again implored of him, saying, De'vo! let it not be so done by a person prepared to make offerings as thou art, extend thy forgiveness to this Brahman; he insisted upon his ejection. On the courtiers approaching Chânakko, and saying, 'Achârivo! we come, by the command of the raja, to remove thee from hence; but incapable of uttering the words, "Achâriyo, depart hence," we now stand before thee abashed.' Enraged against him (Nando), rising from his seat to depart, he snapt asunder his Brahmanical cord, and dashed down his jug on the threshold, and thus invoking malediction: 'Kings are impious: may this whole earth, bounded by the four cceans, withhold its gifts from Nando,' he departed. On his sallying out, the officers reported this proceeding to the râja. The king, furious with indignation, roared. 'Catch, catch, the slave.' The fugitive, stripping himself naked, and assuming the character of an ajîvako, and running into the centre of the palace, concealed himself in an unfrequented place, at the Lankhârathânan. The pursuers, not having dis-

covered him, returned and reported that he was not to be found.

"In the night he repaired to a more frequented part of the palace, and meeting some of the suite of the royal prince Pabbato, admitted them into his confidence. By their assistance he had an interview with the prince. Gaining him over by holding out hopes of securing the sovereignty for him, and attaching him by that expedient, he began to search the means of getting out of the palace. Discovering that in a certain place there was a ladder leading to a secret passage, he consulted with the prince, and sent a message to his (the prince's) mother for the key of the passage. Opening the door with the utmost secrecy, he escaped with the prince, and they fled to the wilderness of Vinijhâ (Vindhya.)

While dwelling there, with the view of raising resources, he converted (by recoining) each kahâpana into eight, and amassed eighty kotis of kahâpanas. Having buried this treasure, he commenced to search for a second individual entitled (by birth) to be raised to sovereign power and met with the aforesaid prince of the Morlyan dynasty called

Chandagutto.

" His mother, the queen consort of the monarch of Moriyanagara, the city before mentioned, was pregnant at the time that a certain powerful provincial raja conquered that kingdom, and put the Moriyan king to death. In her anxiety to preserve the child in her womb, she departed for the capital of Pupphapura, under the protection of her elder brothers, and under disguise she dwelt there. At the com. pletion of the ordinary term of pregnancy she gave birth to a son, and relinquishing him to the protection of the devos, she placed him in a vase, and deposited him at the door of a cattle pen. A bull named Chando stationed himself by him, to protect him; in the same manner that Prince Ghoso, by the interposition of the devata, was watched over by In the same manner also, that the herdsman in the instance of that Prince Ghoso repaired to the spot where that bull planted himself, a herdsman, on observing this prince, moved by affection, like that borne to his own child, took charge of and tenderly reared him; and in giving him a name, in reference to his having been watched by the bull Chando, he called him 'Chandagutto,' and brought him up. When be had attained an age to be able to tend cattle a certain wild huntsman, friend of the herdsman, becoming acquainted with the boy, attached to him took him from (the herdsman) to his own dwelling, and established him there. He continued to dwell in that village.

"Subsequently, on a certain occasion, while tending cattle with other children in the village, he joined them in a game called, 'the game of royalty.' He himself was named Râjı; to others he gave the offices of sub-king, &c. Some being appointed judges, were placed in a judgment hall; some he made officers of the king's household; and others, outlaws or robbers. Having thus constituted a court of justice, he sat in judgment. On culprits being brought up, when they had been regularly impeached

and tried, on their guilt being clearly proved to his satisfaction, according to the sentence awarded by his judical ministers, he ordered the officers of the court to chop off their hands and feet. On their replying 'Devo! we have no axes;' he answered: 'It is the order of Chandagutto that ye should chop off their hands and feet, making axes with the horns of goats for blades, and sticks for handles.' They acted accordingly; and on striking with the axe, the hands and feet were lopped off. On the same person commanding, 'Let them be reunited' the hands and feet were restored to their former condition.

"Chânakko happening to come to that spot, was amazed at the proceeding he beheld. Accompanying (the boy) to the village, and presenting the huntsman with a thousand kahâpanas, he applied for him; saying, I will teach your son every accomplishment; consign him to me.' Accordingly, conducting him to his own dwelling, he encircled his neck with a single fold of a woollen cord, twisted with gold thread, worth a lac.

"The discovery of this person is thus stated (in the former works):

' He discovered this prince descended from the Moriyan line.'

"He (Chânakko) invested Prince Pabbatto, also with a similar woollen cord. While these youths were living with him, each had a dream, which they separately imparted to him. As soon as he heard each (dream), he knew that of these Prince Pabbato would not attain royalty; and that Chandagutto would, without loss of time, become paramount monarch in Jambudipo. Although he made this discovery, he disclosed nothing to them.

"On a certain occasion having partaken of some milk-rice prepared in butter which had been received as an offering at a brahminical disputation, they retired from the main road, and lying down in a shady place, protected by the deep foliage of trees, fell asleep Among them the Achariyo awakening first, rose, and for the purpose of putting prince Pabbato's qualifications to the test, he gave him a sword, and telling him: 'Bring me the woollen thread on Channagutto's neck, without either cutting or untying it, sent him off. He started on the mission, and failing to accomplish it, he returned. On a subsequent day, he sent Chandagutto on a similar mission. He repairing to the spot where Pabbato was sleeping, and considering how it was to be effected, decided: 'There is no other way of doing it; it can only be got possession of, by cutting his head off.' Accordingly chopping his head off, and bringing away the woollen thread, he presented himse f to the Brahman, who received him in profound silence. Pleased with him, however, on account of this (exploit), he rendered him in the course of six or seven years highly accomplished, and profoundly learned.

"Thereafter, on his attaining manhood, he decided: 'From' henceforth this individual is capable of forming and controlling an army;' so he repaired to the spot where his treasure was buried, and took possession of it, and employed it, enlisting forces from all quarters, and distributing money among them; and having thus formed a powerful army, he entrusted it to him. From that time throwing off all disguise, and invading the inhabited parts of the country, he commenced his campaign by attacking towns and villages. In the course of their (Chânakko

and Chandagutto's) warfare, the population rose to a man, and surrounding them, and hewing their army with their weapons, van-quished them. Dispersing, they re-united in the wilderness; and consulting together, they thus decided: 'As yet no advantage has reuslted from war; relinquishing military operations, let us acquire a knowledge of the sentiments of the people.' Thenceforth, in disguise, they travelled about the country. While thus roaming about, after sunset retiring to some town or other, they were in the habit of attend-

ing to the conversation of the inhabitants of those places.

"In one of these villages, a woman having baked some 'appala-pûva' (pancakes) was giving them to her child, who leaving the edges would only eat the centre. On his asking for another cake, she remarked; 'This boy's conduct is like Chandagutto's in his attempt to take possession of the kingdom.' On his inquiring: 'Mother, why, what am I doing; and what has Chandagutto done?' 'Thou, my boy,' said she, 'throwing away the outside of the cake, eatest the middle only Chandagutto also in his ambition to be a monarch, without subduing the frontiers, before he attacked the towns, invaded the heart of the country, and laid towns waste. On that account, both the inhabitants of the town and others, rising, closed in upon him, from the frontiers to the centre, and destroyed his army. That was his folly.'

"They, on hearing this story of hers, taking due notice thereof, from that time again raised an army. On resuming their attack on the provinces and towns, commencing from the frontiers, reducing towns, and stationing troops in the intervals, they proceeded in their invasion. After a respite, adopting the same system, and marshalling a great army, and in regular course reducing each kingdom and province, then assailing Pâtiliputta and putting Dhana-nando to death, they seized

that sovereignty.

"Although this had been brought about, Chânakko did not ate once raise Chandagutto to the throne; but for the purpose of discov ring Dhana-nando's hidden treasure, sent for a certain fisherman (of the river); and after deluding him with the promise of raising the ehhatta for him, and securing the hidden treasure, within a month from that date, put him also to death, and inaugurated Chandagutto monarch.

"Hence the expression (in the Mahâvanso) a descendant of the dynasty of Moriyan sovereigns; as well as the expression installed in the sovereignty.' All the particulars connected with Chandagutto, both before his installation and after, are recorded in the Atthakathâ of the Uttaravihâro priests. Let that (work) be referred to, by those who are desirous of more detailed information. We compile this work in an abridged form, without prejudice however to its perspicuity.

"His (Chandagutto's) son was Bindusaro. After his father had assumed the administration, (the said father) sent for a former acquaintance of his, a Jatilian, named Maniyatappo, and conferred a commission on him. 'My friend, (said he) do thou restore order into the country; suppressing the lawless proceedings that prevail.' He replying 'sâdhu,' and accepting the commission, by his judicious measures, reduced the country to order.

<sup>1</sup> This is probably the Kaivarta-nanda of the Rajaratnakara.

"Chânakko, determined that to Chandagutto—a monarch, who by the instrumentality of him (the aforesaid Maniyatappo) had conferred the blessings of peace on the country, by extirpating marauders who were like unto thorns (in a cultivated land)—no calamity should befall from poison, decided on inuring his body to the effects of poison. Without imparting the secret to any one, commencing with the smallest particle possible, and gradually increasing the dose, by mixing poison in his food and beverage, he (at last) fed him on poison, at the same time taking steps to prevent any other person participating in his posioned repasts.

"At a subsequent period his queen consort was pronounced to be pregnant. Who was she? Whose daughter was she? 'She was the daughter of the eldest of the maternal uncles who accompanied the râja's mother to Pupphapura.' Chandagutto wedding this daughter of

his maternal uncle, raised her to the dignity of queen consort.

"About this time, Chânakko, on a certain day having prepared the monarch's repast sent in to him, himself accidentally remaining behind for a moment. On recollecting himself, in an agony of distress, he exclaimed, 'I must hasten thither, short as the inteval is, before he begins his meal;' and precipitately rushed into the king's apartment, at the instant that the queen who was within seven days of her confinement, was in the act, in the râja's presence, of placing the first handful of the repast in her mouth. On beholding this, and finding that there was not even time to ejaculate 'Don't swallow it,' with his sword he struck her head off and then ripping open her womb, extricated the child with its caul, and placed it in the stomach of a goat. In this manner, by placing it for seven days in the stomach of seven different goats, having completed the full term of gestation, he delivered the infant over to the female slaves. He caused him to be reared by them, and when a name was conferred on him—in reference to a spot, (Bindu) which the blood of the goats had left—he was called Bindusâro."

This Bindusåra succeeded his father as king, and, after a reign of 28 years, he was succeeded by the great As'oka. In this manner, the Buddhists prove that through the Mauryas, As'oka belonged to the same family as Buddha, the royal family of the S'âkyas.

The Brahmans, on the contrary, endeavour to show that Chandragupta belonged to the same contemptible race as the Nandas. Thus we read in the Vishnu-purana<sup>2</sup>:—

"The last of the Brihadratha dynasty, Ripunjaya, will have a minister named S'unika (S'unaka, Bh. P.), who having killed his sovereign will place his son Pradyota upon the throne (for 23 years, Vâyu and Matsya P.). His son will be Pâlaka (24 years, V.; Tilaka or Bâlaka, 28 years, M. P.). His son will be Vis'âkhayûpa (50 years V.; 53 M. P.). His son will be Janaka (Ajaka, 21 years V; Sûryaka, 21 years M.; Rajaka, Bh. P.). And his son will be Nandivardhana (2) years V. and M. P.). These five kings of the house of Pradyota will reign over the earth for 138 years (the same number in V. and Bh. P.).

<sup>&</sup>lt;sup>1</sup> See page 148.

<sup>&</sup>lt;sup>2</sup> Vishņu-purāņa, transtated by H. H. Wilson, p. 466.

"The next prince will be Śis'unâgo; his son will be Kâkavarna (36 years V. and M.); his son will be Kshemadharman (Kshemakarman, 20 years V., Kshemadharman, 36 years M.); his son will be Kshatraujas (40 years V.; Kshemajit or Kshemarchis, 36 years M.; Kshetrajna, Bh. P.); his son will be Vidmisâra (Vimbisâra, 28 years V.; Vindusena or Vindhyasena, 28 years M.; Vidhisâra, Bh.); his son will be Ajâtas'atru; his son will be Dharbaka (Harshaka, 25 years V.; Vans'aka, 24 years M.); his son will be Udayâs'va (33 years V.; Udibhi or Udâsin, 33 years M.); his son also will be Nandivardhana; and his son will be Mahânanda (42 and 43 years V.; 40 and 43 years M.). These ten Śais'unâgas will be kings of the earth for 362 years.

"The son of Mahânanda will be born of a woman of the Sûdra-class; his name will be Nanda, called Mahâpadma, for he will be exceedingly avaricious. Like another Paras'u-râma, he will be the annihilator of the Kshatriya race, for after him the kings of the earth will be Sûdras. He will bring the whole earth under one umbrella, he will have eight sons, Sûmalya, and others, who will reign after Mahâpadma; and he and his sons will govern for a hundred years. The Brahman Kautilya

will root out the nine Nandas.

"Upon the cessation of the race of Nanda, the Mauryas will possess the earth. Kautilya will place Chandragupta<sup>4</sup> on the throne; his son will be Vindusâra; his son will be As'okavardhana; his son will be Suyas'as; his son will he Das'aratha; his son will be Sangata; his son will be Sangata; his son will be Sangata; his son will be Sas'adharman, and his successor will be Vrihadratha. These are the ten Mauryas who will reign over the earth for 137 years."

The title of Maurya, which by the Puddhists was used as a proof of As'oka's royal descent, is explained by the Brahmans as a metronymic,

Murâ being given as the name of one of Nanda's wives.

If now, we survey the information here brought together from Buddhist, Brahmanic, and Greek sources, we shall feel bound to confess that all we really know is this:—

Chandragupta is the same person as Sandrocyptus, or Sandracottus. This Sandracottus, according to Justin (xv. 4.), had seized the throne

<sup>2</sup> 25 years V.; 27 years M.: the latter inserts a Kanvayana, 9 years,

and Bhúmi-mitra or Bhûmiputra, I4 years, before him.

3 According to the Vâyu, Udaya or Udayas'va founded Pataliputra, on

the southern angle of the Ganges.

4 The length of this monarch's reign is given uniformly by the Purânas and the Buddhist histories, as 24 years. The number is given by the Vâyu-Purâna, the Dîpavans'a, the Mahâvans'a (where 34 is a mistake for 24), and in Buddhaghosha's Arthakatha. Cf. Mahâv. p. lii.

5 The Vâyu-Purâna calls him Bhadrasâra, and assign 25 years to his

reign.

6 Vishņu-purāna, p. 468. n. 21. This rests only on the authority of the comment tor on the Vishnu-purāna; but Chandragupta's relationship with Nanda is confirmed by the Mudrârâkshasa.

<sup>&</sup>lt;sup>1</sup> Šis'unāka, who, according to the Vâyu and Matsya Purāṇa, relinquished Benares to his son, and established himself at Girivraja or Râjagṛtha in Behar, reigned 40 years, V. and M. P.

of India after the prefects of Alexander had been murdered (317 B. c.). Seleucus found him as sovereign of India when, after the taking of Babylon and the consquest of the Bactrians, he passed on into India. Seleucus, however, did not conquer Sandracottus, but after concluding a league with him, marched on to make war against Antigonus. This must have taken place before 312, for in that year, the beginning of the

Seleucidan era, Seleucus had returned to Babylon.

We may suppose that Chandragupta became king about 315, and as both the Buddhist and Brahmanic writers allow him a reign of 24 years, the reign of Bindusara would begin 291 B.C. This Bindusara again had according to both Brahmanic and Buddbistic authors, a long reign of either twenty-five or twenty-eight years. Taking the latter statement as the better authenticated, we find that the probable beginning of As'oka's reign took place 263 B.C.; his inauguration 259 B.C.; his Council either 246 or 242 BC. At the time of As'oka's inauguration, 218 years had elapsed since the conventional date of the death of Buddha. Hence if we translate the language of Buddhist chronology into that of Greek chronology, Buddha was really supposed to have died 477 B.c., and not 543 B.C. Again, at the time of Chandragupta's accession, 162 years were believed to have elapsed since the conventional date of Buddh's death. Hence Buddha was to have died 315 + 162 = 477 B.C. Or, to adopt a different line of argument, Kanishka, according to the evidence of coins, must have reigned before and after the Christian era. In the Stupa of Manikyala, which was built by Kanishka, Roman coins have been found of as late a date as 33 B.C. How long before that date this Turushka or Indosevthian king may have assumed the sovereignty of India it is difficult to determine. But under him the Northern Buddhists place a new Council which was presided over by Vasumitra,3 and the date of which is fixed at more than 400 after Buddha's Nirvana. If we add 400 and 33, and take into account that the Council took place more than 400 years after Buddha, and that Kanishka must have reigned some years before he built his Stûpa, we find again that 477 B.C. far more likely than 543, as the conventional date of Buddha's death. All the dates, however, before Chandragupta are to be considered only as hypothetical. The second council under Kalas'oka is extremely problematical, and the date of Buddha's death, as 218 before As'oka, is worth no more than the date of Vijaya's landing in Ceylon, fixed 218 before Devênâmpriya Tishya. Professor Lassen, in order to give an historical value to the date of 543 assigned to the death of Buddha, adds 66 years to the 22 years of the reign of the Nandas, and he quotes in support of this she authority of the Puranas which ascribe 88 years to the first Nanda. The Puranas, however, if taken in their true meaning, are entirely at

<sup>&</sup>lt;sup>1</sup> Lassen, Indische Alterthumskunde, ii. 413.

<sup>&</sup>lt;sup>2</sup> A. Cunningham in the Journal of the Asiatic Society of Bengal, xviii. p. 20

<sup>&</sup>lt;sup>3</sup> Asiatic Researches, xx, 297.

<sup>&</sup>lt;sup>4</sup> Någårjuna. who must be somewhat later than Vasumitra, is roughly placed 400 years after Buddha by the Northern, 500 after Buddha by the Southern Buddhists.

variance with the Buddhist chronology before Chandragupta, and it is not allowable to use them as a corrective. As to the chronology of the Ceylonese Buddhists, so far from becoming more perfect by the addition of those sixty-six years, it would really lose all consistency. The most useful portions of that choronology are the prophecies of Buddha and others, as to the number of years intervening between certain events. All these dates would have to be surrendered if we adopted Professor Lassen's correction. The great Council would not fall 218 years after Buddha's death, Chandragupta would not come to the throne 162 years after the Nirvâna: Buddha, in fact, as well as his apostles, would be convicted as false prophets by their very disciples.

Whatever changes may have to be introduced into the earlier chronology of India, nothing will ever shake the date of Chandragupta. the illegitimate successor of the Nandas, the ally of Seleucus, the grandfather of As'oka. That date is the sheet anchor of Indian chronologv. and it is sufficient for the solution of the problem which occupies us at present. It enables us to place Kâtyâyana before Chandragupta, the successor of the Nandas, or, at all events, the founder of a new dynasty, subsequent to the collapse of Alexander's empire. It enables us to fix chronologically an important period in the literature of India. the Sûtra period, and to extend its limits to at least three generations after Katyayana, to about 200 B c. In doing so, I am far from maintaining that the evidence which connects the names of Kâtvâvana and Nanda is unexceptionable. Nowhere except in Indian history should we feel justified in ascribing any weight to the vague traditions contained in popular stories which were written down more than a thousand years after the event. The most that can be said in favour of these traditions is, first, that there was no object in inventing them; secondly. that they are not in contradiction with anything we know of the early history of India from other sources; and thirdly, that the date which from their suggestions we assign to the literary works of Katyayana and his predecessors and successors, harmonises with the conclusions derived from the literature of the Brahmans, as to the probable growth and decay of the Hindu mind previous to the beginning of our era.

Although these chronological discussions have occupied so much of our space, it is necessary to add a few words of explanation. It might seem as if, in bringing together all the evidence available for our purpose, certain authorities had been overlooked which might have confirmed our conclusions. Professor Böhtlingk, whose researches with regard to the age of Panini deserve the hignest credit, has endeavoured to fortify his conclusions by some additional evidence, derived from the works of Chinese travellers; and other writers on the same subject have followed his example, though they have given a different interpretation to the statements of those travellers, and have arrived at different results as to the probable date of Panini. The evidence of these Buddhist pilgrims, however, yields no real results, either for or against the date assigned to Panini and Katyayana, and it is for this reason that it has been entirely discarded in the preceding pages. Professor Böhtlingk relied on the testimony of Hiouen-thsang, a Buddhist pilgrim who travelled through India in the years 629-645 after Christ, and whose travels have lately been translated by M. Stanislas Julien. There we read: "Apres avoir fait environ cinq cent li, au sud-est de la capitale (de Chînapati), il arriva au couvent appele' Ta mo sou fa naseng kia lan (Tâmasavana sanghârâma), ou le couvent de la Foret Sombre. On y comptait environ trois cent religieux qui suivaient les principes de l'ecole des Sarvâstivâdas. Ils avaient un exte'rieur grave et imposant, et se distinguaient par la purete' de leur vertu et l'e'le'vation de leur caractere. Ils approfondissaient surtout l'e'tude du petit Ve'hicule. Les mille Buddhas du Kalpa des Sages (Bhadrakalpa) doivent, dans ce lieu, rassembler la multitude des Devas et leur expliquer la sublime loi. Dans la trais centieme anne'e apre's le Nirvâna de Sâkya Tathâgata, il y eut un maître des S'âstras, nomme' Kâtyâyana, qui composa, dans ce couvent, le Fa-tchi-lun (Abhidnarma-jnâna-prasthâna)."

At first sight this might seem a very definite statement as to the age of Kâtyâyana, placing him, if we accept the conventional date of Buddha's death, about 243 B. C. But how can we prove that Hiouenthsang was speaking of Kâtyâyana Vararuchi? It might be said that the Katyayana, so simply mentioned by Hiouen-thsang, must be a person of note. Hiouen-thsang does not mention ancient authors except men of note, and the Katyayana whose dates he gives in this place, cannot be a chance person of that name, but must be some well-known author.2 It could hardly be meant for Mahakayana, because he was the pupil of Buddha, and could not be placed 300 years after this Nirvâna. Besides Mahâkatyâyana, there is certainly no person of the same name of greater literary fame than Kâtyayana Vararuchi. But the Kâtyâyana of whom Hiouen-thang speaks was a Buddhist, and the author of a work on metaphysies, which Hiouen-thsang himself translated from Sanskrit into Chiuese. Making all possible allowance for the tendency of later Buddhist writers to refer the authorship of certain works to names famous in ancient Brahmanic history, we can hardly build much on the supposition that the author meant by the Chinese traveller was the old Kâtyâyana Vararuchi, the contemporary of Pâṇini. But, even if all these objections could be removed, what use could we make of Hiouen thrang's chronology, who follows the system of the Northern, and not of the Ceylonese, Buddhists, who makes As'oka to reign 100 years after Buddha, Kanishka 400, the king of Himatala 600, and so on? We should first have to determine what, according to Hiouen-thsang, was the real date of Buddha's Nirvana, and what was the era used at his time in the monasteries of Northern India; whether he altered the dates, assigned by the Buddhists of India to the various events of their traditional history, according to the standard of the Chinese Buddhist chronology, or whether he simply repeated the dates, such as they were communicated to him in the different places which he visited. All these questions would have to be answered, and if they could be answered, we should in the end only arrive at the date of Katyayana. but not of the Kâtyâyana, with whom we are concerned.

There is another passage in Hiouen-thsang which has been frequently-discussed, and according to which it would seem that we should have

<sup>&</sup>lt;sup>1</sup> Me'moires sur les Centre'es occidentales par Hiouen-thsang, liv. iv. p. 200 <sup>2</sup> Foucaux, Lalitavistara, pp. 3. 415. 417.

to place Pânini much later, and that Kâtyâyana, the critic of Pânini,

could not have lived before the first century after Christ.

M. Reinaud, in his excellent work, "Me'moire Ge'ographique. Historique et Scientifique sur l'Inde, ante'rieurement au milleu du XIe sie'cle, d'apres les e'crivains arabes, persans et chinois (Paris, 1849)," was the first to call attention to this passagr. He says (p. 88.): "Ainsi que pour plusieurs autres personnages notables du bouddhisme, Hiouenthsang attribue a Panini deux existences, la premiere a une epoque ou la vie de l'homme e'tait plus longue qu'a pre'sent, et la seconde vers l'an 500 apre's la mort de Buddha, c'est-a dire au temps du second Vikramâditya, un siecle environ apres le regne de Kanika. Dans sa premiere existence, Pânini professait le brahmanisme; mais dans la seconde il se convertit avec son pere au bouddhisme." M. Reinaud pointed out with great sagacity the various consequences which would follow from such a statement, and he remarked besides that the fact of the Yavananî (lipi), the writing of the Ionians or the Greeks, being mentioned in Pânini, would likewise tend to place that grammarian rather later than was commonly supposed.

The same legend, thus partially translated from Hiouen-thsang, was made by Professor Weber the key-stone of a new system of Indian chronology. Admitting the double existence of Pâṇini, he says that his second existence falls 500 years after Buddha, or 100 after Kanishka, whom Hiouen-thsang places 400 after Buddha. The date assigned by Hiouen-thsang to Kanishka is rejected by Professor Weber. He takes, however, the real date of Kanishka, as established on numismatic evidence, about 40 a. D.; he then adds to it the hundred years, which, according to the constructive chronology of the Northern Buddhists, elapsed between Kanishka and Pâṇini, and thus deduces 140 a. D. as a

new date for Pânini.

Without entering into the merits of these calculations, we are enabled by the publication of the complete translation of Hiouen-thsang to show that, in reality, the Chinese pilgrim never placed Panini so late as 500 after Buddha. On the contrary, he represents the reputation of that old grammarian as firmly established at that time, and his grammar as the grammar then taught to all children. I subjoin the extracts from Hiouen-thsang:—

"Apres avoir fait environ vingt li au nord oue t de la ville de Cu-to-kia-han-t'ena (Udkhanda?), il arriva a la ville de P'o-lo tou lo Salatura) qui doona le jour an Rishi Po-ni-ni (Pânini), auteur du Traite' Ching-

minglun (Vyakaranam).

Dans la haute antiqite', les mots de la langue e'tnient extremement nombreux; mais quand le monde eut e'te' de'truit, l'univers se trouva vide et de'sert. Des dieux d'une louge'vite' extraordinaire descendirent sur la terre pour servir de guides aux peuples. Telle sut l'origine des lettres et des livres. A partir de cette e'poque, leur source s'agrandit et de'passa les bornes. Le dieu Fan (Brahman) et le roi du ciel (Indra) e'tablirent des regles et se conformerent au temps. Des Rishis he're'tiques composerent chacun des mots. Les hommes les prirent pour modeles, continuerent leur œuvre, et travaillerent a l'envi pour en conserver la tradirion; mais les e'tudiants faisaient de vains efforts, et il leur e'tait difficile d'en approfondir le sens.

"A l'e'poque où la vie des hommes e'tait re'duite a cent ans, on vit paraître le Rishi Po-ni-ni (Pânini), qui e'tait instruit des sa naissance et posse'dait un vaste savoir. Afflige' de l'ignorance, il voulut retrancher les notions vagues et fausses, de'barrasser la langue des mots superflus et en fixer les lois. Comme il voyageait pour faire des recherches et s'instruire, il rencontra le dieu Tseu-thsai (îs'vara Deva), et lui exposa le plan de l'ouvrage qu'il méditait,

"'A merveile!' lui dit le dieu Tseu-Ihasi (îs'vara Deva); 'vous pou-

vez compter sur mon secours.'

"Aprés avoir recu ses instructions, le Rishi se retira. Il se livra alors à des recherches profondes, et de'ploya toute la vigueur de son esprit. Il recu illit une multitude d'expressions, et composa un livre de mots qui renfermait mille s'lokas; chaqui s'loka etait de trente-deux syllabes. Il sonda, jusqu'à leurs dernieres limites, les connaissances anciennes et nouvelles, et ayant rassemble, dans cet ouvrage, les letters et les mots, il le mit sous une enveloppe cashetee et le presenta au roi, qui en concut autant d'estime que d'admiration, Il randit un pe'cret qui ordonnait à tous ses sujets de l'e'tudier et de l'enseigner aux autres. Il ajouta que quiconque pourrait le re'citer, d'un bout à l'autre, recevrait, pour re'compense, mille bie ces d'or. De la vient que, grâce aux lecons successives des maîtres, cet ouvrage est encore aujourd'hui en grand honneur. C'est pourquoi les Brâhmanes de cette ville ont une science solide et des talents e'leve's, et se distinguent à la fois par l'e'tendue de leurs connaissances et la richesse de leur me'moire.

"Dans la ville de P'o-lo tou-lo (lisez So-lo tou-lo—Sâlâtura), il y a un Stupa. Ce fut en cet endroit qu'un Lo han (un Arhat) convertit un disciple de Po-ni-ni (Pâṇini). Cinq cents ans apre's que Jou-lai (le Tathâgata) ent quitte' le monde, il y eut un grand 'O-lo-han (Arhat) qui, venant du royaume de Kia-chi-mi-lo (Cachemire), voyageait pour convertir les hommes. Quand il fut arrive' dans ce pays, il vit un Fan tehi (un Brahmachârin) occupe' á fouetter un petit garcon qu'il instruisait. 'Pourquoi maltraitezvous cet enfant?' dit l' Arhat au Einrtohi (Brah-

machârin).

"'Je lui fais e'tudier,' re'pondit-il, 'le Traite' de la Science des Sons

(Ching-ming-Vyakaranam), mais il ne fait aucun progre's.'

"L'Arhat se de'rida et laissa e'chapper un sourire. Le vieux Fan tohi (Baahmachârin) lui dit: Les Cha-men (Śramanas ont un cœur affectueux et compatissant, et s'apitoient sur les cre'atures qui souffrent. L'homme plein d'humanite' vient de sourire tout á l'heure; je de'sirerais en connaître la cause.'

"'Il n'est pas difficile de vous l'apprendre,' re'pondit l'Arhat, 'mais je crains de fair naître en vous un doute d'incre'dulite'. Vous avez, sans doute, entendu dire qu'un Rishi, nomme Po-ni-ni (ânini) a compose' le Traite' Ching-ming-lun (Vyâkaraṇam), et qu'il l'a laisse', apre's lui, pour l'instruction du monde.' Le Po-lo-men (le Brâhmane) lui dit: Les enfants de cette ville, qui sont tous ses disciples, reverent sa vertu, et la statue, e'leve'e en son honneur, subsiste encore aujourd'hui.'

<sup>1 &</sup>quot;Livre de mots" is intended as the title of Pânini's grammar, which was "Šabdânus'âsanam." This title is left out in the Calcutta edition, and likewise in Professor Böhtlingk's edition of Pânini. See Zeitschrift

"Eh bien! repartit l' Arkat, cet enfant, a qui vous avez donne le jour, est pre cise ment ce Reshi. (Dans sa vie ante rieur), il embloyait sa forte me moire a e tudier les livres profanes; il ne parlait que des traite she re tiques et ne cherchait point la ve rite. Son esprit et sa science de pe rirent, et il parcourut, sans s'arreter, le cercle de la vie et de la mort. Grâce a un reste de vertu, il a obtenu de devenir votre fils bien. aime. Mais les livres profanes et l'é loquence du sie cle ne donnent que des peines inutiles. Pourraiton les comparer aux saintes instructions de Jou lai (du Tathagata), qui, par une influence secrete procurent l'intelligence et le bonheur?

"'Jadis, sur les bords de la mer du midi, il y avait un arbre desseche dont le trone creux donnait asile a cinq cents chauves-souris. Des marchands s'arreterent un jour au pied de cet arbre. Comme il re'gnait alors un vent glacial, ces hommes, qui e'taient tourmente's par la faim et le froid, amasserent du bois et des broussailles et allumerent du feu au pied de l'aibre. La flamme s'accrut par degre's et embrasa bientot l'arbre desse'che'.

" Dans ce moment, il y eut un des marchands qui, apres le milieu de la nuit, se mit a lire, a haute voix, le Recueil de l'O-pi-ta-mo (de l'Abhidharma). Les c auves-souris, quoique tourmente es, par l'ardeur du fau, e'couterent avec amour les accents de la loi, supporterent la douleur sans sortir de leur retraite, et y terminerent leur vie. En conse'quence de cette conduite vertueuse, elles obtinrent de renaître dans la classe des hommes. Elles quitterent la famille, se livrerent a l'e'tude, et, grâce aux accents de la loi, qu'elles avaient jadis entendus, elles acquirent une rare intelligence, obtinrent toutes ensemble la dignite' d'Arhat, et cultiverent, de siecle en siecle, le champ du bonheur. Dans ces derniers temps, le roi Kia-ni-se-kia (Kanishka) et l'honorable Hie (Arya Pârs'vika) convoquerent cinq cents sages dans le royaume de Kia-chi-mi-lo (Cachemire), et composerent le l'i-pocha-lun (la Vibbasha s'astra). Tous ces sages e'taient les cinq cents chauvessouris qui habitaient jadis le creux de l'arbre desse'che'. Quoique j'aie un esprit borne', j'e'tais moi-meme l'une d'elles. Mais les hommes different entre eux par la superiorite' ou la me'diocrite de' leur esprit; lesluns prennent leur essor, tandis que les autres rampent dans l'obscurite'. Maintenant, o homme plein d'humanite', il faut que vous permettiez a votre fils bien-aime de quitter la famile. En quittant la famille (en embrassant la vie religieuse), en acquiert des merites ineffables.'

"Lorsque l'Arhat eut acheve ces paroles, il donna une preuve de sa

puissance divine en disparaissant a l'instant meme.

"Le Brâhmane se sentit pe'ne'tre' de foi et de respect, et apres avoir fait e'clater son admiration, il alla raconter cet e've'nement dans tout le voisinage, Il permit aussitot a son fils d'embrasser la vie religieuse et de se livrer a l'etude. Luimeme se convertit immediatement, et montra la plus grande e time pour les trois Pre'cieuv. Les hommes de son village suivirent son exemple, et, aujord'hui encore, les habitants s'affermissent de jour en jour dans la foi.

" En partant au nord de la ville de Ou-to kia-han-t'cha (Udakhânda?',

il franchit des montagnes, traversa des valle'es, et, apre's avoir fait environ six cents li, il arriva au royaume de Ou-tchang-na<sup>1</sup> (Udyâna).<sup>2</sup>

Whatever the historical value of this legend may be, it is quite clear that it lends no support of any kind to the opinion of those who would place the grammarian Pâṇiṇi 500 years after Buddha, or 100 years after Kanishka.

It is possible that the inquiries into the ancient literature of Buddhism, particularly in China, may bring to light some new dates, and help us in unravelling the chronological traditions of the Brahmans of India. The services, already rendered to Sanskrit archæology by the publications of M. Stanislas Julien are of the higest value, and they hold out the promise of a still larger harvest; but for the present we must be satisfied with what we possess, and we must guard most carefully against rash conclusions, derived from evidence that would break down under the slightest pressure. Even without the support which it was attempted to derive from Hiouen-thsang, Katyayana's date is as safe as any date is likely to be in ancient Oriental chronology; and the connection between Kâtyâyana and his predecessors and successors, supported as it is not only by tradition but by the character of their works which we still possess, supplies the strongest confirmation of our chronological calculations. As to other works of the Sûtra period, there are no doubt many, the date of which cannot be fixed by any external evidence. Tradition is completely silent as to the age of many of their authors. With regard to them we must trust, at least for the present, to the similarity of their style and character with the writings of those authors whose age has been fixed. It is possible that the works of earlier authors quoted by Yaska and Panini and others might still come to light, if any systematic search for ancient MSS. was made in different parts of India. Many works are quoted by Sâyana, Devarâja, Ujjvaladatta, and other modern writers, which are not to be found in any European Library. Some of them may still be recovered.3 We must not, however, expect too much. Vast as the ancient literature of India has been, we must bear in mind that part of it existed in oral tradition only, and was never consigned to writing. In India, where before the time of Panini we have no evidence of any written literature, it by no means follows that because an early Rishi is quoted in support of a theory, whether philosophical or grammatical, there ever existed a work written by him with pen and ink. His doctrines were handed down from generation to

<sup>1</sup> Inde du nord.

<sup>&</sup>lt;sup>2</sup> Me'moires sur les contre'es occidentales, traduits du Sanserit en Chinois, en l'an 648, par Hiouen thsang, et du Chinois en Français par M. Stanislas Julien, Membre de l'Institut; tome i. p. 125; Voyages des pelerins Bouddhistes, vol ii. See also the author's edition of the Rig-veda and Prâtis'âkhya Introduction, p. 12.

<sup>&</sup>lt;sup>3</sup>According to the opinion of M. Fitz-Edward Hall, a scholar of the most extensive acquaintance with Sanskrit literature, the number of distinct Sanskrit works in existence is, probably, not less than ten thousand. (Journal of the Asiatic Society of Bengal, 1858, p. 305.)

generation; but, once erased from the tablets of memory, they could never be recovered.

In the Satras which we still possess, it is most important to observe the gradual change of style. Saunaka's style, when compared with that of his successors, is natural, both in prose and verse. His prose more particularly runs sometimes so easily and is so free from the artificial contrivances of the later Sûtras, that it seems a mistake to apply to it the name of Sûtra. It is not unlikely that this title was assigned to his works at a time when its meaning had not vet been restricted either to the long "yarns" of the Buddhists or to the compendious paragraphs of the Brahmans, and we may well believe the statement that Saunaka's works on the ceremonial resembled more the Brahmanas than the later Sûtras. As'valâyana's style is still intelligible, and less cramped by far than style of the Nirukta, a work commonly ascribed to Yaska, the collector of the Nighantus. Panini is more artificial He is no longer writing and composing, but he squeezes and distils his thoughts, and puts them before us in a form which hardly deserves the name of style. Kâtyāyana is still more algebraic; but it is in Pingala that the absurdity of the Sûtras becomes complete. If any writers succeed him they could hardly have excelled him in enigmatic obscurity, and We may well believe that he was one of the last writers of Sûtras. The authors of the Paris'ishtas, unwilling to wear the strait-jacket of the Sutrakaras, and unable to invent a more appropriate dress, adopted the slovenly metre of epic poetry, well adapted for legendary narration but unfit for scientific discussion.

## CHAPTER II.

## THE BRAHMANA PERIOD.

Having assigned to the Sûtra literature of India the wide limits of a period extending from 600 to 200 B. C., we have now to examine another and confessedly more ancient class of Vedic writings, differing in style both from the Sûtras, which are posterior, and from the Mantras, which are anterior to them. These are called by the comprehensive name of Brâhmanas. But as between the Sûtras and the later Sanskrit literature we discovered a connecting link in the writings known under the name of Paris ishtas, so we meet on the frontier between the Brâhmana and the Sûtra literature, with a class of works intermediate between the Brâhmanas and Sûtras, which claim to be considered first. These are the Aranyakas, or "The Treatises of the Forest."

THE ARANYAKAS.

The Aranyakas are so called, as Sayana informs us, because they had to be read in the forest1. It might almost seem as if they were intended for the Vanaprasthas only, people who, after having performed all the duties of a student and a householder, retire from the world to the forest to end their days in the contemplation of the deity. Thus it is said in the Arunikopanishad, that the Sannyasin, the man who no longer recites the Mantras and no longer performs sacrifices, is bound to read, out of all the Vedas, only the Aranyaka or the Upanishad. In several instances the Aranyakas form part of the Brahmanas, and they are thus made to share the authority of S'ruti or eve-We have seen, however, that part of an Arany ka was ascribed to a human author, to As'valâyana. Another part is quoted by Sâryana in his Commentary on the Rig-veda, 2 as being a Sûtri work of S'aunaka's. Colebrooke found, in one transcript of this Aranyaka, that it was ascribed to As'valayana; but he remarks, "probably by an error of the transcriber." This is not the case; and it is a good proof of a certain critical conscience even amongst the ortholox dog natists of the Hindus, that they acknowledged a certain difference between the Brahmanas and Aranyakas, although it was of great importance to them, particularly in their orthodox philosophy, to be able to appeal to passages from the Aranyakas as invested with a sacred authority. The most important Upanishads, which are full of philosophy and theo-

1Såyana on the Taittiriyáranyaka. अरण्याध्ययनादेतदारण्यकामतीर्यः ते। अरण्ये तदधीयीतेत्येवं वाष्यं प्रचक्ष्यते ॥

And again, एतदारण्यकं सर्व नावती श्रोतुमहित॥ parts of the Taittiriyaranyaka are exempted from the restriction that they should be read in the forest only नारएयाश्रीतिनयम: नावित्रादिचतुष्ये। and hence they are ranged with the Brahmanas, अतस्तद्वाह्मणप्रथे भूतं व्याख्यातमप्यदः॥

<sup>2</sup>P. 112 पंचमारण्यक औष्णिहतृचाशी निरित खंडे शौनकेन स्तितं सुरूत-इन्तुम्नय इति त्रोएयद् सानसिं रियमिति हे इति। These words occur in the Aitareyaranyaka, v. 2. 11. सुरूत्कृतनुम्नय इति त्रीण्यद् सानसिं रियमिति स्को। Other passages quoted by Sayana from this Aranyaka can always be identified in the Aitareyaranyaka. Cf. Colebrooke, Misc. Essays, i. 46. sophy, form part of the Åranyakas, and particularly in later times the Åranyaka was considered the quintessence of the Vedas. Nevertheles it is acknowledged by Indian authors that a mistake may be made and the work of a human author may be erroneously received as a part of the sacred book by those who are unacquainted with its true origin. An instance, they say, occurs among those who use the Bahyrich, a såkbå of the Rig-veda, by whom a ritual of Ås'valåyana has been admitted under the titls of the fifth Åranyaka, as a part of the Rig-veda.

That the Âranyakas presuppose the existence of the Brâhmanas may be clearly seen from the Brihadâranyaka, of which we possess now a complete edition by Dr. Röer, of Calcutta, together with two Sanskrit commentaries. If we take for instance the story of Janaka, who promised a large prize to the wisest Brâhman at his sacrifice, and compare this story, as it is given in the S'atapatha-brâhmana (xi. 4. 6.) with the third Adhyâya of the Brihadâranyaka where the same subject occurs, we find in the Âranyaka all the details given almost in the same words as in the Brâhmana, but enlarged with so many additions, particularly with respect to the philosophical disputations which take place between Yâjnavalkya and the other Brahmans, that we cannot hesitate for a moment to consider the Âranyaka as an enlargement upon the Brâhmana.

The chief interest which the Aranyakas possess at the present moment consists in their philosophy. The philosophical chapters well known under the name of Upanishads are almost the only portion of Vedic literature which is extensively read to this day. They contain, or are supposed to contain, the highest authority on which the various systems of philosophy in India rest. Not only the Vedânta philosopher, who, by his very name, professes his faith in the ends and objects of the Veda, but the Sânkhya, the Vais'eshika, the Nyâya, and Yoga philosophers, all pretend to find in the Upanishads some warranty for their ten-ts, however antagonistic in their bearing. The same

<sup>1</sup> Mahâbhârata i. 258.: "This body of the Mahâbhârata (the index) is truth and immportality; it is like new butter from curds, like the Brahman among men, like the Âranyaka from the Vedas, like nectar from medicinal plants, like the sea, the best among lakes, like the cow, the highest among animals." Thus the Upanishad is called the essence of the Veda; S'atap-brâhm. x. 3. 5. 12. तस्य वा एतस्य यज्ञुणे रस

<sup>&</sup>lt;sup>2</sup> This is taken from Colebrooke's extracts from the Pûrva-mîmânsâ a system of philosophy of which it would be most desirable to have a complete edition. (Miscellaneous Essays, i.307.) Dr. Goldstücker, of Königsberg, has collected large materials for such a work; and I trust he will shortly find an opportunity of publishing the important results of his studies.

<sup>&</sup>lt;sup>3</sup> Vedânta is used, but not yet in its technical sense, Taittirîyaâranyaka, x. 12.; a ver'se frequently repeated-elsewhere.

वेदांतिवज्ञानसुनिश्चितार्थाः संन्यासयागाद्यतयः शुद्धसूच्या । ते ब्रह्मलोकेषु परांतकाले परामृताः परिमुच्यति सर्वे ॥

plies to the numerous sects that have existed and still exist in India. eir founders, if they have any prefensions to orthodoxy. invariably peal to some passage in the Up nishals in order to substantiate their n reasonings. Now it is true that in the Upanishals themsalvas are is so much freedom and breadth of thought that it is not difficult find in them some authority for almost any shade of philosophical sinion. The old Upanishads did not pretend to give more than guesses at truth," and when, in course of time, thay became invested ith an inspired character, they allowed great latitude to those who rofessed to believe in them as revelation. Yet this was not sufficient or the rank growth of philosophical doctrines during the latter ages of ndian history; and when none of the ancient Upanishads could be ound to suit the purpose, the founders of new sects had no scruple and o difficulty in composing new Upanishads of their own. This accounts or the large and ever growing number of these treatises. Every new sollection of MSS, every new list of Upanishads given by native writers, adds to the number of those which were known before; and the most modern compilations seem now to enjoy the same authority as the really genuine treatises.

The original Upanishads had their place in the Aranyakas and Brâhmanas. There is only one instance of a Sanhitâ containing Upanishads—the Vâjasaneyi-sanhitâ, which comprises the Îs'a upanishad, forming the 40th book, and the Sivasankalpa, forming part of the 34th book. This, however, so far from proving the greater autiquity of that Upanishad, only serves to confirm the modern date of the whole collection known under the name of Vâjasaneyi-sanhitâ. But though the proper place of the genuiue Upanishads was in the Brâhmanas, and here chiefly in those secondary portions commonly called Aranyakas, yet in later times, the Upanishads obtained a more independent position, and though they still professed to belong more particularly to one or the of the other four Vedas, that relationship became very

lax and changeable.

<sup>2</sup> Colebrookes, Essay, i. 92.

The true etymological meaning of the word Upanishad had been forgotten in India. It is generally explained by rahisya, or guhya Ades'ah, mystery; and an artificial etymology is given, according to which Upanishad would mean "destruction of passion or ignorance, by means of divine revelation," The original signification of the word, however, must have been that of sitting down near somebody in order to listen, or in order to meditate and worship. Thus we find up + sad used in the sense of sitting and worshipping:

Rv. ix. 11. 6.—Námasa it úpa sídata, "Approach him with praise."
Rv. x. 73. 11.—Váyah suparna'h úpa sedur I'ndram priyámedhah
rishayah na'dhamanah. "The poets with good thoughts have approached
indra begging, like birds with beautiful wings."

The root as, which has the same meaning as sad, to sit, if joined with the preposition upa, expresses the same idea as upa sad, i. e., to

Mahîdhara maintain that some parts of the Upanishad were aimed at the Buddhists, who denied the existence of an intelligent Self, called life a water bubble, and knowledge intoxication.

approach respectfully, to worship (Rv. x. 153. 1.). It is frequently to express the position which the pupil occupies when listening to his teacher, and it clearly expresses a position of inferiority in such passages as Sat.-brahmana, i. 3. 4. 15: tasmad uparyasinam kshatriyam adhastad imah praja upasate, therefore these people below (the Vis' or Vais'yas) sit under, or pay respect to the Kshatriya who sits above. Still more decisive is another passage in the same work (ix. 4. 3. 3.), where upanishadin is used in the sense of subject: "kshatraya tad vis'am adhastad upanishadinnim karoti," he thus makes the Vis' below subject to the Kshatriya." Their can be little doubt therefore that Upanished meant originally the act of sitting down near a teacher, of submissively listening to him; and it is easy to trace the steps by which it came to mean implicit faith, and, at last, truth or divine revelation.

The songs of the Veda contained but little of philosophy or theosophy, and what the Brahmans call the higher knowledge is not to be sought for in the hymns of the Rishis. "What,"4 says the author of the Svetas'vatara-upanishad, "what shall a man do with the hymns, who does not know that eternal word of the hymns in the highest heaven, that in which all the gods are absorbed? Those who know it, they are blessed." The same sentiment is frequently expressed, but nowhere with greater force than in a passage of the Kathaupanishad, 5 a passage most remarkable in many respects. "That divine Self," the poet says, "is not to be grasped by tradition, 6 nor by understanding, nor by all revelation; by him whom He himself chooses, by him alone is He to be grasped; that Self chooses his body as his own." Rammohan Roy when he visited the British Museum and found the late Dr. Rosen engaged in preparing an edition of the hymns of the Veda, expressed his surprise at so useless an undertaking. But the same philosopher looked upon the Upanishads as worthy to become the foundation of a new religion, and he published several of them himself with notes and trantlations. "The adoration of the invisible Supreme Being," he writes, "is exclusively prescribed by the Upanishads or the principal parts of the Veda, and also by the Vedent," and it other portions of the Veda, seem to be in contradiction with the pure doctrine of the Upanishads, he hinnts that that the whole work must not only be stripped of its authoritd, but looked upon as altogether unintelligible.7 The early Hindus did not and any difficulty in reconciling the

2 In this sense Upanishad is frequently used in the plural, and signifies sessions.

nost different and sometimes contradictory opinions in their search after truth; and a most extraordinary medley of oracular sayings might be collected from the Upmishads, even from those which are genuine and comparatively ancient, all tending to elucidate the darkest points of philosophy and religion, the creation of the world, the nature of God, the relation of man to God, and similar subject. That one statement should be contradicted by another seems never to have been felt as any serious difficulty. Thus we read in the first verse of the Svetas vatara-upanishad: "Is Brahman the cause? Whence are we born? By what do we live? Where do we go? At whose command do we walk after the Law, in happiness and misery? Is Time the cause, or Nature, or Law, or Chance, or the Elements? Is Man to be taken as the source of all? Nor is it their union, because there must be an independent Self, and even that independent Self has power over that which causes happiness and pain" The onswers returned to such questions are naturally vague and various. Thus Mâdhava in his Commentary on Parâs'ara, quotes first from the Bhavricha-upanishad "In the beginning this (world) was Self alone, there was nothing else winking. He thought, Let me create the worlds, and he created these From this it would follow that the absolute Self was supposed to have created everything out of nothing. But immediately afterwards Mâdhava quotes from another Upanishad, the Svetås'vatara (IV. 10.), where Mâyâ or delusion is called the principle, and the Great Lord himself, the deluded 2 This is evidently an allusion to Sankhya doctrines, but Mâdnava explains it in a different sense. He m intains that here also the Divine Self is meant by the Great Lord, and that Delusion is only one of his powers, as heat is a power of fire. And he appeals to another passage in the same Upanishad (I. 3.), where it is said "that sages endowed with meditation and intuition, saw the power of the Divine Self, concealed by his own qualities." This same interpretation is adopted in the sûtras of the Vedânta-philosophy, but it by no means follows that therefore it is the true one. The principal interest of the older Upanishads consists in the absence of that systematic uniformity which we find in the later systems of philosophy, and it is to be regretted that nearly all scholars who have translated portions of the Upanishads have allowed themselves to be guided by

The commentators wrote all, more the Brahmanic commentators. or less, under the influence of philosophical systems, and thought themselves justified in explaining the Upanishads in such a manner that they should agree, even in the most minute points, with the sûtras of the philosophical schools. But the authors of the Upanishads were poets rather than philosophers. Truth itself assumed, in their eyes, an aspect varying according to their own feelings and misgivings. We saw that the Bhavricha-upanishad placed Atman or the Self at the beginning of all things. The Taittiriya-upanishad 1 speaks of Brahman the true, omniscient, and infinite, and derives from it the ether, the air, fire, water, earth, plants, food, seed, and body.2 This, in the eyes of the later commentators, may appear substantially the same doctrine as that of the Bahvricha-upanishad. But to us it is of interest to mark the difference, and to watch the various attempts which were made to express the idea of a creator. The Bahvrichas, by calling him Atman in the masculine, showed that they were impressed more strongly with the idea of personal Being; the Taittirîyas, speaking of Brahman as neuter, gave more prominence to the idea of a Power. It was an epoch in the history of the human mind when the identity of the masculine Self and the neutral Brahman was for the first time perceived, and the name of the discoverer has not been forgotten. It was Sandilya who declared that the Self within our heart is Brahman (Chhând. up. iii. 4. 14. p. 208.), and this tenet, somewhet amplified, is quoted as "Sandilya's wisdom" by the author of the Satapatha-brahmana (x. 6. 3.). Other sages among the Chhandogas again speak simply of a Sat, or a Being, which desired to be many, and created the light, the light flowing into water, the water into food, and so on. The Atharvanikas speak of the Creator as Akshara, and it must remain doubtful whether they connected with this word the idea of the Indestructible or of Element.4 'l'he term used by the Vâjasaneyins is Avyakria, or the Undeveloped. Every one of these terms had originally a meaning of its own, and though in later times they may all be used synonymously, they ought to be kept distinct when we are tracing the history of the human mind. Some of the ancient sages, after having arrived at the idea of Avyakrita, Undeveloped, went even beyond, and instead of the Sat or to ov, they postulated an Asat, to un ov, as the beginning of all things. Thus we read in the Chhândogya-upanishad:5 "and some say,

Bibl. Ind. vii. 54.

² Purusha is body rather than man. Mâdhava says: तत्र पुरुषशब्देन शिर:पाण्या दाकृतियुक्तो देहो ऽभिधोयते । स च देहो ब्रह्मादिस्तंबातो बहुपकार:॥

³ Chhand,-up. vi. 2.; Bibl. Ind. iii. 394. सन्वेव सोम्येद्मप्र आसीत् एकमहितीयं। तदेशत बहु स्यां प्रजायेयेति। तत्तेजऽसृजत। तत्तेज ऐशत बहु स्यां प्रजायेयेति तद्पोऽसृजत॥

in the beginning there was Asat (not being), alone, without a second;

and from this Asat might the Sat be born."

But in spite of the Great variety of philosophical thought on this and similar subjects that was to be found in the Upanishads, the want of new Upanishads was felt by the sects which sprang up in every part of India. The old Upanishads, however, were not rejected, and to the present day the ten which are chiefly studied in Bengal are the Brihadaranyaka, the Aitareya, Chhandogya, Taittirîya, Îs'a, Kena, Katha, Pras'na, Mundaka and Mandûkya upanishads. Every one of these has been published, and we possess an excellent edition both of the text and commentary by Dr. Röer in the volumes of the Bibliotheca Indica. whole number of Upanishads, however, known to be or to have been in existence, is much larger. It was commonly stated as 62,2 but it has lately been brought as high as 108,3 and even higher. Some of the titles given in various lists belong most likely to smaller portions of certain Upanishads, and these extracts, adopted by some sect or other, were afterwards quoted as independent treatises.4 Many are of very modern origin, and have no right to be mentioned in connection with Vedic literature. In order, however, to have this whole mass of literature together, every work that claims the title of Upanishad on any ground whatsoever, has been incorporated in an alphabetical list, which will be printed as an Appendix. There are several works which had to be consulted in drawing up this list. First, Anquetil Duperron's Oupnekhat,5 a work which contains the translation of fifty Upanishads from

4 The Maitreyî-upanishad (29. 89.) is probably meant for the Dialogue between Yâjnavalkya and Maitreyî in the Brihadâranyaka. The S'ândilya upanishad (57. 105.) seems to be a portion of the Chhândogya-upanishad.

Duperron received a MS. of the Persian translation of the Upanishads from M. Gentil, the French resident at the court of Saudjaëddaulah. It was brought from Bengal to France by M. Bernier, in the year 1775. Duperron, after receiving another MS., collated the two, and translated the

Persian into French (not published) and into literal Latin.

The Persian translation, of which several other MSS. exist, bears the following title in Euperron's translation: "Hane interpretationem  $\tau\omega\nu$  Oupneknathai quorum vis quatuor librorum Beid, quod, designatum cum secreto magno (per secretum magnum) est, et integram cognitionem luminis luminum, hic Fakir sine tristitia (Sultan) Mahammad Dara Scahkoh ipse, cum significatione recta, cum sinceritate, in tempore sex mensium, (post-

<sup>2</sup> Ward, loc. cit. p. 61.

<sup>3</sup> W. Elliot, Journal of the As. Soc. of Bengal, 1851, p. 607.

<sup>5</sup> Oupnekhat, îd est, Secretum tegendum: opus ipsa in India rarissimum continens antiquam et arcanam, seu theologicam et philosophicam doctrinam, e quatuor sacris Indorum libris, Rak beid, Djedjer baid, sam baid, Atharban baid, excerptam; ad verbam, e Persico idiomate, Samskreticis vocabulis intermixto, in Latinum conversum: Dissertationibus et Annotationibus difficiliora explanantibus, illustratum; studio et opera Anquetil Duperron, Indicopleustæ. Argentorati, typis et impensis fratrum Levrault, vol. i. 1801: vol. ii. 1862.

Persian into Latin. [The author of this Persian translation is supposed to be Dara Shakoh, the eldest son of Shah Jehan, and pupil of Babu Lal; but in reality the work seems to have been performed by several Pandits. whom that enlightened prince called from Benares to Delhi, ordering them to translate some of their sacred works into Persian. Three years after the accomplishment of their work, their patron was put to death by his brother Aurungzeb.] Sec andly, there is Colebrooke's Essay on the Vedas, which gives a more complete enumeration of the Upanishads. Thirdly, Weber's Analysis of Duperron's translation of Upanishads, in his "Indian Studies." Fourthly, an article by Mr. W. Elliot in the Journal of the Asiatic Society of Bengal, 1851, giving an account of Upanishads known in the South of India, among the Telugu Brahmans. Fifthly, Dr. Roer's introductions to the various Upanishads, edited and translated by him in the volumes of the Bibliotheca Indica. There are other works, the well-known pamphlets of Rammohun Roy, the Essays of Pauthier, Poley, d'Eckstoin, Windischmann, and the publications of the Tattvabodhinî Society, all of which had to be consulted in drawing up our own alphabetical list.

The names of the authors of the principal Upanishads<sup>2</sup> are unknown. This is owing to the very character of these works. They contain authoritative statements on the highest questions, and such statements would lose all authority if they were represented to the people at large as the result of human reasoning and imagination. They, in a higher degree than any other part of the Vedas, must have been considered from the very beginning as revelation, and as directly communicated to the world by the Supreme Spirit. This sentiment is clearly expressed in the beginning of the Mundaka-upanishads; "Brahman (mase.), the creator of the universe, the preserver of the world, appeared first among the gods. He taught the knowledge of Brahman (neuter), the foundation of all knowledge, to Atharvan, his eldest son. Atharvan long ago imparted the knowledge of Brahman, which Brahman had explained to him, to Angis; he told it to Satyavâha Bhâradvâja, Bhârad-

remo die, secundo  $\tau ov$  Schonbeh, vigesimo.) sexto mensis  $\tau ov$  Ramazzan, anno 1067  $\tau ov$  Hedjri (Christi, 1657) in urbe Delhi, in mansione nakhe neudeh, cum absolutione ad finem fecit pervenire."

The MS. was copied by Atma Ram in the years 1767 A.D. Duperron adds: Absolutum est hoc Apographum ve sionis Latinæ των quinquaginta Oupnekhatha, ad verbum, e Persico idiomate, Samscreticis vocabulis intermixto, factæ, die 9 Octobris, 1795, 18 Brumaire anni 4 Reipubl. Gall, Parisiis.

<sup>1</sup> Elphinstone, History of India, ii. 446. An earlier instance of a translation of the Upanishads is mentioned in Elliot's Historians of India, i. 260. "Abdul Kâdir, author of the l'arikhbadaum, who died at the close of the 16th century, says that he was called upon to translate the Atharvana-veda from the Hindi, which he excused himself from doing on account of the exceeding difficulty of the style and abstruseness of meaning; upon which the task devolved on Ha'ji' Ibrahim Sirhindi, who accomplished it satisfactorily."

2 Some of the most modern Upanishads are confessedly the works of

Gaudapâda, Sankara, and other more recent philosophers.

våja in succession to Angiras. Saunaka, the great lord, approached Angiras respectfully, and asked: What is it through which, if known all this becomes known?" It is stated that the text of the Upanishads, after it had once been revealed, was never affected by differences, arising from the oral tradition of various Sâkhâs; and in one instance where various texts of the same Upanishad have been noted by the Brâhmans, they are ascribed to various localities, but not to various Sâkhâs. Each Sâkhâ, however, was supposed to be possessed of an Upanishad, and the Muktikâ states boldly that, as there are 1180 Sâkhâs, there ought properly to be as many Upanishads.

Another reason why we never hear of the authors of Upanishads as we hear of the Rishis of hymns is that in many instances the Upanishads are mere compilations from other works, Verses from the hymns are incorporated into various Upanishads, and stories originally propounded in the Brâhmanas, are enlarged upon by the compilers of these philo-

sophical tracts.

In cases only where the Upanishads form part of an Aranyaka, the reputed authors of the larger works might likewise be considered as the authors of the Upanishahs. This authorship, however, is different from the authorship of a Gaudapâda and Sankara. As the Brihadâranyaka forms part of the Satapatha-brahmana, Yajnavalkya, the reputed author of the Brahmana, might well be considered as the author of the Upanishad known by the name of Prihadaranyaka. It forms the last five Prapathakas of the 14th book of the Satapatha-brahmana in the Madhyandina-s'âkhâ, whereas in the Kânya-s'âkhâ the whole of the 17th book is comprised under the name of Upanishad. Yajnavalkya Vajasaneya is mentioned towards the end of the Brihadaranyaka as the person who received the whole of the White Yajur veda from Aditya or the Sun. His influential position at the court of Janaka, king of Videha, is alluded to several times, and one portion of the Brihadaranyaka is called the Yâjnavalkîyam Kândam, as specially celebrating the victories gained by that sage over all his rivals. But even if we accept the traditional opinion that Yajnavalkpa was the author of the Brahmana and the Aranyaka, such a supposition would be of very little help to us in determining the probable age of the Upanishad portion of the S'atapatha-brahmana. We need not enter at present into the question whether the supposed authorship of Yajnavalkya implies that he actually composed, or only that he collected and arranged the sacred code of the Vajasaneyins. That code is, no doubt, in some peculiar sense, considered as Yajnavalkya's own work. At the time of Panini it was called by a name which, by its very character, indicated that the S'atapatha-brâhmana was a work due to the exertion of one individual, and that it was not, like other Brahmanas, simply proclaimed by him (prokta), or formed the traditional property of an ancient Vedic Sakha bearing his name. This, together with a remark in the Varttika to Panini, iv. 3. 105., may be interpreted as indicating the more modern date of this Brahmana and its Aranyaka, as compared with the Brahmanas and Aranyakas of other Vedas. But beyond this, the name of Vajasaneya. Yajnavalkya, as the reputed author

<sup>&</sup>lt;sup>1</sup> See Mundaka-up ed. Röer.

of these works, will not help us in fixing the age of the Vajasaneyi-

brâhmana-upanishad.

Attempts have been made to fix the age of Yajnavalkya, as the author of a Law-book, and to transfer this date to the author of the Vedic works, just mentioned. The versifier, however, of these laws is as distinct from the original Yajnavalkya, as the poetical editor of the Laws of the Manavas is from the mythic Manu, the founder of the Manavas'akha.

Although the poetical editor of this code of laws speaks of the Aranvakal as his own work, nobody will be misled by an assertion of this kind,2 But even the age of the versifier of Yajnavalkîva's code of laws is difficult to determine. Professor Wilson, in his. "Ariana Antiqua" (page 364), observes that the word Nanaka, a gold or silver coin having upon it the figure of Siva, may be derived from Nana, a term which occurs on the coins of Kanerki, and is supposed to be "the name of a goddess; probably the same as the Anaitis or Anahid of the Persians, or the tutelary goddess of Armenia, Anaia or Nanaca." If so (and I think the explanation extremely doubtful) the age of Yajnavalkya's legal dieta in which the word Nanaka occurs, would be subsequent to the era of Kanerki, and, as Professor Stenzler remarks in his edition of Yajnavalkya, the second century after Christ would be the earliest date that could be assigned to Yajnavalkya. Now the identification of Nanaka and Nana (Nanaia, Nana Rao,) is a very ingenious conjecture. but no more. Even if admitted to be true, we should still have to prove that the same goddess did not occur in the same way on more ancient oriental coins, As the Hindus derived their knowledge of coined money from foreign nations, Nanaka may have been current in India long

<sup>2</sup> Yâjn. Dh. iii. 110.

ज्ञेयं चारण्यकमहं यदादिन्याद्वाप्तवान् । यागशास्त्रं च मत्त्रोक्तं ज्ञेयं ये।गमभोष्त्रता॥

"He who wishes to attain Yoga (union with the Divine Spirit) must know the Aranyaka, which I have received from Aditya, and the Yoga-s'astra, which I have taught." I thought, at first, that there might have been old Dharma-sûtras of Yâjnavalkya, and that the versifier of these Sûtras took this sentence simply from the Sûtras. I have not yet found, however, Yâjnavalkya-sûtras on Achâra. The so called Vaishnava-dharma-s'astra, or Srî-bhagavad-Vishnu-sanhitâ, which has been printed at Calcutta, contains large portions of Sûtras which have been worked up in a very crude manner into a law treatise The whole chapter on the anatomy of the human body, which in the Yajnavalkiya Code precedes the verse in question (iii. 110), a chapter which does not stand in the Manava code, exists, still in prose, in the Vishnu-sanhita (fol. 28. a. line 11). The simile of the lamp, also, representing the mind in the middle of the body, is borrowed by the editor of the Yajnavalkîya Code from the Vishnu-sanhita (fol. 29. a, line 1). Yet, although the Vishnusanhita, like the Code of Yajnavalkya, goes on describing the Yoga, no mention is made here of the Aranyaka, nor does the author speak of himself in the first person, as the author of the metrical Code does.

<sup>1</sup> This can only mean the Brihadâranyaka, as the commentator also observes.

before the time of Kanerki, though the Nanakas of Kanerki may be the first known to us as coined in India. The occurrence of a word like Nanaka, therefore, is not sufficient by itself to prove that the second century after Christ is the earliest date of the Yajnavalkiya Code, still less of Yajnavalkya, as Professor Stenzler supposes. But whatever date may be assigned to this Sloka work, the date of Yajnavalkya, the author of the Aranyaka and the Satapatha-brahmana, would not be affected by it in any way, and the Satapatha-brahmana is the only work from which we may expect information on this point

Another attempt has been made to fix the age of Yajnavelkya, or, at least, to assign certain chronological limits to the first origin of the Sakha of the Malhyandinas, a subdivision of the Vajasanevins. when speaking of the course of the Ganges, mentions among the rivers falling into the Ganges, the "Andomatis, flowing from the country of the Mandiadini, an Indian people."2 Lassen thought he discovered in this the Sanskrit word Madnyandina, meridional; and, as a mere conjecture, such a remark was valuable. Professor Weber, however. went beyond this, and, taking for granted the identity of Mandiadini and Madhyandina, taking for granted also the identity of this Indian people with the Madhyandina, a subdivision of the Sakha of the Vajasanevins, he concluded that the text of this Sakha, i.z., the Sanhita and Brahmana of the White Yajur-veda, published by himself, must have existed in the third century B. C. Such rapid conclusions are rarely safe. There may have been such a people as the Madhyandinas at any time before or after Christ, and there may have been such a Sakha as that of the Madhyandinas at any time before or after Christ, but the people need not have had any connection with that Sakha, as little as the Prachyas or Prasii had anything in common with the Sakha of the

<sup>2</sup> Indische Aiterthumskunde, i. 139.; Schowanbeck, Megasthenis Indica, p. 106.

In the same way it might be said that the Rig veda-sausita could not have been collected before the second century after Christ, because the word Nishka occurs in the hymns. Nishka is a weight of gold or gold in general, and it certainly has no satisfactory etymology in Sanskrit. Nothing seems to be more likely than that it should be derived from Kanishka, the Sanskrit, name of Kanerki, as we speak of a "Soveraign," the French of a "Louis" The first syllable Ka may be taken as the usual prefix, particularly as Fahian calls the same king Kanika and Nika. (Cf. Reinaud Me'moirs sur l'Inde, p. 76.) Yet nobody would draw from this the conclusion that the V da was written after the time of Kanishka. If Nishka be really derived from the name Ka-Nishka, Kanishka must have been the name of title of more ancient kings, whose money became known in India. But Nishka may have a very different etymology, and at all events it does not furnish any solid basis for chronological conclusions. Nishka does once occur in Pânini's Sûtras, v. 2. 119; and it is frequently quoted as an example. Pân. iv. 3. 156.

निष्केण कोत नैष्किकं। निष्कस्य विकार: नैष्किकः द्विनिष्कः। द्विनैष्किकः। Pap. i. 4, 87, उप निष्के कार्यापण । v. 2, 119, नैष्करातिकः। vi. 2, 55, निष्कमाला। iv. 3, 153, हारको निष्कः। Cf. v. 1, 37,

Prachya-kathas or the Καμζισθολοι, another Indian people, mentioned by Greek writers, with the Sakha of the Kapishthalas Granted, however, that the Sakha was formed in the country of the Madhyandinas, and derived its name from it, nothing whatever would follow from this

as to the exact date when this was effected.

A second Aranyaka is that of the Taittiriyas. As the Taittiriyaveda (or the Black Yajur-veda) is always represented as anterior to the White Yajur-veda, the Taittirîya aranyaka also might be expected to be older then the Bribadaranyaka. It is more likely, however, that the Taittirîya âranyaka did not yet exist at the time when Yajoavalkya, after seceding from his master, founded a new school, and endowed it with a new Sanhitâ and Brâhmana. The Aranyaka of the Taittirîyas may have been added to their Brahmanas subsequently to this schism, in the same way as the baihadaranyaka is certainly later then many portions of the Satapatha-Brahmana. At all events the Taittirîya-aranyaka represents the latest period in the development of the Vedic religion, and shows a strong admixture of post-vedic ideas and names. The same applies also to several parts of the Taittirîya-brâhmana, the last part of which does not belong to Tittiri, but is ascribed the Katha, the same Muni to whom the beginning of the Aranyaka is said to have been revealed. 1 There are some traces which would lead to the supposition that the Taittisîya-veda had been studied, particularly in the south of India, and even among people which are still considered as un-Aryan in the Brâhmana of the Rig-veda. In the Taittirîya âranyaka different readings are mentioned, which are no longer ascribed to different Sakhas but to certain countries in the south of India, like those of the Dravidas, Andhra, and Karnatakas. This fact by itself would throw some doubt on the antiquity and genuineness of this class of Vedic writings, 2 at least in that form in which we now possess them.

The Taittirîya-âranyaka consists of ten books of which the four last are devoted to Upanishad doctrines. No author is mentioned, and Tittiri, who might seem to hold the same position for the Taittiriyaranyaka which Yajnavalkya holds for the Brihadaranyaka, is represented by the Brahmanas themselves neither as the author nor as the first teacher. He received the tradition from Yaska Paingi, who received it from Vais'ampâyana. Tittiri himself handed it on to Ukha, and he to Atreya. Tittiri, therefore, was believed to be the founder of a Sakha

but not the author of the Aranyaka.

A third Aranyaka is the Aitareya âranyaka, belonging to the Rigveda. It forms a work by itself, and is not counted as part of the Aitareya-brâhmana. This is an important point. The work consists of five books or Aranyakas, 3. the second and third of which form the Bah-

<sup>2</sup> I find that Harisvâmin also, his commentary on the Satapithabrâhmana, quotes the Dâkshinâtyas and Saurashtras, together with the Kanvas, as authorities on vedic subjects. See Dr. Weber's Ind, Studien, i. 77. In the same place Dr. Weber attempts to prove the late origin of this work by the contraction of sa indrah into sendrah. This contraction, however, occurs already in the Rig-veda-sanhitâ. See also Pân. vi i. 134. 3 The first Aranyaka consists of five Adhyayas and twenty-two

vricha upanishrd, if by this name we like to distinguish the complete Upanishad from a portion of it, viz.: Adhyavas 4-6, of the second Arangaka, commonly quoted as the Aitareyopanishad If we ask for the name of the author, we find again the same uncertainty as in the Bribadaranyaka and the Taittirîyaranyaka. All we know for certain is that there was a Sakha of the Aitareyins, which was in the possession of a Brahmana and an Aranyaka. Both these works were afterwards adopted by the later Sakhas of the Rig-veda, so that we actually hear of an As'valâvana text of the Aitareyakam. We also know from the (!hhândogya upanishad (iii. 16.) that there was a Mahidasa Aitareva, who, by means of his sacred knowledge was supposed to have defied death for 1,600 years; and in the Aitareya-âranyaka, not in the Brâhmana, he is several times quoted by the same name as an authority. In the later commentaries, a story is mentioned according to which the Brahmana and Aranyaka of the Rig-veda were originally revealed to one Aitareya, the son of Itara. This story, however, sounds very apoeryhal, and had a merely etymological origin. Itarâ, in Sanskrit, means not only the other of two, but also low, rejected. Thus, if the patronymic Aitareya was to be accounted for, it was extremely easy to turn it into a metronymic, and to make Aitareva the son of an Itarâ, a rejected wife Thus Sâyana, in hie introduction to the Aitareya-brâhmana, tells us that there was once a great Rishi who had many wives. One of them was called Itara, and she had a son called Mahidasa. His father preferred the sons of his other wives to Mahidasa, and once he insulted him in the sacrificial hall, by placing all his other sons on his lap. Mahidasa's mother, seeing her son with tears in his eyes, prayed to her own tutelary goddess, the Earth (svîyakuladevatâ Bhūmih), and the goddess in her heavenly from appeared in the midst of the assembly, placed Mahidasa on a throne, and gave him on account of his learning the gift of knowing the Brahmana, consisting of forty Adhyayas, and, as Sayana calls it, another Brahmana, treating "of the Aranyaka duties."

This, and similar stories mentioned by Colebrooke, are not calculated to inspire much confidence. On the contrary we feel inclined to attach more value to the accidental admissions of the Brâhmanas who ascribe the later portions of the Aitareyâranyaka to such well known authors as Saunaka and As'valâyana. There may have been an Aitareya, the founder of the Sâkbâ of the Aitareyins, and himself the expounder of those ceremonial, philologica, and philosophical tracts which are incorporated in the Brâhmana and the Aranyaka of the Aitareyins. He is quoted himself as an authority in those works, but

Khandas. The second Aranyaka consists of seven Adhyâyas and twenty-six Khandas. The Upanishad begins with the fourth Adhyâya and the twenty-first Khanda. The third Aranyaka consists of two Adhyâyas and twelve Khandas. The fourth Aranyaka consists of one Adhyâya and one Khanda (ascribel to As'valâyana in Shadgurus'ishya's commentary on the Sarvânukrama.) The fith Aranyaka consists of three Adhyâyas and fourteen Khandas (ascribed to S'aunaka).

<sup>1</sup> Misclaneous Essays, i. 46. n.

nothing is said in them of his degraded descent, nor of the erudition

granted to him by the goddess of the earth.

Another aranyaka, belonging to another Sakha of the Rig-vedo, is the Kaushîtaki-aranyaka. Colebrooke stated in his Essay on the Veda that "the original of the Kaushîtakam was among the portions of the Veda which Sir Robert Chambers collected at Benares, according to a list which he sent to ms some time before his departure from India." According to the catalogue of Sir Robert's MSS, which are now at the Royal Library at Berlin, there is in that collection not only the text and commentary of the Kaushîtaki brâhmana, but likewise the Aranyaka in three Adhyâyas, of which the third constitutes the Kaushîtaki-upanishad. Here again we know nothing as to the name of an author, Kaushîtakin being simply the name of that section which the text of these works was handed down from teacher to pupil.

There are no Aranyakas for the Sâma-veda, nor for the so-called fourth Veda, the Atharvana.

Traces of modern ideas are not wanting in the Aranyakas, and the very fact that they are destined for a class of men who had retired from the world in order to give themselves up to the contemplation of the highest problems, show an advanced, and already declining and decaying society, not unlike the monastic age of the Christian world. The problems, indeed, which are discussed in the Aranyakas and the old Upanishads are not in themselves modern. They had formed the conversation of the old and the young, of warriors and poets, for ages. But in a healthy state of society these questions were discussed in courts and camps: priests were contradicted by kings, sages confounded by children, women were listened to when they were moved by an unknown spirit.1 This time, which is represented to us by the early legends of the Aranyakas, was very different from that which gave rise to professional anchorites, and to a literature composed exclusively for their benefit. As sacrifices were performed long before a word of any Brâhmana or Sûtra had been uttered, so metaphysical speculations were carried on in the forests of India long before the names of Aranyaka or Upanishad were thought of. We must carefully distinguish between a period of growth, and a period which tried to reduce that growth to rules and formulas. In one sense the Aranyakas are old, for they reflect the very dawn of thought; in another, they are modern, for they speak of that dawn with all the experience of a past day. There are passages in these works, unequalled in any language for grandeur, boldness, and simplicity. These passages are relics of a better age. But the generation which became the chronicler of those Titanic wars of thought, was a small race: they were dwarfs, measuring the footprints of departed giants.

Chronologically we can see with great clearness that the Aranyakas are anterior to the Sûtras. It is only in their latest portion that they show traces of the style of Sûtra compositions. We can likewise see that they are later than the Brâhmanas, to which they themselves, in

<sup>&</sup>lt;sup>1</sup> A Kumârî gandharvagrihîtâ is quoted as an authority in the Kaushîtaki-brâhmana, and it is explained by "vis'eshîbhijnâ." Kaush.-br. ii. 9.; Ait.-br. v. 29. Ind. Studien, i. 84. 217.

several instances, form a kind of appendix. Beyond this we cannot go. and an inpartial consideration of the arguments adduced in favour of a much earlier or a much later date of this class of Vedic literature, will show a complete absence of facts and arguments, such as are required for historical inductions. Whether Panini knew the Aranyakas as a branch of sacred literature is uncertain. Although he mentions the word "Aranyaka," he only uses it in the sense of "living in the forest;" and it is the author of the Varttikas who first remarks that the same word is also used in the sense of 'read in the forest.' The word Upanishad, besides being used in the Upanishads themselves2, occurs in the Sûtras of Pânini (i. 4. 79.), but there is nothing to prove that Parini knew Upanishad as the name of a class of sacred writings.

It is hardly necessary to remark that at the time when the Aranyakas were written, the hymns of the Sanhitas were not only known, but known in the same form in which we now possess them. The Rig-veda is quoted as a whole, and consisting of ten Mandalas. Though the name of Mandala is not used, the names assigned to each of the ten books are the same as those used in the Anukramanis, and they follow each other in the same succession. Nay, these names had evidently been current for some time before, for the author of the Aranyaka assigns the most extraordinary etymologies to them, and uses them in support of the wildest speculations. He first mentions the S'atarchins or the poets of the first Mandala. He then comprehends the poets of Mandala II. to IX. under the common name of the Madhyamas, assigning to the poets of the tenth and last Mandala the name of Kshudrasûktas and Mahasuktas. The middle books are enumerated more in detail under their usual names, Gritsamada, (ii.), Vis'vamitra (iii.), Vamadeva (iv.), the Atris (v), Bharadvaja (vi), Vas'ishtha (vii.), the Pragathas (viii.), the Pâvamânîs (ix.). The names also of Rig-veda, Yajur-veda, and Sama-veda occur as literary titles in this Aranyaka.4

The etymologies assigned to these names are not perhaps more absurd than those which we find in the Brahmanas. But there are other etymological explanations in the Aranyakas such as we scarcely find in any genuine Brahmana. Part of the first Aranyaka (i. 4) reads almost like a commentary on the first hymns of the Rig-veda, and the short glosses scattered about in these books of the forest might well

be considered as the first elements of a Nirukta.

The grammatical study of the bymns of the Veda was evidently far advanced, and scholastic pedantry had long taken the place of sound erudition, when the early portions of the Aranyaka were composed. Not only the ten books of the Rig-veda are mentioned, but likewise their subdivisions, the hymns (sûkta), verses (rich), half verses (arddharcha), feet (pada), and syllables (akshara). Sometimes the syllables of certain hymns and classes of hymns are counted, and their number is supposed to possess a mysterious significance. In one passage (ii. 12.) speculations

are propounded on the division of letters into consonants (vyanjana),

vowels (ghosha), and sibi ants (ûshman).

Admitting, therefore, that the Aranyakas represent the latest productions of the Brâhmana period, and that in some cases their authors belong to the age of S'aunaka, in others even to a more modern age, we have now to consider the character of the genuine Brâhmanas, in order to point out the differences which distinguish the Brâhmanas from the Sûtras by which they are followed, and from the Mantras by which they are preceded.

THE BRÂHMAŅAS

The difficulty of giving an exhaustive definition of what a Brâhmana is has been felt by the Brâhmans themselves. The name given to this class of literature does not teach us more than that these works belonged to the Brâhmans. They were brâhmanic, i.e., theological tracts, comprising the knowledge most valued by the Brâhmans, bearing partly on their sacred hymns, partly on the traditions and customs of the people. They profess to teach the performance of the sacrifice; but for the greater part they are occupied with additional matter; with explanations and illustrations of things more or less distantly connected with their original faith and their ancient ceremonial.

Sâyana, in his introductions to the Rig-veda, I has given such extracts from the Pûrva-mîmâmsî philosophy as may furnish a pretty correct idea of the Brâhmanas, and he has treated the same subject again in

his Introduction to the Aitareya-brahmana.

"A Brâhmaṇa," he says, "is twofold, containing either commandments (vidhi, or additional explanations (arthavâda). This is confirmed by Apastamba, saying: 'The Brâhmaṇas are commandments for the sacrifices; all the rest consists of additional explanations.' The commandments, too, are of two kinds, either causing something to be done which was not done before, or making something known which was not known before. Of the former kind are all those commandments occurring in the practical part, such as, 'At the Dîkshaṇiyâ ceremony he presents a purodâs'a oblation to Agni and Vishṇu.' Of the latter kind are all philosophical passages, such as, 'Self was all this alone in the

beginning.

"But how can it be said," Sâyana goes on, "that the Veda consists of Mantras and Brâhmanas, as the essential qualities neither of the one nor of the other part can be satisfactorily defined? For if it be said that a Mantra alludes to those things which are commanded, this definition would not comprehend all Mantras, because there are some which are themselves commandments, as, for instance, 'He takes Kapinjalas for the spring.' Again, if it be said that a Mantra is what makes one think (man, to think), this definition would comprehend the Brâhmanas also. Other definitions have been given, that a Mantra ends with the word thou art, or that it ends with the first person plural; but none of these definit one can be considered as exhaustive. The only means, then, by which Mantras can be distinguished from Brâhmanas lies in their general sacrificial appellation, which comprehends the most different things under the one common name of Mantras. There are some recording

<sup>1</sup> Rig-veda-bhashya, p. 11.

the performance of sacrifices; some contain praises, some end with the word thee (tva), some are invocations, some are directions, some contain deliberations, some contain complaints, some are questions, some are answers, &c. All these attributes are so heterogeneous, that none of them can be used for a definition. Knowing, however, that the Veda consists only of two parts, we may say that whatever does not come under the name of Mantra is Brahmana, whether it contains reasons. explanations, censures, recommendations, doubts, commandments, relations, old stories or particular determination. Not one of these subjects belongs to the Brahmanas exclusively, but they occur more or less frequently in the Mantrus also, and could therefore not be used as definitions of the Brahmanas. The same objection applies to all other definitions which have been attempted. Some have said that the frequent occurrence of the particle iti (thus) constitutes a Brahmana; others. that a Brahmana closes with the words ityaha (thus he said); others that a Brahmana contains stories. &c.; but all this would apply with equal force to some of the Mantras. The only division therefore of the Veda that holds good consists in comprehending one part under the old traditional appellation of Mantra, and considering all the rest as Brah. manas.

"But it might be objected," Sâyana continues, "that for instance in the chapter on the Brahmayajna, other parts of the Veda are mentioned besides the Brâhmanas and Mantras, under the title of Itihâsas (epic stories), Purânas (cosmogonie stories), Kalpas (ceremonial rules, Gâthâe (songs), Nârâs'ansîs, 'heroic poems). This however would be the same mistake, as if we should place a Brâhman co-ordinate with a Brâhman who is a mendicant. For all these titles, like Itihâsa, &c., apply only to subdivisions of the Brâhmanas. Thus, passages from the Brâhmanas, like 'The gods and the Asuras were fighting,' &c., would be called Ithihâsas; other passages like 'In the begginning there was nothing,' would be called Purânas; therefore, we may safely say, that the Vedas consist of two parts only, of Mantras and Brahmanas."

If after these not very satisfactory definitions of what a Brahmara is and how it differs from a Mantra, we turn to the Brahmanas themselves, such as we possess them in MS, we find that their number is

much smaller than we should have expected.

If every Sakha consisted of a Sanhita and Brahmana, the number of the old Brahmanas must have been very considerable. It must not be supposed, however, that the Brahmanas which belonged to different Sakhas, were works composed independently by different author. On the contrary, as the Sanhitas of different Sakhas were nothing but dif-

According to Madhusûdana's view, the Brâhmanas consist of three parts; of commandments, additional explanations, and Vedânta doctrines, the latter being more particularly represented by the Upanishads. The same author speaks of four classes of commandments, "A commandment may consist," he says, "either in a simple definition ('the oblation to Agni is given in eight cups,'); or it may include the aim (he who wishes for life in heaven may perform the sacrific s of the new and full moon); or it may detail the means by which the sacrifice is performed (let him sacrifice with rice); or it may contain all this together."

ferent recensions of one and the same original collection of hymns, and could be distinguished from each other only by a number of authorised virial lections or by the addition and omission of certain hymns, the Brahmanas also, which were adopted by different Charanas of the same Veda, must be considered not as so many independent works, but in most instances as different recensions of one and the same original. There was originally but one budy of Brahmanas for each of the three Vedas; for the Rig-veda, the Brahmanas of the Bahvrichas, for the Sama-veda the Brahmanas of the Chhandogas, and for the Yajur-veda in its two forms the Brahmanas of the Taitririyas, and the Satapathabrahmana. These works were not written in metre, like the Sanhitâs, and were therefore more exposed to alteration in the course of a long continued oral tradition.

We possess the Brahmana of the Bahvirchas, in the Sakhas of the Aitareyins and the Kaushîtakins. The various readings of other Sakhas, quoted by the commentator on the Aitareya-brahmana, show evidently. that there were other Sakhas of the Bahvrichas, which differed but little in the wording of their Brahmanas. But even the Brahmana of the Kaushîtakins which has been preserved to us as a distinct work, different from the Brahmann of the Aitareyius, can only be considered as a branch of the original stock of Brahmana literature, current among the Bahvrichas. Its arrangement differs considerably from that of the Aitareya-brâhmana. The sacrifice described in the beginning of the -itareya-brâhmana forms the seventh Adhyaya of the Kaushîtakibrahmana, and most of the other sacrifices are equally displaced. Others which are discussed in the Aitareya-brâhmana are altogether wanting in the Kausnîtaki-brâhmana, and must be supplied from the Sûtras of the Sânkhâyana-s'âkhâ, a subdivision of the Kaushîtakins. But whenever parallel passages occur, it becomes clear that the coincidences in the description of sacrifices and the wording of legends cannot be accidental.

Most of the Brâhmanas which are left to us are collective works. A tradition has been preserved in confirmation of this fact. The Brâhmana of the Taittirîyas in the Sakhâs both of the Apastambîyas and the Atreyas, contains some portions which bear the name of Katha, and were tormerly the property of his followers. The component parts are frequently called Brâhmanas, instead of chapters or sections. The same applies to the Aranyakas and Upanishads. In some cases, these smaller Brâhmanas are quoted by their special titles; and in their

<sup>1</sup> Aitareya-br. i. 1. अग्निवें देवानामवमी विष्णुः प्रम: &c. Kaush,-br. vii. 1. अग्निवें देवानामवराद यो विष्णुः प्राईयः, &c. Ait.-brâhm. ii. 2.= Kaush.-br. x. 2.; ii. 6. = x. 4.( Śânkn.:sûtra, v. 17.); ii. 3. = xii. 1.

<sup>&</sup>lt;sup>2</sup> Maitreyî-brâhmana is the title given to that portion of the Brihadâ-ranyaka which contains the dialogue between Yâjnavalkya and Maitreyî. The Saulabhâni brâhmanâni, quoted by Âs'valâyana and Pâṇini as modern compositions, may refer to sections containing a dialogue similar modern compositions, may refer to sections containing a dialogue similar to that between Janaka and Sulabhâ which exists in the Mahâbhârata. 111. v. 11. 854. Cf. Lessen, Ind. Alterth. xv. note. According to Pâṇini, however, they ought to be taken as Brâhmanas composed by Sulabha.

collected form they are handed down, not always by the name of the Charana by which they were adopted, but more frequently by that of the Charana in which their original collection took place. Thus the Aitareya-brâhmana, though adopted by the As'valâyanîyas, is more frequently quoted by its original name than by that of As'yalâyana-brâhmana. The Brâhmana of Kaushîtakin or the Kaushitakins is more usually referred to by this name than by that of the later Charana of the Sânkhâyanas.

In the Brahmana of the Chhandogas it is evident that after the principal collection was finished (called the praudha or panchavins'a-brâhmana i. e., consisting of twenty-five sections), a twenty-sixth Brahmana was adled which is known by the name of Shadvius'a-brahmana. This Brah. mana together with the Adbhuta-brâhmana must be of very modern date. It mentions not only temples (Devâyatanâni), but images of gods (daivata-pratimâ) which are said to laugh, to cry, to sing, to dance, to burst, to sweat, and to twinkle. These two have long been supposed to be the only Brahmanas of the Chandogas, and they constitute, no doubt, the most important part of that class of literature. It is curious, however, that whenever the Brahminas of the Chandogas are quoted, their number is invariably fixed at eight. Kumarila Bhatta, i. 3, 2 says, "in the eight Brahmanas, together with the Upanishads, which the Chhandogas read, no single accent is fixed." Still more explicit is a statement by Sâyana which I quoted in the introduction to the first volume of my edition of the Rig-veda 3 Here Sayana says: "There are eight Brahmanas; the Praudha is the first, this means the large Brahmna, or the Panchavinsa); the one called Shadvinsa or Shadvinsad. brâhmana, is the second; then follows the Sâmavidhi; then the Arsheyabrâhmana, the Devatâdhyaya-brâhmana, and the Upanishad. These with the Sanhitopanishad and the Vans'a are called the eight books." these the Sâmavidhâna-brâhmana was well known, the very quotation of Sâyana has been taken from his commentary on this very curious work. It might have been difficult, however, to identify the other five works if there had not been amoung the MSS. of Prefessor Wilson's collection at the Bodleian Library, one (No. 451) containing four of these small tracts. the Sanhitopinishadam-brahmanam, the Devitadhyayah, the Vans'abrahmanam, and the Arsheya brahmanam. 4 The only Brahmana, therefore, on which any doubt could remain, was the Upanishad, and here we shall probably not be wrong if we adopt one of Professor Weber's less fold conjectures, that Sâyana intended this for the Chhândogya upanishad. 5

Quoted as such by Yâjnikadeva on Kâty. 2. 5. 18.; 6. 6. 25. Weber, Ind. Stud. i. 230.

<sup>&</sup>lt;sup>2</sup> Brâhmanâni hi yâny ashṭau sarahasyâny adhîyate Chhandogâs teshu sarveshu na kas'chin niyatah svarah.

<sup>3</sup> P. xxvii. note.

<sup>&</sup>lt;sup>4</sup>See also "A Catalogue Raisoue'e (sie) of Oriental Manuscripts in the Library of the late College Fort St. George," by the Rev. W. Taylor, Madras, 1857, p. 69.

<sup>&</sup>lt;sup>5</sup>The Vansa-brahmana has lately been printed, with some valuable remarks, by Prof. A. Weber, Ind. Stud. iv. 371.

With the exception of this and the Sâmavidhana, which contains most important information on questions connected with Achâra or customs all the other tracts are of comparatively small importance.

It is in the S'atapatha-brâhamana, however, that we can best observe the gradual accumulation of various theological and ceremonial tracts which were to form the sacred code of a new Charana. The text of this work has been edited by Professor Weber, and we can the text of this work has been edited by Professor Weber, and we can likewise avail ourselves of several essays on this branch of Vedic literature, published from time to time by that industrious scholar. According to Indian traditions, Yâjnavalkya Vâjasaneya, the founder of the new Charana of the Vajâsaneyins, is himself if not the author, at least the first who proclaimed the Sanhitâ and brâhmana of the Vâjasaneyins. We can see clearly that the composition of both the Sanhitâ and Brâhmana was guided by the same spirit, and it is not at all unlikely that in this the most modern of all Vedas, the final arrangement of the Sanhitâ may have been contemporaneous with, or even later than the composition the Brâhmana.

First of all, it ought to be remarked that the story which has been preserved by tradition of the schism introduced by Yajnavalkya among the followers of the Adhvaryu or Yajur-veda is confirmed by internal evidence. The general name of the ancient Sakhas of the Yajur-veda is Charkha, and the Taittirîyas, therefore together with Kathas and other are called by general name, Charaka-s'akhas. This name Charaka is used in one of the Khilas of the Vajasaneyi-sanhita as a term of reproach. In the 30th Adhyaya a list of people is given who are to be sacrificed at the Purushamedha, and among them we find the Charakacharya, the teacher of the Charakas, as the proper victim to be offered to Dushkrita or sin. This passage, together with the similar hostile expression in the S'atapatha brahamana were evidently dictated by a feeling of animosity against the ancient schools of the Adhvaryus, whose soured texts we possess in the Taittirîya veda, and from whom Yajanvalkaya seceded in order to become himself the founder of the new Charanas of the Vajasaneyins.

If we compare the Sanhitâ and Brâhmana of the Vâjasaneyins with those of the Charakas, we see that the order of the sacrifices is on the whole the same and that the chief difference between the two consists in the division of Mantras and Brâhmanas, which is carried out more strictly by Yâjnavalkya than in the ancient text of the Taittirîyas. This was most likely the reason why the text of Yâjnavalkya was called most likely the reason why the text of Yâjnavalkya was called Sukla Yajur-veda which is generally translated by the White Yajur-veda but some commentators explain Sukla more correctly by s'uddha and translate it by 'cleared,' because in this new text the Mantras had been cleared and separated from the Brâhmanas and thus the whole had been rendered more lucid and intelligible. In opposition to this they suppose that the old text was called Krishna or dark, because in it the verses and rules are mixed together, and less intelligible; or because, as

<sup>1</sup> Dvivedaganga explains शुक्कानि यर्जूषि by शुद्धानि यद्वा ब्राह्मणे गमिश्रितमं-

Vidyaranya says it contains the rules of the Hotri as well as as of the Adhvaryu priests, and thus biwildered the mind of the student.

It was the nature of the duties which the Adhvaryus had to perform at the sacrifices that their hymns and invocations could hardly be separated from the rules (vidhi) contained in the Brahmanas. It was not a mere accident therefore that in the Vedas of the ancient Adhvaryus the hymns and rules were mixed up and must be considered as a mere innovation if what is now called the Sanhita of the Black Yajur vada is distinguished by this name from the Brahmana, which in reality is a continuation of the same work. It is not unlikely that it was the very wish to have, like the Bahrichas and Chhandogas, a Sanhitâ, i. e. a collection of hymns distinct from the ceremonial rules which led to the secess on of the Vajasanevins, and by a kind of reaction, to the absurd adoption of the titles of Sanhua Brahmana among the Taittiriyas. In the new code of the Vajasaneyins the most important part was nevertheless the Brah nana, the Sanhita being a mere collection of verses extracted and collected for the convenience of the officiating priest. The difference in the text of these verses and formulas would be marked is Brâhmana, and transferred from the Bâahmana into the Sanhitâ. This is, therefore the very opposite of what happened with the text of the Sanhitâ and Brâhmana of the Bahvrichas. Here the Sanhitâ existed long before the Brâhmana of the Aitareyins was composed. The Vâjasaneyi sanhi â may possibly r present various readings which existed in the Saknas of the laittirayas; but these verses were collected and formed into a Sanhitâ only as an appendix to the S'atapatha brâhamana the real code of the Vâjasaneyins. Where the sacrificial invocations of the Vajasaneyins differ from those the Taittiriyas we ought to recognise in those diffrences the last traces of S'akhas which existed previous to the establishment of the Vâjasaneyins. In the beginning, for instance, of the Dars'a pûrnamâsa sacrifice, the Adhvaryu priest, having called the cows and calves together, has to touch the calves with a branch. This act of the sacrifice was originally accompanied by the words "vâyava stha, upâyava stha," "you are like the winds."—and the whole ceremony, together with these invocations, is contained in the Taittirîva-sanhitâ. In the Mâdhyandina s'akha, on the contrary, not only are the words "upâyava stha" admitted in the Sanhita, but a distinct warning is given in the Brâhmana not to use these words, belonging to a different Sâkhâ.2

100

A comparison of the text of the Taittiriyas and Vajasanevins shows that it would be a mistake to call Yajnavalkya the author, in our sense of the word, of the Vajasaneyi-sanhita and the S'atapatha-brahmana. But we have no reason to doubt that it was Yajnavalkya who brought the ancient Mantras and Brahmanas into their present form, and, considering the differences between the old and new text, we must admit that he had a greater right to be called an author than the founders of the Charanas of other Vedas whose texts we possess. In this sense, Kâtvâyana says, in his Anukramanî, that Yâjnavalkya received the Yajur-veda from the Sun. In the same sense the S'atapatha-brahmana ends with the assertion that the White Yajur-veda was proclaimed by Yajnavalkya Vajasaneya; and in the same sense Panini, or rather his editor, says in the first Varttika to iv. 3. 105. that there were modern Brahmanas proclaimed by Yajnavalkya, and that their title differed by its formation from the title given to more ancient Brahma-At the time when these titles were framed Yajnavalkya was still alive; and his work, therefore, was not yet considered as one handed down by tradition through several generations. There might seem to be some difficulty in making Yajnavalkya, the author or editor of the whole Yajur veda, because there are several portions of the Brahmana where Yajnavalkya himself is introduced as one of the chief interlocutors, so much so that part of the Brihadaranyaka, the last book of the Satapatha-bahmana. is designated by the name of Yajnavalkîyam kandam. But similar instances occur in several of the traditional works of the Brahmans, and in this case the decided traces of a later origin which are to be found in the Bribadâranyaka, would justify us in supposing that these portions were addded after Yajnavalkya's decease. particularly as it is called Yajnavalkîya, not Yajnavalkya-kanda.3

That Yajnavalkya, though deserting the Charakas, derived great advantage from their Veda, is seen at once by the whole arrangement on his work. I give a list of the various subjects treated in the Vajasaneyi-sanhita, according to Mahadhara. The Sanhita of the Vajasaneyins

begins with

The Dars'apûrnamâsamantrâs, Adhyâya, i. -ii. 28.

Then follow:—

Gharmâdinishkritis, lxi.

Jnanakandam, xl.

According to this list the Våjasaneyi-sanhitâ may be divided into different sections. The first section comprises the Dars'apûrṇamâsa, &c., i.—iii.; the second the Soma sacrifices, iv.—x.; the third the Agnichayanas, xi.—xviii.

<sup>2</sup> According to the Mitakshara commentary on Yajuavalkya's Dharma-s'astra, xxxvi. 1. forms the beginning of an Aranyaka. Weber,

Vorlesungen, p. 103.

<sup>&</sup>lt;sup>1</sup> According to the forty-eighth Atharvaparis'ishta, the thirty-second verse of the twenty-third Adhyaya would be the last verse of the Sanhita. See Weber, Ind. Stud. iv. p. 432.

These eighteen Adhyâyas, which correspond to the Taittirîya-sanhitâ are explained in the first nine books of the Satapahtha-brâhmana and the first eighteen chapters of Kâtyâyana's Sûtras. They form, no doubt, the most important part of the Adhvaryuveda, but there is no evidence to show that they ever existed in a separate form. It has been well remarked, however, by the editor of the Satapatha-brâhmana, that the first nine books consist altogether of sixty Adhyâyas, 1 and that the name of Shashtipatha, the Sixty Paths, which is mentioned in the Vârt tika to Pân. iv. 2. 60., may refer to this portion, whereas the whole Brâhmana, consisting of one hundred Adhyâyas, received the title of Satapatha, the Hundred Paths.

The Sautrâmanî ceremony, which begins with the 19th Adhyâya, has nothing corresponding to it in the Taittirîya-sanhitâ, but, like the following sacrifices, it has been incorporated in the Taittirîya-brâhmana. There is a difference also in the treatment which this sacrifice receives in the Satapatha-brâhmana. Adhayâya xix. and xx. are indeed explained there, in the 12th book, but they do not receive the same careful explanation which was given to the preceding sacrifices. The last Adhyâya, containing verses of the Hotri, is not explained at all. Kâtyâyana treats these three Adhyâyas in the 19th book of his Sûtras.

The As'vamedha, which fills Books xxii.—xxv. of the Vâjasaneyi-sanhitâ, is but partially contained in the Taittirîya-sanhitâ; and the Satapatha also, though it devotes to this ceremony a considerable part of the 13th book, treats it in a much more superficial manner than the

former sacrifice. Katyayana explains it in his 20th book.

The Adhyâyas, which follow the As'vamedha, are distinctly called Khilas or supplements by Kâtyâyana. They are relegated to the Brâhmana by the Taittirîyas, and explained with less detail in the Satapatha-brâhmana. Adhyâyas xxvi.—xxix. contain some hymns belonging to sacrifices previously explained, and they are passed over entirely by the Satapatha-brâhmana and by Kâtyâyana. Adhyâyas xxx. and xxxi. contain the Purushamedha, which the Taittirîyas treat in their Brâhmana. The Satapatha-brahmana devotes but a short space to it in its 13th book, and Kâtyâyana explains Adhyâya xxxi. in his 21st book.

The ceremonies comprised in the three following Adhyâyas, xxxii. to xxxiv. Sarvamedha and Brahmayajna, are passed over by the S'atapatha-brâhmana and Kâtyâyana. The Taittirîyas allow them no place

in their Brâhmana but include them in their Aranyaka.

The Pitrimedha which follows in the xxxvth Adhyaya, finds its place in the Brahmana of the Taittiriyas. The Satapatha and Katyayana explain it, the former in the 13th, the latter in the 21st book.

A similiar ingenious remark has been made by the same savant with regard to the Aitareya and Kaushîtaki, or, as he calls it, Sânkhayanabrâhmaṇa. The former consists of forty, the latter of thirty Adhyâyas, and it is not unlikely that the rule in Pâṇini, v. 1. 62, how to form the names of Brâhmaṇas, consisting of thirty and forty Adhyâyas, had special reference to these works. The names are "trains'âni and châtvârins'âni brâhmaṇâni;" the explanation, "trins'ad adhyâyâh parimâṇam eshâm brâhmaṇânâm."

The Sukriya portion of the Vâjasaneyi-sanhitâ, xxxvi.—xl., is excluded from the Brâhmana of the Taittirîyas, and treated in their Âranyaka. The Satapatha-brâhmana explains three of these Adhyâyas, xxxvii.—xxxix., in full detail in its 17th Kânda, and Kâtyâyana devotes to them the Sûtras of his last book.

Those who only take into account the general object of the Satapatha-brâhmana have called it a running commentary on the Vâjasaneyi-sanhitâ. But this applies strictly to the first nine books only, and with the tenth book the Brâhmana assumes a new and more independent character. The tenth book is called the Agnirahasyam, the mystery of the fire, and it refers to no particular portion of the Sauhitâ, but enlarges on the ceremonies which have been described in the four preceding books. Towards the end x. 4. 6.), it contains two chapters, which, in the Kânva-s'âkhâ, form the beginning of the Brihadâranyakaupanishad, and are there followed by the Madhu-kânda the Yajnaval-kîya-kânda, and Khila-kânda of the 14th book of the Mâdhyandina-s'âkhâ. The tenth book or Agnirahasyam closes with its own genealogy or Vans'a.

With the 11th book begins, according to Sâyana, the second part of the Sâtapatha-brâhmana. It is called Ashţâdhyâyi, and gives additional information on all the sacrifices mentioned before, beginning with the Agnyâdhâna.

The 12th book, which is called Sautramanî, treats of prâyas chitta, or penance in general, and it is only in its last portion that it refers to the text of the Sanhita, and to that ceremony in particular from which it has derived its names. Besides this name of Saûtramanî, the 12th book is also known by the name of Madhyama or the middle book, and this title can only be explained if we begin the second part of the Satapatha, not, as Sâyana suggests, with the 11th, but with the 10th book.

The 13th book is chiefly concerned with the As'vamedha, and its first three Adbyâyas may again be considered as a kind of commentary on the Sanhitâ. Towards the end some sacrifices, beginning with the Purushamedha, which the Sanhitâ treats in its Khila portion, are explained, but other ceremonies also are mentioned, for which there is no precedent in the Sanhitâ. The Brihadâranyaka, the last book of the Satapatha, contains in its first three Adhyâyas, a close commentary on the Pravargya of the Sanhitâ, but becomes quite independent afterwards. Its object is no longer the sacrifice, but the knowledge of Brahman, without any particular reference however, to the last Adhyâya of the Sanbitâ, which, as we saw, was equally devoted to the doctrine of the Upanishads.

It is clear, therefore, that the Satapatha-brâhmana was not simply a running commentary on the Sanhitâ; nay there is nothing to prove that the hymn-book of the Vâjasaneyins existed previous to their Brâhmana. The Satapatha-brâhmana may have been edited by Yâjnavalkya, but its component parts, like the component parts of the other Brâhmanas, must have been growing up during a long period of time in different localities before they were collected. The collection of ancient Brâhmanas must always have been the work of individual teachers, and their Brâhmanas, in their new and complete form, were at first the

exclusive property of that one Charana to which the collectors belonged, or of which they became the founders. Afterwards these collective Brahmanas were adopted by the members of other Charanas, who either added some chapters of their own, or introduced certain modifications, by which we now find that different texts of one and the same Brâhmana differ from one another We must distinguish, therefore, between old and new Brahmanas, the former being those which from time immemorial had been living in the oral tradition of various Charanas the latter comprising the great collective works. Some of the latter vary slightly in the editions adopted in various Charanas; others, and these the most modern, show the distinct influence of individual editors. Pâṇivi, whose views are not shackled by the inspiration-doctrine which blinded and misled all the followers of the orthodox Mimânsâ school, broadly states the fact, that there are old and new Brahmanas; whereas, according to the doctrine of later divines, the Brahmanas are neither old nor new, but eternal, and of divine origin. Pânini, who is a grammarian, rests his opinion as to the different dates of the Brahmanas on the evidence of language. "A book," he says, "composed by a certain author, may be called by an adjective derived from the author's name." 1 For instance, a book composed by Vararuchi, may be called "Vararucho granthah." A work, on the contrary, which has only been taught and promulgated by a person, is not to be called his book (grantha), but bears its own title, such as "grammar," or, whatever else it may be, together with an adjective, derived from the author's name. Pânini's grammar, for instance, is not to be called "Pâniniyo granthah" but "Pâninîyam vyâkaranam;" because it is a canonical work, revealed to Panini, but not invented by him. It may also be called "Paniniyam," in the singular neuter; i.e., Panineum.3 In the same way it is perfectly correct to speak of an "Apis'alam", a work composed by Apis'ala, of a "Paingi Kalpah," an old ceremonial of Pinga's, of a "Mâdhurî Vrittih," a commentary of Madhura, 4 and of "Chârakâh Slokah," verses composed by Charaka. "But," says Panini, "if the work referred to consists either of Vedic hymns (Chhandas), or of old Brâhmanas (purânaprokteshu Brâhmaneshu), then it is not correct to use these derivative adjectives in the singular (unless we employ secondary derivatives, such as Taittirîyakam, Kâthakam), but it is necessary to use the masculine plural." It is wrong to use the word Katham as an adjective from Katha, in the sense of hymns promulgated by Katha; or to use Taittirîyam (from Tittiri, like Pâninîyam from Pânini), or Taittirîyam Brâhmanam, in the sense of a Brâhmana promulgated by Tittiri. Even Kalpas and Sûtras like the Kalpas of Kâs'yapa, and Kaus'ika, or the Sûtras of Pârâs'arya, Silâla, Karmanda, and Kris'âs'va, are better quoted

<sup>1</sup> Pân. iv. 3. 116. कृते प्रथे ॥ Kaiyyaṭa says that this Sûtra does not belong to Pâṇini. See page 94.

² Pâṇ. iv. 3. 115 उपज्ञाते Bhâshya: विनापदेशेन ज्ञातं ॥ iv. 3. 101. तेन प्रोक्तं । Bbâshya: यत्तेव प्रोक्तंन च तेन कृतं ॥

<sup>&</sup>lt;sup>3</sup> Cf. iv. 3. 101; iv. 2. 64.

<sup>4</sup> Of. Pan. iv. 3. 108.

as "the Kas'yapins," &c., if they are old works. 1 According to Panini. we must speak of "the Kathas," i. e., those who study and know the hymns promulgated by Ka(ha; of "the Taittirîyas," those who study and know the Brahmana promulgated by Tittiri. This peculiarity of the Sanskrit language, which reminds us of the Greek expression of or  $\pi \epsilon \rho r$  admits of a very natural explanation, if we remember that in these old times literary works did not exist in writing, but were handed down by oral tradition in different communities, which represented, so to say, different works, or even different recensions of one and the same work, like so many manuscripts in later times. It was much more natural, therefore, to say, "the Taittiriyas relate," than to speak of a Taittiriyam, a work proclaimed by Tittiri, who was perhaps a merely nominal ancestor of the Taittirîyas, or to refer to a Taittirîya grantha, i.e., Tittiri's book, which in reality never existed. That this is the real ground for this Sanskrit idiom becomes more evident by the exceptions mentioned by Panini himself. There are no exceptions with regard to the names of hymns, or rather of the supporters of their texts; but there are Brahmanas, Kalpas, and Satras, spoken of in the same way as Pânini's own work. It is wrong, for instance, to speak of the Yâjnavalkyas in the same sense as we speak of the Taittiriyas, and the works promulgated by Yajnavalkya, although they are Brahmanas, are called Yajnavalkyani Brahmanani.3 "And why?" says Katyayana; "because they are of too recent an origin; that is to say, they are almost contemporaneous with ourselves." Here, then, we see that as early as Panini and Kâtyâyana a distinction was made, not only by learned men, but in common language, between old and modern Brahmanas. We see that the Brâhmanas of Yâjnavalkya, whose works, as those of a seceder, we had reason to consider as modern, are by their very name classed as modern. What other Brahmanas belong to the same class, it is not so easy to say, 4 because the only other instance quoted, besides Brâhmanas of Yajnavalkya, are the Saulabhani Brahmanani; and they bave not yet been met with. It is not unlikely, however, that the so-called Anubrâhmanani,5 or supplementary Brahmanas, which we have, for instance, in the Sâma-veda,6 may come under this category7.

¹ Cf. Pan. iv. 2. 66. इदांसि ब्राह्मणानि च प्रोक्तप्रत्ययांतान्यध्येतृवेदितुप्रत्ययं विना न प्रयोक्तव्यानि ॥

<sup>&</sup>lt;sup>2</sup> That the Kathas were an old Charana possessing their own tradition and laws, is seen from the 11th Vârttika to Pân, iv. 3, 120, and from Pân, iv. 3, 126.

<sup>3.</sup> Pân. iv. 8. 105. 1. याज्ञवंदक्यादिभ्यः प्रतिषेश्रस्तुहयकालत्वात्।

<sup>&</sup>lt;sup>4</sup> There is no Gaṇa, Yâjnavalkyâdiḥ.

<sup>&</sup>lt;sup>5</sup> Ct. Pân. iv. 2. 62.

<sup>&</sup>lt;sup>6</sup> The Anubrahmaninah are mentioned in the Nidana-sûtra belonging to the Samaveda. Cf. Ind. Stud. i. 45.

<sup>7</sup> Arcient Chhandas (Sanhitâ-śâkhâs) are those of the Kathas, Charakas, Maudas, and Paippalâdas, Saunakins, Vâjasaneyins, etc., iv 2. 66.

That different Brahmanas existed at the time when the great collective Brahmanas were composed, might be proved, even without the testimony of Pânini, by quotations occurring in the Brâhmanas them-selves. The original Charanas were not all rival sects, and it was natural that one Charana should be ready to accept Brahmanas of another, if they contained any additional traditions or precepts which seemed to be valuable. Thus we find the Brahmanas of the Kathas added to the Brahmanas of the Taittiriyas. In other cases we find that one Brâhmana quotes the opinion of another Sâkhâ, not in support of its own doctrines, but in order to refute it. Thus the Kaushîtakins are frequently attacked in the Tandya-brahmana. Now, if these quotations of different authorities, which we meet with in Brahmanas, alluded only to the opinions of certain individuals we might still be dcubtful whether these opinions had formerly been laid down in separate Brahmana works. But when we see quotations like "iti Kaushitakam," "iti Paingyam," "so says the work of the Kaushitakins or Paingins," there can be little doubt that separate Brahmanas, propagated by separate Charanas, are here intended, whatever commentators may say to the contrary.1

What became of these numerous Bråhmana-charanas which are quoted both in the Bråhmanas and in the Sûtras, is not quite clear. Most likely they were absorbed or replaced by a more modern class of Charanas, the Sûtra-charanas. When the Sûtras once came to be regarded as part of the sacred canon, they gave rise to a large number of new Charanas. Their members would preserve the text of the Sanhitâ and Brâhmana of an earlier Charana from which they originally branched off<sup>3</sup>

Ancient Brâhmanas are those of the Bhâllavins, Taittirîyas, Vâratantavîyas, Khândikîyas, Aukhîyas; the Âlambins, Pâlangins, Kâmalins, Ârchâbhins, Ârunins, Tândins, Syâmâyanins, Kathas, and Kâlâpas (these descended from the nine pupils of Vais'ampâyana); the Hâridrâvins, Taumburavins, Aulapins, and Chhâgaleyins (these derived their origin from the four pupils of Kalâpin); the Sâtyâyanins. Old Kalpas are those of the Kâs'yapins, Kaus'ikins, the Paingî and Ârunaparâjî Kalpah. Old Sûtras those of the Pârâs'arins, Śailâlins, Karmandins, and Kris'âs'vins.

<sup>1</sup> Indische Studien, i. 395.

<sup>2</sup> Colebrooke has taken a different view with respect to the Sûtras He says, "But those numerous Sâkhâs did not differ so widely from each other as might be inferred from the mention of an equal number of Sanhitâs, or distinct collections of texts. In general, the various schools of the same Veda seem to have used the same assemblage of prayers; they differed more in their copies of the precepts or Brâhmanas; and some received into their canon of scripture portions which do not appear to have been acknowledged by others. Yet the chief difference seems always to have been the use of particular rituals taught in aphorism (sûtras) adopted by each school; and these do not constitute a portion of the Veda, but, like grammar and astronomy, are placed among its appendages. "Misc. Essays, i. 18.

ें तैत्तिरीयके समासाये समानाध्ययने नाना स्त्राणि । तस्माद्पि शाखाभेदः ॥ तथा चैकस्यां तैत्तिरीयशाखायां समानपाठायां सूत्रभेदाद्वांतरशाखाभेदः ॥

The ground of division being in the Satras, the minor differences between the texts of the Sanhitas and Brahman s might be waived in these modern Charanas and this would gradually lead to the loss of many of the old Sakhas. We saw before, in the case of the Sakalas and Bâshkalas, that at the time when Sûtras began to be composed there was a tendency to reunite different Sakhas into one. the introduction of Sūtras encroached on the study of the Brahmans and Sanhitâs in the school of the Brahmans, becomes evident from passages in which the custom of performing sacrifices after the prescriptions of Sûtras only declared to be without merit and without effect. Kumarila in one passage simply states the fact that priests perform sacrifices by means of the Kalpa sutras only, and without the Veda, that they could not do the same by means of the Mantras and the Brahmanas, and without the Kalpas. In another place? he declares that the reason why the Smritis or law-books, which he considers to be founded on the Vela, had not been made up of literal extracts, was because this would have endangered the sacred study of the whole Vela. The Veda would thus have been read in a different order, or small extracts only would have been studied instead of the whole Veda. Now this is what seems to have happened to a certain extent by the introduction of the Sûtras, and it would account for the loss of many of the old Sakhas, Sanhitas as well as Brahmanas.

In order to show more clearly to how great an extent the Vedic literature was fostered by means of the Charanas I shall give a list from the Charanavaûha. This Paris'ishta is a document of a comparatively late period, though it may be one of the oldest works belonging to this class of literature. It is, therefore, no good authority as to the number of the old Sanhitâ-charanas and Brâhmana-charanas, many of which were lost or merged into others during the Sūtra period; but it is of interest as the first attempt at a complete enumeration of Sūtra-Charanas, and may be trusted particularly with regard to the Sūtra-charanas, which, at the time of its composition, were still of recent origin. The number of the old Charans would, no doubt, have to be increased considerably, if the quotations of different Sākhâs were

वेदाद्वतेऽपि कुर्वति कर्णैः कर्माणि याज्ञिकाः। न तु कर्पेविना केचिन्मंत्रब्राह्मणमात्रकात्॥

3 It has been printed by Prof. Weber in his Indische Studien. I possess the collation of some of the Berlin MSS., but not of all. In addition to the MSS., collated by Prof. Weber, I have used the text and various readings given in Rådhakântadeva's S'abdakalpadruma.

<sup>&</sup>lt;sup>1</sup> Kumârila, i. 3.

²Kumárila, i. 3. 1. बतु किमर्थं वेदवाक्यान्येव नेापसंगृहीतानीति । संप्रदायविना-शमीतेः । विशिष्टानुपूर्व्ययस्थितो हि स्वाध्याये। ऽध्येतयः श्रूयते । स्मातिश्च-वाराः केचित्कचित्कस्यांचिच्छाखायां तत्रापि तु केचित्पुरुषमेवाधिकृत्यामायंते ऽपरे कतुप्रकरणामाताः केनिविश्वमित्तेनेत्कृष्यमाणाः पुरुषधर्मतां भजते । यथा मलवद्वाससा सह न संवदेत्तस्मान ब्राह्मणायावगुरेदित्यवमादयः । तत्र यदि तावत्तान्येव वाक्यान्युद्धत्याध्यापयेयुस्ततः क्रमान्यत्वात्स्वाध्यायविधिविरोधः स्यात् । अनेन च निद्शनेनान्येऽप्यर्थवादोद्धारेण विधिमात्रमधीयीरन् कर्मोपा-यिकमात्रं वा । तत्र वेदप्रलयः प्रसङ्केत ॥

taken into account, which occur in the Brahmanas as well as in the Sûtras. But at the same time we may conclude from the lists given in the Charanavyûha that most of these old Charanas were extinct shortly after the Sûtra-period, and that their works as well as their names, began to be forgotten.

Of the Rig-veda five Charanas are mentioned:

- 1. The Sakalas. 1
- 2. Bâshkalas.<sup>2</sup>
- 3, As'valâynas.<sup>3</sup>
  4. Sânkhâyanas.<sup>4</sup>
  - 5. Mândukâyanas.<sup>5</sup>

We miss the names of several old Sakhas such as the Aitareyins, Sais'iras. 6 Kaushîtakins, Paingins, while the As'valayanas, who are mentioned, must be considered as the founders of one of the latest Sakhas of the Rig-veda.

The number of Sakhas of the Yajur-veda is stated at eighty-six. We have first the twelva Charanas comprehended under the common name of Charakas. They are, according to the MS. of the Charanavyaha;

- 1. Charakas. 7
- Ahvarakas.<sup>8</sup>

<sup>1</sup> Pân iv. 3. 128; iv. 2. 117.

Bâshkala. Not mentioned in Pânini. As to its etymology, of. Pân. ii. 1. 65.

3 Pân. iv. 1. 99. Gana nadadi.

4 This Sâkhâ is spelt Sânkhyâyana, Sânkhyâyana, and Sânkhâyana. The last, bowever, the most correct spelling. See Pânini, Ganapâtha, as vâdi, and kunjâdi. This Sâkhâ is omitted by accident in MS. E. I. H.

5 Pân. iv. 1. 19 (text), Mâṇḍûka ; derivative, Mâṇḍûkâyana. See also

Pân. iv. 1. 119.

The Sais'ira Sâkhâ, however, may perhaps be considered as a subdivision of the Sâkala-s'âkhâ. Saisira, or S'isira is mentioned in the Purâṇas as one of the five S'âkala pupils, who propagated different S'âhâs of the Rigveda, all of them derived from the original recension of S'âkalya Vedamitra In the Vishṇu-purâṇa these five pupils or descendants of S'âkalya Vedamitra are called Mudgala, Gosvalu, Vâtsya, S'âlîya, and Sis'ira (Vishṇu-pur. 277) In the Vâyu-purâṇa their names are Mudgala, Golaka, Khâlîya, Mâtsya, Sais'ireya. In the commentary on the S'âkala-prâtis'âkhya are they called Mudgala, Gokula, Vatsya, S'aisira, and S'is'ira, according to the Paris MS, at the E. I. H.

इदं शास्त्र पार्षदाच्यमिक संपू णेमुत्तरत्र वस्ये वस्याम इत्यर्थः । शैशिरीये पारायणपाठ इति वाक्यशेषः । शैशिरीयायां संहितायामित्छर्थः । शैशिरी संहिता शिशिरदृष्टत्वात् । तथा पुराणे उक्तं । मुद्रलो गोकुलो वात्स्यः शैशिरः शिशिरस्तथा । पंचेते शाकलाः शिष्याः शासामेदप्रवर्तका इति । तथा च ऋग्वेदे शिशिरीयायां संहितायामिति । यथा ऋग्वेदे पारायणासाये शाकल्ये शैशिरीयक मिति वा। The verses to which this commentary refers are not in the MS.

- 39. Vaineyas.2
- 40. Vaidheyas.3
- 41. Audheyas.4
- 42. Mauneyas 5

Though the number of the Sakhas of the Yajur-veda is stated as eighty-six by the Charanavyûha, the names given, including the Vâjasaneyins, amount only to torty-three, exactly half the number expected. It is difficult to account for this, for although some other names are mentioned, for instance the Prâchya, Udîchya and Nairritya Kathas, yet this would not increase the number of Sâkhás sufficiently.

The largest number of Sakhas is ascribed to the Sama-veda. It is said to have been a thousand. The author of the Charanavyûha, however, confesses that the greater part of them no longer exist. Those remaining at the time when the Charanavyûha was composed were the seven Sakhas of the

11. Prachinayogyas. 1

12. Naigeya-Kauthumas.

The account given by the S'. K. D. is very different and in many places corrupt. Here we have, 1. the Asurayanîyas or Surayanîyas, 2. Vârtântaveyas, 3. Prânjalas, 4. Rigvarnabhedas, 5. Prâchînayogyas, 6. Jnânayogyas, 7. Rânâyanîyas. The Rânâyanîyas are subdivided into nine; Rânâyanîyas, 8. S'âthyâyanîyas (or Sârâyanîyas, Sâthyamugryas) 9. Sâtvalas (or Sâtyamudbhavas), 10. Maudgalas (not mentioned in the Bhâshya), 11. Knallalas, 12. Mahâkhallavas, 13. Lângalas, 14. Kauthumas, 15. Gautamas, 16. Jaiminîyas.

Of the Atharva-veda nine divisions are mentioned, but the names given are incomplete and corrupt. They are given here, with some

conjectural emendations from the MSS.3

- 1. Paippalâdas.4
- 2. Saunakas.5
- 3. Dâmodas.
- 4. Tottayanas,
- 5. Jayalas.
- 6. Bråhmapalås'as.
- 7. Kaunakhins.
- 8. Devadars'anins.6
- Châranavidyâs.

This list makes no distinction between old and new Charanas. If we had the whole Vedic literature before us, as it was living during ancient times in the traditions of numerous Bråhmanic families, it would be possible to determine which of these Charanas owe their origin to Såtras, which to Bråhmanas or Sanhitås. As it is, we can only infer that some Charanas, like those of the As'valåyanas, Hiranyakes'ins, Bhåradvåjins, Åpastambins, Baudhåyanas, Pårås'aryas, &c., are in all probability of modern origin, because the only works ascribed to their founders are Sûtra compilations. Their Sanhitås and Bråhmanas, whenever they are mentioned, seem to be the same as those of older Charanas, with but small modifications. Other Charanas, like those of the Paingins, Kaushîtakins, Aitareyins, Såtyåyanins &c., are not mentioned in connection with any Sûtras composed by authors bearing these names; and it is most likely, therefore, that they derive their origin

<sup>6</sup> Gana Saunakadi.

from authors whose names have been perpetuated in the titles of certain Brahmanas. Whether these Charanas were in possession of Satras is doubtful, nor have we any means of determining whether, for instance, a member of the Aitareyi-charaga, after adopting the Kalpasûtras of S'aunaka, would retain his allegiance to the Aitareyins or not. The ancient Sanhitâs used in these Brâhmana-charanas, and originally adopted from older Charanas, were not likely to be affected by considerable differences after their adoption. The fact that we never find a Kaushîtaki-sanhitâ or Paingi-sanhitâ quoted tends to show that the Charanas, which owe their independent constitution to the introduction of a Brahmana, retained in most instances the original text of their Sanhitâs. Charanas, lastly, like those of the Sâkalas, Bâskalas, Sais'iras, &c., whose names are connected neither with Sütras nor Brahmanas. but with Sanhitas only, must be referred to the earliest period of the formation of Vedic communities, and must have existed, as the hearers of their own traditional collection of hymns, before the composition of either Brahmanas or Sûtras. With regard to many Charanus, however, it will remain doubtful to which of these three classes they belong, until a larger number of Vedic works peculiar to each Charana becomes available. Charanas like those of the Madhyandinas and Kanvas must be referred to the Brahmana period, because their Sanhitas and Brahmanas are ascribed to one and the same teacher. This teacher, Yajnavalkya, is represented as the author of modern Brahmanas and we saw that, in all probability, his Sanhitâ was even more modern than his Brâhmanas. The fact however, that the Sûtras adopted by the Mâdhyandina and Kânva-charanas are ascribed to Kâtyâyana, shows that these Charanas existed certainly previous to the Sûtra period. With regard to the Sanhita-charanas it will always be difficult to determine how far their differences were fixed, if not originally called forth by the introduction of the Brahmanas. Most likely the Sanhita charanas are restricted to the Rig-veda. It is certain, at least, that no Brahmana belonging to any Veda was composed before the division of priest into Hotris, Udgatris, and Adhvaryus, -had taken place. Before that division there was but one collection of hymns, that of the Bahvrichas, and it is among the Bahvrichas only that we have any distinct traces of Sanhita-charanas.

It will always be very difficult to assign a distinct meaning to such terms as Charana and Sikha, because we have nothing that exactly corresponds to them in our own experience. Literary works, such as the Sakhas were, have assumed with us a much more tangible shape. They exist as books, and not merely as a body of thought handed down in schools, or in families. To read a sakha meant not only to go over it, but to take possession of it to guard it in the memory, and to enable others to read it by repeating it to them. A man who had read a book was himself the book: the soug of a poet had no outward existence except through those who heard and remembered it. A work once composed, might either wither for want of an audience, or grow, like a tree, of which every new listener would become a new branch. The idea of representing what we should call an edition of a hundred copies, by the simile of a branch, was a very natural one, and if we once adopt it and enter into the spirit of this Sanskrit idiom, we see that it is difficult to distinguish between the branch, as the book, and the branch, as the

reader; between the trust, and the trustee. It would be well, however, to speak of the former only as s'akha, and of the latter as the reader of a s'akha, while we should reserve the name of Charana for those ideal successions or fellowships to which all those belonged who read the same s'akha.

If it is difficult to describe what a Sakha and a Charana were, it is all the more necessary to state what they were not. Now a Charana was not the same as a Gotra or Kula. Gotra or Kula means a family. and the number of families that had a right to figure in the Brahmanic Peerage of India was very considerable. The Brahmans were proud of their ancestors, and preserved their memory with the most scrupulous care, as may be seen by the numerous treatises on the subject which are preserved to the present day. Madhaya, for instance, after stating who his fither, mother, and brothers were, what Sakha he followed. what Sûtra he had adopted adds at the end that his family descended from Bharadvaja. 1 Gotras, or families existed among Kshatriyas and Vais yas as well as among Brahmans. 2 Charanas were confirmed to the priestly caste. Gotras depended on a real or imaginary community of blood, and thus correspond to what we call families. Charanas depended on the community of sacred texts. They were ideal fellowships, held together by ties, more sacred in the eyes of a Brahman than the mere ties of blood. They were the living depositaries of the most sacred texts, and with the extinction of a Charana, the words which were believed to be the breath of God would have been lost without the hope of recovery. Members of different Gotras might belong to the same Charana. When the member of a Gotra became the founder of a new Charana, the new Charana might bear the name of its founder, and thus become synonymous but not identical, with a Gotra.

The names of the Charanas were naturally preserved as long as the texts which they embodied continued to be studied. The names of the Gotras were liable to confusion, particularly in later times, when their number had become very considrable. But the respect which the Brâhmans, from the very earliest time, paid to their ancestors, and the strictness with which they prohibited marriages between members of the same family, lead us to suppose that the genealogical lists, such as we find in the Brâhmanas, in the Sûtras, in the Mahâbhârata, in the Purânas, and even at the present day, present in their general outlines a correct account of the priestly families of India. All Brâhmanic families who keep the sacred fires are supposed to descend from the Seven Rishis. These are:—Bhrigu, Angiras, Vis'vamitra, Vasishtha, Kas'yapa, Atri, Agasti. The real ancestors, however, are eight in number:—Jamad squi, Gautama and Bharadaaja, Vis'vamitra,

1 श्रीमती जननी यस्य सुकोर्तिमायणः पिता। सायणा भोगनाथश्च मनावुद्धो सहोद्रौ॥ यस्य वैधायनं सूत्रं शाखा यस्व च याजुषी। भोरद्वाजं कुळं यस्य सर्वज्ञः स हि माधवः॥

<sup>&</sup>lt;sup>2</sup> Baudhâyana-sûtra-bhâshya. MS. E. I. H. 104, p, 91.

Vasishtha, Kas'yapa, Atri, Agastya. The eight Gotras which descend from these Rishis, are again subdivided into forty-nine Gotras, and these forty-nine branch off into a still larger number of families. The names gotra, vans'a, varga, paksha, and gana are all used in the same sense, to express the larger as well as the smaller families descended from the eight Rishis.

A Brahman, who keeps the sacrificial fire, is obliged by law to know to which of the forty-nine Gotras his own family belongs, and in consecrating his own fire he must invoke the ancestors who founded the Gotra to which he belongs. Each of the forty-nine Gotras claims one, or two, or three, or five ancestors, and the names of these ancestors constitute the distinctive character of each Gotra. <sup>1</sup> A list of these forms part of most of the Kalpa-sûtras, and I here give one of them from the 12th Book of As'valâyana's Śrauta-sûtras. <sup>2</sup>

List of the Forty-nine Gotras, according to As'valayana, xii. 10. seq. 1. THE BHRIGUS.

There are other lists of much greater extent, which may become useful in time for chronological calculations. In them the first branch of the Bhrigus, the Vatsas, count 73 names; among them such names as Saunakâvanâh (8). Pailâh (13), Paingalâyanâh (14), Pâṇinih (29), Vâlmîkayah (30). The Vidas comprise 13, the Arshtishenas 8, the Yaskas 20, the Mitrayus 11, the Vainyas 3, and the Sunakas 9 names. It would occupy too much space to print these lists here.

GOTRAS. 203

In order to prove that these lists were not merely arbitrary compositions, their practical bearing on two very important acts of the ancient Brahmanic society, the consecrating of the sacrificial fires, and

marriage, should be borne in mind.

When the fire is to be consecrated, Agni Havyavahana, the god who carries the libations to heaven, must be invoked. This invocation or invitation of Agni, is called pravara. Agni himself or the fire is called Arsheya, the offspring of the Rishis, because the Rishis first lighted him at their sacrifices. He is the Hotri as well as the Adhvaryu among the gods. Like the Hotri and Adhvaryu priests, he is supposed to invite the gods to the sacrifice, and to carry himself the obtation to the seat of the immortals. When therefore a Brahman has his own fire consecrated, he wishes to declare that he is as worthy as his ancestors to offer sacrifices, and he invites Agni to carry his oblations to the gods as he did for his ancestors. The names of these ancestors must then be added to his invitation, and thus the invitation or invocation of the ancestors came to be called pravara. For instance, if a Brâhman belongs to the family of the Mândûkeyas, he must know that the Mandakeyas belong to the Vatsas, and that the Vatsas are descended from Bhrigu, and invoke five ancestors. He must, therefore, like all members of the Vatsa-gotra, invoke Agni by the names of Bhargava, Chyâvana, Âpnavâna, Aurva, and Jâmadgna. If he belong to the family of Yajnavalkya, a branch of the Kus'ikas, descendants of Vis'vâmitra, he must invoke Agni by the name of Vis'vâmitra, Devarâta and Udala. This, at least, is the rule laid down in the Baudhayana-sûtra, with which the As'valayana-s?tra coincides, expect that it does not mention the Yajnavalkyas as a subdivision of the Kus'ikas. This custom was known at the time of the composition of the Brahmanas, and we have no reason to doubt that ever since the first establishment of Vedic sacrifices, the forty-nine families preserved the tradition of their sacred pedigree, and that their genealogies possess a certain historical value.2

This is confirmed still further if we consider the ancient Brahmanic marriage laws. To marry a woman belonging to the same Gotra, or having the same Pravara, was considered incest, and visited with severe penance. As valâyana (xii. 15.) says: "Asamânapravarair vivâhah." "Marriage takes place with persons who have not the same Pravara, i. e., who do not invoke the same Rishis as their ancestors." Apastamba says: "Sagotrâya duhitaram na prayacbehhet," "Thou shalt not give thy daughter to a man belonging to the same Gotra or family." Yâjnavalkya says: "Aroginîm bhrâtrimatîm asamânârshagotrajâm udvahet." "Let a man marry a woman who is free from disease,

तस्य (अग्नराहवनोयस्य) प्रकर्षण प्रार्थनानि तैस्तिमैत्रद्विभिरेकद्वितिपंचसंख्याकैविशिष्टानि एकार्षयाद्व्यार्षयास्त्र्यार्षयाः पंचार्षयाः प्रवरा इत्युच्यंते ॥
2 Thus we read in the Srauta-sûtras, of the Mânavas, that the Dikshita must say his name, the name of his Gotra, of his father, grandfather and great grandfather; a custom which, if observed as a sacred law, must have -preserved a genealogical knowledge for many generations. दीक्षिता ऽयमसाविति नाम गृह्याति। आमुष्यायणमिति गात्रं। अमुष्य पुत्र इति पितुनीम्ना। अमुष्य पैत्रिति पितामहस्य। अमुष्य नप्त्रिति प्रापतामहस्य।

who has brothers, and who is not the daughter of a man having the same ancestors and belonging to the same Gotra as himself." In each case severe punishments are threatened if a man transgress these rules knowingly, or even unknowingly. There are some special rules with regard to marriage, which differ again according to different Sûtras; of which the following, taken from As'valâyana, may serve as a specimen:

1. Persons who have the same Prayara must not intermarry.

Hence a Parâs'ara must not marry the daughter of Parâs'ara.

2. Person belonging to the same Gotra must not intermarry. Hence a Vis'vâmitra must not marry the daughter of a Vis'vâmitra.

3. There are exceptions to this rule among the Bhrigus and Angirasas. As a general rule, persons are called sagotra, if but one of the Rishis whom they invoke is the same. Hence an Upamanyu must not marry the daughter of a Parâs'ara, because the name of Vasishtha occurs in the tryârsheya pravara of both. But the three Gotras of the Bhrigus, from the Syaitas to the Sunakas, may intermarry. The first four Gotras of the Bhrigus must uot, neither the six first Gotras of the Gotamas. The Prishadas'vas, Mudgalas, Vishnuvriddhas, Kanvas, Agastyas, Haritas, Sankritis. Kapis, and Yaskas may intermarry among themselves, and with the Jâmadagnyas, &c. Dhirghatamas', on the contrary, Auchathyas and Kakshîvats are to be considered as members of one Gotra, nor are marriages allowed between the Bharadvâjâgnives'is, Rikshas, Sunga-Sais'iris, (or Sungas, Sais'iris), Katas, and, according to some, the Gargas.

It is clear from this that the science of genealogy, being so intimately connected, with the social and ecclesiastical system of the Brâhmans, must have been studied with great care in India, and that the genealogical lists which have been preserved to us in ancient works represent something real and his orical.

After we have thus gained an insight into the system by which the Brâhmanas were handed down from generation to generation, we now return to a consideration of the literary merits of these works. The Brahmanas represent no doubt a most interesting phase in the history of the Indian mind, but judged by themselves, as literary productions. they are most disappointing. No one would have supposed that at so early a period, and in so primitive a state of society, there could have risen up a literature which for pedantry and downright absurdity can hardly be matched anywhere. There is no lack of striking thoughts, of bold expressions, of sound reasoning, and curious traditions in these collections. But these are only like the fragments of a torso, like precious gems set in brass and lead. The general character of these works is marked by shallow and insipid grandiloquence, by priestly conceit, and antiquarian pedantry. It is most important to the historian that he should know how soon the fresh and healthy growth of a nation can be blighted by priesteraft and superstition. It is most important that we should know that nations are liable to these epidemics in their youth as well as in their dotage. These works deserve to be studied as the physician studies the twaddle of idiots, and the raving of madmen. They will disclose to a thoughtful eye the ruins of faded grandeur, the memories of noble aspirations. But let us only

try to translate these works into our own language, and we shall feel astonished that human language and human thought should ever have been used for such purposes. The following is a small specimen, and it has not been chosen to give an unfavourable idea of the Brâhmaṇas. It is the beginning of the Aitareya-brâhmaṇa, and explains a sacrificial act in itself full of meaning. Originally the Dîkshanîyâ, as this ceremony is called, was meant to represent, by simple and natural emblems, the new birth through which a man, on his first admission to the sacrifice, was believed to enter a new life. Let us see what became of this act in the hands of the Brâhmaus.

Agni is the first among the Gods, Vishnu the last. Between them

stand all the other deities.

They offer a Purolas'a to Agni and Vishnu which has been prepared

for the Dîkshanîyâ in eleven jars.2

They offer it indeed to all the deities of this ceremony, without any difference.3

For Agni is all the deities, Vishnu is all the deities.4

They are the two extremities of the sacrifice, Agni and Vishnu. Thus when men offer the Purolâs'a to Agni and Vishnu, they worship the deities at both ends.<sup>5</sup>

Here they say, if there be a Purolas'a prepared in eleven jars, and there be two gods, Agni and Vishnu, what rule is there for the two, or what division?

The Purolâs'a of eight jars belongs to Agni, for the Gâyatri verse consists of eight syllables, and the Gâyatrî is Agni's metre. That of

¹ अग्निर्वे देवानामवमे। विष्णुः परमस्तदंतरेण सर्वा अन्या देवताः॥

The commentator says that the gods among whom Agni and Vishnu are the first and last, are the gods to whom prayers are offered at the ceremonies belonging to the Agnishtoma. There are 12 prayers (s'astra), and the first is addressed to Agni (bhûr Agnir jyotih); the last, which is an agnimaruta, contains a verse in praise of Vishnu (Vishnor nu kam). See Kaushîtaki-brahmana, viii. 1. This passage proves nothing as to the relative dignity of Agni and Vishnu. In the Kaush.-br. Agni is called avarârddhya, Vishnu pararddhyas, and the Com. explains these terms as signifying the first in the former, and the first in the latter half.

अ। अ। वैष्णवं पुरोडाशं निर्वपति दोक्षणोयमे कादशकपालं ॥

A purolâs'a is a baked flour cake (pakvah pishtapindah) and nirvap, to strew, means originally to take four handfuls of rice from the cart and throw them into a winnowing basket. Here, however, it means the offering of the oblation which has been prepared in that manner. The original meaning of Dîkshâ is said to be "shaving or cleansing."

- <sup>3</sup> सर्वाभ्य एवेनं तहेवताभ्ये। Sनंतरायं निर्वपति॥
- 4 अग्निर्वे सर्वा देवता विष्णु. सर्वा देवताः॥
- <sup>5</sup> एते वै यज्ञस्यांत्ये तन्वौ यद्शिश्च विष्णुश्च तद् ग्रदाग्नावैष्णवं पुराडाशं निर्वपंत्यंतत एव तद्दे वान्ध्नुवंति ॥
- ह तदाहुर्यदेकादशकपालः।पुरोडाशो द्वावप्नाविष्णू कैनये।स्तत्र क्छिप्तिः का विभक्तिरिति॥

three jars belongs to Vishnu, for Vishnu strode thrice through this universe. This is their rule here, and this the division.

He who thinks himself without wealth, may offer a Chara in ghee

(clarified butter).2

On this earth no one succeeds who has no wealth?

The ghee in the Chara, is the milk of the woman, the grains belong to the man; both together are a pair. Thus the Chara increases him by this very pair with progeny and cattle, so that he may prosper. 4

He who knows this is increased with progeny.5

He who performs the New-moon and Full-moon sacrifices, has commenced with the sacrifice and with the gods. 6 After having sacrificed with the New-moon or Full-moon oblation, he may perform the Diksha on the same oblation and the same sacrificial seat. 7

This is one Dîkshâ.8

The Hotri must recite seventeen Sâmidhenî verses.9

े अष्टाकपाल आग्ने ये। ऽष्टाक्ष्मा वै गायत्री गायत्रमग्ने रखंदस्त्रिकपाले। वैष्णवस्त्रिहींदं विष्णुर्विचकमत सैनयो।स्तत्र वलक्षिः सा विभक्तिः॥

<sup>2</sup> घृते चर्र निर्वपेत याऽप्रतिष्ठिता मन्येत ॥

- <sup>3</sup> अस्पां वाव स न प्रतितिष्ठति ये। न प्रतितिष्ठति ॥
- 4 तद्यद्वतं तित्स्रये पये। ये तंडुलास्ते पुंजस्तिनमथुनंनेनैवैनं तत्प्रजया पशुनिः प्रजनयति प्रजात्ये॥

5 प्रजायते प्रजया पशुभिर्य एवं वेद् ॥

" आरब्धयत्ती वा एवं आरब्धदेवती ये। दर्शपूर्णनासाभ्यां यजत आप्रावाः स्येन वा हविषेष्ट्रा पैर्णमासेन वा तस्मिन्नेव हविषि तस्मिन्बर्हिषि दोक्षेतेषा एका

The commentator tries to show that the Dars'a-pûrṇa-mâsa sacrifices are connected with all other rites. Although the Soma sacrifice is not a modification of the Dars'a-pûrṇa-mâsa, still the Ishtis, as, for instance, the Dîkshanîyâ and Prâyanîyâ, are, and they form part of the Soma sacrifice. The Agnihotra also, with all its parts, does not follow the rules of the D. P., but it has reference to the Ahavanîya and the other sacred fires, and these fires must be placed by means of the Pavamâna-ishti. Now, as all the Ishtis are modifications of the D. P., the relation is established; and therefore the D. P. may be called the beginning of all sacrifices.

The commentator says; havih means the sacrifice, and barhih means the same, and he takes the two locatives in the sense of "after this new-

moon and full-moon sacrifice has been performed."

हविः शब्दवद्वहिःशब्दे। ऽपि यज्ञोपळक्ष हः । तस्त्रिज्ञानावास्याख्ये हिविषि यज्ञे तस्मिन्पार्णमासाख्ये वहिषि यज्ञेऽनुष्ठिते सति पश्चादेव दक्षिते॥

S The last words, "this is one Dîkshâ," indicate that there is another; that is to say, some allow the Soma sacrifice, which begins with the Dîkshâ, before the Dars'a-pûrna-mâsa.

<sup>9</sup> सप्तदश सामिधेनीरनुत्रू यात्॥

The number is stated, because generally the Sâmidhen îs are only fifteen in number. These fifteen were originally but eleven verses, of which the first and last are repeated three times.

The Prajapati, the Lord of the World, is seventeen-fold, the months are twelve, and the seasons five, by putting the Hemanta and Sis'ira seasons as one. So much is the year, and the year is Prajapati.

He who knows this prospers by these verses which reside in Praja-

pati.2

The sacrifice went away from the gods. They wished to find it by means of the Ishtis. The Ishtis are called Ishtis because with them they wished (ish, to wish) to find it.<sup>3</sup> They found it.<sup>4</sup>

He who knows this prospers after having found the sacrifice.5

What are called oblations (âhûti) are invocations (âhûti); with them

the sacrificer calls the gods, this is why they are called ahutis.6

They are called Utis, for by their means the gods come to the calling of the sacrificer (ayanti, they coms). Or because they are the paths and the ways, they are called ûtis; for they are the way to heaven for the sacrificer.

There they say, as another priest makes the oblation (scil. the Adhvaryn), then why do they call him the Hotri (the offerer), who

recites the prayers and formulas?8

Because he causes the deities to be brought near according to their station, saying, "Bring him, hring him," this is the reason why he is called Hotri; he is a Hotri (from avah, to bring near.

He who knows this, is called a Hotri. 10

He whom the priests initiate (by means of the Dîkshâ cerenony), he is made again to be an embryo (he is born again.)<sup>1</sup>

े सतर्शो वै प्रजापतिर्द्धार्य मासाः पंवर्तवा हेमंत्रशिशायाः समासेन तावांत्सवत्सरः संवत्सरः प्रजापतिः ॥

<sup>2</sup> प्रजापत्यायतनामिरेवामो राष्ट्रोति य एवं वेद् ॥ १ ॥

3 The Brâhmana gives here three fanciful etymologies of ishti, the technical name of the sacrifice; of ahuti, the oblations enjoined at the sacrifice; and of uti, another name for the same. The real etymology of ishti is not ish, to wish, but yaj, to sacrifice; of ahuti, not hvayati, to call, but juhoti, to offer; of uti, not ayati, to come, but avati, to protect.

4 यहां वै देवेभ्य उदक्र गामत्ति विष्टिमिः प्रैषमैच उत्यदि विष्टिमिः प्रैषमैच्छं-

स्न तयस्ता वा ऊतयस्त उ एवैतत्स्वगंयाणाः यजमानस्य भवंति ॥

8 तदाहुर्यद्न्या जुहोत्यथ याऽनु चाह यज्ञति च कस्मातं हे।तेत्याचक्षत इति ॥ The commentator says, that the proper name for the Hotri would seem to be Anuvaktri or Yashtri, because प्रानुवान्यां चानुवृते याज्यां च पठति ॥

े यद्वाव स तत्र यथाभाजनं देवता अनुमावशामुमावहेत्यावहयति तदेव है।तहीतत्वं होता भवति॥

10 है।तेत्येनमाचक्षते य एवं वेद् ॥ २ ॥

11 पुनर्वा पनमृत्विजा गर्भ कुर्वति यं दीक्षयंति ॥

They sprinkle him with water. 1

Water is seed; having thus given this to him, they initiate him.2

They anoint him with fresh butter (navanîta). Charified butter for the gods is (called) Ajya; for men Surabhighrita; for the manes Ayuta, for the embryos Navanîta. Therefore by anointing him with navanîta, they increase him with his own portion.<sup>3</sup>

They anoint his oyes with a collyrium.4

Anointing is light for the eyes. Having thus imparted light to him, they initiate hlm.

They rub him clean with twenty-one handfuls of Kus'a grass. 6 Him who is pure and has thus been cleaned, they initiate. 7

They take him to the hall.8

The hall is the womb for the pupil (dîkshîta). By taking him to the hall they take him (who was before represented as an embryo) into his womb.

In this true womb he sits, and hence he departs. 10

Therefore the fruit is borne in the true womb and brought forth from it. 11

Therefore let not the sun shine upon him in its rising or setting away from the hall nor let the priests speak to him. 12

They cover him with a cloth. 13

## <sup>1</sup> अद्भिरभिषंचंति॥

² रेतो वा आाः सरेतसमेवैनं तत्कृत्वा दीक्षयंति॥

<sup>3</sup> नवनीतेनाभ्यंजंति॥

आजयं वे देवानां सुरभिष्ठतं मतुष्याणामायुतं पितृणां नवतोतं गर्भाणां तद्यवन नीतेनाम्यंत्रति स्वेनैवेनं तद्भागधेयेन समर्थयंति

The commentator quotes a verse to the effect that molten ghee is called ajya; hardened it is called ghrta; slightly molten, it is called ayuta; and well seasoned it is called surabhi. But the Taittiriyas say, "ghrita is for the gods, astu for the manes, nishpakva for men." Astu is here the same as ayuta, slightly molten, and nishpakva, quite liquid.

आजंत्येनं ॥

- 4 तेजा वा एतद्क्ष्यार्यदांजनं सतेज तमेवैनं तत्कत्वा दीक्षयंति
- 🤊 एकविंशत्या दर्भपिंजूहैः पावयंति ॥
- शुद्धमेवैनं तत्पूतं दोक्षयं ति ॥
   दोक्षितविमितं प्रपादयंति ॥

The hall is called Dîkshit -vimita, because it was made (vimita) for the initiated (dîkshita). It is commonly called Prachînavins'a.

- <sup>8</sup> ये।निर्वा एवा दीक्षितस्य यद्दोक्षितविषितं ये।निमेत्रैतं ततस्वां प्रपाद्यंति ॥

  - 12 बाससा प्रोर्णवंति॥

This cloth is the caul in which the pupil is to be born; thus they cover him with the caul 1

The skin of a black antelope is his next cloak.2

Next to the eaul is the Jarâyu; thus they cover him with the Jarâyu.<sup>3</sup>

He closes his hands.4

With closed hands the embryo lies, with closed hands the child is born. As he closes his hands, he holds the sacrifice, and all its gods between his hands.<sup>5</sup>

They say, there is no confusion for him who has first finished his Dîkshâ, for his sacrifice is held fast (between his hands), and the gods are so likewise. Therefore there can be no loss for him, like that which falls on him whose Dîkshâ was finished later.

After having put off his cloak, he descends to the bath. Therefore

an embryo is born after he is separated from the Jarâyu.7

He descends together with his cloth—therefore a child is born toge-

ther with the caul.8

For him who has not offered a sacrifice before, let (the Hotri) recite two puronuvåkyås, "tvam agne saprathå asi," (v. 13.4.) for the first, "soma yås te mayobhuvah" (i. 91.9.) for the second portion of the ghee.9

<sup>1</sup> उरुवं वा एतद्दीक्षितस्य यद्वास उरुवेनैवैनं तत्त्राणुंवात ॥

<sup>2</sup> कृष्णाजिनमुत्तरं भवति॥

<sup>३</sup> उत्तरं वा उठवाजजरायु जरायुणेवैनं तत्रोर्ण्वति ॥

4 मुष्टी कुरुते॥

<sup>5</sup> मुष्टी वे कत्वा गर्भोऽ तः शेते मुण्टी कत्वा कुमारी जायते तद्यनमुण्टी कुरुते यज्ञे चैव तत्सर्वाश्च देवता मुण्ट्यो कुरुते ॥

ं तदाहुर्न पूर्वदीक्षिणः संभवाऽस्ति परिगृहोता वा पतस्य यज्ञः परिगृहीता

देवता नैतस्यार्त्तरस्त्यपरदीक्षिण एव यथा तथेति ॥

It is said by the commentator that if two or more Brâhmans perform the Soma sacrifice on the same spot and at the same time, they commit a sin, which is called sansava, confusion of libations. They ought to be separated by a river or a mountain. He, however, who has finished his Dîkshâ first and holds the gods between his closed hands, is not exposed to the consequences of the sansava, because the gods will be with him and n t with the other man whose Dîkshâ was finished later.

- र उन्तुच्य कृष्णाजिनमवभृयमभ्यवैति तस्त्रान्युक्ता गर्भा जराये।जीयंते ॥
- 8 सहैव वाससाभ्यवैति तस्मात्सहैवाल्बेन कुमारा जायते ॥ ३॥
- त्वमग्ने सप्रथा असि सेाम यास्ते मयाभुव इत्याज्यभागयेः पुरानुवाक्ये
   अनुव्याद्यः पूर्वमनीजानः स्यात्तस्मे ॥

After the general remarks on the Dîkshanîyeshti which were given in the first three sections, without any particular regard to the offices of the Hotri the fourth section begins with the ceremonial rules for the Hotri. The Hotri has to recite certain verses on being ordered to do so by the Adhvaryu.

(The third line of the first verse is) "through thee they carry out the sacrifice;" and by reciting this line the Hotri carries out the sacrifice for the pupil.1

For him who has offered a sacrifice before, let the Hotri recite instead "Agnih pratnena manmanâ," (viii 44. 12.) and "soma gîrbhish tvâ

vayam" (i 91. 11.)<sup>2</sup>

By saying "pratnam" (former) a word which occurs in the first verse, he alludes to the former sacrifice.

Both these rules (of using certain verses for a man who has not,

and for a man who has, sacrificed before) are not to be observed.4

Let him rather use the two verses on the destruction of Vritra "Agnir vritranî janghanat," (vi. 16. 24.) and "tvam Somâsi satpatih" (i. 91. 5.)

For he whom the sacrifice approaches destroys Vritra; therefore

verses on the destruction of Vritra are to be used.6

Having enjoined these two verses for the introductory ceremony of the offering of ghee, the Brâhmaga now proceeds to detail the yâjyânu-

vakyas for the principal offering,

"Agnir mukham prathamo devatânâm," &c., is the Puronuvâkyâ, "Agnis' cha Vishno tapa uttamam manah," etc., the Yâjyâ verse. These two verses on Agni and Vishnu are correct in form. The correctness of a sacrifice consists in its correctness of form; it consists in this that the verse recited alludes to the act performed.

Agni and Vishnu are the guardians of the Dîkshâ among the gods. They are the lords of the Dîkshâ. Therefore as the oblation is to Agni and Vishnu, they who are the lords of the Dîkshâ are pleased and grant

the Dîkshâ, saying, Let those who perform this rite be initiated.8

¹ त्वया यज्ञ वितन्वत इति यज्ञमेवास्मा एतद्वितने।ति॥

- <sup>2</sup> अग्निः प्रह्मे न मन्त्रना साम गीर्भिष्टा वयमिति यः पूर्वमोजानः स्यात्तस्मै ॥
- <sup>3</sup> प्रतिमिति पूर्वं कर्माभिवद्ति॥
- 4 तत्तनादृत्यं॥
- 🏮 अग्निर्वत्राणि जंघनस्यं से।मासि सत्पतिरिति वार्त्रघावेव कुयात् ॥

<sup>6</sup> वृत्रं वा एष हंति यं यझ उपनमति तस्माद्वात्रे झावेव कर्तव्याविति॥

The reason which the commentator gives for his extraordinary proceeding is, that in each of the two couples of verse; which were first recommended, the first verse only contained an allusion to the peculiarities of the sacrifices, while the two verses now enjoined both treat of the destruction of Vritra.

<sup>7</sup> अग्निर्मु खं प्रथमे। देवनानामश्चिश्च निष्णे। तप उत्तमं मह इन्याञ्च।वैष्णवस्य हविषा याज्यानुवाक्ये भवतः। आञ्चावैष्णव्यो ह्वपसमृद्धे पतद्वे यज्ञस्य समृद्धं

पद्रपसमृद्धं यत्कर्म क्रियमाणसृगमिवद्ति ॥

Instead of saving "anuvâkyâyâjya," because the anuvâkyâ comes before the yâjyâ, the compound yâjyânuvâkye is formed, the shorter word, according to grammar, stinding first in a Dvandva compound. The verses are not in the s'âkala-s'âkhâ of the Rig-veda.

<sup>8</sup> अग्निश्च ह वै विष्णुश्च देवानां दीक्षापाली तौ दीक्षाया ईशाते तद्यदाग्ना-

They are Trishtubhs (by their metre), in order that they may give

bodily strength.1

Having explained the verses used by the Hotri at the principal part of the sacrifice, the Brâhmana adds some rules on the Svishţakrit verses.

He who wishes for beauty and for wisdom, let him use the two Gâyatrî verses of the Svishtakrit.

The Gâyatrî is beauty, full of wisdom.4

He who knowing this uses the two Gâyatrîs becomes possessed of beauty and wisdom.

He who desires long life, let him use two Ushnih verses.6

Ushnih is life.7

He who knowing this uses the two Ushnihs, arrives at any age.8

He who desires heaven, let him use two Anushtubhs.9

There are sixty-four syllables in the two Anushtubhs, and three are those worlds, (earth, sky and heaven) each of twenty-one parts. With each twenty-one syllables he ascends to these worlds, and with the sixty fourth he stands firm in heaven. 10

He who knowing this uses the two Anushtubhs stands firm.<sup>11</sup> He who desires wealth and glory, let him use two Brihatîs.<sup>12</sup> The Brihatî is wealth and glory.<sup>13</sup>

## वैष्णवं हिवर्मवित यौ दीश्वाया ईशाते तौ प्रोतौ दीश्वां प्रयच्छतां यौ दीश्वियतारी तौ दीश्वयेतामिति॥

- <sup>1</sup> त्रिष्ट्रमौ भवतः संद्रियत्वाय ॥ ४ ॥
- <sup>2</sup> They are "Sa havyavâl am irtyah," (iii 11. 2.) and "Agnir hotâ purohitah." (iii. 11. 1.)
  - <sup>3</sup> गायत्र्यो स्विष्टकृतः संयाज्ये कुर्वीत तेजस्कामे। ब्रह्मवर्चसकामः॥
  - 4 तेजा वै ब्रह्मवर्चसं गायत्री॥
  - ं तेजस्वो ब्रह्मवर्चेती भवति य एवंविद्वान् गायत्र्यौ कुहते॥
  - <sup>6</sup> उष्णिहावायुः कामः कुर्वीत ॥

They are "Agne vâjasya gom tah," (i. 79. 4) and "St idhano vasush kavih." (i. 79. 5.)

- <sup>7</sup> आयर्वा उष्णिक ॥
- 8 सर्वमायरेति य एवविद्वानुष्गिहै। कुहते॥
- <sup>9</sup> अनुष्टुभी स्वर्गकामः कुर्वीत॥

They are "Tvam Agne vasûn." (i. 45. 1.)

- 10 द्वरीर्वा अनुष्टुमोश्चतुःषष्टिरश्चराणि त्रय इम ऊद्ध्वा एकविंशा छोका एकविंशत्यैकविंशत्यैवेमाँ छोकात्रोहति स्वर्ग एव छोके चतुःषष्टितमेन प्रतिति-प्रति॥
  - ें। प्रतिष्ठिति य एवं विद्वाननुष्टुभे। कुरुते ॥
  - 12 बृहत्या श्रोकामे। यशस्कामः कुर्वीत ॥ They are "Ena vo agnim (vii 16 1.), and Udasya s'ochih." (vii. 16. 3.).
    - <sup>13</sup> श्रोचे यशश्छंदसां बहतो॥

He who knowing this u es two Brihatis gives himself wealth and glory.1

He who loves the sacrifice, let him use two Panktis.2

The sacrifice is like a Pankti.3

The sacrifice comes to him who, knowing this, uses two Panktis.4

Let him who desires strength, use two Trishtubhs. Trishtubh is strength, which is vigour and power. 6

He who knowing this uses two Trishtubhs, becomes strong, vigorous and powerful.

Let him who desires cattle, use two Jagatîs.8

Cattle is Jagatî-like.9

He who knowing this uses two Jagatis, becomes rich in cattle. 10

Let him who desires food, use two Virâj verses. 11

Virâj is food. 12 (virâj, to shine.)

Therefore he who has the largest food here shines most on earth; this is the reason why it is called Virâj (shining). 13

He who knows this shines forth among his own people; he is the

best of his friends.14

All these are voluntary verses. We now come to those which are always to be used.

Now the metre Viraj possesses five powers.

Because it has three lines, therefore it is Gâyatrî and Ushnih (which also have three lines). Because its lines have each eleven syllables, therefore it is Trishtubh. Because it has thirty-three syllables, therefore it is Anushtubh. (If it be said that the two Virâj verses in question, i. e., "preddho agne," &c., and "imo agne," &c., have only thirty-one and thirty-two syllables, it must be remembered that)

<sup>1</sup> श्रियमेव यश आत्मन्धत्ते य एवंविद्वान्बृहत्यौ कुरुते ॥

² पंकी यज्ञकाम: कुर्वीत ॥

They are "Agnim tam manye." (v. 6. 1.)

<sup>3</sup> पांको वै यज्ञः॥

4 उपैनं यज्ञो नमति य एवं विद्वान् पंकी कुरुते॥

ठ त्रिष्टभौ वीर्यकामः कुर्वीत ॥

They are "Dve virûpe charatah." (i. 95. 1.)

<sup>6</sup> ओजे। वा इंद्रियं वीर्यं त्रिष्टुप्॥

<sup>7</sup> ओजस्वीदियवान् वीर्यवान्मवति य एवं विद्वाँस्त्रिष्टभौ कुरुते ॥

8 जगत्यौ पशुकामः कुर्वीत ॥

They are "Janasya gopā." (v. 11. 1.)

<sup>9</sup> जागता वैपशवः॥

10 पशुमान्भवति य एवं विद्वान् जगत्यौ कुरुते॥

💶 विराजावन्नाचकामः कुर्वीत 🛚

They are "Preddho agne" (vii. 1. 3.), "Imo agne," (vii. 1. 18.)

12 अन्न वै विराट्॥

ा तस्माद्यस्यैवेह भूयिष्ठमन्नं भवति स एव भूयिष्ठं लोके विराजित तिहरा-जा विराटत्वं॥

14 वि स्वेषु राजति श्रेष्ठः स्वानां भवति य एवं वेद ॥ ५॥

metres do not change by one syllable or by two. The fifth power is

that it is Viraj (shining).1

He who knowing this uses the two Viraj verses, obtains the power of all metres, retains the power of all metres, obtains union, uniformity and unison with all metres, eats and has to eat, has food together with his family.<sup>2</sup>

Therefore the two Viraj verses are certainly to be used, those which

begin with "Preddho agno" and "Imo agne."3

Dikshâ is right, Dikshâ is truth, therefore a man who performs the Dikshâ must speak the truth.

Now they say, what man can speak all truth? Gods are full of truth, men are full of falsehood.<sup>5</sup>

Let him make each speech with the word "Vichakshana." (which means, let him put "vichakshana" at the end of the name of a person whom he addresses.)

The eye is vichakshana, for with it he sees clearly (vi-chaksah, to perceive.)

The eye is established as truth among men.8

Therefore people say to a man who tells something, "Hast thou seen it?" And if he says "I saw it," then they believe him. And if one sees a thing oneself, one does not believe others, even many.

## <sup>।</sup> अथे। पंत्रवोर्यं वा एतच्छंदे। यद्विराट ॥

यत् त्रिपदा तेने िणहानायभ्यौ यहस्या ए हादशासराणि पदानि तेन तिष्टुप् यत् त्रयस्त्रिंशदक्षरा तेना नुष्टुम्न वा एकेनाक्षरेण छंदांसि वियंति न द्वाभ्यां । यद्विराट् तत्पंचमं ॥

- <sup>2</sup> सर्वेषां छंइसां वोर्यमवरुंद्धे सर्वेषां छंदसां वोर्यमश्तुते सर्वेषां छंदसां सायुक्यं सरूपतां सलेकतामश्तुतेऽकादाऽक्रपतिर्भवत्थश्तुते प्रजायाकाद्यं य एवंविद्यान् विराजा कुरुते ॥
  - <sup>3</sup> तस्त्राद्विराजावेव कर्तव्ये । प्रेद्धो अग्न इमे। अग्न इत्येते ॥
  - 4 ऋतं वाव दीक्षा सत्यं दीक्षा तस्याहीक्षितेन सत्यमेव विद्तव्यं।

Right (rita) and truth (satya) are said to differ, inasmuch as rita means a true conception, satya, a true speech.

<sup>5</sup> अथो खल्वाहुः काेऽर्हति मनुष्यः सर्वं सत्यं विदतुं सत्यसहिता वै देवा अन्तसहिता मनुष्या इति॥

<sup>6</sup> विचक्षणवती वाचं वदेत्॥

For instance, instead of saying, "Devadatta, bring the cow," let him say, "Devadatta, vichakshana, bring the cow." According to Apastamba, vichakshana ought to be used after the names of a Kshatriya and Vais'ya, but "chanasita" after the name of a Brahman.

<sup>7</sup> चक्षुर्वे विचक्षणं वि ह्ये नेन पश्यतीति ॥ Kausha -br. चक्षुर्वे विचक्षणं चक्षण हिविपश्यति ॥

<sup>8</sup> एतद वै मनुष्येषु सत्यं निहितं यश्युः॥

° तस्मादा बञ्चाणमाहुरद्वागिति स यद्यर्शमित्याहाथास्य श्रद्द्वति यद् वै स्वयं पश्ययि न बहुनां चनान्येषां श्रद्धाति॥ Therefore let a man make each speech with the word "Vichakshana;"

then his attered speech becomes full of truth. 1

The next extract is from the Kaushîtaki-brâhmana (xxvi. 5.), It will show how completely the true character of the sacrifice had been forgotten, and how much importance was attached to mere trifles.<sup>2</sup> It is intelligible, wherever there is an established ceremonial, and priests appointed to watch over it, that certain rules should be laid down for remedying any mistakes that may have occurred in the performance of a sacrifice. The chapter of accidents is a large one, and the Brâhmans have spared no pains in laying down the most complicated rules, how to counteract the consequences of a real mistake. The rules of penance or práyas chitta occupy, in several instances, one-third of the whole collections of ceremonial rules. But this was not enough. Discussions were raised, not only how to remedy mistakes, that had been observed at the time; but how to counteract the effects of mistakes, unobserved during the performance of the sacrifice. To settle this question, the Kaushîtakins quote the following story:—

"And then Pratardana, the son of Divodâsa, (a famous king) having gone to the sacrifice of the Rishis of Nimisha, sat down in their presence and asked the question: 'If the Sadasya (the superintending priest, according to the ceremonial of the Kaushîtakins) should make known a past blunder, or any one of the priests should observe it, how would you be free from sin?' The priests were silent. Their Brahman was Alîkayu, the descendant of Vâchaspati. He said, 'I do not know this, alas! Let us ask the teacher of our fathers, the elder Jâtukarnya., He asked him: 'If the performer himself should observe a past blunder, or some one else should make it known, how could that blunder become not a blunder? by saying the passage again, or by an offering?' Jâtukarnya said, 'The passage must be said again.' Alîkayu asked him again: Should he say again the Śistra, the Anuvachana. the Nigada, the Yâjyâ, or whatever elses it may be, from beginning to end? Jâtukarnya said: As far as the blunder extends, so far let him say it

¹ तस्माद्विचक्षणवतीमेव वाचं वदेत्सत्ये।त्तरा हैवास्यः वागुदिता भवति भवति ॥ ६ ॥

² अथ ह स्माह दैवादासिः प्रतद्ना नैमिषीयाणां सत्रमुपगम्यापास्य विचि-कित्सां पप्रच्छ ययिकांतमुख्यणं सदस्या बोधयेतिर्द्वजां वान्यतमा बुध्येत कथं वोऽनुख्यणं स्यादिति त उ ह तूष्णोमासुस्तेषामळीकयुर्वाचस्पता ब्रह्मास स होवाच नाहमेतद्वे द हंत पूर्वेषामाचार्यं स्थविरं जातुकर्ण्यं पृच्छानोति त ह पप्रच्छ ययि-कांतमुख्यणं कर्ता वा स्वयं बुध्येतान्या वा बेधयेत कथं तदुख्यणमनुख्यणं भवेतपुनर्वचनेन वा मंत्रस्य होमेन वेति पुनर्वाच्या मंत्र इति ह स्माह जातुकण्यं-स्तमळीकयुः पुनः पप्रच्छ शस्त्रं वानुचचनं वा निगदं वा याज्यां वा यद्वान्यत्सर्व तत्पुनर्वूयादिति यावन्मात्रमुख्यणं तावख्यूयद्वचं वार्द्धचं वा पदं वा पदं वा वर्णं वेति ह स्माह जातुकण्योऽथ ह स्माह कीषीतिकर्वाद्व होतारा यञ्चस्य किंचिदुख्यणमनुध्य-मानाः कुर्वति सर्व तद्यिर्देवो होतानुख्यणं कराति तदेतद्वचाभ्युदितं॥

again, whether a verse, a half verse, a foot, a word, or a letter. Then said Kaushîtaki: Let him not say the passage again, nor let him perform a penance offering (Kaush.-br. vi. 11.) It is not a blunder,' so said Kaushîtaki; 'for whatever blunder the Hotris commit at the sacrifice without being aware of it, all that, Agni, the divine Hotri, makes whole; and this is confirmed by a verse from the Rig-veda.'"

There are, however, othere passages in the Brâhmanas, full of genuine thought and feeling, and most valuable as pictures of life, and as records of early struggles, which have left no trace in the literature of other nations. The story of Sunahas'epha. for instance, which we find in the Aitareyabrahmana, and in the Sânkhâyana-sûtras is interesting in many respects. It shows that at that early time, the Brâhmans were familiar with the idea of human sacrifices, and that men who were supposed to belong to the easte of the Brâhmans were ready to sell their sons for that purpose. The text of this story, together with the various readings, as gathered from the Sânkhayana sûtras will be printed in the appendix.

"Haris'chandra, the son of Vedhas, of the family of the Ikshvakus, was a king without a son. He had a hundred wives, but had no son by them. In his house lived Parvata and Narada. He asked Narada: "Tell me, O Narada, what do people gain by a son, whom they all wish

for, as well those who reason as those who do not reason?"

Being asked by one verse, Nårada 3 replied in ten verses:

If a father sees the face of a son, born alive, he pays a debt in him, and goes to immortality.

'The pleasure which a father has in his son is greater than all the pleasures that are from the earth, from the fire, and from the waters.

Always have the fathers overcome the great darkness by a son; for a Self is born from his Self; it (the new-born Self, the son) is like a ship, full of food, to carry him over.

What is the flesh? What is the skin? What are the hairs? What the heat? Try to get a son, you Brahmans; he is undoubtedly the world.

'Food is life for men, clothing his protection, gold his beauty, cattle his strength. His wife is a friend, his daughter is a pity<sup>4</sup>; but the son is his light in the highest world.

<sup>1</sup>See Professor Wilson's Eassay on Human Sacrifices in the Veda, and Professor Roth, in Weber's Ind. Studien, i. p. 457.

<sup>2</sup> Haris'chandra was, according to the Puranas, the son of Tris'anku, king of Ayodhya. whom Vasishtha had cursed, and who made Vis'vamitra his Purohita. Vis'vamitra in the Brahmana is represented as one of Haris'chandra's priests, but the office of Brahmana is held by Vasishtha. In the Ramayana, the S'acrifice of Sunahs'epha takes place under King Ambarîsha.

3 Narada is known as a frequent interlocutor in the epic and puranic poetry, particularly in dialogues where moral and legal precepts are

given. Cf. Burnouf Bhagavat purana, vol. iii. preface.

4 The commentator gives a very different version of this line. He takes mala, which usually means matter, or mud, to signify the state of life of a Grikastha, or householder. Ajina, the skin, particularly of the antelope (aja), he takes as a symbol of the Brahmacharin state, because

'As husband he embraces a wife, who becomes his mother, when he becomes her child, having been renewed in her, he is born in the tenth month.

'A wife is a wife (jâyâ) because man is born (jâyate) again in her. She is a mother (âbhûti) because he brings forth (âbhûti); a germ is hidden in her.

'The gods and the old ages brought great light unto her. The gods said to men: "In her you will be born again."

'There is no life for him who has no son, this the animals also know.

'The path which those follow who have sons and no sorrows, is widely praised and happy. Beasts and birds know it, and they have

young ones everywhere.'

Having thus spoken, he said to him: 'Go to Varuna the king, and say: May a son be born to me, and I shall sacrifice him to you.' The king assented, he went to Varuna the king, and said: 'May a son be born to me and I shall sacrifice him to you.' Varuna said, 'Yes.' A son was born to him, called Rohita. Then Varuna said to Haris'chandra: 'A son is born to thee, sacrifice him to me.' Haris'chandra said: 'When an animal is more than ten days old, it can be sacrificed. May he be older than ten days and I shall sacrifice him to you.'

Varuna assented. The boy was more than ten days old, and Varuna said: 'He is older now than ten days, sacrifice him to me.' Haris'chandra said: 'when an animal's teeth come, then it can be sacrificed. May

his teeth now come, and I shall sacrifice him to you.'

Varuna assented. His teeth came, and Varuna said: 'His teeth have come, sacrifice him to me.' Haris'chandra said: 'When an animal's teeth fall out, then it can be sacrificed. May his teeth fall out, and I

shall sacrifice him to you.'

Varuna assented; his teeth fell out, and Varuna said: 'His teeth have fallen out, sacrifice him to me.' Haris chandra replied: 'When an animal's teeth come again, then it can be sacrificed. May his teeth come again, and I shall sacrifice him to you.'

Varuna assented. His teeth came again, and Varuna said: 'His teeth have come again, sacrifice him to me.' Haris'chandra said: 'When a warrior (kshatriya) is girt with his armour, then he can be sacrificed. May he be girt, and I shall sacrifice him to you.'

Varuna assented. He was girt, and Varuna said: 'He has been

girt, let him be sacrificed to me.'

Haris'chandra assented. He addressed his son and said: 'Child, he gave you to me; Death! that I sacrifice you to him.' The son said, 'No!' took his bow, and went to the forest, and lived there for a year.

the pupil wears a skin. S'mas'runi, used in the singular for beard, he takes as a symbol for the Vanaprastha. because be does not shave any more; and tapus he explains to mean the penance practised by the Parivadjaka.

Why the birth of a daughter was considered a pity we learn from the

following verse (metre Rathoddhatâ) :-

संभवे स्वजनदुःखकारिका। संप्रदानसमयेऽर्थहारिका। यौवनेऽपि बहुदेशकारिका। दारिका हृद्यदारिका पितुः॥ And Varuna seized Haris'hehandra, and his belly swelled This Rohita heard and went from the forest to the village (grâma). Indra, in the form of a man, went round him, and said: 'For a man who does not travel about there is no happiness, thus we have heard, O Rohita! A good man who stays at home is a bad man. Indra is the friend of him who travels. Travel.'

Rohita thought, a Brahman has told me to travel, and thus he travelled a second year in the forest. When he went from the forest to the village, Indra, in the form of a man, went round him, and said:

A traveller's legs are like blossoming branches, he himself grows and gathers the fruit. All his wrongs vanish, destroyed by his exertion

on the road. Travel!'

Rohita thought, a Brâhman has told me to travel, and thus he travelled a third year in the forest. When he went from the forest to the town, Indra, in the form of a man, went round him, and said:

'The fortune of a man who sits, sits also; it rises, when he rises; it sleeps, when he sleeps; it moves well when he moves. Travel!'

Rohita thought, a Brahman has told me to travel, and thus he travelled a fourth year in the forest. When he went from the forest to the town, Indra, in the form of a man, went round him, and said:

'A man who sleeps is like the Kali age; a man who awakes is like the Dvapara age; a man who rises is like the Treta age; a man who

travels is like the Krita age. Travel!'

Rohita thought, a Brâhman has told me to travel, and thus he travelled a fifth year in the forest. When he went from the forest to the town, Indra, in the form of a man, went round him, and said:

A traveller finds honey, a traveller finds sweet figs. Look at the

happinese of the sun, who travelling never tires. Travel!

Rohita thought, a Brâhman has told me to travel, and thus he travelled a sixth year. He met in the forest a starving Rishi, Ajîgarta, the son of Suyavasa. He had three sons, S'unahpuchha, S'unahs'epha, and S'unolangula. Rohita said to him: 'Rishi, I give you a hundred cows, I ransom myself with one of these thy sons.' The father embraced the eldest son, and said: 'Not him.' 'Nor him,' said the mother, embracing the youngest. And the parents bargained to give Sunahs'epha, the middle son. Rohita gave a bundred, took him, and went from the forest to the village. And he came to his father, and said: 'Father, Death! I ransom myself by him.' The father went to Varuna, said: 'I shall sacrifice this man to you.' Varuna said, 'Yes, for a Brâhman is better than a Kshatriya.' And he told him to perform a Râjasûya sacrifice. Haris'chandra took him to be the victim for the day, when the Soma is spent to the gods.

Vis'vanitra was his Hotri priest, Jamadagni his Adhvaryu priest, Vasishtha, the Brahman, Ayasya, the Udgatri priest. When Sunahs'epha had been prepared, they found nobody to bind him to the sacrificial post. And Ajîgarta, the son of Sûyavasa said: Give me another hundred, and I shall bind him.'2 They gave him another hundred, and he

This is one of the earliest allusions to the four ages of the world.

<sup>&</sup>lt;sup>2</sup> Langlois, in his translation of the Harivans'a (i. 124.), takes a different view of this circumstance. According to his translation Sunahs'epha

bound him. When he had been prepared and bound, when the Aprî hymns had been sung, and he had been led round the fire, they found nobody to kill him. And Ajîgarta, the son of Sûyavasa said: 'Give me another hundred, and I shall kill him.' They gave him another hundred, and he came whetting his sword. Then S'unahs'epha thought, They will really kill me as if I was not a man. Death! I shall pray to the gods.' He went with a hymn to Prajapati (Lord of the World), the first of gods. Prajapati said to him: 'Agni (fire) is the nearest of gods, go to him.' He went with a hymn to Agni, and Agni said to him: Savitri (the progenitor) rules all creatures, go to him.' He went with a hymn to Savitri, and Savitri, said to him.' Thou art bound for Varuna the king, go to him.' He went with a hymn to Varuna the king, and Varana said to him: 'Agni is the mouth of the gods the kindest god, praise him, and we shall set thee free.' Thus he praised Agni, and Agni said to him: Praise the Vis've Devâh, and we shall set thee free. Thus he praised the Vis've Devâh, and they said to him: Indra is the greatest, strongest, mightiest, and friendliest of the gods, praise him, and we shall set thee free.' Thus he praised Indra, and Indra was pleased, and gave him in his mind a golden car, which Sunahs'epha acknowledged by another verse. Indra said to him; 'Praise the As' vinau, and we shall set thee free.' Thus he praised the As'vinau, and they said to him: 'Praise Ushas (dawn), and we shall set thee free.' Thus he praised Ushas with three verses. While each verse was delivered, bis fetters were loosed, and Haris'chandra's belly grew smaller, and when the last verse was said, his fetters were loosed, and Haris'chandra well again."

This story is chiefly interesting as revealing to us three distinct elements in the early social life of India. These are represented by the royal or reigning family of the Ikshvakus, by their priests or ministers belonging to several famous Brahminical races, and by a third class of man, living in the forests, such as Ajigarta and his three sons. It is true that Ajîgarta is called a Rishi, and one of his sons a Brâhman. But even if we accept the Aryan origin of Ajîgarta, the seller and butcher of his own son, it is important to remark how great a difference there must have been between the various Arvan settlers in India, Whether we ascribe this difference to a difference in the time of immigration, or-whatever other reason we may assign to it, yet there remains the fact, that, with all the vacuted civilisation of the higher Aryan classes, there were Aryan people in India to whom not only a young prince could make the offer of buying their children but where the father offered himself to bind and kill the son, whom he had sold for a hundred cows. This was a case so startling to the later Brahmans, that the author of the Laws of Manu was obliged to allude

<sup>&</sup>quot;avait e'te' dans une autre existence un des coursiers attele's au char du soleil." Langlois reads in the text Haridas'va, which he takes as a name of the sun with green horses.

The commentator observes here, that although at a sacrifice men and wild beasts were bound to the post, yet both beasts and men were set free immediately after the paryagni-karanam (purification by fire, carried round), and only animals like sheep, etc., were killed.

to it, in order to defend the dignity of his easte. 1 Manu says, that hunger is an excuse for many things, and that Ajigarta, although he went to kill his own son, was not guilty of a crime, because he did so to appease his hunger. Now the author of the Aitareya-brahmana certainly does not adopt this view, for Ajigarta is there, as we shall see, severely abused for his cruelty, so much so, that his son, whom he has sold, considers himself at liberty to leave the family of his parents, and to accept the offer made by Vis'vamitra of being adopted into his family. So revolting, indeed, is the description given of Ajîgarta's behaviour in the Brahmans, that we should rather recognise in him a specimen of the un-Arvan population of India. Such a supposition, however, would be in contradiction with several of the most essential points of the legend, particularly in what regards the adoption of S'unahs'epha by Vis'vâmitra. Vis'vâmitra, though arrived at the dignity of a Brahman, clearly considers the adoption of S'unahs'epha Devarâta, of the famous Brâhmanic family of the Angirasas, as an advantage for himself and for his descendants; and the Devarâtas are indeed mentioned as a famous branch of the Vis'vâmitras. (V.-P. p. 405, 23.). S'unahs'epha is made his eldest son, and the leader of his brothers, evidently as the defender and voucher of their Brahmahood, which must have been then of very recent date, because Vis'vâmitra himself is still addressed by S'aunahs'epha as Raja-putra, and Bharatarishabha.

The Aitareya-brâhmaṇa goes on to state that the priest asked S'unaḥs'epha to perform the sacrifice of the day. S'unaḥs'epha then invented the ceremony called Anjahsava and prepared the Soma, accompanied by four verses. He poured the Soma into the Drona-kalas'a vessel with one verse and made the libations with the four first verses of the same hymn accompanied by Svâhâ exclamations, as the secrifice had been begun by Haris'chandra. Afterwards he carried out all the things belonging to the Avabritha ceremony, employing two verses, and made Haris'chandra go to the Ahavanîya fire with another hymn.

"When the sacrifice had thus been performed S'unahs'epha sat down on the lap of Vis'vâmitra. Ajîgarta, the son of Sûyavasa, said: "Rishi, give me back my son." Vis'vâmitra said, "No; for the gods have given him to me." He became Devarâta (Theodotus) the son of Vis'vâmitra, and the members of the families of Kapila and Babhru became his relations. Ajîgarta, the son of Sûyavasa said: "Come thou, O son, we, both I and thy mother call thee away." Ajîgarta the son of Sûyavasa said: "Thou art by birth an Angirasa, the son of Ajîgarta, celebrated as a poet. O Rishi, go not away from the line of thy grandfather, come back to me." Sunahs'epha replied; "They have seen thee with a knife in thy hand, a thing that men have never found even amongst S'ûdras; thou hast taken three hundred cows for me, O Angiras." Ajîgarta the son of Sûyavasa said: "My old son, it grieves me for the wrong that I have done; I throw it away, may these hundred cows belong to thee." S'unahs'epha

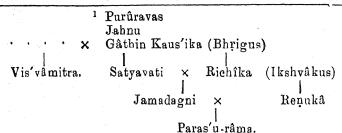

<sup>&</sup>lt;sup>1</sup> Manu, x. 105.

<sup>2</sup> These verses are to be found in the sixth Anuvaka of the first Mandala of the Rig-veda.

replied: "Who once commits a sin will commit also another sin; thou wilt not abstain from the ways of S'ûdras; what thou hast committed cannot be redressed." "Cannot be redressed," Vis'vâmitra repeated. "Dreadful stood the son of Sûyavasa when he went to kill with his knife. Be not his son, come and be my son." S'unahs'epha said: "Tell us thyself, O son of a king, thus as thou art known to us, how I, who am an Angirasa, shall become thy son." Vis'vâmitra replied: "Thou shalt be the eldest of my sons, thy offspring shall be the first, thou shalt receive the heritage which the gods have given me, thus I address thee." S'unahs'epha replied: "May the leader of the Bharatas say so, in the presence of his agreeing sons, for friendship's and happiness' sake, that I shall become thy son." Then Vis'vâmitra addressed his sons: "Hear me, Madhuchhandas, Rishabha, Renu' Ashṭaka, and all ye brothers that you are, believe in his seniority."

This Vis'vâmitra had a hundred sons, fifty older than Madhuchhandas and fifty younger. The elder did not like this, and Vis'vâmitra pronounced a curse upon them, that they should become outcasts. They became Andhras, Pundras, S'abaras, Pulindas, Mûtibas, and many other outcast tribes, so that the descendants of Vis'vâmitra became the wor-t of the Dasyus. But Madhuchhandas, together with the other fifty sons, said: "What our father tells us, in that we abide; we place thee before us and follow thee. When Vis'vâmitra heard this, he praised his sons and said: "You sons will have good children and cattle, because you have accepted my will, and have made me rich in brave sons. You, descendants of Gathin, are to be honoured by all, you brave sons, led by Devarata; he will be to you good counsel. You, descendants of Kus'ika, follow Devarâta, he is your hero, he will give you my riches, and whatever knowledge I possess. You are wise, all you sons of Vis'vâmitra together; you are rich, you stood to uphold Devarâta, and to make him your eldest, descendants of Gâthin. Devarâta<sup>2</sup> (S'unahs'epha) is mentioned as a Rishi of both families, in the chiefdom of the Jahnus, and in the divine Veda of the Gathins."

The same chapter of the Aitareya brahmana, where this story of Sunahs'epha is told, contains many curious details on the mutual relation of the Brahmans and the Kshatriyas. The story of Sunahs'epha is said to form a part of the inauguration of a king, to whom it is

This last verse, which is also attributed to Vis'vâmitra, ought to be taken rather as a recapitulation of the whole story. Jahna is one of the ancestors of Vis'vâmitra, belonging to the Lunar Dynasty; Gâthin is considered as Vis'vâmitra's father. The commentator gives Jahna as a Rishi of the family of Ajîgarta, which seems better to agree with the Vedic story.

related by the Hotri priests, the Adhvaryu priest acting the second

part; perhaps an early attempt at dramatic representation.

It does not necessarily follow from this legend that the Rishis, the authors of the Vedic hymns, offered human sacrifices. No one would conclude from the willingness of Abraham to sacrifice his own son in obedience to a supposed command from Jehovah, that the Jews had been in the habit of offering their sons as victims. It is not, however, because human sacrifices seem to belong only to the most savage races of men, that we doubt the prevalence of this custom among the ancient Hindus. Human sa rifices are not incompatible with a higher stage of civilzation, particularly among people who never doubted the immortality of the soul, and at the same time felt a craving to offer whatever seemed most valuable on earth to the gods in whom they believed. There are few nations in the history of the world whose early traditions do not exhibit some traces of human sacrifices. And though I doubt the continuance of that custom during the Chhandas period, I see no reason to doubt its previous existence. A passage from the Aitareya brâhmana offers a striking confirmation of this opinion. It is said there (Ait.-br. 6. 8.) that the god; took man for their victim. "As he was taken, medha, the sacrifice or the spirit,) went out of him. It entered the horse. Therefore the horse became Then the gods took the horse, but as it was the sacrificial animal. taken, the medha went out of him. It entered the ox. Therefore the ox became the sacrificial animal. The same happened with the Afterwards the sheep, then the goat, and at last the earth became the victim. From the earth rice was produced and rice was offered in the form of purodâs'a, in lieu of the sacrificial animal. The other beings which had formerly been offered and then been dismissed, are supposed to have become changed into animals unfit for sacrifice; man into a savage, the horse into a Bos Gaurus, the ox into a Gayal ox, the sheep into a camel (ushtra) the goat into a s'arabha. animals are amedhya or unclean, and should not be eaten."

The drift of this story is most likely that in former time all these victims had been offered. We know it for certain in the case of horses and oxen, though afterwards these sacrifices were discontinued. As to sheep and goats they were considered proper victims to a still later time. When vegetable offerings took the place of bloody victims, it was clearly the wish of the author of our passage to show that, for certain sacrifices, these rice-cakes were as efficient as the flesh of animals. He carries out his argument still further, and tries to show that in the rice the beard corresponds to the hair of animal; the husk to the skin; the phalikaranas to blood; the meal to the flesh; the straw to the bones.

The next story, from the Satapatha-brahmanal serves to illustrate the relations between the priestly and royal families in the early history of India, and allows us an insight into the policy of the Brahmans

in their struggle for political influence.

"Janaka of Videha once met with some Brahmans who had just They were S'vetaketu Äruneya, Somis'ushma Satyayajni, and

<sup>18&#</sup>x27;atapatha-brâhmana. Mâlhyandina-s'âkhâ, xi.4.5. The same story is alluded to in the Brihadaranyaka, iv. 3. 1.

Yajnavalkya. He said to them: 'How do you perform the Agnihotra?' S'vetaketu replied: 'O king, I sacrifice to two heats in one another, which are ever shining, and pervading, the world with their splendour. ' How is that?' said the king. S'vetaketu replied: 'Aditya (the sun) is heat; to him do I sacrifice in the evening in the fire (Agni). Agni is heat; to him do I sacrifice in the morning in the sun (Aditya).' 'What becomes of him who sacrifices thus?' said the king. The Brahman replied: 'He becomes evershining with happiness and splendour, and has his dwelling with these two gods and is one with them.'

Then Somas'ushma began: 'O king, I sacrifice to light in light.' 'How is that?' said the king. Somas'ushma replied: 'Aditya is light, to him do I sacrifice in the evening in Agni. Agni is light, to him do I sacrifice in the morning in Aditya.' What becomes of him who sacrifices thus?' said the king. The Brahman replied: He becomes full of light and splendour in this life, and has his dwelling with these two

gods and is one with them.'

Then said Yajnavalkya: 'I offer the Agnihotra in taking out the fire (from the house-altar): for when Aditya sets, all the gods follow him, and if they see that I take out the fire, they come back, and, after having cleaned the sacrificial vessels, having filled them again, and after having milked also the sacred cow, I shall delight them, when I see them again, and they see me.'

Janaka said: 'Thou, O Yajnavalkya, hast come very near to the Agnihotra; I shall give thee a hundred cows. But thou dost not know what becomes afterwards of these two libations (in the morning and

evening). So he said, then mounted his car and went away.

The priests said: 'This fellow of a Rajanya has insulted us; let us call him out for a Brahman-dispute.' Yajnavalkya observed, We are Brâhmans, he a fellow of a Râjanya. If we vanquished him whom should we say we had vanquished? But if he vanquished us, people would say of us that a Rajanya had vanquished Brahmans. Do not think of this.' They allowed what he said, and Yajnavalkya mounted his car, and followed the king. He reached the king, and the king said to him, 'Yajnavalkya, dost thou come to know the Agnihotra? 'The

Agnihotra, O king,' replied Yajnavalkya."

Here the king begins to explain to Yajnavalkya his own view of the two morning and evening libations, called Agnihotra. He says, that these two sacrifices rise into the air, and are there again performed; the wind being the fuel, and the rays the bright libation. Then he goes on explaining how these two sacrifices, after having delighted the air, enter the sky, where they are performed by sun and moon; how they come back to the earth, and are performed by fire (warmth) and plants; how they enter the man, and are performed by his tongue and food; how they enter the woman, and a son is born. "This is the true Agnihotra, O Yajnavalkya,' said the king; 'there is nothing higher than this 'Yâjnavalkya granted him a boon; and the king said, 'May I be allowed, Yajnavalkya, to ask thee what I wish.' Since then Janaka became a Brahman."

The two following stories are of a more mythological character, and contain curious traditions about Manu, the supposed ancestor of man-

kind. The first is from the Aitareya-brahmana, v. 14.

"Nabhanedishtha, the son of Manu, had been deprived of his paternal share by his brothers. while he was pursuing his studies (in the house of his Guru). When he came home, he said, 'What is my share?' They replied (pointing to Manu) 'The father, who is our governor and arbitrator.' (Therefore sons call now their father, governor (nishthava1) and arbitrator (avavaditri)). He went to his father and said, Father, they have made thee to be my share. The father replied, Do not believe it, my son, by any means. The Angiras' there perform a sacrifice in order to go to heaven, but every time they come to the sixth day, they get confused. Let them recite these two hymns (of thine 2) on the sixth day, and when they go to heaven they will give thee all the great riches which they have brought together for the sacrifice.' The son said, 'Yes;' went to them, and spoke: 'Ye sages, receive me, the son of Manu.'3 They replied, 'What is thy wish that thou speakest thus?' He answered, 'I shall teach you this sixth day, and you shall give me, when you go to heaven, all these great riches which you have brought together for the sacrifice.' They agreed, and he recited for them these two hymns on the sixth day. Thus the Angiras' understood the sacrifice and the life in heaven. Therefore, when the Hotri priest recites these two hymns on the sixth day, it leads to an understanding of the sacrifice and of the life in heaven.

When the Angiras' were going to heaven they said, "All these great riches are thine, O Brâhman." While he was putting them together, a man in dark dress came up from the north, and said, 'This is mine, mine is what is left on the sacred spot.' Nâbhânedishtha replied, 'They gave it to me.' The man said, 'Then let us ask thy father about it.' He went to his father, and the father said, 'Have they given thee nothing, my son?' Nâbhânedishtha replied, 'They gave, me a portion, but then a man in dark dress came up from the north and said. "This is mine; mine is what is left on the sacred spot," and took it.' The father said, 'It belongs to him, indeed, my son, but he will give it to thee.' Thereupon Nâbhânedishtha went back and

<sup>1</sup> The commentary explains, निष्ठावः by धनविभागादेर्धमेरहस्यं निःशेषेण स्थितिनिर्णयो निष्ठा। सा यस्मिन्नस्ति स निष्ठावः। ताद्वशं धर्मरहस्यनिर्णतारमित्य थंः॥ अवविद्तारं। ज्येष्ठपुत्रस्येतावत् द्वितीयस्येतावत् अन्यस्येतावदित्यवच्छिद्य वेदितुं समर्थोऽवविद्ता । ताद्वशं॥ अयमर्थः। अयं मनुर्धमेशास्त्रकर्तृत्वाद्धमेररु-स्यनिर्ण्यवान् पितृन्वेन तवैताविद्त्यविच्छद्य वक्तुं समर्थश्च॥

<sup>2</sup> Two hymns ascribed to Nabhanedhishtha, occur in the Rig-veda, x, 5. 1. & 2.

<sup>3</sup> These words are taken from the second hymn of Nabhanedishtha.

<sup>4</sup> The text is एनचे ब्राह्मण सहस्रामिति | but the commentator says, it is to be understood of a thousand cows or animals, left on the spot of the sacrifice, and that in a different S'âkhâ of this Brahmana the text is

तेसुवर्ग छोक यंतो य एषां पशव आसन् तानस्ता अद्दुरिति ॥
5 The commentator says, that this is Rudra, the lord of animals, and that this is clearly indicated in a different S'akha, where the text is तं पशुभिश्चरंतं यज्ञवास्तौ रुद्र आगच्छदिति ॥

said, 'This is thine indeed, O reverend sir; thus spoke my father. 'This I give to thee,' relied the man, 'who hast spoken the truth. Therefore the truth must be spoken by a man who knows it. These verses of Nåbhånedishtha give great riches. They give great riches; and he understands on the sixth day the life in heaven who knows this.'"

The next extract is taken from the S'atapatha-brâhmana, i. 8. I. I.

(Prap. vi. 3. 1.):-

"To Manu they brought in the morning water to wash. As they bring it with thair hands for the washing, a fish comes into the hands

of usanu as soon as he has washed himself.

He spoke to Manu the word: - Keep me, I shall preserve thee.' Manu said, 'From what wilt thou preserve me?' The fish said, 'The flood will carry away all these creatures. I shall preserve thee from it.' 'How canst thou be kept?' said Manu.

The fish replied, 'As long as we are small there is much destruction for us; fish swallows fish. First, then, thon must keep me in a jar. If I outgrow it dig a hole, and keep me in it. If I outgrow this, take

me to the sea, and I shall be saved from destruction.'

He became soon a large fish. He said to Manu, 'When I am full-grown, in the same year the flood will come. Build a ship then, and worship me, and when the flood rises go into the ship, and I shall preserve thee from it.'

Manu brought the fish to the sea, after he had kept him thus. And in the year which the fish had pointed out Manu had built a ship, and worshipped the fish. Then when the flood had risen, he went into the ship. The fish came swimming to him, and Manu fastened the rope of the ship to a horn of the fish. The fish carried him by it over the northern mountain.

The fish said, 'I have preserved thee. Bind the ship to a tree. May the water not cut thee asunder while thou art on the mountain. As the water will sink, thou wilt slide down.' Mann slid down with the water; and this is called the Slope of Manu on the northern mountain. The flool had carried away all these creatures, and thus

Manu was left there alone.

He went along meditating a hymn, and wishing for offspring. And he sacrificed there also (a pâkayajna). Taking clarified butter, coagulated milk, whey and curds, he made an offering to the waters. In a year a woman was brought forth from it. She rose unctuous and trickling; and where she stood there was clarified butter. Mitra and Varuna came to meet her.

They said to her, 'Who art thou?' She said, 'The daughter of Manu.' 'Sav thou art ours,' they said. 'No.' she replied; 'he who has begotten me to him I belong.' Then they asked her to be their sister, and she half agreed and half did not agree. She went off and

came to Manu.

Manu said to her, , Who art thou?' She said, 'I am thy daughter.' 'How art thou my daughter?' he asked. She replied, 'The oblations which thou hast thrown into the waters, clarified butter, coagulated m lk, whey and curds, by them 'hou hast begotten me. I am a blessing. Praise me at the sacrifice. If thou praise me at the sacrifice thou wilt be rich in offspring and cattle. Whatever blessing thou wilt ask

by me, will all be given to thee.' thus he praised her in the middle of this sacrifice; for the middle of the sacrifice is that which comes between the introductory and the final prayers (prayajas and anuyajas).

Manu went along with her, meditating a hymn, and wishing for offspring; and by her he begat this offspring, which is called the offspring of Manu, and whatever blessing he asked was all given to him.

She is indeed *Ida*. Whoever knows this, and goes with *Idâ*, he begets the offspring which Manu begat; and whatever blessing he asks by her, is all given to him."

These extracts from the Brahmanas will be sufficient to show that here is much curious information to be gathered from these compilations. In spite of their general dreariness, the Brâhmanas well deserve to be preserved from destruction, which can only be done by the help of European editors. It is true that the ceremonial, the vidhis, can be better studied in the Sûtras, but if we want to know what meaning was assigned to every act of the sacrifice, such as it had been handed down and become fixed in the Brahmanic society of India, long before the composition of any Brahmana, we must consult these works. Though their professed object is to teach the sacrifice, they allow a much larger space to dogmatical, exegetical, mystical and philosophical speculations, than to the ceremonial itself. They appeal continually to earlier authorities, and in some of them, particularly in the Kaushîtaki-brâhmana, the confleting opinions of ancient sages are so well confronted, and their respective merits so closely discussed, that we sometimes imagine ourselves reading the dogmatic philosophy of Jaimini. According to the views of native commentators, the characteristic feature of the Brahmanas consists in doubt, deliberation, and discussion, and the word Mimansa which afterwards became the title of Jaimini's philosophy, is frequently used in the Brahmanas to introduce the very problems which occupy the attention of Jaimini and his followers. Of course the discussion is not a bond fide discussion. The two sides of every question are stated, but they only serve to lead us on to the conclusion which the author of the Brahmana considers in the light of a divine revelation. We are reminded of the disputations of two Doctors of Theology who defend for a time the most heretical propositions with the sharpest weapons of logic and rhetoric, though they would extremely regret the final victory of that cause which, for argument's sake, they are called upon to maintain. Never was dogmatism more successfully veiled under the mask of free discussion than in the Mimansa or discussion of the Brahmanas.

The fact of so many authorities being quoted by name in these works shows that the Brâhmanas exhibit the accumulated thoughts of a long succession of early theologians and philosophers. But the very earliest of these sages follow a train of thought which gives clear evidence of a decaying religion. The Brâhmanas presuppose, not only a complete collection of the ten Mandalas of the Rig-veda, not only the establishment of a most complicated ceremonial, not only the distribution of the ceremonial offices among three or four classes of priests but a complete break in the primitive tradition of the Aryan

At the time when the law laid down about the settlers of India. employment of certain hymns at certain parts of the sacrifice, the original meaning of these hymns, and the true conception of the gods to whom they were addressed, had been lost. The meaning also of the old and sacred customs by which their forefathers had hallowed the most critical epochs of life and the principal divisions of the year, had faded away from the memory of those whose lucubrations on the purport of the sacrifices have been embalmed in the so-called Arthavadas of the Brâhmanas. It is difficult to determine whether, before the beginning of the Brahmana period, there existed various S'akhas among the Bahvrichas. The collecton of the Rig-veda-sanhitâ must no doubt have been completed long before the age which led to the composition of Brahmanas. Various readings also may have found their way into that collection before the Brahmana period. But the scrupulous preservation of such variations, which were the natural result of oral tradition. seems more akin to the spirit of the Brahmanas than to that of an earlier age. There is less room for doubt as to the date of the S'akhas of the Adhvaryus and Chhandogas. They belong to the Brahmana period. What is called the Taittirîya-sanhitâ is no Sanhitâ, in the usual sense of the word, but was originally the Brahmana of the ancient Adhvaryus. It contains the description of the sacrifice, such as it would be required by the Adhvaryus. The composition of a separate Sanhita in their behalf, the so-called Sanhita of the White Yajur-veda. is contemporaneous with, if not later than, the collection of the S'atapatha-brâhmana. We therefore consider all the Sâkhâs of the Adhvaryus, with the exception of their Sûtra-s'âkhâs, as Brâhmanasakhas which had grown up during the Brahmana period. And if we feel more besitation with regard to the Sanhita of the Chhandoras. it is not with reference to what is usually called the Sama-vedasanhitâ but with regard to the Gânas. These collections of hymns, though they have a purely ceremonial object, have an air of antiquity, and we could hardly understand how the Tandya brahmana, even in its original compouent parts, could have arisen, unless we suppose that there existed previously collections and groups of hymns, comprised under special names, such as we find in the Gânas. Without, therefore, pronouncing a definite opinion on the existence of any Sakhas of the two minor Vedas, previous to the first appearance of Brahmana literature, we confine ourselves to the assertion, that not one line of any of the Brahmanas which we possess could have been composed, until after the complete collection of the Rig-veda, and after the threefold division of the ceremonial. Not one of the Brahmanas was composed by a Brâhman who was not either a Bahvricha, an Adhvaryu, or Chhan-There was a fourth class of superintending priests, who were supposed to be cognisant of the duties of all the three other classes: but there was, as we shall see, neither Brâhmana nor Sanhitâ for their special benefit. According to the opinion of some, the superintendent or Brâhman might indeed be an Adhvaryu, or even a Chhandoga, but the general rule is that he should be a Bahvrichal, because the Bahvricha had the widest knowledge of Vedic hymns. There must have been a

<sup>1</sup> Kaush,-br. vi. 11 तदाहुः किविद। किछद्सं ब्रह्माणं चृणीत इत्यध्वर्युमि

time when every Brahman who had to act as a priest, whatever offices he had to perform at the sacrifice, was acquainted with the complete body of the sacred hymns, collected in the Rig-veda. But of that time no traces are left in our Brâhmanas. Our Brâhmanas know of no hymns which are not the property of Hotri, Adhvaryu, or Udgatri; they know of no priests, except the four classes which have divided between themselves all the sacrifices, and have distinct duties assigned to them, whether they officiate singly or jointly. Such a system could only have been carried out by a powerful and united priesthood; its origin and cotinuance can hardly be conceived, without the admission of early councils and canons. Originally every sacrifice was a spontaneous act, and as such had a meaning. When the sacrifices fell into the hands of priests, the priest was at first the minister, afterwards the representative, of those who offered the sacrifice. But it is only in the last stage of priesteraft that the spoils are divided, and certain acts made the monopoly of certain priests. All this had taken place before the rising of what we call the Brahmana literature, and we may well conceive that but few traces are left in these works of the thoughts and feelings which had suggested the first spontaneous acts of the early worshippers of India.

The transition from a natural worship to an artificial ceremonial may take place gradually. It had taken place long before the beginning of the Brahmana period, and the process of corruption continued during this and the succeeding periods, till at last the very corruption became a principle of new life. But there is throughout the Brahmanas such a complete misunderstanding of the original intention of the Vedic hymns, that we can hardly understand how such an estrangement could have taken place, unless there had been at some time or other a sudden and violent break in the chain of tradition. The author of the Brahmanas evidently imagined that those ancient hymns were written simply for the sake of their sacrifices, and whatever interpretation they thought fit to assign to these acts, the same, they supposed, had to be borne out by the hymns. This idea has vitiated the whole system of Indian exegesis. It might be justified, perhaps, if it had only been applied to the purely sacrificial hymns, particularly to those which are found in the Sanhitâs of the Sâma veda and Yajur-veda. But the Rig-veda too has experienced the same treatment at the hands of Indian commentators, and the stream of tradition, flowing from the fountain-head of the original poets, has, like the waters of the Sarasvatî, disappeared in the sands of a desert. Not only was the true nature of the gods, as conceived by the early poets, completely lost sight of, but new gods were actually created out of words which were never intended as names of divine beings. There are several hymns in the Rig-veda containing questions as to who is the true or the most powerful god. One iu particular is well known, in which each verse ends with the inquiring exclamation of the poet; "Kasmai devâya havisha vidhema?" "To which

त्येके संपरिक्रमाणां क्षेत्रज्ञां भवतोति छद्दागिमित्येके तथा हास्य त्रिभिवैदेहिवियंजाः संस्क्रियंत इति बहुचिमिति त्वेव स्थितं । Some allowance must be made for the fact that the (Kaushîtakins are Bahvrichas

god shall we sacrifice with our offering?" This, and similar hymns, in which the interrogative pronoun occurred, were employed at various sacrifices. A rule had been laid down, that in every sacrificial hymn. there must be a deity addressed by the poet. In order to discover a diety where no deity existed, the most extraordinary objects, such as a present, a drum, stones, plants, were raised to the artificial rank of deities. In accordance with the same system, we find that the authors of the Brahmanas had so completely broken with the past, that, forgetful of the poetical character of the hymns, and the yearning of the poets after the unknown god, they exalted the intorrogative pronoun itself into a deity, and acknowledged a god Ka or Who? In the Taittirîvasanhitâ 1 (i. 7. 6. 6.), in the Kaushîtaki-biâhmana (xxiv. 4.), in the Tândvabrâhmana (xv. 10.), and in the Satapatha-brâhmana, wherever interrogative verses occur, the author states, that Ka is Prajapati, or the Lord of Creatures (prajapatir vai Kah). Nor did they stop here. Some of the hymns in which the interrogative pronoun occurred were called Kadvat, i.e., having kad or quid. But soon a new adjective was formed, and not only the hymns, but the sacrifice also, offered to the god, were called Kaya, or who ish. This word, which is not to be identified with the Latin cujus, cuja, cujum, but is merely the artificial product of an effete mind, is found in the Taittirîya-sanhitâ (i. 8. 3. 1.). and in the Vajasaneyi-sanhita (xxiv. 15.). At the time of Panini this word had acquired such legitimacy as to call for a separate rule explaining its formation (Pan. iv. 2. 25.). The Commentator here explains Ka by Brahman. After this, we can hardly wonder that in the later Sanskrit liverature of the Puranas, Ka appears, as a recognised god. as the supreme god, with a genealogy of his own, perhaps even with a wife; and that in the laws of Manu, one of the recognised forms of marriage, generally known by the name of the Prajapati-marriage. occurs under the monstrous title of Kaya.

What is more natural than that the sun should be called in the hymns, golden-handed? The Brahwana, however, affected with a kind of voluntary blindness, must needs explain this simple epithet by a story of the sun having lost his hand, and having received instead a hand

made of gold.

It would be useless to multiply these instances, as every page of the Brahmanas contains the clearest proof that spirit of the ancient Vedic poetry, and the purport of the original Vedic sacrifices, were both beyond the comprehension of the authors of the Brahmanas. But although we thus perceive the wide chasm between the Brahmana period and that period by which it is preceded, we have still to answer the question whether any probable limits can be assigned to the duration of this literary period. The Brahmanas are not the work of a few individuals. By whomsoever they were brought into that form in which we now possess them, no one can claim the sole authorship of the dogmas which are incorporated in each Brahmana. The Brahmanas represent a complete period during which the whole stream of thought flowed in one channel, and took, at least in that class which alone sustained intellectual activity, the form of prose, never before applied

<sup>1</sup> See Böhtlingk and Roth's Dictionary, s. v.

to literary productions. There are old and new Brahmanas, but the most modern hardly differ in style and language from the most ancient. The old Brahmanas passed through several changes, represented by the Bråhmana-s'akhås, and even the most modern were not exempt from these modifications. Considering, therefore, that the Brahmana period must comprehend the first establishment of the threefold ceremonial, the composition of separate Brahmanas, the formation of Brahmana-charanas and the schism between old and new Charanas, and their various collections, it would seem impossible to bring the whole within a shorter space than 200 years. Of course this is merely conjectural: but it would require a greater stretch of imagination to account for the production in a smaller number of years of that mass of Brahmanic literature which still exists, or is known to have existed. Were we to follow the traditions of the Brahmanas themselves, we should have much less difficulty in accounting for the great variety of authors quoted, and of opinions stated in the Brahmanas. They contain lists of teachers through whom the prahmanas were handed down, which would extend the limits of this age to a very considerable degree. The Chhandogas have assigned a separate Brâhmana to the list of their teachers, viz., the Vans'a-brâhmana, a work the existence of which ought not to have been called into question, as a copy of it existed in the Bodleian Library. In the S'atapatha-brâhmana these lists are repeated at the end of various sections. There seems to be no imaginable object in inventing these long lists, as in the eyes of the Brahmans they would have been much too short for the extravagant antiquity assigned to their sacred books. With the exception of the highest links in each chain of teachers, the lists have an appearance of authenticity rarely to be met with in Indian compositions. The number of teachers in the Vans'a-brâhmana amount to 53, the last of them, Kas'yapa, the father having received the tradition from Agni, or the god of fire. From Agni the tradition is further traced to Indra, Vâyu (wind), Mritvu (death) Prajapati (the Lord of Creation), and lastly to Brahman, the Self existing. From Kas'yapa, down to Rådha Gautama, his 26th successor the line of teachers seems to have been undivided. Râdha Gautama had two pupils, who apparently became the founders of different schools. One is called Ans'u Dhananjayys, who received instruction from Radha Gautama and Amâvâsya S'ândilyâyana; the other, Gobhila, had no teacher besides Rådha. The successors of Gobhila are eleven in number, while those of Ansju Dhanan)ayya are twenty-five.

In the S'atapatha-brâhmana we find four Vans'as. The most important of them stands at the end of the whole work, and consists of fifty-five names; the last of the human teachers being again Kas'yapa, who here is supposed to have received his revelation from Vâch, the goddess of speech. She received it through Ambninî from Aditya, the sun. Among the successors of Kas'yapa we mark the 10th, Yâjnavalkya, the pupil of Uddâlaka and the teacher of Asuri; and the 15th, Sânjîvîputra; Sânjîvîputra seems to have united two lines of teachers; he was

<sup>1</sup> Prof. Weber's recent edition of this tract, is the best amende he could have made for his former scepticism with regard to the existence of this and other Brahmanas of the Sama-veda.

the pupil of Kars'akeyiputra, and, according to the Vans'a of the 10th book, he was likewise the pupil of Mandûkayani, the 9th successor of Tura Kâvasheya, who is fabled to have received his revelation, not through the agency of Vach, Ambhinî, and Aditya, but direct from Prajapati and the self-existing Brahman. There are two other Vans'as, one at the end of the Madhukanda, the other at the end of the Yajnavalkiyakânda. Both are, in reality, varieties of one and the same Vans'a, their differences arising from the confusion caused by the recurrence of similar names. That of the Madhukanda consists of sixty names, only forty-five or forty-six of which have an historical appearance. The principal divine teachers after Brahman, the Self-existing, are Parameshthio, (Prajâpati?), Mrityu (death), Dadhyach and the two As'vins.

At the end of the Khila-kanda a fifth list is found, not a Vans'a, but a list of teachers who handed down the Vans'a. This seems to be ascribed to Uddâlaka Aruneya, the teacher of Yajnvalkya, as its original author.

59, Brahman Svayambhu.

It would be difficult to tell how these long strings of names are to be accounted for, whatever system of chronology we adopt. If we were in possession of the Vans'as of the Bahvrichas and the ancient Adhvaryus, we might perhaps see more clearly. But it is important to observe that these two, which are decidedly the two most ancient Vedas, seem to have had no Vans'as at all. However this may be explained hereafter, certain it is,—and these long lists of names teach at least this one thing,—that the Brâhmans themselves looked upon the Brâhmana period as a long continued succession of teachers, reaching from the time when these lists were made and received to the most distant anti-

The priest of Janamejaya Pârikshita, at his Horse sacrifice, is called Indrota (Daivâpa) Saunaka in the Satapatha, xiii, 5. 4. 1., and in the Mahâbh. xii 5595, seq. Cf, Weber, Ind. Satud. i. pp. 203. 483.

quity, back to the very dynasties of their gods. If, therefore, we limit the age of the Brahman s to the two centuries from 60 ) to 800 B. c., it is more likely that hereafter these limits will have to be extended than that they will prove too wide.

There is one work which ought to be mentioned before we leave the Brâhmana period, the Gopatha brâhmana. It is the Brâhmana of the Brahma-veda, the Veda of the Atharvangiras' or Bhrigu-Angiras. This Yeda does not properly belong to the sacred literature of the Brahmans, and though in later times it obtained the title of the fourth Veda, there was originally a broad distinction between the magic formulas of the Atharvangiras' and the hymns of the Bahvrichas, the Chhandogas, and the Adhvaryus. Madhusûdana states the case simply and clearly. "The Veda," he says, "is divided into Rich, Yajush and Saman for the purpose of carrying out the sacrifice under its three different forms. The duties of the Hotri priests are performed with the Rig-veda, those of the Adhvaryu priests with the Yajur-veda, those of the Udgatri priests with the Sama-veda. The duties of the Brahman and the sacrificer are contained in all the three. Atharva-veda, on the contrary, is totally different. It is not used for the sacrifice, but only teaches how to appease, to bless, to curse, &c." But although the hymns of the Atharvans were not from the first looked upon as a part of the sacred literature of the Brahmans, the Brahmana of the Atharvans belong clearly to the same literary period which saw the rise of the other Brahmanas; and though it does not share the same authority as the Brahmanas of the three great Velas, it is written in the same language, and breathes the same spirit. The MSS of this work are extremely scarce, and the copy which I use (E. I. H. 2142) is hardly legible. remarks, therefore, which I have to offer on this work will necessarily be scanty and incomplete.

The original division of the Vela, and of the Vedic ceremonial, was, as we have seen, a threefold division. The Brahmans speek either of one Veda or of three; of one officiating priest, or of three. "Trayî vidya," the threefold knowledge, is constantly used in the Brahmanas with reference to their sacred literature. This, however, proves by no means that at the time when the Brahmanas were composed the songs of the Atharvangiras' did not yet exist. It only shows that originally they formed no part of the sacred literature of the Brahmans. In some of the Brahmanas, the Atharvangiras' are mentioned. The passage translated before (p. 20.) shows that at the time when the Satapatha-brahmana was composed the songs of the Atharvangiras' were not only known, but had been collected, and had actually obtained the title of Veda. Their original title was the Atharvangiras', or the Bhrigvangiras', or the Atharvans, and these very titles show that songs which could be quoted in such a manner,2 must have been of ancient date, and must have had a long life in the oral tradition of India. Their proper position with reference to the other Vedas is well marked in a passage of the Taittirîyâranyaka (viii. 3.), where the Yajush is called the head, the Rich the right, the Saman the other side, the Ades'a (the Upanishad) the vital breath, and the Atharvagiras' the tail.

<sup>&</sup>lt;sup>1</sup>Nirukta-paris'ishta, 1, 10.

<sup>&</sup>lt;sup>2</sup> See pages 185.

The songs known under the name of the Atharvangiras' formed probably an additional part of the sacrifice from a very early time. They were chiefly intended to counteract the influence of any untoward event that might happen during the sacrifice. They also contained imprecations and blessings, and various formulas, such as popular superstition would be sure to sanction at all times and in all countries. If once sanctioned, however, these magic verses would soon grow in importance, nay, the knowledge of all the other Vedas would necessarily become useless without the power of remedying accidents, such as could hardly be avoided in so complicated a ceremonial as that of the Brahmans. As that power was believed to reside in the songs of the Atharvangiras', a knowledge of these songs became necessarily an essential part of the theological learning of ancient India.

According to the original distribution of the sacrificial offices among the four classes of priests, the supervision of the whole sacrifice, and the remedying of any mistake that might have happened belonged to the Brahman. He had to know the three Vedas, to follow in his mind the whole sacrifice, and to advise the other priests on all doubtful points. If it was the office of the Brahman to remedy mistakes in the performance of the sacrifice, and if, for that purpose, the formulas of the Atharvângiras' were considered of special efficacy, it follows that it was chiefly the Brahman who had to acquire a knowledge of these formulas. Now the office of the Brahman was contested by the other classes of priests. The Bahvrichas maintain that the office of Brahman should be held by a Bahvricha (Hotri), the Adhvaryus maintain that it belongs to one of their own body, and the Chhandogas also preferred similar claims. It was evidently the most important office, and in many instances, though not always, it was held by the Purchita, the hereditary family priest. Certain families also claimed a peculiar fitness for the office of Brahman, such as the Vasishthas and Vis'vâmitras' (See p. 47.)

Because a knowledge of the songs of the Atharvangiras' was most important to the Brahman or Purchita,2 these songs themselves, when once admitted to the rank of a Veda, were called the Veda of the Brâhman, or the Brahma veda. In the Gopatha brahmana the title of Brahmayeda does not occur.3 But the songs of the Atharvangiras' are They are called both Atharvara-veda (i. 5.), and mentioned there. Angirasa-veda (i. 8.), and they are repeatedly represented as the proper Veda for the Brahman. Thus we read (iii. 1.): "Let a man elect a Hotri who knows the Rich, an Adhvaryu who knows the Yajusa, an Udgâtri who knows the Sâman, a Brâhman who knows the Atharvângiras." It seems in fact the principal object of the Gopatha to show the necessity of four Vedas. A carriage, we are told, does not proceed with less than four wheels, an animal does not walk with less than four feet, nor will the sacrifie be perfect with less than four Vedas. 4 But although a knowledge of the fourth Veda is thus represented as essential to the Brâhman, it is never maintained that such a knowledge would be

<sup>&</sup>lt;sup>1</sup> Sâyaṇa's Introduction to the Rig-veda, p. 3. 1.3.

<sup>&</sup>lt;sup>2</sup> Yajnavalkya's Lawbook; i. 312.

<sup>3</sup> See, Lowever, i. 22.

<sup>4</sup> At the end of the fifth Prapathaka we read:

sufficient by itself to enable a person to perform the offices of a Bråhman. Like the Chhandogas (Rv. Bh. vol. i. page 3.), the Åtharvanikas also declare that the whole sacrifice is performed twice, once in words, and once in thought. It is performed in words by the Hotri, Udgåtri and Adhvaryu separately; it is performed in thought by the Bråhman alone (Gop. Br vol. iii 2.). The Bråhman, therefore, had to know all the three Vedas and in addition the formulas of the Atharvangiras, It is a common mistake in later writers to place the Atharva-veda co-ordinate with the other Vedas, and to represent it as the Veda of the Bråhman. The Gopatha-bråhmana raises no such claims; when it describes the type of the sacrifice, it says:

Agni (fire' was the Hotri
Vâyv (wind) the Adhvaryu,
Sûrya (sun) the Udgatri,
Chandramas (moon) the Brâhman,
Parjanya (rain) the Sadasya,
Oshadhi and Vanaspati (shrubs and trees) the Chamasâdhvaryus,
The Vis've Devas were the Hotrakas,
The Atharvângiras', the Goptris or protectors.

In another place (v. 24.) the persons engaged in the sacrifice are enumerated as follows:

Hotri, Maitrâvaruṇa, Achhâvâka, Grâvastut (Rig-veda), I—4. Adhvaryu, Pratiprasthâtri, Neshṭri, Unnetri, (Yajur-veda), 5—8. Udgâri, Prastotri, Subrahmaṇya, Pratihartri (Sâma-veda,) 9—12. Brâhman, Biâhmaṇâchhansin, Potri, Agnîdhra (Atharvângiras'), 13—16.

Sadasya, 17. Patnî dîkshitâ (the wife), 18. Samitri (the immolator, 19, Gribapatı (the lord), 20. Angiras, 21.

Here we see that besides the four Brâbman-priests to whom a know-ledge of the Atharvângiras' is recommended, there were other priests who are called Goptris, i.e. protectors or Angiras', and whose special office it was to protect the sacrifice by means of the magical formulas of the Atharvângiras', against the effects of any accidents that might have happened. Such was the original office of the Atharvans at the Vedic sacrifices, and a large portion of the Gopatha brâhmana (i 13.; i. 22.) is taken up with what is called the Virishta, the Ûna, the Yâtayâmat or whatever else the defects in a sacrifice are called which musbe made good (sandhâna) by certain hymns, verses, formulas, or exclamations. There are long discussions on the proper way of prod nouncing these salutary formulas, on their hidden meaning, and their miraculcus power. The syllable Om, the so-called Vyâhritis, and other strange sounds are recommended for various purposes, and works such

ऋम्भिः पृथिवी यज्जुषांतरिक्षं साम्ना दिवं छोक्रजित्सामजभाः । अथर्वभिरंगिः रोभिश्च गुप्तो यज्ञश्चतुष्पाद्दिव...॥ as the Sarpa-veda, Pis'acha-veda, Asura-veda, Itihasa-veda, Purana-veda, are referred to as authorities (i. 10.).

Although, however, the Gopatha-brahmana is more explicit on the chapter of accidents than the Brahmanas of the other Vedas, the subject itself is by no means peculiar to it. The question of expiation or penance (pragas'chitta) is fully discussed in the other Vedas, and remedies are suggested for all kinds of mishaps. The ceremonial in general is discussed in the Gopatha in the same manner as in the other Brahmanas. There is, in fact, very little, if any, difference between the Gopatha and the other Brahmanas, and it is not easy to discover any traces of its more recent origin. It begins with a theory of the creation of the world, such as we find in many places of the other Brahmanas. There is nothing remarkable in it except one idea, which I do not remember to have seen elsewhere. Brahman (neuter, the self-existing, burns with a desire to create, and by means of his heat, sweat is produced from his forehead, and from all the pores of his body. These streams of sweat are changed into water. In the water Brahman perceives his own shadow, and falls in love with it. This, however, is only one phase in the progress of creation, which is ultimately to lead to the birth of Bhrigu and Atharvan. Atharvan is represented as the real Prajapati, or Lord of Creation. From him twenty classes of poets, the same as those mentioned in the Anukramani, are produced, and their poems are said to have formed the Atharvanaveda.

Then follows a new series of creation. Brahman creates the earth from his feet, the sky from his belly, heaven from his skull. He then creates three gods: Agni (fire) for the earth, Vâyu (wind) for the sky, and Aditya (sun) for the heaven. Lastly, he creates the three Vedas: the Rig-veda proceeds from Agni, the Yajur-veda from Vâyu, the Sâma-veda from Aditya. The three Vyâhritis also, or sacred syllables (bhuh bhuvah svar), are called into existence. It is important to remark, that nothing is here said of the fourth Veda, its origin is described separately, and its second name, Angirasa, is explained in detail. We look in vain for any traces of more modern ideas in the Gopatha-brahmana, till we come to the end of the fifth Prapathaka. This is the last Prapathaka of the Gopatha-brâhmana, properly so called. The text is very corrupt, but it seems to contain an admission that, besides the twenty-one sacrifices which are acknowledged in all the Vedic writings, the Angiras' had some new sacrifices of their own. 1 That the Gopatha brâhmana was composed after the schism of the Charakas and Våjas aneyins, after the completion of the Våjasanevi-sanhita, may be gathered from the fact that where the first lines of the other Vedas are quoted in the Gopatha, the first line of the Yajur-veda is taken from the Vâjasaneyins, and not from the Taittirîyas.

<sup>े</sup> सप्तः सुत्याः सप्त च पाक्रयज्ञा हिवर्यज्ञाः सप्त तथैकविंशि । सर्व ते यज्ञा अंगिरसाऽपि यंति नृतना यानृषया (१) स्त्रज्ञति ये च सृष्टाः पुराणैः And again यांश्च प्रामे यांश्चारएये जपंति मंत्र ज्ञातार्थान्बहुधा जनासः । सर्वे ते यज्ञा

The five Prapathakas which we have hitherto discussed, form only the first part of the Gopatha-brahmana. There is a second part, called the Uttara-brahmana, which consists of more than five Prapathakas. It is impossible to fix their exact numbers as the MS. breaks off in the middle of the sixth book. It is likewise reckoned as belonging to the Atharva-veda, and quoted by the name of Gopatha. In this second part we meet repeatedly with long passages which are taken from other Brahmanas. Sometimes they coincide literally, sometimes the differences are no greater than what we find in different Sakhas of the same Brahmana. Thus the legend of the sacrifice running away from the gods, which is told in the Altareya-brahmana, i. 18, is repeated in the Uttara-brahmana, ii. 6. The story of Vasi htha receiving a special revelation from Indra which is told in the Taittirî yaka 1 (iii. 5. 2.) is repeated in the Uttara-brahmana, (ii. 13.). And here a difference occurs which is characteristic. The Taittiriyas relate that owing to this special revelation which Vasishtha had received from Indra, the Vasishthas had always acted as Purohitas. So far both the Taittirîyas and the Atharvans agree. But when the Taittiriyas continue that therefore a Vasishtha is to be chosen a Brahman, the Atharvans demur. The sentence is left out, and it is inculcated on the contrary that the office of Brahman belongs by right to a Bhrigu, or to one cognisant of the songs of the Atharvangiras.'2

If, as we have little reason to doubt, these passages in the second part of the Gopatha-brâhmana were simply sopied from other Brâhmanas, we should have to assign to the Uttara-brahmana a later date than to the Brahmanas of the other Vedas. But this would in no way affect the age of the original Gopatha-brahmana. In it there is nothing to show that it was a more modern composition than, for instance, the Satapatha-brâhmana. In the Sanhitâ of the Atharva-veda we find something very similar.3 Here also the last, if not the last two books, betray a more modern origin, and are full of passages taken from the Rig-veda. The Anukramani calls the nineteenth book the Brahmakanda, and the hymns of the last book yajniyas'ansanamantras, i. e. hymns for sacrificial recitations. The collection of the Sanhita was probably undertaken simultaneously with the composition of the Gopathabrâhmana, at a time when through the influence of some of the families of the Bhrigus and Angiras' the magic formulas of the Atharvans had been acknowledged as an essential part of the solemn ceremonial.

3 Atharva-veda-sanhitâ, herausgegeben von Roth und Whitney.
Berlin, 1855, and 1856.

With the means at present at our disposal it is impossible to trace the history of these verses back to the earlier period of Vedic literature. and I shall not return to them again. What is known of their origin and character has been stated by Professor Whitney in several very careful articles in the Journal of the American Oriental Society. 1 "The Atharvana," he says, "is, like the Rich, a historical and not a liturgical collection. Its first eighteen books, of which alone it was originally composed, are arranged upon a like system throughout; the length of the hymns, and not either their subject or their alleged authorship, being the guiding principle: those of about the same number of verses are combined together into books, and the books made up of the shorter hymns stand first in order. A sixth of the mass, however, is not metrical, but consists of longer or shorter prose pieces, nearly akin in point of language and style to passages of the Brahmanas. Of the remainder, or metrical portion, about one sixth is also found among the hymns of the Rich, and mostly in the tenth book of the latter: the rest is peculiar to the Atharvana." And again.2 "The most prominent characteristic feature of the Atharvana is the multitude of incantations which it contains; these are pronounced either by the person who is himself to be benefitted, or, more often, by the sorcerer for him, and are directed to the procuring of the greatest variety of desirable ends; most frequently, perhaps, long life, or recovery from grievous sickness, is the object sought: then a talisman, such as a necklace, is sometimes given, or in very numerous cases some plant endowed with marvellous virtues is to be the immediate external means of the cure; further, the attainment of wealth or power is aimed at, the downfall of enemies, success in love or in play, the removal of petty pests, and so on, even down to the growth of hair on a bald pate."

## CHAPTER III.

## MANTRA PERIOD.

HAVING ascribed to one period the first es ablishment of the threefold ceremonial (trayî vidyâ), the composition, and collection of the Brahmanas, and the ramification of the Brahmana charanas, we have now to see whether we can extend our view beyond the limits of this period and trace the stream of Vedic literature still further back to its source and its earliest diffusion. According to its general character, the Brahmana period must be called a secondary period. It exhibits a stratum of thought, perfectly unintelligible without the admission of a preceding age, during which all that is misunderstood, perverted, and absurd in the Brahmanas, had its natural growth, its meaning, and purpose. But can it be supposed that those who established the threefold ceremonial, and those who composed the threefold Brahmanas, followed immediately upon an age which had known poets, but no priests, prayers, but no dogmas, worship, but no ceremonies? Or are there traces to show that, even previous to the composition of the Brâhmanas, a spirit was at work in the literature of India, no longer creative, free, and original, but living only on the heritage of a former age, collecting. classifying, and imitating? I believe we must decidedly adopt the latter view. The only document we have, in which, we can study the character of the times, previous to the Brahmana period, is the Rig-veda-sanhita. The other two Sanhitas were more likely the production of the Brahmana period. These two Vedas, the Yajur-veda and Sâma-veda, were, in truth, what they are called in the Kausnîtaki-brâhmana, the attendants of the Rig veda.1 The Brâhmanas presuppose the Trayî vidyâ, the threefold knowledge, or the three fold Veda, but that Trayî vidya again presupposes one Veda, and that the Rig-veda. We cannot suppose that the hymns which are found in the Rig-veda, and in the Sanhitas of the two supplementary Vedas, the Sama and Yajur-veda, were collected three times by three independent collectors. If so, their differences would be much greater than they are. The differences which do exist between the same hymns and verses as given in the three Sanhitas, are such as we should expect to find in different Sakhas, not such as would naturally arise in independent collection or Sanhitas.

The principle on which the Sanhitâ of the Rig-veda was made is different from that which guided the compilers of the Sanhitâs of the Adhvaryus and Udgâtris. These two Sanhitâs follow the order of an established ceremonial. They presuppose a fixed order of sacrifices. This is not the case in the Sanhitâ of the Bahvrichas. There is, as we shall see, a system in that Sanhitâ also, but it has no reference to the ceremonial.

The different character of the Rig-veda-sanhitâ, as compared with the Sanhitâs of the other two Vedas, has attracted the attention of

<sup>&</sup>lt;sup>1</sup> तत्परिचरणावितरी वेदी ॥ vi. 11.

the Brahmans, and we may quote on this subject the remarks of Sayana, in his Introduction to the Rig-veda.

"Has As'valâyana," he says, "when composing the ceremonial Sûtras. followed the order of the Sanhita of the Rig-veda, or of the Brahmana? He could not have followed the order of the hymns, because he says at the beginning of his Sûtras, that first of all he is going to explain the new and full-moon sacrifices (Dars'a purnamasa), while the first hymns of the Rig-veda are never used at that sacrifice. Nor does he seem to have followed the Brahmana. For the Brahmana begins with the Dîkshanîyâ ceremony. Here then it must be observed that the collection of hymns follows the order which is observed at the Brahmavaina and on other occasions where prayers are to be recited. It does not follow the order in which hymns are employed at the different sacrifices. Brahmayajna is the name given to the act of repeating by heart one's own sacred text or even a single verse of it, whether a Rich, Yajush or Sâman. This repeating of all the Rich, Yajush or Saman verses is enjoined by many passages of the Brahmanas, and whenever hymns are thus enjoined to be repeated, that order is to be observed in which they have been handed down by an uninterrupted tradition. But as As'valâyana teaches the particular employment of particular hymns, basing it upon the authority of what are termed indicative passages of the revelation, it is but natural that he can not follow the order of the hymns of the Rig-veda. The texts of the Yajurveda, however, are given, from the first beginning, according to their order at the performance of sacrifices, and thus have Apastamba and others proceeded in the same order in the composition of their Sûtras. As this order has once been received, it is likewise adopted in the Brahmayajna. That As'valâyana should explain in the first place the Dars'apûrnamâsa sacrifice, while the Brâhmana begins with the Dîkshanîyâ sacrifice, is no objection, because the Dîkshanîyâ is only a modification of the Dars'apûrnamâsa, and many of its rules must be supplied from the typical sacrifice. Thus the Kalpa sûtra of As'valâyana assists in teaching the performance of the sacrifice by showing the employment of the hymns. That As'valayana should teach the employment of passages which do not occur in the Sanhita of the Rig-veda,2

<sup>1</sup> D 18

<sup>2</sup> Our MSS. represent, according to tradition, the text of the Sakala-s'ākhā and the same text is followed by As'valāyana in his Sūtras. Now, whenever As'valāyana quotes any verses which form part of the Sākala-s'ākhā, he only quotes the first words. Every member of his Charana was supposed to know the hymn of the Sākalas'ākhā by heart, it was sufficient, therefore, to quote them in this manner. But when he has occasion to refer to the verses which are found in the Brāhmana of the Aitareyins, without being part of the Sākala-sanhitā, As'valāyana quotes them in full. As these verses are not quoted in full in the text of the Aitareya-brāhmana, we may fairly suppose that the text of the Rig-velu-sanhitā, current among the Aitareyins, was different from that of the Sākala-s'ākhā, and contained the full text of these by mas. Sāyana, in his Commentary, does not state that these additional verses belonged to the Sākhā of the Aitareyins, but there can be little doubt that at his time the text of their Sanhitā was

is no fault, because these hymns occur in different Sakhas, and their employment is prescribed by a different Brahmana, so that their being mentioned can only increase the value of his Satras. Those who know the logic of this subject say, that there is but one secrifice and that it is to be learnt from all the different Sakhas."

Here then we see that even so late a writer as Sayana is fully aware of the peculiar character of the Rig-veda, as compared with the other Vedas. In his eyes the collection of hymns, preserved in the Rig-veda, has evidently something anomalous. He, brought up in the system of a stiff liturgical religion, looks upon the Sanhitas simply as prayerbooks to be used at the sacrifices. The sacrifices as taught in the Brahmanas and Sutras, are to him a subject of far greater importance than the religious poetry of the Rishis. It is but natural, therefore, that he should ask, what is the use of this collection of hymns, in which there is no order or system, as in the hymn books of the Yajur veda and Sama-veda? His answer, however, is most unsatisfactory. For if the other two collections of hymns can be used for private devotion although they follow the order of the sacrifices, why should not the same apply to the hymns of the Rig-veda?

Whenever we find in the ancient literature and theology of the Brå hmans anything that is contrary to their general rules, anything that seems anomalous to them and is yet allowed to exist, we may be sure that it contains some really historical elements, and that it was of too solid a nature to receive the smooth polish of the Bråhmanic system. It is so with the Rig-veda sanhità. It belongs to a period previous to the complete ascendancy of the Brâhmans; it was finished before

the threefold ceremonial had been worked out in all its details.

And yet there is some system, there is some priestly influence, clearly distinguishable in that collection also. It is true that the ten books of the Rig-veda stand before us as separate collections, each belonging to one of the ancient families of India; but were these collections undertaken independently in each of these families, at different times, and with different objects? I believe not. There are traces, however faint, of one superintending spirit.

Eight out of the ten Mandalas begin with hymns addressed to Agni, and these hymns, with the exception of the tenth Mandala, are invari-

lost and forgotten. He says, however, that these verses belonged to a different Sakha, and that they must be supplied from As'valayana's Sûtras, where for this very reason, they were given in full. At the time of As'valayana, therefore, the text of the Sanhita of the Aitareyins was still in existence, and he likewise notices in his Sûtras peculiarities in the ceremonial of the Aitareyins. Dr. Roth has pointed out one of these verses (Nirukta, xlv.). The passage in the Aitareya-brahmana from which the verse is taken, is, i. 4. 2.; and Sâyana says

there: ता प्ताश्चतस्त्र ऋवः शाखांतरगना आश्वलायनेन पहिता दृष्टवाः ॥
In a similar manner the modern Sûtras of the Fratres Attidii (Tab. vi. vii.)
contain the Mantras in full. which in the ancient statutes (Tab. i.) are only
indicated as generally known. See Aufrecht und Kirchhoff, Die Umbrischen Sprachdenkmäler.

ably followed by hymns addressed to Indra. 1 After the hymns addressed to these two deities we generally meet with hymns aidressed to the Vie Devâh. This cannot be the result of mere accident, nor is hing in the character of the two gods Agni and Indra, which there reessitate such an arrangement. Agni is indeed called the would lowest .. the gods, but this neither implies his inferiority nor his superiority.2 It simply means that Agni, as the god of fire on the hearth, is the nearest god, who descends from his high station to befriend men, and who, in the form of the sacrificial fire, becomes the messenger and mediator between god and men.3 This would not be sufficient to account for the place assigned to him at the beginning of eight out of the ten Mandalas of the Rig-veda. Indra, again, is certainly the most powerful of the Vedic gods,4 but he never enjoys that supremacy which in Greece and Rome was allowed to Zeus and Jupitor. We can hardly doubt, therefore, that the place allowed to hymns addressed to Agni and Indra, at the beginning of the Mandalas, was the result of a previous agreement, and that the Mandalas themselves do not represent collections made independently by different families, but collections carried out simultaneously in different localities under the supervision of one central authority.

Another indication of the systematic arrangement of the Mandalas

is contained in the Apri hymns.

There are ten Aprî-sûktas in the Rig-veda:

1. I. 13, by Medhatithi, of the family of the Kanvas (ii. b.); 12 verses.

1 First Mandala, Anuvâka 1. = Agni. Anuvâka 2. 3= Indra. Second Mandala, Anuvaka 1. = (Agni-11). Anuvâkâ 2. = Indra. Anuvâka 1. 2. = Agni. Third Mandala, Anuvâka 3. 4. = Indra. Fourth Mandala, Anuvaka 1 -- 2, 5. = Agni. Anuvâka 2.3. = Indra. Fifth Mandala, Anuvâka 1.-2, 14. = Agni. Anuvaka 2, 15.-3, 8. Indra. Sixth Mandala, Anuvâka 1.-2, 1. = Agni. Anuvâka 2, 1.-4, 4. = Indra. Seventh Mandala, Anuvâka 1. - Agni. Anuvâka 2. = Indra. Eighth Mandala, Pragatha hymns.

Ninth Mandala, Soma hymns.

Tenth Mandala, Anuvâka 1. = Agni.

<sup>2</sup> Schol. ad Pind Nem. x. 59. Και λαρ το πρωτον εσχατον ποτε δυναται λενεσθαι, και το εσχατον, πρωτον κεχρηται και Σοφοκλης τω εσχατω αντι του πρωτου, Ηδη γαρ εδρα Ζευς εν εσχατω θεων (εχει γαρ εδραυ. Brunck.)

8 Rv. iv. 1. 5. स त्वं ने। अग्ने ऽनमे। भनेति नेदिष्ठां अस्या उपमो व्युष्टी ॥ "Come down to us, O Agni, with thy help, he thou most near to us to day as the dawn flashes forth."

<sup>4</sup> इंद्रा वे देवानामेजिष्ठो बलिष्टः Kaushîtaki-brahmaṇa, vi. 14.

2. I. 142, by Dirghatamas, son of Uchathya, of the family of the Angirasas (ii. a.); 13 verses. (Indra.)

3. I. 188, by Agastya, of the family of the Agastis (vii); 11 verses.

(Tanûnapât.)

4. Il. 3. by Gritsamada, son of Sunahotra, (Angirasa, adopted by Sunaka (Bhargava) (i 7.); 11 verses., (Naras'ansa.)

5. III. 4, by Vis'vamitra, son of Gathin, of the family of the Vis'va-

mitras (iv.); 11 verses (Tanûnapât.)

6. V. 5, by Vasus ruta, son of Atri, of the family of the Atreyas (iii.):

11 verses. (Narâs'ansa.)

7. VII. 2, by Vasishtha, son of Mitravarunau, of the family of the Vasishthas (vi.); 11 verses. (Naras'ansa.)

IX. 5, by Asita or Devala, of the family of the Kas'yapas (v.):

Il verses. (Tanûnapât.)

9. X. 70, by Sumitra, of the family of the Bådhryas'vas (i. 6.): Il verses (Narås'ansa)

10. X. 110, by Râma, the son of Jamadagni, or by Jamadagni, of the

family of the Jâmadagnyas (i. 2.); 11 verses. (Tanûnapât)

These hymns consist properly of 11 verses, each of which is addressed to a separate deity. Their order is as follows:-

First verse, to Agni Idhma or Susamiddha, the lighted fire.

Second verse, to Tanûnapât, the sun hidden in the waters or the clouds, or to Naras'ansa, the rising sun, praised by men.

Third verse, to the Ilas, the heavenly gifts, or Ilita, Agni, implored

to bring them.

Fourth verse, to Barhish, the sacrificial pile of grass. Fifth verse, to Devîr dvârah, the gates of heaven. Sixth verse, to Ushasa-naktau, dawn and night.

Seventh verse, to Daiviyau, hotârau, prachetasau, (i.e., Agni and Aditya, or Agni and Varuna, or Varuna and Aditya; Shadgurus'ishya).

Eighth verse, to the three god lesses Sarasvatî, Ilâ, Bhâratî.

Ninth verse, to Tvashiri, the creator.

Tenth verse, to Vanaspati, the tree of the sacrifice.

Eleventh verse, to the Svåhåkritis. (Vis've Devåh, Shadgurus'ishva.) The only differences in the ten Apri hymns of the Rig-veda arise from the name by which the second deity is invoked. It is Tanûnapât in hymns 3, 5, 8, 10; Naras'ansa in hymns 4, 6, 7, 9; whereas in hymns 1 and 2 the second deity is invoked under either name in two separate verses. This raises the number in these two hymns to twelve, and this number is again raised to thirteen in hymn 2, by the addition at the end

of a separate invocation of Indra.

The whole construction of these hymns is clearly artificial. They share the character of the hymns which we find in the Sama and Yajur-vedas, being evidently composed for sacrificial purposes. Nevertheless, we find these artificial hymns in seven out of the ten Mandalas, in I., II., V., VII., X., X. This proves a previous agreement among the collectors. For some reason or other, each family wished to have its own Apri hymn, a hymn which had to be recited by the Hotri priest, previous to the immolation of certain victims, and such a hymn

<sup>1</sup> Burnouf, Journal Asiatique, 185), p. 249, Roth, Nirukta, p. xxxvi.

was inserted, not once for all in the Sanhita, but ten times over. Some of the verses in the Aprî hymns are more repetitions, and even families so hostile to each other as the Vasishthas and Vis vamitras have some verses in common in these Aprî hymns. But, if on one side the presence of the Aprî hymns in different Mandalas proves a certain advance of the ceremonial system in the Mantra period, and the influence of a priestly society even in the first collection of the hymns; it proves likewise, that the traditional distribution of the Mandalas among various Vedic families is not a merely arbitrary arrangement. These tamilies insisted on having each their own Apri hymn recorded, and whereas for the general ceremonial, as fixed in the Brahmanas and Sûtras, the family of the poet of certain hymns employed at the sacrifices, is never taken into account, we find an exception made in favour of the Aprî hymns. If a verse of Vis'vâmitra is once fixed by the Brahmanas and Satras as part of any of the solemn sacrfices, no sacrificer, even if he were of the family of the Vasishthas, would have a right to replace that verse by another. But with regard to the Aprî that liberty is conceded. The Aitareya-brahmana records this fact in the most general form. Let the priest use the Aprîs according to the Rishi. If he uses the Apris according to the Rishi, he does not allow the sacrificer to escape from the relationship of that Rishi." As'valayana enters more into details.2 He says that those who belong to the Sunakas, should use the hymn of Gritsamada; those who belong to the Vasishthas, that of Vasishtha. The Aprî hymn of Râma or Jamadagni he allows to be used by all families, (excepting the Sunakas and Vasishthas) but, he adds, that each family may choose the Aprî hymn of its own Rishi. How this is to be done is explained in a Sloka, ascribed to Saunaka.3 He ascribes the first Aprî hymn to the Kanvas; the second to the Angiras,' with the exception of the Kanvas; the third to the Agastis; the fourth to the Sinakas; the fifth to the Vis'vamitras; the sixth to the Atris; the seventh to the Vasishthas; the eighth to the Kas'yapas; the ninth to the Badhryas'vas; the tenth to the Bhrigus, with the exception of the Sunakas and Badhrvas'vas.4

The original purpose of the Apri hymns, and the motive for allowing the priest to choose among them according to the family to which his client belonged, are difficult to discover. An ancient author of the name of Ganagari, sendeavoured to prove from the fact that one and

the same Aprî hymn may be used by all, that all people belong really and truly to one family. It is possible, indeed, that the Aprî hymns may have been songs of reconciliation, and that they were called aprî, i. e. appeasing hymns, not from their appeasing the anger of the gods, but the enmities of members of the same or different families. However that may be, they certainly do prove that there had been an active intercourse between the ancient families of India long before the final collection of the ten books, and that there ten books were collected and arranged by men who took more than a merely poetical in-

terest in the acient sacred poetry of their country.

Although we see from these indications that the collection of the hymns which we possess in the Rig-veda took place during a period when the influence of the Brahmans, as a priestly caste, had made itself felt in India, we must claim, nevertheless, for this collection a character not yet exclusively ceremonial. Not only is the order of the hymns completely independent of the order of the sacrifices, but there are numerous hymns in our collection which could never have been used at any sacrifice. This is not the case with the other Vedas. Every hymn, every verse, every invocation in the Sanhitas of the Sama and Yajur-vedas are employed by the Udgatris and Adhvaryus. whereas the hymns of the Rig-veda are by no means intended to be all employed by the Hotri priests. If we speak of the sacred poetry of the Brahmans, that of the Sama and Yajur-vedas is sacred only because it is used for sacrificial purposes, that of the Rig-veda is sacred. because it had been handed down as a sacred heir-loom from the earliest times within the memory of man. The sacredness of the former is matter of system and design, that of the latter is a part of its origin.

There is an objection that might be raised against this view, and which deserves to be considered. No one acquainted with the ceremonial of the Brâhmans could well maintain that, after the final division of that ceremonial among the three classes of priests, a collection like that of the Rig-veda could have been conceived. The Rig-veda is not a Veda for the Hotri priest, in the same sense in which the Sâman and Yajur-vedas are for the Udgâri and Adhvaryu priests. But it might be said that there is a fourth class of priests, the Brâhman class, and that the Rig-veda might have been collected for their special benefit. In order to answer this objection, we shall have to examine more

closely the real character of the four classes of priests.

As'valâyana (iv. 1.), says that there are four priests, each having three men under him. These are:

- Hotri, with Maitrâvaruna Achhavâka, Grâvastut.
   Adhvaryu, with Pratiprasthâtri, Neshtri, Unnetri.
- III. Udgâtri, with Prastotri, Âgnîdhra or Agnîdh, Potri.
- IV. Brâhman, with Brâhmanachhansin, Pratihartri, Subrahmanya.

This is not the order as given in Âs'valâyana; he places the Brâhman and his three men before the Udgâṭri and his attendants. Some would seem to place the Brâhman first of all, but Âs'valâyana (Grihya, i. 22.) remarks that the Brâhman is first chosen when there is an election of four priests only. If all the sixteen are chosen, then the Hotri comes first, afterwards the Brâhman, thirdly the Adhvaru and lastly the Udgâṭri.

These sixteen priests are commonly called by the name of Ritvij, and are chosen by the man in whose favour the sacrifice is offered, the Yajamâna or Svâmin. There are other priests, such as the Samitri, (the slayer,) the Vaikartas, (the buschers,) the Chamasadhvaryus, (the assistants of the Adhvaryus,) but they do not rank as Ritvij. The Kaushît. akins admit a seventeenth Ritvij, the so called Sadasya, who is to superintend the whole sacrifice. This large arrary of priests was only wanted for certain grand sacrifices. In the Gautama-sûtra-bhâshya (p. 30.) we are told that for the Agnihotra and Aupasana one priest, the Adhvaryu, was sufficient; for the Dars'apûrnamâsa, four; for the Châturmâsyas five; for the Pas'ubandha six; for the Jyotishtoma sixteen. As valayana prescribes the sixteen priests for the sacrifices called Ahina (sacrifices lasting from two to eleven days), and Ekâha (sacrifices of one day), and restricts the seventeen priests to the Sattras (sacrifices lasting from thirteen to one hundred days). Each of the four classes of these priests had peculiar duties to perform. These duties were prescribed in the Brahmanas. The duties of the Hotri are laid down in the Brâmanas of the Bahvrichas, such as the Kaushîtaki and Aitareya-brahmanas; those of the Adhvarya in the Brahmanas of the Charakas (the Taittirîyaka and in the Brahmanas of the Vajasaneyins (the Satapatha); those of the Udgatri in the Brahmanas of the Chhandogas (the Tandya.) Apastamba, who describes the sacrifice in his Paribhasha-sûtras, 2 says that it is prescribed by the three Vedas, the Rig-veda, Yajur-veda and Sâma veda.3 "The Hotri," he says, "performs

<sup>3</sup> सं त्रिभिर्वेदैवि घीयते ॥३॥ ऋग्वेदय छुवेदसामवदैः ॥४॥ ऋग्वेदेव होता करोति ॥१६॥ सामवेदेवोद्दाना ॥१७॥ यजुवेदेनाध्वर्युः ॥१८॥ सर्वेब्रह्मा ॥१६॥

<sup>1</sup> Åsv'.-Grihya i. 22. सदस्य सप्तदशं कीषीति हनः समामनंति स कर्मणा-मुपद्रष्टा भवतीति । सप्तद्शग्रहणमृत्विक्सर्थो भवतीति ज्ञापनार्थं ॥ Ttis is confirmed by the Kaushîtaki-brâhmana. Other authorities admit several Sadasyas. (शास्त्रांतरेऽनेके द्रष्टाः) For the Sattra sacrifices a seventeenth priest. called the Gribapati, lord of the house, is admitted. He is not considered as the Yajamana, but seems to be the actual sacrificer. (गृहपतिसञ्जेन केवलयजमानपदार्थकारिणा सप्तद्शेन पुरुषेण सहिता: Narayana on Astr. Srauta-sûtra, iv. 1.) In the Aitareya-brahmana (vii 1.), where the division of the animal among the various priests is escribed, we have the sixteen Ritvij, and besides one Sadasva, three Grihapatis (probably the sacrificer himself, one who acts for him and who acts for his wife), one Samitri (a slayer, who need not be a Brahman), two Vaikartas (butchers), several Upagatris (choristers), and an Atreya. Other wives (patnis) besides the phâryâ are mentioned as present. In the Tândya-brâhmana (25. 15.) the Pratiprasthâtri is left out, but two Adhvaryus, two Unnetris, and two Abhigarapagarau are mentioned.

his duties with the Rig-veda, the Udgâtri with the Sâma-veda, the Adhvaryu with the Yajur-veda; the Brâhman with all the three Vedas."

The Adhvaryus were the priests who were intrusted with the material performance of the sacrifice. They had to measure the ground, to build the altar (vedi), to prepare the sacrificial vessels, to fetch wood and water, to light the fire, to bring the animal and immolate it. They formed, as it would seem, the lowest class of priests, and their acquirements were more of a practical than an intellectual character. Some of the offices which would naturally fall to the lot of the Adhvaryu, were considered so degrading, that other persons besides the priests were frequently employed in them. The Samitri, for instance, who had to slay the animal, was not a priest, he need not even be a Brahman. and the same applies to the Vaikartas, the butchers, and the so-called Chamasadhvaryus. The number of hymns and invocations which they had to use at the sacrifices was smaller than that of the other priests. These, however, they had to learn by heart. But as the chief difficulty consisted in the exact recitation of hymns, and in the close observance of all the euphonic rules, as taught in the Pratis'akhyas, the Adhvaryus were allowed to mutter their hymns, 2 so that no one at a distance could either hear or understand them Only in cases where the Adhvaryu had to speak to other officiating priests, commanding them to perform certain duties,3 he was of course obliged to speak with a loud and distinct voice. All these verses and all the invocations which the Adhvaryus had to use. were collected in the ancient liturgy of the Adhvaryus to gether with the rules of the sacrifice. In this mixed form they exist in the Taittirîyaka. Afterwards the hymns were collected by themselves, separated from the ceremonial rules, and this collection is what we call the Yajur-veda-sanhita or the prayer-book of the Adhvaryu priests.

There were some parts of the sacrifice, which according to ancient custom, had to be accompanied by songs, and hence another class of priests arose whose particular office it was to act as the chorus. This naturally took place at the most solemn sacrifices only. Though as yet we have no key as to the character of the music which the Udgatris performed, we can see from the numerous and elaborate rules, however

<sup>&</sup>lt;sup>1</sup> Ait.-brâhmaṇa, vii. 1.

<sup>3</sup> An instance of this occurs in a passage of the Aitareya-brâhmaṇa translated by Prof. Roth. The first words (ii. 2.) A THI YUNGATE are spoken by the Adhvaryu, and not, as Professor Roth supposes, by the Hotri. It is the Adhvaryu only who can say, "We anoint the sacrificial stake, do thou accompany us with the hymns." A passage like this, as it is adderessed to another priest, the Adhvaryu would have to pronounce with a loud voice. The Brâhmaṇa itself says, says the Adhvaryu "The presha, or command, "anubrâhi," can only be addressed to the Hotri, and there was no ground for placing the following verses in the mouth of the Adhvaryu. Roth, Nirukta xxxiv.

250 HOTRIS

unintelligible, that their music was more than mere chanting. The words of their songs were collected in the order of the sacrifice, and this libratto is what we possess under the name of Sama-veda-sanhita,

or the prayer-book of the Udgatri priests.1

Distinct from these two classes, we have a third class of priests, the Hotris, whose duty it was to recite certain hymns during the cacrifice in praise of the deities to whom any particular act of the sacrificer was addressed. Their recitation was loud and distinct, and required the most accurate knowledge of the rules of euphony or Sikshâ. The Hotris, as a class, were the most highly educated order of priests. They were supposed to know both the proper pronunciation and the meaning of their hymns, the order and employment of which was taught in the Brâhmanas of the Bahvrichas. But while both the Adhvaryus and Udgâtris were confessedly unable to perform their duties without the help of their prayer-books, the Hotris were supposed to be so well versed in the ancient sacred poetry, as contained in the ten Mandalas of the Rig-veda, that no separate prayer-book or Sanhitâ was ever arranged for their special benefit.

There is no Sanhita for the Hotris corresponding to the Sanhitas of the Adhvaryus and Udgâtris. The Hotri learnt from the Brâhmana, or in later times, from the Sûtra, what special duties he had to perform. He knew from those sources the beginnings or the names of the hymns which he had to recite at every part of the service. But in order to be able to use these indications, he had previously to know the whole body of Vedic poetry, so as to be ready to produce from the vast store of his memory whatever hymn or verse was called for at the sacrifice. There of Walker's Collection a work entitled, exists among the MSS. As'valâyana-s'âkhoktamantra-sanhitâ, a collection of hymns of the As'valayana-s'akha, which contains the hymns as required according to the Grinva sûtras of As'valâyana. It would have been easy to construct a similar collection for the S'rauta-sûtras, but such a collection was never made, and it is never alluded to in the aucient literature of the Brahmans.2

If then the itig-veda sanhita was not composed for the special benefit of the Hotris, much less of the other two classes of priests, it might be supposed that it had nevertheless a sacrificial character, and was intended to assist the fourth class of priests, or the Brahman, properly so called. The Brahman, as we saw, had to watch the three classes of priests and to correct any mistake they might commit. He was therefore, supposed to know the whole ceremonial and all the

Sâyana (Rv. Bh. i. p. 23.) remarks that some verses of the Yajurveda are called Rich in the Brahmanas of the Adhvaryus. Thus the verse

The Sanhitâ consists of two parts; the Ârchika and Staubhika. The Ârchika, as adapted to the special use of the priests, exists in two forms, called Gânas, or Song-books, the Veyagâna and Āraṇyagâna. The Staubhika exists in the same manner as ûhagân; and Uhyagâna Cf. Benfey, Preface to his edition of the Sâma-vedi-ârchika, Leipzig, 1848, and Weber, Ind Studien, i. 30. The supposition that the modern origin of some of the Rigveda, could be proved by their not occurring in the Sâma-veda, has been well refuted by Dr, Pertsch.

hymns employed by the Hotri, Adhvaryu, and Udgåtri. Now the Rig veda does contain most of the hymns of the other two Velas, I and in several places it is maintained that the Bråhman ought properly to be a Hotri. All this would render it not improbable that the Rig-veda sanhitå belonged to the same age as the other two Sanhitås, that its collection was suggested by the same idea which led to the collection of the hymns of the other two classes of priests, and that, for the special benefit of the Bråhman, it comprehended in one body all the hymns which the Hotri, the Adhvaryu, and Udgåtri were expected to know singly. In this case the Rig-veda-sanhitå, instead of being more ancient, would in fact represent the latest collection of a sacred poetry.

It would be of no avail to appeal to the testimony of later authorities, such as the Puranas, in order to refute this theory. The Vishnupurana (p. 276), for instance, has the following remarks on this subject; "Vyasa," it is said, "divided the one sacrificial Veda into four parts, and instituted the sacrificial rite administered by the four kinds of priests, in which it was the duty of the Adhvaryu to resite the Yajush verses or direct the ceremony; of the Hotri to repeat the Rich; of the Udgatri to chant the Saman; and of the Brahman, to pronounce the formula called Atharvan. Then the Muni, having collected together the hymns called Rich, composed the Rig-veda, &c., and, with the Atharvans, he composed the rules of all the ceremonies suited to kings, and the function of the Brahman agreeably to practice." This passage only serves to show that the authors of the Puranas were entirely ignorant of the tone and character of the Vedic literature. although the Brahman priest was the only Ritvij who had occasionally to use passages from the Atharva-veda, blessings, imprecations, etc.; yet the so-called Atharva-veda had nothing in common with the three ancient Vedas, and contained no information on the general features

देव: सिनतीत्पुनानु is called a Rich addressed to Savitri. Sâmans also are mentioned, as when it is said, "Singing the Sâman he sits down." In the Sâna-veda there are not only Rich verses, but also Yajush invocations, such as आश्चनमित अच्युनमित, प्राणशंसितमित । The Hotri priests have likewise to use invocations which would more properly be called Yajush, such as अवर्षाऽध्वर्षाइड "Adhvaryu, hast thou got the water?" to which the Adhvaryu replies: उतेमनंनमुः "Yes, it has come." Here the Commentator says, होत्यंद्धरात्मकं कंचिन्मंत्रं निधत्ते॥

¹ The invocations, properly called Yajush, are of course not to be found in the Rig-veda. Some of the hpmns of the Sâma and Yajur-veda, which have a more modern appearance, are to be found in the tenth Mandala of the Rig-veda, or among the latest addition, such as the Vâlakhilyas. There are, however, some, which, though they occur in the Sâma and Yajur-vedas, are not to be found in the Rig-veda. This may possibly be accounted for by the fact that we do not possess all the Sâkhâs of the Rig-veda. The differences also in the text of hymns, as read in the three Vedas, must be ascribed to the influence of early Sâkhâs, and cannot be used as an argument for determining the more or less ancient date of the three Vedas.

of the great sacrifice, such as would have been indispensable to the

superintendent of the other priests.1

The real answer to a supposition which would assign the Rig-veda-sanhitâ to the Brâhman is, that to him also that collection of hymns would have been of no practical utility. He would have learnt from it many a hymn never called for, never used at any sacrifice; and he would have had to unlearn the order both of hymns and verses whenever he wished to utilise his knowledge for the practical objects of his station.

We may, therefore, safely ascribe the collection of the Rig-veda, or, as Professor Roth calls it, the historical Veda, to a less practical age than that of the Brahmana period; to an age, not entirely free from the trammels of a ceremonial, yet not completely enslaved by a system of mere formalities; to an age no longer creative and impulsive, yet not without some power of upholding the traditions of a past that spoke to a later generation of men through the very poems which they were

collecting with so much zeal and accuracy.

The work of the Mantra period is not entirely represented by the collection of the ancient hymns. Such a work would be sufficient in itself to give a character to an age, and we might appeal, in the history of ancient Greek literature, to the age of the Diaskeuasts. A veneration which begins to collect has entered into a new phase of life. Nations, like individuals, become conservative when they cease to trust implicitly in themselves, and have learnt from experience that they are not better than their fathers. But though the distinctive feature of the Mantra period consisted in gathering the fruits of a bye gone spring, this was not the only work which occupied the Brahmans of that age. Where poems have to he collected from the mouth of the people, they have likewise to be arranged. Correction, are supposed to be necessary; whole verses may have to be supplied. collecting and correcting a large number of poems, many a man would feel disposed to try his own poetical powers; and if new songs were wanted, it did not require great talent to imitate the simple strains of the ancient Rishis. Thus we find in the Rig-veda, that, after the collection of the ten Mandalas was finished, some few hymns were added. generally at the end of a chapter, which are known by the name of Khilas. We can hardly call them successful imitations of the genuine songs: but in India they seem to have soon acquired a certain reputation. They found their way into the Sanhitas of the other Vedas; they are referred to in the Brahmanas; and though they are not counted in the Anukramanis, together with the original hymns, they are there also mentioned as recognised additions.

Be ides these hymns, which were added after the collection of the ten books had been completed, there is another class of hymns, actually incorporated in the sacred Decads, but which nevertheless must be

<sup>1</sup> Prasthana-bheda, p. 16., 1. 10. अथर्च वेदस्तु यज्ञानुपयुक्तः शांतिपौष्टि-काभिचारादिकर्मप्रनिपादकत्वे तात्यंतिविलक्षण एव । Against this statement that of Kumarila should be taken into account: (i. 3.) शांतिपुष्ट्यभि-चारार्था हो कत्रसन्ति गान्नि शास्ति गास्ति य प्रभोयं ते द्वारपोवात्मोय गोवराः ॥

ascribed to poets who were imitators of earlier poets, and whose activity, whether somewhat anterior to, or contemporaneous with the final edition of the Rig-veda-sanhitâ, must be referred to the same Mantra period. We need not appeal to the tradition of the Brâhmans, who, in matters of this kind, are extremely untrustworthy. They place a very small interval between the latest poets of the hymns and the final collection of the ten books. The latter they ascribe to Krishna Dvaipâyana Vyâsa, the embodiment of the Indian διασκευη, whereas one of the poets whise hymns form part of the Sanhitâ, is Parâs'ara,

the reputed father of Vyåea.

But we have better evidence in the hymns themselves, that some of their authors belonged to a later generation than that of the most famous Rishis. The most celebrated poets of the Veda are those who are now called the Mâdhyamas, from the fact of their hymns standing between the first and the last books of our collection. They are Gritsamada, (2d Mandala), Vis vâmitra (3d Mandala), Vâmadeva (4th Mandala), Atri (5th Mandala), Bharadvâja (6th Mandala), and Vasishtha (7th Mandala). Added to these are, in the beginning, the hymns of various poets, collected in the first Mandala, called the book of the Satarchins, from the fact that each poet contributed about a hundred verses; and at the end, the book of the Pragâtha hymns (8th Mandala), the book of the Soma hymns (9th Mandala), and the book of long and short hymns, ascribed to the Kshudrasûkta and Mahâsûkta poets, which, in accordance with its very name, is a miscellaneous collection.

It by no means follows that all the hymns of the seven middle Rishis are more ancient than those of the first and the last books; or that these books contain nothing but modern hymns. But the very name of Madhyama, given to the poets of the books from the second to the seventh shows that they were considered, even by the Brahmans, as distinct from the first and the three last books. They are not the middle books numerically, but they are called so because they stand by themselves, in the midst of other books of a more miscellaneous character.

Traces, however, of earlier and later poems are to be found through the whole collection of the Rig-veda; and many hymns have been singled out by different scholars as betraying a later origin than the rest. All such hymns I refer to the Mautra period, to an age which, though chiefly occupied in collecting and arranging, possessed likewise the power of imitating, and carrying on the traditions of a former age.

It is extremely difficult to prove the modern origin of certain hymns, and I feel by no means convinced by the arguments which have been used for this purpose. At present, however, I need not enter into the minutize of this critical separation of ancient and modern poetry. It is not my object to prove that this or that hymn is more modern than the rest; but I only wish to establish the general fact that, taken as a whole, the hymns do contain evidence of having been composed at various periods.

In order to guard against misconceptions, it should be understood that, if we call a hymn modern, all that can be meant is that it was

<sup>&</sup>lt;sup>1</sup> See page 22, note 2, and page 30.

composed during the period which succeeded the first spring of Vedic poetry, i. e., during the Mantra period. There is not a single hymn in the Rig veda that could be ascribed to the Brahmana period. Even a few of the Khilas, modern as they appear to us, are presupposed by the Brahmanas and quoted, together with other more ancient hymns. The most modern hymns in the Rig Veda-Sanhita, if our calculations are right, must have been composed previous to 8 10 B. c., previous to the first introduction of prose composition.

In order to prove that the hymns which are now thrown together into one body of sacrel poetry, were not the harvest of one single generation of poets, we have only to appeal to the testimony of the poets themselves, who distinguish between ancient and modern hymns. Not only has the tradition of the Brahmans, which is embodied in the Anukramans, assigned certain hymns to Rishis, who stand to each other in the relation of father and son, and grandson, but the hymns themselves allude to earlier poets, and events which in some are represented as present, are mentioned in others as belonging to the past. The argument which Dr. Roth! has used in older to prove the comparatively modern date of the Atharvana, applies with equal force to some of the hymns of the Rig vels. Here, also, the names of Purumilha, Vasishtha, Janualagni, and others, who are known as the authors of certain hymns, are mentioned in other hymns as sages, who in former times enjoyed the favour of the gods.

"As our ancestors have praised thee, we will praise thee," is a very frequent sentiment of the Vedic poets. A new song was considered a special honour to the gods. The first hymn of the Rig-veda gives utterance to this sentiment. "Agni," says Madhuchhandas, "thou who art worthy of the praises of ancient, and also of living poets, bring hither thou the gods."

Vis'vâmitra the father of Madhuchhandas, and himse'f one of the ancient Rishis, concludes his first hymn 2 with the words, "I have proclaimed, O Agni, these thy ancient songs, 3 and new songs for thee who art old. These great libations have been made to him who showers benefits upon us: the sacred fire has been kept from generation to generation."

In another hymn, 4 Vis'vamitra distinguishes between three classes of hymns, and speaks of Indra as having been magnified by ancient,

middle, and modern songs.

The sacrifice itself is sometimes represented as a thread which unites the living with the departed, and through them, with the first ancestors of man, the gods.<sup>5</sup> The son carries on the weaving which was interrupted by the death of his father,<sup>6</sup> and the poet, at the begin-

<sup>1</sup> Abhandlungen, p. 43.

<sup>&</sup>lt;sup>5</sup> See my Essay on the Funeral Ceremonies, p. xxii. note.
<sup>6</sup> Rv. x. 130. 1.

ning of a sacred rite, 1 exclaims. "I believe I see, with the eye of the mind, those who in byegone days performed this sacrifice." With a similar feeling, Vis'vâmitra, in his morning prayer, looks back to his fathers, who have gazed on the rising sun before him, and have exalted the power of the gods: 2

"To Indra goes my thought, spoken out from the heart, to him, the Lord, it goes, fashioned by the bard. It awakes thee when it is recited

at the sacrifice; Indra, take heed of that which is made for thee!

"Rising even before the day, awakening thee when recited at the sacrifice, clothed in sacred white raiments, 3 this is our prayer, the old,

the prayer of our fathers.

"The Dawn, the mother of the twins, has given birth to the twins (i.e. Day and Night)—the top of my tongue fell, for he (the Sun) came. The twins, who have come near the root of the Sun, assume their bodies as they are born together, the destoyers of darkness.

"Amongst men there is no one to scoff at them who were our fathers, who fought among the cattle. Indra, the mighty and powerful,

has stretched out their firm folds."4

Vasishtha, another of the ancient Rishis, speaks likewise of ancient and modern hymns by which others, besides his own family, secured the favour of the gods.<sup>5</sup> "Whatever poets, ancient or modern, wise men, made prayers to thee, O Indra, ours may be thy propitious friendship:

protect us, O god, always with your blessings !"

One of the greatest events in the life of Vasishtha was the victory which King Sudâs achieved under his guidance. But in the Mandala of the Vasishthas, the same event is sometimes alluded to as belonging to the past, and in one of the hymns ascribed to the same Vasishtha we read: "Committing our sons and offspring to the same good protection which Aditi, Mitra, and Varuna, like guardians, give to Sudâs, let us not make our gods angry."

These passages, which might be greatly increased, will be sufficient to show that there were various generations of Vedic poets. The traces of actual imitations are less considerable than we might expect under such circumstances; and where we do meet with stereotyped phrases, it is often difficult to say which poe used them for the first time. When we find Dîrghatamas Auchataya, beginning a hymn to Vishnu with the words, "Let me now proclaim the manly deeds of Vishnu;" and another hymn of Hiranyastûpa Ângirasa to Indra, beginning with, "Let me now proclaim the manly deeds of Indra," we may suppose that the one hymn was composed with a pointed reference to the other; but we cannot tell which of the two was the original, and which the copy.

4 Gotra, originally a nurdle, then those who live within the same

hurdles or walls; a family, a race.

<sup>&</sup>lt;sup>1</sup> Rv. x. 130. 7.

<sup>2</sup> Rv. iii. 39.

<sup>3</sup> The Vis'vâmitras were white raiments. Their colour, called arjuna, can hardly be distinguished, however, from the colour of the dress of the Vasishthas, which is called s'veta.

<sup>5</sup> Ry. vi. 23. 9.

The fact, however, of ancient and modern hymns being once admitted, we may hope to arrive gradually at some criteria by which to fix the relative age of single hymns. Some of the hymns betray their comparatively modern origin by frequent allusion to ceremonial subjects. I do not mean to say that the sacrifice as such, was not as old and primitive an institution as sacred poetry itself. Most of the hymns owe their origin to sacrifices, to public or domestic holy-days. But those sacrifices were of a much more simple nature than the later Vedic cere-When the father of a family was priest, poet, and king, in one person, there was no thought as yet of distributing the ceremonial duties among sixteen priests, each performing his own peculiar office, or of measuring the length of every log that should be put on the fire, and determining the shape of every vessel in which the libations should be offered. It was only after a long succession of sacrifices that the spontaneous acts and observances of former generations would be treasured up, and established as generally binding. It was only after the true meaning of the sacrifice was lost, that unmeaning ceremonies could gain that importance which they have in the eyes of priests. If a hymn addressed to the gods had been heard, if a famine had ceased after a prayer, an illness been cured with a charm, an enemy been vanquished with war songs; not only would these songs, however poor, be kept and handed down in a family as the most precious heirloom, but the position in which the poet recited them, the time of the day, the most minute circumstances of every act, would be superstitiously preserved, in order to insure the future efficiency of the prayer. This was the origin of a ceremonial so complicated as that of the Brahmans. Now, we find in some of the hymns allusions which refer, not to a naturally growing, but to an artificial and a decaying ceremonial.

The most ancient name for a priest by profession was Purchita, which only means proepositus or prosess. The Purohita, however, was more than a priest. He was the friend and counsellor of a chief, the minister of a king, and his companion in peace and war. Vasishtha and .Vis'vâmitra, who with their families have both been the Purchitas of King Sudas, did more for the king than chanting hymns to implore the aid of their gods. Vasishtha was with the army of Sudas when that king conquered the ten kings who had crossed the Parushnî (Hydraotis, Rawi); Vis'vâmitra, when Sudâs himself crossed the Vipas' (Hyphasis, Beyah) and the Satadru (Hesudras, Sutlej). The importance of their office is best shown by the violent contest which these two families of the Vasishthas and Vis'vâmitras carried on, in order to secure for themselves the hereditary dignity of Purchita. There was a similar contest between the priest at the Court of Asamati, a descendant of Ikshvaku. He, not satisfied with his f ur Purchitas, Bandhu, Subandhu, Srutabandhu, and Viprabandhu, who were brothers and belonged to the family of the Gaunayanas, dismissed them, and appointed two new priests (mayavinau). These new Purchitas, seeing that the Gaupayanas used incantations

<sup>1</sup> See Prof Roth's excellent essay on Vasishtha and Vis'vâmitra, in his work, "Zur Literatur und Geschichte des Veda," published as early as 1846.

against the life of King Asamâti, retaliated, and caused, by their charms, the death of one of them, Subandhu. Thereupon the other three brothers composed a song to appease the wrath of the two priests, and to save their own lives. This song and some others connected with the same contest, from part of the 8th Ashṭaka of the Rig-veda.

The very fact of the office of Purohita being hereditary shows that it partook of a political character. It seems to have been so at an early time. In a hymn of the Rig-veda, i. 94. 6, where Agni is invoked under several priestly names, he is called, Janushâ Purohita or Purohita by birth. Cf. i. 102. 8. And we find several instances where priests, if once employed by a royal family, claim to be employed always. When Janamejaya Pârikshita ventured to perform a sacrifice without the Kas'yapas, he was farced by the Asitamrigas, a family of the Kas'yapas to employ them again. Whan Vis'vântara Saushadmana drove away the Syâparnas from his sacrifice, he was prevailed upon by Râma Mârgaveya to call them back. 1 All this shows that the priestly office was of great importance in the ancient times of India.

The original occupation of the Purohita may simply have been to perform the usual sacrifices; but with the ambitious policy of the Brâhmans, it soon became a stepping-stone to political power. Thus we read in the Aitareya-brâhmana: "Breath does not leave him before time; he lives to an old age; he goes to his full time, and does not die again, who has a Brâhman as guardian of his land, as Purohita. He conquers power by power; obtains strength by strength; the people

obey him, peaceful and of one mind."

Vâmadeva, in one of his hymns, expresses the same sentiment; and though he does not use the word Purohita, there can be little doubt that the Aitareya-brâhmana is right in explaining the words Brihaspati and Brâhman by Purohita.

"That king withstands his enemies with strong power who supports

a Brihaspati3 in comfort, praises him, and honours him as the first.

"The king before whom there walks a priest, lives well established in his own house; to him the earth yields for ever, and before him the

people bow of their own accord.

"Unopposed he conquers treasures, those of his enemies and his friends, himself a king, who makes presents to a Brâhman: the gods protect him" This shows that the position of the Brâhmans at the courts of the Kashatriya kings was more influential than that of mere chaplains. They walked before the king, and considered them-

<sup>1</sup> Aitareya br. vii. 27. Roth, Abhandlungen, p. 118. Weber, Ind. Studien, 1. 39. Mârgaveya is a difficult name. It may be simply, as Sâyana says, the son of his mother Mṛigû; but Mṛigû may be a variety of Bhṛigu, and thus confirm Lassen's conjecture that this Râma, the son of Jamadagni, of the race of Bhṛigu, commonly called Paras'u-râma. Cf. Weber, Ind. Stud. i. 216. Marghu is the name of Margiana in the Cuneiform Inscriptions.

<sup>&</sup>lt;sup>2</sup> Rv. iv. 50. 7. <sup>3</sup> "Brihaspati," says the Aitareya-brâhmana, "was the Purohita of the gods, and the Purohitas of human kings are his successors."

selves superior to him. In later times, when the performance of the ceremonies no longer devolved on the Purchita, the chief priest took the place of the so called Brahman priest, who was the episcopos of the whole, though he himself took little active part in it. Thus at the sacrifice of Haris'chandra, described in the Aitareya-brahmana (vii. 16.). Avâsya acts as Udgâtri, Jamadagni as Adhvaryu, Vis'vâmitra as Hotri, and Vasishtha, who is known as the Purchita of the Ikshvaku dynasty, as Brâhman. In the Taittirîya-sanhitâ (iii. 5. 2.), we read: "Men were born, having a Vasishtha for Purohita, and therefore a Vasishtha is to be chosen as Brâhman." In the Aitareya-brâhmana again the Brahman is identified with Brihaspati, who was the Purohita, or puraetri of the gods.

The original institution of a Purchita, as the spiritual adviser of a king or a chief, need not be regarded as the sign of a far advanced hierarchical system. The position of the Brahmans must have been a peculiar one in India from the very beginning. They appear from the very first as a class of men of higher intellectual power than the rest of the Aryan colonists; and their general position, if at all recognised, could hardly have been different from that of Vasistha in the camp of Sudas. The hymns, therefore, which only allude to a Purchita, or priests in general, need not to be ascribed to a late age. But when we meet in certain hymns not only with these, but with various grades of priests, we may be sure that such hymns belong to the Mantra period, and not to the age of primitive Vedic poetry.

This is a question of degree. If we find such verses as "the singers sing thee, the chaunters chaunt thee," where the singers are called not by their technical name of Udgatri, but Gayatrins, and the chaunters not by their technical name of Hotri, but Arkins, all we can say is that the later division of the sacrifice between Hotri and Udgatri priests is here found in its first elements. It does not follow that there existed at that time two recognised classes of priests, still less that the Udgatris were then in possession of their own Sanhita. But in Rv. v. 44. we read :

14. "The Rich verses long for the god who watches; the Samana verses go to him who watches; this Soma libation calls for him that watches: 1, O Agni, am at home in thy friendship."2

Here it is clear that the distinction between Rich verses, that were recited, and Saman verses that were sung, must have been established. though again we need not go so far as to maintain the actual existence of a prayer-book for the Udgatri priests.

The third class of priests, the Adhvaryus, who performed the principal acts of the sacrifice, are likewise alluded to in the hymns. We read, Rv. iii. 36. 10: " Accept, O Indra, what is offered thee from the hand of the Adhvaryu, or the sacrifice of the libation of the Hotri."

There are several hymns which contain allusions to the Dars'apurnamasa, the fomous New and Full Moon sacrifices. These sacrifices in themselves may have been of the greatest antiquity, as old as any

<sup>1</sup> Rv. i. 10. गायंति त्वा गायत्रिणे। S चेंत्यकमिकिणः।

थ ये। जगार तमृबः कामयंते थे। जगार तम सामानि यंति।

attempt at a regulated worship of the gods. Passages therefore, where we only meet with allusions to the phases of the moon, and their recurrent appeal to the human heart to render thanks to the unknown Powers that rule the changes of nature, and the chances of human life. prove by no means, as the Indian commentators suppose, that at the time of the ancient Vedic poets the lunar ceremonies were of the same solemn and complicated nature as in later times. We read, Rv. I. 194. 4: "Let us bring fuel, let us prepare oblation remembering thee at each conjunction of the moon. 1 Do thou perfect our sacred acts that we may live long. Let us not fail in thy friendship, O Agni."2 Passages like this do not necessitate the admission of a full-grown ceremonial, they only point to its natural beginnings. The same remark applies to the three daily prayers, at sun-rise, noon, and sunset. Nature herself suggests these three periods as the most appropriate for rendering thanks to the heavenly givers of light and life. Thus Manu Vaivasvata3 alludes several times to the three periods of the day which the gods themselves have fixed for their sacrifice, sunrise (sûrya udyati, or sûra udite), mid-day (madhyandine divah or madhyandine), and sun-set (nimruchi, or âtuchi), and he calls this established order of the sacrifice rita, the law or the truth.

But when these sacrifices are mentioned with their technical names, when the morning, and noon, and evening prayers are spoken

## या जगार तमयं साम आह तवाहमस्मि सख्ये न्याकाः॥

Rv. viii. 3.22. ऋबसामाभ्यां ॥

1 I translate parva by conjunction, because parvani, the dual, is used for the tull and new moon; As avalâyana-sûtras, i. 3. 12. Mr. Weigle, in his interesting article on Canarese literature (Zeitschrift der Deutschen Morgenländischen Gesellschaft), states that habba or pabba means a festival in Canarese, whereas in Sanskrit its usual signification is a chapter of a book. Mr. Weigle therefore refers pabba to a class of words, which, in being transferred from the Sanskrit into the Dravidian languages, have changed their meaning. We see, however, that the old meaning of parva new and full moon, would account very well for the meaning attached to pabba in Canarese, a festival.

भरामेध्मं कृणवाम ह्वीषि ते चित्रयंतः पर्वणा पर्वणा वयं । जीवातवे प्रतरं साध्या धियोऽस्रे सख्ये मा रिषामा वयं तव ॥

<sup>3</sup> Rv. viii. 27. 19:--

.

यदद्य सूर्य उद्यति प्रियक्षता ऋतं दघ ।
यिष्ठिष्ठ्वि प्रबुधि विश्ववेदसा यद्वामध्यंदिने दिवः ॥ १६ ॥

of as first, second, and third libation, we feel that we move in a different atmosphere, and that we are listening to priests rather than to poets. Thus Rv. iii. 28.1:

"Agni, accept our offering, the cake, O Jatavedas, at the morning

libation, thou rich in prayer.

"The baked cake, O Agni, is prepared for thee alone indeed; accept it, O youngest of all the gods.

"Agni, eat the cake offered to thee when the day is over, thou art

the son of strength, stationed at the sacrifice.

"At the mid-day libation, O Jatavedas, accept here the cake, O sage! Agni, the wise do not diminish at the sacrifices the share of thee, who art great.

"Agni, as thou lovest at the third libation the cake, O son of strength, that is offered to thee, therefore, moved by our praise, take

this precious oblation to the immortal gods to rouse them.

"Agni, thou who art growing, accept, O Jatavedas, the offering, the

cake, at the close of day."

This hymn contain in reality nothing but a set of invocations for the three daily libations; it uses the very words used in the ceremonial, and it would hardly have been written except by some pious priest

brought up under the system of the Brahmanic ceremonial.

The technical names of the priests are of frequent occurrence. The name of Ritvij would not prove a great development of the ceremonial. It would only mean the priest who officiates at the various seasons. It was then that the sacred fire was kindled by friction. It was lighted in the morning day after day (dive dive), it was lighted at the full and new moon, and it was lighted likewise to each of the great natural divisions of the year. Thus it is said, Rv. iii. 29. 10: "This wood is thy mother every season, born from which thou shinest. Do thou sit there, as thou knowest it, and make our prayers prosper."

There is nothing artificial in this. But when we meet with the names of the Ritvij priests, such as Potri, Agnîdhra, Pras'âstri, Neshtrii Hotri, Adhvaryu, Brahman, we can no longer doubt that here we have to deal with late and artificial poetry. These names of priests are afterwards still further generalised, and transferred to Agni, who, as the god of fire, is supposed to carry the offerings of men to the seats of the gods. He is called the Purohita, or high-priest. Sapta-hotri also, and sapta-mâhusha, acting as seven priests, are names applied to the god of the sacrificial flame.

There is a whole class of hymns commonly called danastutis, or praises of gifts. They are the thanksgivings of certain priests for presents received from their royal patrons. All of these, like the Latin panegyrics, betray a modern character, and must be referred to the Mantra period. In the Brahmana period, however, not only are these panegyrics known but the liberality of these royal patrons is held up to the admiration and imitation of later generations by stories which had to be repeated at the sacrifices. In the Sankhayana-sûtras (xvi. 11.), the

<sup>&</sup>lt;sup>1</sup> Rv ii. 36.; ii. 37.

<sup>&</sup>lt;sup>2</sup> These seven priests seem to be Hotri, Potri, Neshtri, Agnîdh, Pras'âsri, Adhvaryu and Brâhman.

following stories called Naras'ansa (neuter), are mentioned as fit for such occasions. The story of Sunahs'epha; of Kakshîvat Aus'ija who received gifts from Svanaya Bhavyaya; of Syavas va Archananasa who received gifts from Vaidadas vi; of Bharadvaja who received gifts from Bribu the carpenter, and Prastoka Sârnjaya; of Vasishtha who was Purohita of King Sudas Paijavana; of Medhathi, and how Asanga Playogi having been a woman became a man; of Vatsa Kanva who received gifts from Tirindira Paras'avyaya; of Vas'a As'vya who received gifts from Prithus ravas Kanîna; of Praskanva who received gifts from Prishadhra Medhya Mâtaris'va (sie); of Nâbhânedishtha Manava, who received gifts from the Angiras.' All these acts of royal liberality are recorded in the hymns of the Rig-veda, but the hymns themselves may safely be referred to the second age of Vedic poetry.

Another and most convincing proof that some of our hymns belong to a secondary period of Vedic peotry, is contained in a song, ascribed to Vasistha, in which the elaborate ceremonial of the Brahmans is actually turned into ridicule. The 103rd hymn in the 7th Mandala, which is called a panegyric of the frogs, is clearly a satire on the priests; and it is curious to observe that the same animal should have been chosen by the Vedic satirist to represent the priests, which by the earliest satirist of Greece was selected as the representative of

the Homeric heroes.

"After lying prostrate for a year, like Brâhmans performing a vow the frogs have emitted their voice, roused by the showers of heaven. When the heavenly waters fell upon them as upon a dry fish lying in a pond, the music of the frogs comes together, like the lowing of cows with their calves.

"When, at the approach of the rainy season, the rain has wetted them, as they were longing and thirsting, one goes to the other while he talks, like a son to his father, saying, akkhala. (βρεχεχεξ χοαξχοαξ.)

"One of them embraces the other, when they revel in the shower of water, and the brown frog jumping after he has been ducked, joins

his speech with the green one.

"As one of them repeats the speech of the other, like a pupil and his teacher, every limb of them is as it were in growth, when they converse eloquently on the surface of the water.

"One of them is Cow-noise, the other Goat-noise, one is brown, the other green; they are different though they bear the same name,

modulate their voices in many ways as they speak,

"Like Brâhmans at the Soma sacrifice of Atirâtra, sitting round a full pond and talking, you, O frogs, celebrate this day of the year when the rainy season begins.

"These Brahmans with their Soma have had their say, performing the annual rite. These Adhvaryus, sweating whilst they carry the hot

pots, pop out like hermit.

"They have always observed the order of the gods as they are to be worshipped in the twelvemonth; these men do not neglect their season; the frogs who had been like hot pots themselves are now released when the rainy season of the year sets in.

"Cow-noise gave, Goat-noise gave, the Brown gave, and the Green gave us treasures. The frogs who give us hundreds of cows, lengthen our life in the rich autumn."

There seems thus to be little room for doubt, if we consider the character of this and similar hymns, that we must make a distinction between two periods in the history of Vedic poetry, the one primitive. the other secondary. Poems, like those which we have just examined. are not the result of an original, free, and unconscious inspiration. They belong to an imitative, reflecting, and criticising age. An exact division between the ancient and the modern portions of the Rig-vela will probably be impossible even after these ancient relies have been studied with a much more searching accuracy than hitherto. The language which might be expected to contain the safest indications of the more ancient or more modern date of certain hymns, has owing to the influence of oral tradition, assumed an uniformity which baffles the most careful analysis. Nor would it be safe to trust to our preconceived notions as to the peculiar character of genuine and of artificial noetry. Some of the very latest poets may have been endowed with a truly poetical genius, when the originality and freshness of their thoughts would seem to place them in a better age. Nor is the fact that the ancient poets enunciate thoughts entirely their own, and with the full consciousness that what they say has never been said before, sufficient to give to all their pr ductions so deep a stamp of truth and faith that our weakened eyes should always discern it. But although we may hesitate about single hymns, whether they are the productions of ancient or modern Ribsis, we cannot hesitate as to the general fact that the ten books of the Rig-veda at the time they were finally collected, comprised the poetry of two different periods. This is the only important point for our purpose. We ascribe the later poets of the Veda to the Mantra period, so that we comprise within that period two apparently distinct, yet, in reality, very cognate tendencies. We suppose that the Mantra period was an age of Epigonoi, occupied at first in imitating the works of their fathers, and towards the end engaged in the more useful employment of collecting all that was within reach, modern as well as ancient, and handing it down to the careful guardianship of later generations. Two hundred years will not be too long a time for the gradual progress of this work. There are several generations of modern poets, and probably two classes of collectors to be accommedated, and the work of the last collectors. the collectors of the Mandalas, could not have commenced before the last line of every poem which now forms part of the ten Mandalas was written. I therefore fix the probable chronolgical limits of the Mantra period between 800 and 1000 B.C.

Before we leave the Mantra period there is one question which if it cannot be fully answered, requires at least to be carefully discussed. Was the collection of the ten books of Vedic hymns the work of persons cognisant of the art of writing or not? Were the 1017 hymns of the Rig-veda, after they had been gathered into one body, preserved by memory or on paper?

We can hardly expect to find answer to this question in the hymns

themselves. Most person acquainted with the history of popular poetry among the principal nations of antiquity would be ready to admit that the original composition and preservation of truly national poetry were everywhere due to the unaided efforts of memory. Where writing is known, it is almost impossible to compose a thousand hymns without bringing in some such words as writing, reading, paper, or pen. Yet there is not one single allusion in these hymns to anything connected with writing.

Let us consider the Old Testament.

The Ten Commandments were not only proclaimed by the voice of God but Moses "went down from the mount, and the two tables of the testimony were in his hand: the tables were written on both their sides; on the one side and on the other were they written. And the tables were the work of God, and the writing was the writing of God, graven upon the tables" ("xodus xxxii. 15. 16.) Here we can have no doubt that the author of the Book of Exodus, and the people to whom it was addressed, were acquainted with the art of writing. Again we read (Exodus xxiv. 7), that "Moses took the book of the covenant, and read in the audience of the people;" and (Exodus xxv. 16.), the Lord commanded Moses, saying, "Thou shalt put into the ark the testimony which I shall give thee. The covenant here spoken of must have existed as a book, or, at least, in some tangible form.

A nation so early acquained with letters and books as the Jews would naturally enjoy some of the terms connected with writing in a metaphorical sense. Thus we read in the Psalms (lvi. 8.), "Put thou my tears into thy bottle: are they not in thy book?"

lxix. 28. "Let them be blotted out of the Book of the living, and not

be written with the righteous."

xl. 7. "Then said, I, Lo I come; in the volume of the book it is written of me."

xlv. 1. "My tongue is the pen of a ready writer."

In the Book of Job (xix. 23.), we actually read, "Oh that my words were now written! oh that they were printed in a book! That they were graven with an iron pen and lead in the rock for ever!" Printed" here can only mean "written."

Proverbs iii. 3. "Write them upon the table of thine heart."

In the Homeric poems, on the contrary, where the whole Grecian life lies before us in marvellous completeness and distinctness, there is not a single mention of writing. The huypa on meta, carried by a Bellerophon instead of a letter, are the best proof that, even for such purposes, not to speak of literary composition, the use of letters was unknown to the Homeric age. The art of writing, when it is not only applied to short inscriptions but to literature, forms such a complete revolution in the history of a nation, and in all the relations of society, both civil and political, that, in any class of ancient literature, the total absence of any allusion to writing, may safely be supposed to prove the absence of the art at the time when that literature arose. We know the complete regeneration of modern Europe which was wrought by the invention of printing. Every page of the literature of the sixteenth century, every pamphlet or fly-sheet of the Reforma-

tion, tells us that printing had been invented. The discovery of writing, and more especially the application of writing to literary purposes, was a discovery infinitely more important than that of printing. And yet we are asked to believe that Homer has hidden his light under a bushel, and erased every expression connected with writing from his poetical dictionary!

But though it is certain that the Homeric poets did not write, or, if we are to adopt the legendary language of certain critics, though it is certain that blind Homer did not keep a private secretary, there is no doubt that, at the time of Peisistratos, when the final collection of the Homeric poems took place, this collection was a collection of written poems. Peisistratos possessed a large library, and, though books were not so common in his time as they were in the time of Alcibiades, when every schoolmaster had his Iliad, 1 yet, ever since the importation of paper into Greece, writing was a common acquire-The whole civilisation Greeks. ment of the educated classes of of Greece, and the rapid growth of Greek literature, has been ascribed to the free trade between Egypt and Greece, beginning with the Saidie dynasty. 2 Greece imported all its paper from Egypt; and without paper no Greek literature would have been possible. The skins of animals were too rare, and their preparation too expensive, to permit the growth of a popular literature. Herodotus mentions it as a peculiarity of the barbarians, that at his time some of them still wrote on skins only. Paper (papyrus or bylus) was evidently to Greece what linen paper was to Europe in the middle ages. 3

Now, if we look for any similar traces in the history of Indian literature, our search is completely disappointed. There is no mention of writing-materials, whether paper, bark, or skins, at the time when the Indian Diaskeuasts collected the songs of their Rishis; nor is there any allusion to writing during the whole of the Brahmana period. This upsets the common theories about the origin of prose literature. According to Wolf, 4 prose composition is a safe sign of a written literature. It is not so in India. The whole of the Brahmana literature, however incredible it may seem, shows not a single vestige of the art of writing, Nay, more than this, even during the Satra period all the evidence we can get would lead us to suppose that even then, though the art of writing began to be known, the whole literature of India was preserved by oral tradition only.

It is of little avail in researches of this kind to say that such a thing is impossible. We can form no opinion of the powers of memory in a state of society so different from ours as the Indian Parishads are from our universities. Feats of memory, such as we hear of now and

Plutarch, Alcibiades, c. vii.

<sup>&</sup>lt;sup>2</sup> See Grote, History of Greece, ii. p. 201.

<sup>&</sup>lt;sup>3</sup> Plin Hist, Nat. xiii. 13. § 27. : "Cum chartæ usu maxime humanitas vitæ constet et etmori."

<sup>4</sup> Wolf Prolegomena, lxx—lxxiii.: "Scripturam tentare et communi usni aptare plane idem fuisse atque posam tentase et ln ea excolenda se ponere."

then, show that our notions of the limits of that faculty are quite arbitrary. Our own memory has been systematically undermined for many generations. To speak of nothing else, one sheet of the "Times" newspaper every morning is quite sufficient to distract and unsettle the healthiest memory. The remnants of our own debilitated memory cannot furnish us with the right measure of the primitive powers of that faculty. The Guaranies, who are represented by Missionaries as the lowest specimens of humanity, evinced such powers of memory when they were once taught to listen and to reason, that it became a custom to make the chief Indian of the town, or one of the magistrates, repeat the sermon just delivered from the pulpit before the people in the street, or in the court-yard of a house, and they almost all did it with the utmost fidelity, without missing a sentence. 1 Even at the present day, when MSS. are neither scarce nor expensive, the young Brâhmans who learn the songs of the Veda and the Brahmanas, and the Sutras, invariably learn them from oral tradition, and know them by heart. They spend year after year under the guidance of their teacher, learning a little, day after day, repeating what they have learnt as part of their daily devotion, until at last they have mastered their subject, and are able to become teachers in turn. The ambition to master more than one subject is hardly known in India. This system of education has been going on ever since the Brahmana period, and as early as the Prâtis'âkhyas we find the most minute rules on the mnemonic system to be followed by every teacher. The only difference in modern times, after the invention of writing, is that a Brahman is not only commanded to pass his apprenticeship at the house of his Guru, and to learn from his mouth all that a Brâhman is bound to know, but the fiercest imprecations are uttered against all who would presume to acquire their knowledge from written sources. In the Mahabharata we read. "Those who sell the Vedas, and even those who write them, those also who defile them, they shall go to hell."2 Kumarila says, "That knowledge of the truth is worthless which has been acquired from the Veda, if the Veda has not been rightly comprehended, if it has been learnt from writing, or been received from a Sûdra.

How then was the Veda learnt? It was learnt by every Bråhman during twelve years of his studentship or Brahmacharya. This according to Gautama, was the shortest period, sanctioned only for men who wanted to marry, and to become Grihasthas. Bråhmans who did not wish to marry were allowed to spend forty eight years as students. The Pråtis'akhya gives us a glimpse into the lecture-rooms of the Bråhmanic colleges. The Guru," it is said,4 "who has himself formerly

been a student, should make his pupils read. He himself takes his seat either to the east, or the north, or the north-east. If he has no more than one or two pupils, they sit at his right hand. If he has more, they place themselves according as there is room. They then embrace their master, and says, 'Sir, read!' The master gravely says 'Om,' i. e. 'Yes.' He then begins to say a prasina (a question), which consists of three verses 1 In order that no word may escape the attention of his pupils, he pronounces all with the high accent, 2 and repeats certain words twice, or he says 'so' (iti) after these words.'

The chief difficulties in the pronunciation of the Veda are the changes of the final and initial letters. The pupils are instructed in these euphonic rules independently (the Sikshâ), but whenever a difficult case of sandhi occurs, the Guru examines his audience and explains the difficulties. And here the method followed is this. After the Guru has pronounced a group of words, consisting of three or sometimes (in long compounds) of more words the first pupil repeats the first word, and when anything is to be explained, the teacher stops him, and says, "Sir." After it has been explained by the pupil who is at the head of the class, the permission to continue is given with the

करणातं॥

If the metre is pankti, the pras'na may consist of two or three verses; if the metre is longer than pankti, two verses only constitute a pras'na; if a hymn consists of one verse, that by itself forms a pras'na. Samayas, i. c. passages which have occurred before (and are sometimes left out in the MSS.), are counted, if they consists of a complete verse. Two Dvipadas are counted as one verse, and, as the Commentator adds (v. 12.), the two half-verses of each Dvipada-line are to be joined in recitation, and only if there is one odd Dvipada-line remaining, a pause is to be made at the end of the first half-verse. If there are some verses remaining at the end of a hymn, they may be joined to the last pars'na; if there are more than two verses, this is optional.

<sup>2</sup> The only words which, in the Sanhita-patha, would be likely to escape the pupil's attention are monosyllables consisting of one vowel only, and that a vowel not changed into a semi-vowel in which form it would be more audible. This would restrict the rule regarding repetition to the two words a and u. Thus for pra, which is pra +a, the Guru would have to say pra a or pra a iti. Instead of ud u shya deva, ud u u shya deva. This repetition would not take place in udv eti because u is changed into v. If sarvodatta could mean a word being wholly udatta, then u would be excluded, and the rule would refer to a only. But sarvodatta means recitation when the accent is disregarded, and all syllables are pronounced with a high tone. The Commentary construes the rule differently. I consture इह प्रयान सर्वोदात्तत्वं \ तिस्मन सर्वोदात्तत्वं \ प्रवास सर्वोदात्तत्वं \ विस्मन सर्वोदात्त्वं प्रवास प्रव

<sup>3</sup> These are chiefly the change of a final m into Anusvâra before r and the ûshmans; the common sandhi of the ûshmans; the suppression of a final n; its transition iuto r; its transition into a sibilant; the absence of sandhi where ri follows; the sandhi of er, and the hiatus.

<sup>4</sup> The text is निर्वाच्ये तु &c.

words, "Well, Sir." After the words of the teacher have thus been repeated by one, the next pupil has to apply to him with the word, "Sir." When there is no difficulty, the rule seems to be that the Guru says two words at a time, which are then repeated by the pupil. If it is a compound, one word only is to be pronounced by the Guru, and to be repeated by the pupil. After a section of three verses has thus been gone through, all the pupils have to rehearse it again and again. When they have mastered it, they have to recite the whole without any break, with an even voice, observing all the rules of sandhi, marking slightly the division in the middle of compounds, and pronouncing every syllable with the high accent.2 It does not seem as if several pupils were allowed to recite together, for it is stated distinctly that the Guru first tells the verses to his pupil on the right, and that every pupil, after his task is finished, turns to the right, and walks round the tutor. This must accupy a long time every day, considering that a lecture consists of sixty and more pras'nas, or of about 180 verses. The pupils are not dismissed till the lecture is finished. At the end of the lecture, the tutor, after the last half-verse is finished, says, "Sir," the pupil replies, "Yes, Sir." He then repeats the proper verses and formulas, which have to be repeated at the end of every reading, embraces his tutor, and is allowed to withdraw.

These rules speak for themselves. They show that at the time when young Bråhmans had to spend from twelve to forty-eight years of their life in doing nothing but learning and rehearsing the Veda, such a system must have had an object worthy of such efforts. Such an object existed, if, in the absence of writing, the sacred songs, which were believed to be the only means to salvation were to be preserved and guarded against loss and corruption. If, at the time of the Pråtis'åkhyas, writing had been known, some mention of a book as a sacred object would surely have occurred somewhere. We know from the Grihyasûtras every event in the life of a Bråhman, from his birth to his death.

Not a word is ever said about his learning to write.

The earliest allusion to this system of oral teaching occurs in a hymn of the Rig veda which must be ascribed to the Mantra period. In the primitive poetry of the Chhandas period there is no mention either of writing or teaching. But in a satirical hymn of the Vasishthas (vii. 103.5) in which the frogs are compared with Brâhmans, teaching their

Here again I differ from the commentator, who takes parasya as an adjective referring to etad, i.e. guroh. At the end of a half-verse, this address, bho! is to be dropped; at the end of an Adhyaya it is optional.

\* Cæsar (de Bello Gallico, vi 14), speaking of the Druids, says: "Magnum ibi numerum versuum ediscere dicuntur, itaque nonnulli annos vicenos

in disciplina permanent, neque fas esse existimant ea literis mandare."

According to some Sakhas, not the Sakalas, certain words (prepositions) are, in this final recitation also, to be followed by the particle iti; abhi is even, in some cases, to be pronounced abhityabhi. Some other rules are given, all of which are optional. The text of the Veda, as repeated in the lecture-room, is neither Sanhita, Pada, nor Krama text. Some few S'akhas only maintain that the Sanhita-text should be used pure et simple.

pupils, it is said: "One frog repeats the words of another, like a pupil who repeats the words of his teacher." (See p. 261.) No similar allusion to writing is to be found even in the latest hymns, the so-called Khilas. If writing had been known during the Brahmana period, is it likely that these works, which are full of all kinds of mystic lucubrations on the origin of all things, should never with a single word have alluded to the art of writing, an art so wonderful that the Greeks would fain ascribe its discovery to one of the wisest gods of the wisest nation on earth? If letters had been known during the period when men in India were still able to create gods, the god of letters would have found his place in the Vedic pantheon side by side with Sarasvatî the goddess of speech, and Pûshan, the god of agriculture. No such god is to be found in India, or in any of the genuine mythologies of the Aryan world.

But there are stronger arguments than these to prove that, before the time of Panini, and before the first spreading of Buddhism in India,

writing for literary purposes was absolutely unknown.

If writing had been known to Panini, some of his grammatical terms would surely point to the graphical appearance of words. I maintain that there is not a single word in Panini's terminology which presupposes the existence of writing. The general name for letters is varni. This does not mean colour in the sense of a painted letter, but the colouring or modulation of the voice. I Akshara, which is used for letter and syllable, means what is indestructible, radical, or an element. We speak of stops as signs of interpunction; Panini only speaks of viramas, stoppages of the voice. The names of the letters are not derived from their shape, as in the Semitic names of Alpha, Beta, Gamma. With the exception of the r, their names are their sounds. The name for r, Repha, does not occur in Pânini. Kâtyâyana, however (iii. 3, 108, 4), explains the derivation of Repha, and in iv. 4, 128, 2, he uses it for ra. In the Pratis'akhyas likewise, the word is well known, and as the participle riphita is used in the same works, there can be little doubt that Repha is derived from a root riph, to snarl or hiss.

'l'he terms for the three accents show no traces of writing, such as

the Latin word "circumflexus."

What would have been more natural, if writing had been known in Pânini's time, than that he should have called the dot of the Anusvâra, vindu i.e., dot, and the Visarga, dvivindu, the double dot? Let us take a later grammarian, Vopideva, and we find such words at once. In Vopadeva, the Anusvâra is called vindu, the Visarga, dvivindu. What the Prâtis'âkhyas and Pânini called the Jihvâmulîya, the sibilant formed near the base of the tongue, and Upadhmanîya, the labial flatus, Vopadeva calls Vajrakriti, having the shape of the thunderbolt (×), and Gajakumbhākriti, having the shape of an elephant's two frontal bones.

 $\binom{\omega}{\omega}$ ) The term arddhachandra, or half-moon, belongs to the same class of grammatical terms. Why should these words occur in later grammarians, and not one of them be found in the Prâtis'âkhyas or Pânini?

Another class of words which would be sure to betray the existence of writing where writing was known, are the words expressive of reading, composing, book, chapter, paragraph, &c. The most usual

<sup>1</sup> Aristotle. Probl. x. 39. : τα δε γραμματα παθη εστι της φωνης.

word for reading in Sanskrit is adhyeti or adhite, and at first sight the very existence of such a word might seem to prove the existence of books that could be read. But we have seen in the Pratis'akhyas what was meant when the pupils asked their tutor to make them read. Adhyeti and adhite, from adhi, over, and i, to go, mean "he goes over a thing, he conquers it, acquires it;" and the very expression "to read a work from the mouth of the tutor," would be sufficient to show that the work existed, not as a book, but in men's memory. Another expression of the same kind is found in Manu (x. I): "All the three castes may read the Veda, but the Brahman alone is allowed to proclaim, i. c., to teach it (prabrûyât). To teach is expressed by causative of the verb adhyeti, adhyapayati, he makes read i. e., he teaches. The ancient Hindus distinguish between two kinds of reading, the grahanadhyayana, the acquisitive reading, and the dharanadhyana, the conservative reading; the former being the first acquisition of a work, the latter its rehearsing in order not to lose a volume that once belonged to one's mental library. This rehearing, or svadhyaya, self-reading, was as sacred a duty as the first acquisition. It was by means of this svådhyåya alone that works could be said to live. We meet with similar expressions in other literatures of the ancient world. Ahura masda, when he wishes his law to live among men, requires Jima to be not only the "rememberer" (mereta), but the bearer and preserver (bheretâ), of the Zarathustrian revelation. And many centuries later, Mahavîra,2 the founder of the Jaina religion, is called sarae, varae, and dharae of sacred knowledge, i.e., smaraka, a rememberer, varaka, a guardian who keeps it from profane eyes, and dharaka, a holder who does not forget the knowledge which he once acquired.

Even so late a writer as Kumarila, when he speaks of the material existence of the Veda, can only conceive of it as exisiting in the minds of men. "The Veda," he says, "is distinctly to be perceived by means of the senses. It exists, like a pot or any other object, in man. Perceiving it in another man, people learn it and remember it. Then others again perceiving it, as it is remembered by these, learn it and remember it, and thus hand it on to others. Therefore, the theologian concludes, the Veda is without a beginning." These theological arguments may be passed over: but immediately afterwards, in order to show that the Veda has a material existence, Kumarila uses another curious expression, which shows again that to him the Veda existed only in the memory of men. "Before we hear the word Veda," he says, "we perceive, as different from all other objects, and as different from other Vedas,

म्युपलभ्यंते सर्वेषां चानादयः संज्ञाः॥

<sup>Apastamba, Dharma-sûtra, iii. 86.
Kalpa-sûtra, ed. Stevenson, p. 29.</sup> 

³ वेदः पुनः सविशेष प्रत्यक्षगम्यः । तत्र घटादिवदेव पुरुषांतरस्थमुलभ्य स्मरंति । तैरिप स्मृतमुपलभ्यान्येऽपि स्मरंतो ऽन्येभ्यस्तथेव त्यमर्थयंतीत्यना-दिता ॥ सर्वस्य चात्मोयसारणात्पूर्वमुपलिधः संभवतीति निर्मूलता ॥ शब्दसंबं-धय्युत्पत्तिमात्रमेव चेह वृद्धव्यवहाराधीनं ॥ प्रागपि हि वेदशब्दादन्यवस्तुविलक्षणं वेदांतरविलक्षणं चाध्येतृस्थमृग्वेदादिक्षपं मंत्रब्राह्मणादिक्षपाणि चान्यविलक्षणा-

something in the form of the Rig-veda that exists within the readers. and things in the form of Mantras and Brahmanas, different from others." Such arguments would not occur to people who were accustomed from time immemorial to appeal to a book as the sacred authority of their faith. When contemporaneously with our Reformation, Nanak founded the religion of the Sikhs, we find in India, as well as elsawhere, that a book, a real book was considered as the firmest foundation of a new faith. "At their assemblies, when the chiefs and principal leaders are seated, the Adi-Granth the first book) and Das'ama Pådshåkå Granth are placed before them; they all bend their heads before these scriptures, and exclaim. Wâ! Gurujikâ Khâlsâ! Wâ! Gurujikâ Fatch! A greater quantity of cakes, made of wheat, butter, and sugar, are then placed before the volumes of their sacred writings, and covered with a cloth. These holy cakes, which are in commemoration of the injunction of Nanak to eat and to give to others to eat, pext receive the salutation of the assembly, who then rise, and the Akalis, pray aloud while the musicians play. The Akalis, when the prayers are finished, desire the council to be seated. They sit down, and the cakes being uncovered are eaten of by all classes of Sikhs; those distinctions of original tribes, which are on other occasions kept up, being on this occasion laid aside, in token of their general and complete union in one cause. The Akâlis than exclaim, "Sirdars! (chiefs) this is a Gurumatâ' (a great assembly); on which prayers are again said aloud. The chiefs, after this, sit closer, and say to each other: "The sacred Granth (book) is betwixt us, let us swear by our scriptures to forget all external disputes, and to be united."1

Such a scene would be impossible among pure Brâhmans. They never speak of their granthas or books. They speak of their Veda, which means "knowledge." They speak of their S'ruti, which means what they have heard with their ears. They speak of Smriti, which means what their fathers have declared unto them. We meet with Brâhmanas, i. e., the sayings of Brâhmans; with Sûtras, i. e., the strings of rules; with Vedangas, i. e., the members of the Veda; with Pravachanas, i. e., preachings; with Sastras, i. e., teachings; with Dars'anas, i. e., demonstration; but we never meet with a book, or a

volume, or a page.

If we take the ordinary modern words for book, ink, writing, &c., not one of them has as yet been discovered in any Sanskrit work of genuine antiquity. Book, in modern Sanskrit, is pustam or pustakam, a word most likely of foreign orign 2 It occours in such works as the Hitopades'a, where we read of a person, "neither read in books nor taught by a tutor." The Hitopades'a itself is said to be written (likhyate) as an extract from the Panchatautra and another book.3

To write is likh and lip, the former originally used in the sense of scratching, whether on stone or leaves, the latter, in the sense of covering a surface with ink. Thus in S'akuntalâ, the chief heroine, when advised to write a love-letter (midnalekha), complains that she has no

Asiatic Researches, xi. 255.

<sup>&</sup>lt;sup>2</sup> Could it be apeshtak, originally the Sanskrit avasthana? See

writing-materials (lekhanasādha āni), and her friend tells her to take a lotus-leaf as smooth as the breast of a parrot, and with her nails to scratch the letters on it. This is clearly writing. In the Vikarmorvas'î, again Urvas'î, not daring to face her lover writes a letter (lekha) on a birch-leaf (bhurjapatra). The king, who sees it, calls it bhurjaqıto aksharavinyasa, "letters put down on a birch leaf;" and when he reads it, he is seid to make the leaf speak (vachayati). The leaf (patra) is used here not in the sense in which we found it in the Sakuntalâ, as the leaf of a tree, but as a leaf or sheet of paper. This paper was made of the bark of the birch-tree; and hence, when the queen picks up the love-letter, she thinks "it is a strip of fresh bark which the south wind has blown thither."

Passages like these, to which we might add the well-known fntroduction to the Mahâbhârata leave little doubt that, at the time when these modren plays were composed, writing was generally practised by women as well as men. Why should there be no such passage in any of the genuine early Sanskrit works if writing had then been equally known?

In Manu's Code of Laws we read (viii. 168.): "What is given by force, what is by force enjoyed, by force caused to be uritten (lekkita), and all other things done by force, Manu has pronounced void." Here again we have clearly writing. But this is only another proof that this metrical peraphrase of the laws of the Manavas is later than the Vedic age.

In the Laws of Yajnavalkya also written documents are mentioned; and the Commentator (ii. 22.) quotes Narada and other authorities, all in Slokas, on several minor points connected with the signing (cnihnita) of papers, and the treatment of witnesses who cannot write (alipijna). But I have found no such traces of written document in any of the ancient Dharmosûtras.

The words for ink masi<sup>2</sup>, kalî, mela, gola) and pen <sup>3</sup> (kalama) have all a modren appearance; and, as to Kayastha, the name of the writer-caste, proceeding from a Kshatriya father and a Sûdra mother, it does

not even occur in Manu.

Another class of words which would be likely to contain allusions to writing are those used for the various subdivision of literary compositions: but these too point to a literature kept up by oral tradition only. We observed before that a lecture (adhyaya) consisted of sixty questions or pras'nas. We find these very words used instead of chapters and paragraphs in the Sanhitâs, and Brâhmanas, and Sûtras. In the Rigveda we have the ancient division into suktas, hymns; anuvâkas, chapters (i.e., repetition); and mandalas books (i.e., cycles): and the later division into vargas, classes; ndyâyas, lectures; and Ashtakas, Ogdoads. In the Taittirîyaka, the division is into Kandikas (sections), anuvâkas, pras'nas and ashtakas. In the Kâṭhaka we have granthas, compositions, and sthânakas, places. The name of the S'atapatha-brâhmana is derived from its 100 pathas or walks; and Shashtipatha is used for a work consisting of sixty walks or chapters. Other words of the same kin

<sup>1</sup> There are, I believe, but two Sanskrit MSS. in Europe which are written on birch bark; one in the Royal Library of Berlin, the other in the Library of All Souls College, Oxford.

<sup>&</sup>lt;sup>2</sup> Lalita Vistara, adhyaya, ix. p. 139. 1. 17.

<sup>3</sup> Unadi-sûtras, iv, 84. calamus, reed.

are prapathaka, a reading, a lecture; ahnika, a day's work; parvan a joint, &c. We look in vain for such words as volumen, a volume, liber, i.e., the inner bark of a tree; or  $\beta \iota \beta \lambda os$  i.e.,  $\beta \iota \beta \lambda os$  the inner inner bark of

the papyrus; or book i.e., beech-wood.

It is clear, from the evidence which we have examined, that it is far easier to prove the absence of writing during the early period of Sanskrit literature, than to discover any traces of writing even at the time when we are inclined to suppose that it was known in India, Writing was practised in India before the time of Alexander's conquest; and though it may not have been used for literary purposes, we can hardly doubt that a written alphabet was known during the greater part of the Sûtrâ period. The Greek writers tell us exactly what we shauld expect under these circumstances. Megasthenes that the Indians did not know letters, that their laws were not written, and that they administered justice from memory. 1 This is perfectly true, if, as has been pointed out, 2 we restrict their ignorance of letters to the fact that they did not employ them for literary purposes. Strabo himself, when quoting the statement of Nearchus that the Indians wrote letters on cotton that had been well beaten together, points out the contradiction between this author and others (i.e., Megasthenes), who declared that the Indians used no letters at all. 3 There is, however, no real contradiction between these two statements, if we only distinguish between the knowledge of letters and their use as a vehicle of literature. Nearchus fully agrees with Megasthenes; for he also states that the laws of the Indians were not reduced to writing. 4 And Megasthenes agrees with Nearchus; for he also shows himself perfectly acquainted with the fact that the Indian used letters for inscriptions on milestones, indicating the resting-places and distances. 5 Nothing could offer a stronger confirmation of our opinion that the Indians had become acquainted with the art of writing during the Sutra period and before the conquest of Alenxander, but that they abstained from using it for literary purposes, than this apparent contradiction in the accounts of Nearchus and Megasthenes. Curtius, differing from Nearchus, maintains that they wrote on the soft rind of trees, 6 a custom which we saw preserved in the play of Urvasî. We can hardly believe that the Indians could have used skins for writing. And though Nicolaus Damascenus declares that he saw the ambassadors of Porus presented to Cæsar Augustus in Antiochia, and that they brought a letier written  $\epsilon \nu \delta \iota \phi \theta \epsilon \rho a$ , we must remember that this letter was written

<sup>2</sup> Schwanbeck, Megasthenis Fragmenta, p. 50.

in Greek, 1 and that the word  $\delta\iota\phi\theta\epsilon\rho\alpha$  may have been used for paper in general.<sup>2</sup>

We shall not be able to trace the Indian alphabet back much beyond Al-xander's invasion. It existed, however, before Alexander. This we know from Nearchus himself, who ascribes to the Indians the art of making paper from cotton. Now, in looking for traces of writing before Alexander's time, we find in the Lalita-vistara, which contains the life of Buddha, that the young Sakya is represented as learning to write. Though the Lalita-vistara cannot be regarded as a contemporaneous witness, it is nevertheless a canonical book of the Buddhists, and, as such, must be ascribed to the third council. It was translated into Chinese 76 a.d. As we have seen, before, the system of instruction practised in the lecture-rooms of the Brahmans, it will perhaps be of interest to glance at the schools in which Buddha was educated, or supposed to have been educated.

"When the young prince had grown, he was led to the writingschool (lipis'âlâ). We may leave out all the wonderful things that happened on this accasion, how he received a hundred thousand blessings, how he was surrounded by ten thousand children, preceded by ten thousand chariots full of sweetmeats, of silver and gold; how the town of Kapilavastu was cleansed, how music sounded everywhere, and showers of flowers were poured from the roofs, windows, and balconies; how, not satisfied with this, celestial ladies walked before him to clear the road, and the daughters of the wind scattered celestial flowers, besides other fabulous beings who all came to honour the Bodhisatva as he went to school. These marginal illustrations may be dropped in all Buddhist books, though they leave but little room for the text. When Buddha entered the school, Vis'vamitra, the schoolmaster (dârakâchârya), unable to bear the majesty of the Bodhisatva's presence, fell to the ground, and had to be lifted up by an angel, named Subhanga. After the king Suddhodana and his suite had left, the nurses and attendants sat down, and the Bodhisatva took a leaf to write on (lipiphalaka) made of sandal-wood (uragasarachandana-mayam). He then asked Vis'vamitra what writing he was going to teach him. Here follow sixty-four names, apparently names of alphabets.4 all of which the Bodhisatva is acquainted with, whereas Vis'vamitra is obliged to confess his ignorance. Nevertheless the Bodhisatva stays at school, and learns to write, together with ten thousand boys.5

<sup>4</sup> The most intersting names are Anga (Bhagalpur), Banga (Bengal), Magadha, Drâvida, Dakshina (Dakhan), Darada, Khâsya (Cassia hills), China (Chinese). Hûna, Deva (Devanâgasî), Bhaumadeva (Brahman), Uttarakurus, anudruta (cursive).

<sup>&</sup>lt;sup>5</sup> The following passage from the Evangelium Infantiæ (ed. Sike, p. 143.) offers a curious parallel: "Erat porro Hierosolymis quidam Zachæus nomine, quijuventutem erudiebat. Dicebat hie Josepho: Quare non-mittis

The alphabet which he learns is the common Sanskrit alphabet, with the omission of the letter l, ri, and rî. It consists of 45 letters, and, as in our own primers, every letter is followed by a word containing that letter at the beginning or in the middle. These words in the Lalita-vistara are so chosen as to illustrate some of the chief points of Buddha's own dectrines. The alphabet is:—a, â, i, î, u, û, e, ai, o, au, am, ah; k, kh, g, gh, n; ch, chh, j, jh, ñ; t, th, d, dh, n; t, th, d, dh, n; p, ph, b, bh, m; y, r, v; s', sh, s, h, kṣh.

Though the further education of Buddha is not fully described, we see him soon afterwards, in a general competition, the most distinguished scholar, arithmetician, musician, and everything else. This comprehensive system of education, through which Buddha is here represented to have passed, is the very opposite of that followed by the Brahmâns. We nowhere meet in the Buddhist literature with those strong imprecations against book-learning which we found among the Brahmâns, and which may be heard, I believe, even at the present day.

If, thus, the first, though rather legendary, trace of writing, as a part of the elementary education in India, is discovered in the life of Buddha, it is curious to observe that the first actual writing, the first well authenticated inscription in India, is likewise of Buddhist origin. There are no Brâhmanic inscriptions earlier than the Buddhist inscriptions of As'oka on the rocks of Kapurdigiri, Dhauli, and Girnar. They belong

ad-me Jesum, ut-literas diseat? Annuebat illi Josephus, et-ad Divam Mariam hoc referobat. Ad-magistrum itaque illum ducebant; qui-simulatque eumconspexerat Alphabetum ipsi conscripsit, utque Aleph diceret præcepit. Et eum dixisset Aleph, magister ipsum Beth pronunciare jubebat. Dominus Jesus: Die mihi prius significationem literæ Aleph, et tum Beth pronunciabo. Cumque magister verbera ipsi intentaret, exponebat illi Dominus Jesus significationes literarum Aleph et Beth; item, quænam literarum figuræ, essent rectæ, quænam dupliquæ, quænam duplicatæ, quæ punctis insignitæ, quæ iisdem earentes ; quare una litera aliam precederet ; aliaque plurima enarrare copit et elucidere, que magister ipse nec audiverat unquam nec in libro ullo legerat. Dixit porro magistro Dominus Jesus : Attende, ut dicam tibi, copitque clare et distincte recitare, Aleph Beth, Gimel, Daleth usque ad finem Alphabeti. Quod miratus magister, Huuc, inquit, puerum ante Noachum natum esse existimo; conversusque ad Josephum, Adduxisti, ait, ad me erudiendum puerum, magistris omnibus doctiorem. Divæ quoque Mariæ inquit : Filio tuo nulla doctrina opus est." <sup>&</sup>lt;sup>2</sup> In an ancient inscription of Khandgiri (Journal of the Asiat. Soc. of Bengal, vi. 318), a king is mentioned who in his youth learned to write, and was taught, besides, arithmetic, navigation, commerce, and law ("tato likharupagana nava vyapara vidhi vis'aradena").

to the third century before Christ. They call themselves lipi, a writing, I or dharmalipi,2 a sacred writing; and they mention the writer or engraver by the name of lipikara.3 This last word lipikara is an important word, for it is the only word in the Sútras of Panini which can be legitim tely adduced to prove that Panini was acquainted with the art of writing. He teaches the formation of this word, iii. 2, 21. There is indeed another passage, which has frequently been quoted, where Panini teaches the formation of the adjective yavandat. This is simply the feminine of yavana, as Indrant is of Indra. Katyayana, however, and the Commentator, both maint in that yavanani is used as a name of lipi, and that it meant the writing of the Yavanas. I see no reason to doubt that most of the examples which we find in the Commentaries go back to the very time of Panini, and I am quite willing to admit that Panini gave his rule on yavanana simply in order to explain this word as the name of a cartain alphabet. But I must demur to any further conclusions. Yavana is by no means the exclusive name of the Greeks or Ioniaus. Professor Lassen has proved that it had a much wider meaning, and that it was even used of Semitic nations. There is nothing to prove that Panini was later than Alexander, or that he was acquainted with Greek literature. In the Lalita-vistâra, where all possible alphabets are mentioned, nothing is said of a Yavananî or a Greek alphabet. Sanskrit alphabet, though it has always been suspected to be derived from a Semitic source, has not certainly been traced back to a Greek source. It shows more similarity with the Aramaan than with any other variety of the Phœnician alphabet. Yavanânî lipi most likely means that variety of the Semitic alphabet which, previous to Alexander, and previous to Panini, became the type of the Indian alphabet. But all this is merely conjectural. It is impossible to arrive at any certain interpretation of Yavanânî, as used by Pânini; and it is much better to confesse this, than to force the word it to an argument for any preconceived notions as to the origin of the Indian alphabet.

There is another word in Panini which might seem to prove that, not only the art of writing, but written books were known at his time, This is grantha. Grantha occurs four times in our texts of Panini. In I. 3, 75., it is so used as to apply to the Veda. In IV. 3, 87. it may refer to any work. In IV. 3, 116, it is applied to the work of any individual author. In VI. 3, 79. it may refer to any work that is studied. I do not attribute much importance to the fact that I. 3, 75, and IV. 3,

<sup>1</sup> Etâya athâya iyam lipi likhitâ; for this purpose was the writing written.

<sup>2</sup> Iyam dhammalipi Devânam pyena piyadasinâ rânâ likhápitâ asti eva. (p. 752.)

<sup>&</sup>lt;sup>3</sup> Burnouf, Lotus, p. 752.

<sup>4</sup> Lepsius, Zwei sprochvergleichendo Abhandlungen, p. 78., Schulze's conjecture about Musnud. Weber Indische Skizzen;

<sup>े</sup> समुदाङ्भ्या यना ऽग्रंथे॥ १०३० ७५॥ अधिकृत्ये कते ग्रंथे॥ ४०३० ८९॥ कृते ग्रंथे॥ ४०३० ११६॥ ग्रंथांताधिके च॥ ६०३० ७६॥

116. are marked as not explained in the Commentaries; for I confess that in none of these four passages can I discover anything to prove that grantha must mean a written or a bound book. Grantha is derived from a root grath, which means nectere, serere. Grantha, therefore, like the later sandarbha. would simply mean a composition. It corresponds etymologically with the Latin textus. Thus it is used by the Commentator to Nir. I, 20, where he says that former teachers handed down the hymns granthato'rthatascha, according to their text and according to their meaning." In the later literature of India grantha was used for a volume, and in granthakutt, a library, we see clearly that it has that meaning. But in the early literature grantha does not mean pustaka, or book; it means simply a composition, as opposed to a traditional work.

This distinction between traditional works and works composed by individual authors is of frequent occurrence in Panini, and we attempted, in a former part of this work, to draw some historical conclusions from this distinction. From IV. 3, 101, to 111, the grammarian gives rules how to derive the titles of works from the names of those by whom they were proclaimed (tena proktam). But in most cases these derivations are used by Panini as intermediate links only, in order to form the names of Charanas who read and preserve these works Never, he says (IV. 2, 66.), use the derivative, which would be the title of a work in the case of hymns (chhandas) or Brahmanas. Do not call a work proclaimed by Katha, Katham, but only speak of Kathas, i. e., those who hand down the works proclaimed by Katha, Another still more significant restriction is made by Panini. With reference to modern works, he says you may use the neuter in the singular or plural, instead of the plural of the masculine. The Brahmanas taught by Yajnavalkya may be spoken of as such. But the ancient Brahmanas first proclaimed by Bhallava &c, can only be spoken of as "the Bhâllavins" (Bhallavidæ), because it is only in the tradition of his descendants that the works of Bhallava and other ancient sages may be said to live.

However we examine the ancient Sanskrit phraseology with regard to books and their authors, we invariably arrive at the same results. In the most ancient literature, the idea even of authorship is excluded. Works are spoken of as revealed to and communicated by cortain sages, but not as composed by them. In the later literature of the Brahmana and Sûtra period the idea of authorship is admitted, but no trace is to be found any where of any books being committed to writing. It is possible I may have overlooked some words in the Brahmanas and Sûtras, which would prove the existence of written books previous to Panini. If so, it is not from any wish to suppress them. I believe, indeed, that the Brahmanas were preserved by oral tradition only but I should feel inclined to claim an acquaintance with the art of writing for the authors of the Sûtras. And there is one word which seems to strengthen such a supposition. We find that several of the Sûtras are divided into chapters called patalas. This is a word never used for the

<sup>1</sup> Thus the Commentator to the Rig-veda, 1, 67, 4. explains chritanti

subdivisions of the Bråhmanas. Its meaning is a covering, the surrounding skin or membrane; it is also used for a tree. If so, it would seem to be almost synonymous with liber and  $\beta\iota\beta\lambda$ os, and it would mean book after meaning originally a sheet of paper made of the surrounding bark of trees. If writing came in towards the latter half of the sûtra periol, it would no doubt be applied at the same time to reducing the hymns and Bråhmanas to a written form. Previously to that time, however, we are bound to maintain that the collection of the hymns, and the immense mass of the Bråhmana literature, were preserved by means of oral tradition only.

## CHAPTER IV.

## THE CHHANDAS PERIOD.

The three periods of Vedic literature which we have examined, the Sûtra, Brâhman, and Mantra periods, all point to some earlier age which gave birth to the poetry of the early Rishis. There was a time, doubtless, when the songs which were collected with such careful zeal in the Mantra period, commented upon with such elaborate pedantry during the Brahmana period, and examined and analysed with such minute exactness during the Sûtra period, lived and were understood without any effort by a simple and pious race. There was a time when the sacrifices, which afterwards became so bewildering a system of ceremonies, were dictated by the free impules of the human heart, a yearning to render thanks to some Unknown being, and to repay, in words or deeds, a debt of gratitude, accumulated from the first breath of life. There was a time when the poet was the leader, the king, and priest of his family or tribe, when his songs and sayings were listened to in anxious silence and with implicit faith, when his prayers were repeated by crowds who looked up to their kings and priests, their leaders and judges, as men better, nobler, wiser than the rest, as beings nearer to the gods in proportion as they were raised above the common level of mankind. These men themselves living a life of perfect freedom, speaking a language not yet broken by literary usage, and thinking thoughts unfettered as yet by traditional chains, were at once teachers, lawgivers, poets, and priests. There is no very deep wisdom in their teaching, their laws are simple, their poetry shows no very high flights of fancy, and their religion might be told in a few words. But what there is of their language, poetry, and religion has a charm which no other period of Indian literature possesses: it is spontaneous, original, and truthful.

We cannot say this of all the hymns: nay, the greater portion of what we now possess of Vedic portry must, no doubt, be ascribed to a secondary period, the so called Mantra period. But after we have discarded what bears the stamp of a later age, there remains enough to give us an idea of an earlier race of Vedic poets. It is true, no doubt, in one sense, that even those earliest specimens of Vedic poetry belong, as has been said by Bunsen, to the modern history of the human race. Ages must have passed before the grammtetical texture of the Vedic Sanskirt could have assumed the consisancy and regularity which it shows throughout. Every tense, every mood, every number and person of the verb is fixed, and all the terminations of the cases firmly are established. Every one of these terminations was originally an independent word with an independent meaning. Their first selection was more or less the result of individual choice, their technical character the result of long usage. There was more than one word for I, and more than one expression for the verb to be. The selection of mi, as the termination of the first person singular, the selection of de in the songe of to be and the :

so as to produce the auxiliary verb as mi, I am, all this was a conventional act, the act of one or two individuals, fixed by circumstances which were more or less accidental. If then, we find the same combination in the ancient Greek  $e\sigma\mu$  and the modern Lithuanian esmi, it is clear that the origin of that form goes back to times long anterior to the separate existence of Sauskrit, Greek, and Lithuanian. As soy, suis, and sono are modern modifications that point back to an earlier type, the Latin sum, the Sanskrit asmi, Greek  $e\sigma\mu$  Lithuanian esmi, are likewise but the modern representatives of some earlier typical form, which existed in the undivided language of the Aryan race.

The same applies to the religion of the Veda. Words like deva for 'god' mark a more than secondary stage in the grammar of the Aryan religion. To use the root div' to shine,' with reference to the heavenly bodies, was the result of a free choice. There were other roots which might have been used instead. Nor was it by any means a necessity that the presence of a Divine Power should be felt exclusively in the bright manifestations of nature. All this was the result of a historical growth; and the early periods of that growth had passed away long before the Rishis of India e und have worshipped their Devas or their bright beings, with sacred hymns and invocations.

From this point of view the Vedic language and poetry may be ascribed to a modern or secondary period in the history of the world, if only it be understood that what preceded that period in India, or in any other part of the Aryan world, is lost to us beyond the hope of recovery, and that, therefore, to us the Veda represents the most ancient chapter in the history of the human intelect. We find no traces in the Veda, or in any Aryan work, of a growing language, growing in the sanse in which some of the Turanian languages may be said to be still growing at the present day!. The whole grammatical mechansim is finished, the most complicated forms are sanctioned, and the only changes of which the Aryan speech, arrived at the point where we find it in the Veda, admits, are those of gradual decay and recomposition. Nor do we find any traces, in the Veda, of a growing religion. We look in vain for the effect produced on the human mind by the first rising of idea of God. To the poets of the Veda that idea is an old and familiar idea: it is understood, never questioned, never denied. We shall never hear what was felt by man when the image of God arose in all its majesty before his eyes, assuming reality before which all other realities taded away into a mere shodow. No whisper will ever reach us of that sacred colloquy when God for the first time spoke to man, and man to God; when man within his own heart heard that still small voice through which the Father of mankind revealed bimself to all his children, to the Jew first, and also to the Gentile; and when God received the first response from human lips: "Who art thou, Lord?" That first recognition of God, that first perception of the real presence of God, -a perception without which no religion, whether natural or revealed, can exist or grow, -belonged to the past when the songs of the Veda were written. The idea of God,

<sup>1</sup> See my Letter on the Classification of the Turanian languages, p. 80.

though never entirely lost, had been clouded over by errors. The names given to God had been changed to gods, and their real meaning had faded away from the memory of man. Even the earlist hymns of the Veda are not free from mythological phraseology. How far the poets retained a vague consciousness of the original purport of the names of the gods is difficult to say. To our eyes the science of language has disclosed the smallest fibres in the tissue of these names, and allowed us an insight into the darkest secrets of their growth. We can see nomina, where even the most keen-sighted native could discover nothing but numina. times, however, we feel surprised at the precision with which even such modern writers as Kumarila are able to read the true meaning of their mythology. When Kumarila is hard pressed by his opponents about the immoralities of his gods, he answers with all the freedom of a comparative mythologist: "It is fabled that Prajapati, the Lord of Creation, did violence to his daughter. But what does it mean? Prajapati, the Lord of Creation, is a name of the sun; and he is called so, because he protects all creatures. His daughter Ushas is the dawn. it is said that he was in love with her, this only means that, at sunrise, the sun runs after the dawn, the dawn being at the same time called the daughter of the sun, because she rises when he approaches. In the same manner, if it is said that Indra was the seducor of Ahalya, this does not imply that the god Indra committed such a crime; but Indra means the sun, and Ahalya (from ahan and li) the night; and, as the night is seduced and ruined by the sun of the morning, therefore is Indra called the paramour of Ahalya."

But in spite of the mythological character which the religion of India has assumed in the Veda, in spite of other traces which show that even its most primitive hymns rest on numerous underlying strata of more primitive thoughts and feelings, we should look in vain, in any other literature of the Aryan nations, to Greece or Rome, for documents from which to study that important chapter in the history of mankind which we can study in the Veda,—the transition from a natural into an artificial religion.

In a history of Sanskrit literature the Chhandas period, though the most interesting from a philosophical point of view, can occupy but a small place. It is represented by a very limited literature, by those few hymns which show none of the signs of a more modern origin which we discussed when treating on the Mantra period. Their number will necessarily very according to the rules which critics follow in testing the age and character of earlier and later hymns. This critical separation can be carried out successfully only after a comprehensive examination of the leading ideas of the whole Vedic poetry, and it could

<sup>े</sup> प्रजापतिस्यायत्प्रजापालनाधिकारादादित्य एवोच्यते। स चारुणाद्यवेलायामुषसमुद्यन्नभ्येति सा तदागमनादेवोपजयात इति तद्दितृत्वेन व्यपदिश्यते।

इत्युच्यते न प्रस्नोव्यभिचारात्।

not be attempted within the small compass of this work. All I can do in this place is to give a few hymns which in thought and language represent the general character of genuine Vedic poetry, and to contrast them with some other hymns which decidedly belong to a later period.

The following hymn is ascribed to Manu Vaivasvata: viii. 30.

1. Among you, O gods, there is none that is small, none that is young: you all are great indeed.

2. Be thus praised, ye destroyers, of foes, you who are thirty and

three, you the sacred gods of Manu.

3. Defend us, help us, bless us! do not lead us far away from the path of our fathers, from the path of Manu!

4. You who are here, O gods, all of you, and worshipped by all

men, give us your broad protection, give it to cow and horse.

There is nothing striking, nothing that displays any warmth o, feeling or power of expression in this hymn. The number of thirty-threef assigned to the gods of Manu. would rather tend to refer its composition to a time when the gods of old had been gathered up and had been subjected to a strict census. Nevertheless, the hymn is simple and primitive in thought and language; and the fact of its being ascribed to Manu Vaivasvata shows that the Brahmans themselves looked upon it as a relic of one of their earliest sages. That Manu himself should be mentioned in the hymn seems to have caused no scruple to the Brâhmans; nor is it any real difficulty from our own point of view. No man of the name of Manu even-existed. Manu was never more than a name-one of the oldest names for man; and it was given in India, as elsewhere, to the supposed ancestor or ancestors of the human race. The Brâhmans, however, like most Aryan nations, changed the appellative into a proper name. They believed in a real Manu, or in several real Manus, to whom they assigned various cognomina, such as Vaivasvata, Apsava (Rv. ix. 7. 3), Sâmvarana (Rv. ix. 6. 5). All of these they naturally counted as among the earliest of human Rishis; and the hymns which they ascribed to them must have belonged in their eyes to the earliest and most important class.

In one sense it is true, no doubt, that invocations of all the gods, the Vis've Devas¹ as they are called, represent a later phase of thought than invocations of single deities. Nevertheless, there is nothing to show that this comprehensive view of all the deities belongs to an age later than that which gave rise to the most ancient hymns which we possess, and which celebrate the power and majesty of individual deities, such as Varuna, Indra, Agni (fire), the Maruts (the winds), Ushas (dawn), &c. When these individual gods are invoked, they are not conceived as limited by the power of others, as superior or inferior in rank. Each god is to the mind of the supplicant as good as all the gods. He is felt, at the time, as a real divinity—as supreme and absolute, in spite of the necessary limitations which, to our mind, a plurality of gods must entail on every single god. All the rest disappear for a moment from the vision of the poet, and he only who is to fulfil their desires stands in full light before the eyes of the worshippers. "Among you, O gods, there is

<sup>&</sup>lt;sup>1</sup> Vis've Devâh, though treated as a plural, has sometimes the meaning of a pluralis majestaticus. See Ewald, Ausführliches Lihrbuch, § 178, b.

none that is small, none that is young; you are all great indeed," is a sentiment which, though, perhaps, not so distinctly expressed as by Manu Vaivasvata, nevertheless, underlies all the poetry of the Veda. Although the gods are sometimes distinctly invaked as the great and the small, the young and the old (Rv. i. 27, 13), this is only an attempt to find the most comprehensive expression for the divine powers, and nowhere is any of the gods represented as the slave of others. It would be easy to find, in the numerous hymns of the Veda, passages in which almost every single god is represented as supreme and absolute. In the first hymn of the second Mandala, Agni is called the ruler of the universe, the lord of men, the wise king, the father, the brother, the son, and friend of men; 2 nay, all the powers and names of the others are distinctly ascribed to Agni. The hymn belongs, no doubt, to the modern compositions; yet, though Agni is thus highly exalted in it, nothing is said to disparage the divine character of the other gods. Indra is celebrated as the strongest god in the hymns as well as in the Brahmanas, and the burden of one of the songs of the tenth book3 is: Vis'vasmad Indra uttarah, "Indra is greater than all." Of Soma it is said that he was born great, and that he conquers every one. He is called the king of the world,5 he has the power to prolong the life of men,6 and in one sense he is called the maker of heaven and earth, of Agni, of Sûrya, of Indra, and of Vishnu.7

If we read the next hymn, which is addressed to Varana (oupavos) we perceive that the god here invoked is, to the mind of the poet, supreme and almighty. Nevertheless, he is one of the gods who is almost always represented in fellowship with another, Mitra; and even in our hymn there is one verse, the sixth, in which Varuna and Mitra are invoked in the dual. Yet what more could human language achieve, in trying to express the idea of a divine and supreme power, than what our poet says of Varuna; -"Thou art lord of all, of heaven and earth." Or, as is said in another hymn (ii. 27. 10.), "Thou art the king of all; of those who are gods, and of those who are men." Nor is Varuna represented as the Lord of nature. He knows the order of nature, and upholds it; for this is what is meant dhritavrata.8 Varuna therefore, knows the twelve months, and even the thirteenth; he knows the course of the wind, the birds in the air, and the ships of the sea. He knows all the wondrous works of nature, and he looks not only into the past but into the future also. But, more than all this, Varuna watches over the order of the moral world. The poet begins with a confession that he has neglected the works of Varuna, that he has offended against his laws. He craves his pardon; he appeals in self-defence to the weakness of human nature; he deprecates death as the reward of sin. His devotion is all he has

¹ त्वं विश्वानि स्वनीक पत्यसे । ii. 1. 8. See Nirukta-paris'shta, i.

<sup>&</sup>lt;sup>2</sup> ii. 1. 9.

<sup>3</sup> x. 86.

<sup>4</sup> ix. 59.

<sup>5</sup> ix. 96. 10., bhuvanasya raja.

<sup>6</sup> ix. 96. 14.

<sup>7</sup> ix. 96. 5.

S Vrata means what must be done, and these Vratas or laws are not (aprachyuta) because "they rest on Varuna as on a rock." (Rv. ii. 28. 8.)

wherewith to appeare the anger of his god; and how natural the feeling, when he hopes to soothe the god by his prayers as a horse is. soothed by kind words. The poet has evidently felt the anger of Varuna. His friends, wishing for booty elsewhere, have left him, and he knows not how to bring back Varuna, who is the only giver of victory. He describes the power of his god, and he praises him chiefly as the guardian of law and order. Like a true child of nature, he offers honey, sweet things, which the god is sure to like, and then appeals to him as to a friend: "Now be good, and let us speak together again." This may seem childish, but there is a real and childish faith in it; and, like all childish faith, it is rewarded by some kind of response. For, at that very moment, the poet takes a higher tone. He fancies he sees the god and his chariot passing by; he feels that his prayer has been heard. True, there is much that is human, earthly, coarse, and filse in the language applied to the deity as here invoked under the name of Varuna. Yet there is something also in these ancient strains of thought and faith which moves and cheers our hearts even at this great distance of time; and a wise man will pause before he ascribes to purely evil sources what may be, for all we know, the working of a love and wisdom beyond our own.

The hymn is ascribed to Sunahs'epha, according to the legend of the later Brahmanas, the victim offered to Varana by his own father Aji-

garta Sauyavasi. (See page 218.)

However we break thy laws from day to day, men as we are, O God, Varuna.

2. Do not deliver us unto death, nor to the blow of the furious; not

to the anger of the spiteful!

3. To propitiate thee, O Varuna we bind thy mind with songs, as the charioteer a weary steed.

4. Away from me they flee dispirited, intent only on gaining

wealth; as birds to their nests.

5. When shall we bring hither the man who is victory to the warriors, when shall we bring Varuna, the wide-seeing, to be propitiated? [6. This they take in common with delight, Mitra and Varuna;

they never fail the faithful giver.

7. He who knows the place of the birds, that fly through the sky.

who, on the waters knows the ships,—

8. He, the upholder of order, who knows the twelve months with the offspring of each, and knows the month 1 that is engendered afterwards.-

9. He who knows the track of the wind, 2 of the wide, the bright.

and mighty; and knows those who reside on high,3-

10. He the upholder of order, Varuna sits down among his people; he, the wise, sits there to govern.

11. From thence perceiving all wondrous things, he sees what has

been and what will be done.

12. May he, the wise son of time aditya), make our paths straight all our days; may he prolong our lives!

<sup>1</sup> The thirteenth or intercalary month; see page 110.

<sup>2</sup> Rv. vii. 87. 2., the wind is called the breath of Varuna.

<sup>3</sup> The gods.

13. Varuna, wearing golden mail, has put on his shining cloak; the spies sat down around him.

14. The god, whom the scoffers do not provoke, nor the tormentors

of men, nor the ploters of mischief,-

15. He, who gives to men glory, and not half glory, who gives it even to our own bodies,—

16. Yearning for him, the far-seeing, my thoughts move onwards,

as kine move to their pastures.

17. Let us speak together again, because my honey has been brought: thou eatest what thou likest, like a friend.2

18. Now I saw the god who is to be seen by all, I saw the chariot

above the earth : he must have accepted my prayers.

19. O hear this my calling, Varuna be gracious now; longing for help, I have called upon thee.

20. Thou, O wise god, art lord of all heaven and earth : listen on

thy way.

21. That I may live, take from me the upper rope, loose the

middle, and remove the lowest!

The one hymn to Varuna would be sufficient to show the mistake of those who deny the presence of moral truths in the ancient religions of the worlds and, more particularly, in the so-called nature-worship of the Aryans. On the contrary, whatever we find of moral sentiments in those ancient hymns is generally as true to-day as it was thousands of years ago; while what is false and perishable in them has reference to the external aspect of the deity, and to his supposed working in The key-note of all religion, natural as well as revealed, is present in the hymns of the Veda, and never completely drowned by the strange music which generally deafens our ears when we first listen to the wild echoes of the heathen worship. There is the belief in God, the perception of the difference between good and evil, the conviction that God hates sin, and loves the righteous. We can hardly speak with sufficient reverence of the discovery of these truths, however trite they may appear to ourselves; and, if the name of revelation seems too sacred a name to be applied to them, that of discovery is too profane, for it would throw the vital truths of all religion, both ancient and modern, into the same category as the discoveries of a Galileo or a Newton. Theologians may agree in denying that any man in possession of his reason can, without a crime, remain ignorant of God for any length of time. Missionaries, however, who held and defended this opinion, have been led to very different convictions after some intercourse with savage tribes. Dobrizhoffer, 3

<sup>1</sup> These spies or watchers are most likely the other Adityas, of whom it is said (ii. 27. 3.) that "they see into what is evil and what is good, and that everything, even at the greatest distance, is near to them." "With them the right is not distinguished from the left nor the east, nor the west." (Rv. ii. 27. 11.) See Roth, Zeitschrift der Deutschen Morgenlandischen Gesellschaft, vi. 72.

<sup>&</sup>lt;sup>2</sup> Hotri does not mean friend, but the priest who is chosen to invite the gods. Perhaps it means poet and priest in a more general sense than in the later hymns.

<sup>3</sup> Dobrizhoffer, Account of the Abipones, vol. ii. p. 58,

who was for eighteen years a Missionary in Paraguay, states that the language of the Abipones does not contain a single word which expresses God or a divinity. Penafiel, a Jesuit theologian declared, that there were many Indians who, on being asked whether, during the whole course of their lives they ever thought of God, replied, no, never. Dobrizhoffer says, "Travelling with fourteen Abipones, I sat down by the fire in the open air, as usual on the high shore of the river Plata. The sky, which was perfectly serene, delighted our eyes with its twinkling stars. I began a conversation with the Cacique Ychoalay, the most intelligent of all the Abiponos I have been acquainted with, as well as the most famous in war. 'Do you behold,' said I, 'the splendour of Heaven, with its magnificent arrangement of stars? Who can suppose that all this is produced by chance? Whom do you suppose to be their creator and governor? What were the opinions of your ancestors on the subject?, 'My father,' replied Ychoalay, readily and frankly, 'our grandfathers and great-grandfathers, were wont to contemplate the earth alone, solicitious only to see whether the plain afford grass and water for their horses. They never troubled themselves about what went on in the Heavens, and who was the creator and governor of the stars." The Guaranies, who had an expression for the supreme Deity whom they call tupa, a word composed of two particles—tu, a word of admiration, and pa, of interrogation, nevertheless worshipped only an evil spirit. Let us turn our eyes from the Indians of America to the Indians of India, and we shall perceive the immense distance by which these noble races are separated from the savage tribes to whom our Missionaries are still trying, and trying in vain, to impart the first principles of religion. The language of their simple prayers is more intelligible to us, their whole world of thought and feeling is nearer to us, than anything wa find in the literature of Greece and Rome, and there are here and there, short expressions of faith and devotion in which even a Christian can join without irreverence. If the following were not addressed to Varuna one of the many names of the deity, it would seem to contain nothing strange or offensive to our ears:

1. Let me not yet, O Varuna, enter into the house of clay; have

mercy, almighty, have mercy!

2. If I go along treambling, like a cloud driven by the wind; have mercy, almighty, have mercy!

3. Through want of strength, thou strong and bright god, have I

gone to the wrong shore; have mercy, almighty, have mercy!

4. Thirst came upon the worshipper, though he stood in the midst of the waters; have mercy, almighty, have mercy!

5. Whenever we men, O Varuna, commit an offence before the heavenly host; whenever we break thy law through thoughtlessness;

have mercy, almighty, have mercy !

Here we have the two ideas, so contradictory to the human understanding, and yet so easily reconciled in every human heart: God has established the eternal laws of the moral world, yet he is willing to forgive those who offend against them; just yet merciful; a judge, and yet a father. "He is merciful even to him who has committed sin."

<sup>1</sup> Rv. vii. 87. yah mrilayatichakrushe chit agah.

The next hymn allows us a still deeper insight into the strange ideas which the Rishis had formed to themselves as to the nature of sin. (Rv. vii. 86)

1. Wise and mighty are the works of him who stemmed asunder the wide firmaments. He lifted on high the bright and glorious heaven;

he stretched out apart the starry sky and the earth.

2. Do I say this to my own soul? How can I get unto Varuna? Will he accept my offering without displeasure? When shall I, with a quiet mind, see him propitiated?

3. I ask, O Varuna, wishing to know this my sin. I go to ask the wise The sages all tell me the same: Varuna it is who is angry

with thee.

4. Was it an old sin, O Varuna, that thou wishest to destroy thy friend, who always praises thee? Tell me, thou unconquerable lord,

and I will quickly turn to thee with praise, freed from sin.

5. Absolve us from the sins of our fathers, and from those which we committed with our own bodies. Release Vasishtha, O king, like a thief who has feasted on stolen cattle; release him like a calf from the repe.

6. It was not our own doing, O Varuna, it was necessity, an intoxicating draught, passion, dice, thoughtlessness. The old is near to

mislead the young; even sleep brings unrighteousness.

7. Let me without sin give satisfaction, like a slave to the bounteous lord, the god, our support. The lord god enlightened the foolish;

he, the wisest, leads his worshipper to wealth.

8. O lord, Varuna, may this song go well to thy heart! May we prosper in keeping and acquiring! Protect us, O gods, always with your blessings!

These ideas preponderate in hymns addressed to Varuna, but they likewise occur in the prayers to the other gods. Varuna is one of the Adityas, the sons of time, the Kronions, the heavenly gods. The hymns addressed to these Adityas in general are full moral sentiments, because these gods are believed to protect men, not only against the assaults of nature, against disease and suffering, but also against the temptations of sin.

Rv. viii. 13. 14. "May evil betide him, the cursing mortal, the enemy

who, double-tongued, would deal us a felon's blow.

15. You gods are with the righteous; you know men in their hearts. Come to the true man, and to the false, ye Vasus!

16. We implore the protection of the mountains, and the protection of the waters.<sup>2</sup> Heaven and earth, remove from us all evil.

17. Carry us, O Vasus, by your blessed protection, as it were in your ship, across all dangers.

18. To our offspring, to our race, and thus to ourselves, make life

longer to live, ye valiant Adityas!

21. O Mitra, Aryaman, Varuna, and ye Winds, grant us an abode free from sin, full of men, glorious, with three bars.

22. We, who are but men, the bondsmen of death, prolong our time well, O Adityas, that we may live!

<sup>1</sup> Name of the poet,

Indra, one of the principal gods of the Veda, is likewise invoked, together with the Adityas, as a god who may pardon sin. "Whatever sin we have committed against you," the poet says, "let us obtain, O Indra, the broad safe light of day; let not the long darkness come upon us!" Indra is clearly conceived as a moral being in the following verse (Rv. viii. 21. 14.,:

"Thou never findest a rich man to be thy friend; wine-swillers despise thee. But when thou thunderest, when thou gatherest (the

clouds), then thou art called like a father."

Out of a large number of hymns addressed to the same god, we select one that is ascribed to Vasishtha. (Rv. vii. 32).

1. Let no one, not even those who worship thee, delay thee far from us! Even from afar come to our feast! Or, if thou art here, listen to us!

2. For these here who make prayers for thee, sit together near the libation, like flies round the honey. The worshippers, anxious for wealth, have placed their desire upon Indra, as we put our foot upon a chariot.

3. Desirous of riches, I call him who holds the thunderbolt with

his arm, and who is a good giver, like as a son calls his father.

4. These libations of Soma, mixed with milk, have been prepared for Indra: thou armed with the thunderbolt, come with the steeds to drink of them for thy delight; come to the house!

5. May he hear us, for he has ears to hear. He is asked for riches; will he despise our prayers? He could soon give hundreds and thou-

sands; -no one could check him if he wishes to give.

6. He who prepares for thee, O Vritra-killer, deep libations, and pours them out? before thee, that here thrives with Indra, never scorned of men.

7. Be thou, O mighty, the shield of the mighty (Vasishthas) when thou drivest together the fighting men. Let us share the wealth of him whom thou hast slain; bring us the household of him who is hard to vanquish.

8. Offer Soma to the drinker of Soma, to Indra, the lord of the thunderbolt; roast roasts; make him to protect us: Indra, the giver,

is a blessing to him who gives oblations.

9. Do not grudge, ye givers of Soma; give strength<sup>3</sup> to the great god, make him to give wealth! He alone who perseveres, conquers, abides, and flourishes: the gods are not to be trifled with.

10. No one surrounds the chariot of the liberal worshipper, no one stops it. He whom Indra protects and the Maruts, he will come into stables full of cattle.

11. He will, when fighting, obtain spoil, 4 O Indra, the mortal,

<sup>1</sup> Rv. ii. 27. 14.

Bakshata is construed with the dative, and the casura forbids to join mahe with raye. A similar construction occurs vii. 97.8., Dakshayaya

dakshata, where the commentator explains it rightly.

4 This verse shows signs of a later origin; the ideas are taken from the preceding verse.

<sup>2</sup> Dhavati is explained as a neuter verb by the commentary, "he who runs towards thee." Dhavati, however, is a technical term, applied to the libations of the Soma-juice, as may be seen, Rv. viii. 1. 17. "Sota hi somam abribhih â îmenam apsu dhavata," "Press the Soma with stones, make it run in the water.

whose protection thou shouldest be. O hero, be thou the protection of our chariots, and of our men!

12. His share is exceeding great, like the wealth of winner. He who is Indra with his steeds, him no enemies can subdue; may he give

strength to the sacrificer !

13. Make for the sacred gods a hymn that is not small, that is well set and beautiful! Many snares pass by him who abides with Indra through his sacrifice.

14. What mortal dares to attack him who is rich in thee? Through

faith in thee, O mighty, the strong acquires spoil in the day of battle.

15. Stir us mighty Vasishthas in the slaughter of the enemies, stir us who give their dearrst treasures. Under thy guidance, O Haryas'va, we shall with our wise counsellors overcome all hardships.

16. To thee belongs the lowest treasure; thou rearest the middle treasure; thou art king always of all the highest treasure; no one

withstands thee in the flock.

17. Thou art well known as the benefactor of every one, whatever battles there be. Every one of these kings of the earth implores thy name, when wishing for help.

18. If I were lord of as much as thou, I should support the sacred

bard, thou scatterer of wealth, I should not abandon him to misery.

19. I should award wealth day by day to him who magnifies, I should award it to whosoever it be. We have no other friend but thee, no other happiness, no other father, O mighty!

20. He who perseveres acquires spoil with his wife as his mate; I bend Indra, who is invoked by many, for you, as a wheelwright bends

a wheel made of strong wood.

21. A motral does not get riches by scant praise: no wealth comes to the grudger. The strong man it is. O mighty, who in the day of battle is a precious gift to thee as to me.

22. We call for thee, O hero, like cows that have not been milked; we praise thee as ruler of all that moves. O Indra, as ruler of all that

is immoveable.

- 23. There is no one like thee in heaven or earth; he is not born, and will not be born. O mighty Indra, we call upon thee as we go fighting for cows and horses.
- 24. Bring all this to those who are good, O Indra, be they old or young; 2 for thou, O mighty, art the rich of old, and to be called in every battle.
- 25. Push away the unfriendly, O mighty, make us treasures easy to get! Be the protector of ourselves in the fight, be the cherisher of our friend!

26. Indra, give wisdom to us, as a father to his sons. Teach us in

this path, let us living see the sun!

27. Let not unknown wretches, evil-disposed and unhallowed, tread us down. Through thy help, O hero, let us step over the rushing eternal waters!

<sup>2</sup> Jyayah stands for jyayasah.

According to the Commentator Kuhachidvid means "wherever he be." It may perhaps mean the ignorant.

In this hymn Indra is clearly conceived as the supreme god, and we can hardly understand how a people who had formed so exalted a notion of the deity and embodied it in the person of Indra, could, at the same sacrifice, invoke other gods with equal praise. When Agni, the lord of fire, is addressed by the poet, he is spoken of as the first god, not inferior even to Indra. While Agni is invoked, Indra is forgotten; there is no competition between the two, nor any rivalry between them or other gods. This is most important feature in the religion of the Veda, and has never been taken into consideration by those who have

written on the history of ancient polytheism.

There are other hymns, again, in which the notion of a deity is much less prominent. Indra is there represented like a hero fighting against enemies. He is liable to defeat, his heart fails him in the combat, and though at last he invariably conquers, he does so rather by an effort than by the mere assertion of his power. Agni, again, in many hymns, is simply described as a power of nature, as the fire, such as it is seen in heaven and on earth. Many things that have become to us familiar, struck the poets of the Veda as wonderful and mysterious. describe the power of the fire with an awe which, to the natural philosopher of the present day, must appear childish. The production of fire by the friction of wood, or its sudden descent from the sky in the form of lightning, is to them as marvellous as the birth of a child. They feel their dependence on fire; they have experienced what it is to be with-They were not yet acquainted with lucifer-matches, and hence, when describing the simple phenomena of fire, they do it naturally with a kind of religious reverence. The following verses, taken from a hymn of Vasishtha (vii. 3.) may serve as a specimen \*

"Neighing like a horse that is greedy for food, when it steps out from the strong prison;—then the wind blows after his blast; thy path,

O Agni, is dark at once.

O Agni, thou from whom, as a new-born male, undying flames proceed, the brilliant smoke goes towards the sky, for as messenger thou art sent to the gods.

Thou whose power spreads over the earth in a moment when thou hast grasped food with thy jaws,—like a dashing army thy blast goes

forth; with thy lambent flame thou seemest to tear up the grass.

Him alone, the ever-youthful Agni, men groom, like a horse in the evening and at dawn; they bed him as a stranger in his couch; the light of Agni, the worshipped 2 male, is lighted.

Ahuta is used in the general sense of worshipped, well attended,

with special reference to a guest. Cf. Rv. i. 44. 4.

<sup>1</sup> The construction of this verse is very abrupt, particularly the transition from the simile of the horse, which is put in the third person to the address to Agni in the second person. The idea, however, is clear. Agni, the fire, when first lighted, is compared with a neighing horse, on account of the crackling noise. He is greedy for food as soon as he steps out of his prison, viz., from the wood from which fire is produced by friction, like a horse stepping out of his stable. Then the wind is supposed to kindle the blaze of the fire, and as the path of the horse is darkened by dust, the path of Agni is darkened by smoke.

Thy appearance is fair to behold, thou brightfaced Agni, when like gold thou shinest at hand; thy brightness comes like the lightning of

heaven; thou showest splendour like the bright sun."

The human, and afterwards divine qualities ascribed to Agni arise chiefly from his character as messenger between gods and men, or, as high-priest, when he is supposed to carry the oblation to the gods. It is one of the most favourite themes of the Vedic poets, though perhaps of the modern rather than of the ancient, to celebrate Agni as a priest, as endowed with all priestly powers, and enjoying all the honorific titles given to the various persons who minister at the great sacrifices. The following hymns, one of Vatsa (Rv. viii. 11.), the other of Gotama (Rv. i. 74.), are rather simple as compared with others of the same class, though there are expressions in which both indicate their more modern character.

1. Thou Agni, art the guardian of sacred rites: thou art a god

among mortals; thou art to be praised at the sacrifices.

2. Thou strong Agni, art to be praised at the festivals, thou who like a charioteer carriest the offerings to the gods.

3. Fight and drive thou away from us the fiends, O Jatavedas,

the ungodly enemies, O Agni!

4. Thou, Jatavedas, desirest not the offering of a hostile man, be it ever so nigh to thee.

5. We mortals and sages worship the great name of thee, the

immortal Jatavedas.

6. We sages call the sage to help, we mortals call on the god for protection, we call on Agni with songs.

7. May the poet draw thy mind even from the most distant abode

with the song that longs for thee, O Agni.

8. Thou art the same in many places, a lord among all people: we call upon thee in battles.

9. In battles we call upon thee, Agni, for help when we want

strength; we call in struggles upon the giver of precious gifts.

10. Thou art ancient, to be praised at the sacrifices; thou sittest as priest from of old and to-day. Replenish thy own body, O Agni, and grant happiness to us!

1. As we go to the sacrifice let us say a song to Agni, to him who hears us even from afar.

2. He who, existing from of old, defended the house for the sacrificer when hostile tribes were gathering together.

3. Let even the nations confess, "Agni was b.rn, the slayer of the

enemy, the winner of booty in every battle."

4. He whose messenger thou art in the house, whose offerings thou art pleased to accept, and whose sacrifice thou renderest efficient.

Of him indeed, O Angiras, son of strength, people say that his

offerings are good, his gods are good and his altar is good.

6. Bring hither, O serene Agni, these gods, bring them that they may be praised, that they may accept the offerings.

<sup>1</sup> Might be "deveshvå martyeshvå," "among gods and among men?"

7. When thou, O Agni, goest on a mission, the sound of the horses of thy moving chariot is never heard.

8. If protected by thee, the warrior is unabashed. Onward he goes,

one after another, forward he steps, O Agni, who offers oblations.

9. Thou, O bright god, besto vest with increase a brilliant array of heroes upon him who offers oblations to the bright gods. 1

It is curious to watch the almost imperceptible transition by which the phenomena of nature, if reflected in the mind of the poet, assume the character of divine beings. The dawn is frequently described in the Veda as it might be described by a modern poet. She is the friend of men, she smiles like a young wife, she is the daughter of the sky. She goes to every house, (i. 123. 4.); she thinks of the dwellings of men (i. 123. 1.); she does not despise the small or the great (i. 124.6.); she brings wealth (i. 48. 1.); she is always the same, immortal, divine, (i. 124. 4.; i. 123. 8.); age cannot touch her, (i. 113. 15.); she is the young goddess, but she makes men glow old, (i. 92. 11.). All this may be simply allegorical language. But the transitions from devi, the bright, to devî, the goddess, is so easy; the daughter of the sky assumes so readily the same personality which is given to the sky, Dyaus, her father, that we can only guess whether in every passage the poet is speaking of a bright apparition, or of a bright goddess; of a natural vision, or of a visible deity. The following hymn of a Vasishtha, (vii. 77.), will serve as an instance :-

"She shines upon us, like a young wife, rousing every living being to go to his work. The fire had to be kindled by men; she brought light

by striking down darkness.

She rose up spreading far and wide, and moving towards every one. She grew in brightness, wearing her brilliant garment. The mother of the cows (of the morning clouds), the leader of the days, she shone gold-coloured, lovely to behold.

She, the fortunate, who brings the eye of the god, who leads the white and lovely steed (of the sun), the Dawn was seen, revealed by her

rays, with brilliant treasures she follows every one.

Thou, who art a blessing where thou art near, drive far away the unfriendly; make the pastures wide, give us safety! Remove the haters, bring treasures! Raise up wealth to the worshipper, thou mighty Dawn.

Shine for us with thy best rays, thou bright Dawn, thou who lengthenest our life, thou the love of all, who givest us food, who givest us wealth in cows, horses, and chariots.

<sup>2</sup> The fire of the altar for the morning prayers.

<sup>1</sup> Every word of this verse baffles translation. Vivâsasi is not simply "thou bestowest," but "thou spreadest out as the sun spreads out his rays." Suvirya is not "an array of heroes," but an abstract, signifying the possession of good strength, only that this good strength means "the chief of all their strength," and has special reference to the sons and all the males born in the house. Dyumad, brilliant, corresponds with the verb vivâsasi Brihat should be taken as an adverb, signifying the ever increasing nature, of the gift bestowed by Agni.

Thou, daughter of the sky, thou high born Dawn, whom the Vasishthas magnify with songs, give us riches high and wide: all ye gods,

protect us always with your blessings !"

This hymn addressed to the Dawn is a fair specimen of the original simple poetry of the Veda. It has no reference to any special sacrifice, it contains no technical expressions, it can hardly be called a hymn, in our sense of the word. It is simply a poem expressing, without any without any display of far-fetched thought or brilliant effort. imagery, the feelings of a man who has watched the approach of the dawn with mingled delight and awe, and who was moved to give utterance to what he felt, in measured language. We have heard the same thoughts and feelings expressed by so many poets, that we can hardly enter into the pleasure with which those early singers spoke their hearts out for the first time. We have become so accustomed to the rules of the most complicated metres that we hardly consider how mysterious is that instinct which suggested to the first poets the extraordinary variety of rhythm which we find in the Veda. But there is a charm in these primitive strains discoverable in no other class of poetry. Every word retains something of its radical meaning, every epithet tells, every thought, in spite of the most intricate and abrupt expressions, is, if we once disentangle it, true, correct, and complete. But this is not the case with all the poems of the Veda. It would be tedious to translate many specimens of what I consider the poetry of the secondary age, the Mantra period. These songs are generally intended for sacrificial purposes, they are loaded with technicalities, their imagery is sometimes more brilliant, but always less perspicuous, and many thoughts and expressions are clearly borrowed from earlier hymns. One specimen may suffice, a hymn describing the sacrifice of the horse with the full detail of a supersititions ceremonial. (Rv. i. 162.)

"May Mitra, Varuna, Aryaman, Âyu, Indra, the Lord of the Ribhus, and the Maruts not rebuke us because we shall proclaim at the sacrifice the virtues of the swift horse sprung from the gods.

When they lead before the horse, which is decked with pure gold ornaments, the offering, firmly grasped, the spotted goat bleats while

walking onward; it goes the path beloved by Indra and Pûshan.

This goat, destined for all the gods, is led first with the quick horse, as Pûshan's share; for Tvashtri himself raises to glory this pleasant offering which is brought with the horse.

When thrice at the proper seasons men lead around the sacrificial horse which goes to the gods, Pûshan's share comes first, the goat,

which announces the sacrifice to the gods.

Hotri, Adhvaryu, Āvayaj, (Pratiprasthātri), Agnimindha (Agnîdhra), Gravagrabha (Gravastut), and the wise Sanstri (Prasastri), may you fill the streams (round the alter) with a sacrifice which is well prepared and well accomplished.

They who cut the sacrificial post, and they who carry it, they who

<sup>2</sup> All names of priests.

The goat is the victim or the offering which is led before the horse, and sacrificed to Indra and Pûshan.

make the ring for the post of the horse, and even they who bring together what is cooked for the horse, may their work be with us.

He came on—(my prayer has been well performed),—the bright-backed horse goes to the regions of the gods. Wise poets celebrate him, and we have won a good triend for the love of the gods.

The halter of the swift one, the heel-ropes of the horse, the heid-ropes, the girths, the bridle, and even the grass that has been put into his mouth, may all these which belong to thee be with the gods!

What the fly eats of the flesh, what adheres to the stick, or to the axe, or to the hands of the immolator and his nails, may all these which

belong to thee be with the gods!

The ordure that runs from the belly, and the smallest particle of raw flesh, may the immolators well prepare all this, and dress the sacrifice till it is well cooked.

The juice that flows from thy roasted limb on the spit after thou hast been killed, may it not run on the earth or the grass; may it be given to the gods who desire it.

They who examine the horse when it is roasted, they who say "it smells well, take it away," they who serve the distribution of the meat,

may their work also be with us.

The ladle of the pot where the meat is cooked, and the vessels for sprinkling the juice, the vessels to keep off the heat, the covers of the vessels, the skewers, and the knives, they adorn the horse.

Where he walks, where he sits, where he stirs, the foot-fastening of the horse, what he drinks, and what food he eats, may all these which belong to thee be with the gods!

May not the fire with smoky smell make thee hiss, may not the glowing cauldron smell and burst. The gods accept the horse if it is

offered to them in due form.

The cover which they stretch over the horse, and the golden ornaments, the head-ropes of the horse, and the foot-ropes, all these which are dear to the gods, they offer to them.

If some one strike thee with the heel or the whip that thou mayest lie down, and thou art snorting with all thy might, then I purify all this

with my prayer, as with a spoon of clarified butter at the sacrifices.

The axe approaches the thirty-four ribs of the quick horse, beloved of the gods. Do you wisely keep the limbs whole, find out each joint and strike.

One strikes the brilliant horse, two hold it, thus is the custom. Those of thy limbs which I have seasonably prepared, I sacrifice in the fire as balls offered to the gods.

May not thy dear soul burn thee while thou art coming near, may the axe not stick to thy body. May no greedy and unskilful immolator, missing with the sword, throw thy mangled limbs together.

Indeed thou diest not thus, thou sufferest not; thou goest to the gods on easy paths. The two horses of Indra, the two deer of the

<sup>1</sup> In these hymns it is sometimes difficult to say whether the horse be meant, or the sun, of which it is the emblem.

<sup>&</sup>lt;sup>2</sup> The verb in the singular (astu) with the substantive in the plural (sarva) finds an analogy in Greek,

Maruts have been yoked, and the horse come to the shaft of the ass (of the As'vins.)

May this horse give us cattle and horses, men, progeny, and all-sustaining wealth. May Aditi keep us free from sin; may the horse of

this sacritice give us strength!

A comparison of the general tone of this hymn with that of the hymns to Varuna, Indra, and Ushas, translated before, can leave little doubt in the mind of critical historians as to its more modern character. We must be careful, however, not to judge the poetry of the ancient bards of India according to our own standard of what is simple and natural and what is not. The great importance attached to what to us seem mere trifles in the performance of a sacrifice would not be sufficient to stamp this hymn as modern. The surperstitious feeling about ceremonial minutiæ is natural in a primitive state of civilization, and there are numerous hymns in the Veda which must be adjudged to the earliest period, and where, nevertheless, we meet with sentiments worthy of the most advanced ceremonialists.

The same caution is still more necestary with regard to another criterion which has been used to prove the modern date of certain hymns, the presence of philosophical ideas. It has been the custom to regard any hymn in which the nature of the deity, the problems of existence, the hope of immortality are expressed, as decidedly modern. The whole tenth Mandala has been assigned to a later period, chiefly because it contains many hymns the language of which approaches the philosophical diction of the Upanishads and of the still later systems

of philosophy. This is a mistake.

There is very little to guide us in forming a judgment of what is genuine and primitive in the ancient poetry of so peculiar a race as the Aryans of India. We have nothing to compare with the poetical relies of the Vedic age. Because we find in some hymns ideas or expressions which, in the literatures of other nations, such as the Jews, or Greeks and Romans, we have accustomed ourselves to regard as of comparatively modern growth, we have no right to conclude that they are equally modern in the history of the Indian mind. The Veda opens to us a chamber in the labyrinth of the human mind through which the other Aryan nations had passed long before they become visible to us by the light of history. Whatever the age of the Veda may be, in one sense it is the oldest book in existence. If this collection had been written but fifty years ago, in some distant part of the world untouched by the general stream of civilisation, we should still call it more ancient than the Homeric poems, because it represents an earlier phase of human thought and feeling. Names which in Homer have become petrified and mythological, are to be found in the Veda as it were in a still fluid state. They next appear as appellatives, not yet as proper names; they are organic, not yet broken and smoothed down. Nor can we compare that earlier, lower, and more savage phase of thought which we find in the Veda, with what we know of really barbarous tribes, such as the Negroes of Africa or the Indians of America. For, however inferior to

<sup>1</sup> See Essai de Mythologie Compare'e, traduit de 1' Anglais de Max Müller, Paris, 1859, p. 47.

the Greeks of Homer and the Jews of Moses, the Aryas of the Seven Rivers are far above those races, and had long crossed the bounds of an unconscious barbarism, when they worshipped Dyaus and the other bright gods of nature.

Let us consider but a single point. We have accustomed ourselves to regard a belief in the unity of God as one of the last stages to which the Greek mind ascended from the depths of a polytheistic faith. The one unknown God was the final result which the pupils of Plate and Aristotle had arrived at when they came to listen to the strange teaching of St. Paul at Athens. But how can we tell that the course of thought was the same in India ? By what right do we mark all hymns as modern in which the idea of one God breaks through the clouds of a polytheistic phraseology? The belief in a Supreme God. in a God above all gods, may in the abstract seem later than the belief in many gods. Yet let one poet but once perceive how he is drawn towards the Divine by the same feelings that draw him towards his father, let such a poet in his simple prayer but once utter, though it be thoughtlessly, the words, "My father," and the dreary desert through which philosophy marches step by step, is crossed at a single bound. We must not compare the Aryan and the Semitic races. Whereas the Semitic nations relapsed from time to time into polytheism, the Aryans of India seem to have relapsed into Monotheism. In both cases these changes were not the result of a gradual and regular progress, but of individual impulses and peculiar influences. I do not think, therefore, that the mere occurrence of monotheistic ideas, and of other large philosophical conceptions, is sufficient to stamp any class of hymns as of modern date. A decided preponderance of such ideas, coupled with other indications in the character of the language, might make us hesitate before we used such as witnesses for the Chhandas period. But there is a monotheism that precedes the polytheism of the Veda, and even in the invocations of their innumerable gods the remembrance of a God, one and infinite, breaks through the mist of an idolatrons phraseology, like the blue sky that is hidden by passing clouds.

There is a hymn of peculiar interest in the tenth Mandala, full of ideas which to many would seem to necessitate the admission of a long antecedent period of philosophical thought. There we find the conception of a beginning of all things, and of a state previous even to all existence. "Nothing that is, was then," the poet says; and he adds, with a boldness matched only by the Eleatic thinkers of Greece, or by Hegel's philosophy, "even what is not  $(\tau o \mu \eta o v)$ , did not exist then." He then proceeds to deny the existence of the sky and of the firmament, and yet, unable to bear the idea of an unlimited nothing, he exclaims. "What was it that hid or covered the existing?" Thus driven on, and asking two questions at once, with a repidity of thought which the Greek and the Sanskrit languages only can fellow, he says, " What was the refuge of what?" After this metaphysical flight, the poet returns to the more substantive realities of thought, and, throwing out a doubt, he continues, "Was water the deep abyss, the chaos, which swallowed everything?" Then his mind, turning away from nature, dwells upon man and the problem of human life. "There was no death," he says.

and, with a logic which perhaps has never been equalled, he subjoins, "therefore was there nothing immortal." Death, to his mind, becomes the proof of immortality. One more negation, and he has done. "There was no space, no life, and lastly, there was no time, no difference between day and night, no solar torch by which morning might have been told from evening." All these ideas lie imbedded in the simple words, "Naratrya ahna asît praketah." Now follows his first assertion: "That One," he says, and he uses no other epithet or qualification—"That One breathed breathless by itself: other than it nothing since has been." This expression, "it breathed breathless" seems to me one of the happiest attempts at making language reflect the colourless abstractions of the mind. "That One," the poet says, "breathed, and lived; it enjoyed more than mere existence; yet its life was not dependent on anything else, as our life depends on the air which we breathe. It breathed breathless." Language blushes at such expressions, but her blush is a blush of triumph.

After this the poet plunges into imagery. "Darkness there was, and all at first was veiled in gloom profound, as ocean without light." No one has ever found a truer expression of the Infinite, breathing and heaving within itself, that the ocean in a dark night, without a star without a torch. It would have been easy to fill out the picture, and a modern writer would have filled it out. The true poet, however, says but a single word, and, at his spell, pictures arise within our own mind, full of a reality beyond the reach of any art.

But now this One had to be represented as growing—as entering into reality—and here again nature must supply a similitude to the poet. As yet, the real world existed only as a gorm, hidden in a husky shell: now, the poet represents the one substance as borne into life by its own innate heat. The beginning of the world was conceived like the spring of nature; one miracle was explained by another. But, even then, this Being, or this nature, as conceived by the poet, was only an unconscions substance, without will and without change. The question how there was generation in nature, was still unanswered. Another miracle had to be appealed to, in order to explain the conscious act of creation: this miracle was Love, as perceived in the heart of men. "Then first came love upon it," the poet continues, and he defines love, not only as a natural, but as a mental impulse. Though he cannot say what love is, yet he knows that all will recognise what he means by love,—a power which arises from the unsearchable depths of our nature, -making us feel our own incompleteness, and drawing us, halfconscious, half-unconscious, towards that far off and desired something, through which alone our life seems to become a reality. This is the analogy which was wanted to explain the life of nature, which he knew was more than mere existence. The One Being which the poet had postulated was neither self-sufficient nor dead: a desire fell upon it,-a spring of life, manifested in growth of every kind. After the manifestation of this desire or will, all previous existence seemed to be unreal, a mere nothing as compared with the fullness of genuine life. A substance without this life, without that infinite desire of production and reproduction, could hardly be said to exist. It was a bare abstract conception. Here, then, the poet imagines he has discovered the secret of creation,—the transition of the nothing into the something,—the change of the abstract into the concrete. Love was to him the beginning of real reality, and he appeals to the wise of old, who discovered in love, "the bond between created things and uncreated." What follows is more difficult to understand. We hardly know into what new sphere of thought the poet enters. The growth of nature has commenced, but where was it? Did the piercing ray of light come from below, or from above? This is the question which the poet asks, but to which he returns no answer, for he proceeds at once to describe the presence of male and female powers, nor is it likely that what follows, "syadha avastât, prayatih parastât," is meant as an answer to the preceding inquiry. The figure which represents the creation as a ray entering the realm of darkness from the realm of light, occurs again at a much later time in the system of Manichaeism, I but like all attempts at clothing transcendental ideas in the imagery of human thought, it fails to convey any tangible or intelligible impression. This our poet also seems to have felt, for he exclaims "Who indeed knows? Who proclaimed it here, whence, whence this creation was produced? The gods were later than its production, therefore who knows whence it came?" And now a new thought dawns in the mind of the Rishi, a thought for which we were not prepared, and which apparently contradicts the whole train of argument or meditation that preceded. Whereas hitherto the problem of existence was conceived as a mere evolution of one substance, postulated by human reasoning, the poet now speaks of an Adhyakasha, an overseer, a contemplator, who resides in the highest heavens. He, he says, knows it. And why? Because this creation came from him, whether he made it or not. The poet asserts the fact that this overseer is the source of creation, though he shrinks from determining the exact process, whether he created from himself, or from nothing, or from matter existing by itself. Here the poet might have stopped; but there are yet four more words of extreme perplexity which close the poem. They may be interpreted in two ways. They either mean "Or does he not know?" and this would be a question of defiance addressed to all who might doubt his former assertion; or they mean "Or he knows not," and this would be a confession of doubt on the part of the poet, startling perhaps after the firm assertion of his belief in this one overseer and creator, yet not irreconcilable with that spirit of timidity displayed in the words, "whether he made it himself or not," which shrinks from asserting anything on a point where human reason, left to herself, can only guess and hope, and, if it venture on words, say in last resort, "Behold, we know not anything."

I subjoin a metrical translation of this hymn, which I owe to the kindness of a friend:—

"Nor aught nor naught existed; yon bright sky
Was not, nor heaven's broad woof outstretched above.
What covered all? what sheltered? what concealed?
Was it the water's fathomless abyss?
There was not death—hence was there naught immortal,

<sup>&</sup>lt;sup>1</sup> Lassen, Indische Altershumtkunde, tii. p. 409.

There was no confine betwixt day and night; The only One breathed breathless in itself, Other than it there nothing since has been. Darkness there was, and all at first was veiled In gloom profound,—an ocean without light.— The germ that still lay covered in the husk Burst forth, one nature, from the fervent heat. Then first came Love upon it, the new spring Of mind—yea, poets in their hearts discerned, Pondering, this bond between created things And uncreated. Comes this spark from earth. Piercing and all-pervading, or from heaven? Then seeds were sown, and mighty power arose-Nature below, and Power and Will above. Who knows the secret? who proclaimed it here. Whense, whence this manifold creation sprang?-The gods themselves came later into being. Who knows from whence this great creation sprang? He from whem all this great creation came. Whether his will created or was mute. The Most High seer that is in highest heaven. He knows it, -or perchance e'en He knows not.

Many of the thoughts expressed in this hymn will, to most readers. appear to proceed rather from a school of mystic philosophers than from a simple and primitive clan of shepherds and colonists. Meditations on the mysteries of creation are generally considered a luxury which no society can include in before ample provision has been made for the lower cravings of human nature; such is no doubt the case in modern Philosophers arise after the security of a state has been established, after wealth has been acquired and accumulated in certain families, after schools and universities have been founded, and a taste created for those literary pursuits which, even in the most advanced state of civilisation, must necessarily be confined to but a small portion of our ever-toiling community. Metaphysics, whether in the form of poetry or prose, are, and always have been, the privilege of the limited number of independent thinkers, and thoughts like those which we find in this ancient hymn, though clothed in a form of argument more in accordance with the requirements of our age, would fail to excite any interest except among the few who have learnt to delight in the speculations of a Plato, a Tauler, or a Coleridge But it would be false to transfer our ideas to the early periods of oriental life. First of all, the merely physical wants of a people living in the rich plains of India were satisfied without great exertions. Secondly, such was the simplicity of their life, that nothing existed which could absorb the energies of the most highly gifted among them. Neither war, nor politics, nor arts, opened a field for the exercise of genius, and for the satisfaction of a legitimate ambition Nor should it be forgotten that, in the natural course of human life, there is after all nothing that appeals with greater force to our deepest interests than the problem of our existence, of our beginning and our end, of our dependence on a Higher

Power, and of our yearnings for a better life. With us these keynotes of human thought are drowned in the din of our busy society. Artificial interests have supplanted the natural desires of the human heart. Nor less should we forget how in these later ages most of us have learnt from the history of the past that our reason, in spite of her unextinguishable aspirations, consumes this life in a prison the walls of which she cannot pierce, and where we only see light by lifting our eyes on high. All this was different in ancient times, and particularly among a people so remarkably gifted for philosophical abstraction as the Hindus. Long before they began to care for the laws of nature, the return of the seasons, the course of the stars, or any other scientific or practical subject, their thoughts were fixed on the one great and ever recurring question, What am I? What does all this world around me mean? Is there a cause, is there a creator -a God? or is it all illusion, chance, and fate? Again and again the Rishis express their doubts, and the one knowledge which they value as wonderfull and excellent is the knowledge of  $\tau \alpha$   $\mu \epsilon \gamma \iota \sigma \tau \alpha$ . It cannot be right to class every poem and every verse in which mystic or metaphysical speculations occur as modern, simply because they resemble the language of the Upanishads. These Upanishads did not spring into existence on a sudden; like a stream which has received many a mountain torrent, and is fed by many a rivulet, the literature of the Upanishads proves, better than anything else, that the elements of their philosophical poetry came from a more distant fountain. The evidence of language is the most decisive for setting the relative age of Vedic hymns; and the occurrence of such a word as tadanim, then, is more calculated to rouse doubts as to the early date of this hymn than the most abstruse metaphysical ideas which may be discovered in it. Hymns like that ascribed to Dîrghatamas (i. 164.) contain, no doubt, many verses full of the most artificial conceptions, the lucubrations rather of conceited dreamers than of simple and original thinkers. But even in those large collective poems there are lines which look like relics of a better age, and bear the stamp of true and genuine feeling. Thus we read in the 37th verse: - "I know not what this is that I am like; turned inward I walk, chained in my mind. When the first-born of time comes near me, then I obtain the portion of this speech."

In the 30th verse of the same hymn we read: "Breathing lies the quick-moving life, heaving, yet firm, in the midst of its abodes. The living one walks through the powers of the dead: the immortal is the brother of the mortal." Sometimes when these oracular sayings have been pronounced, the poet claims his due, "One who had eyes," he been pronounced, the blind will not understand it. A poet, who is a boy, says, "saw it; the blind will not understands it will be the father of his father."

In the same hymn one verse occurs which boldly declares the existence of but one Divine Being, though invoked under different names. (Rv. i. 164. 46.) "They call (him) Indra, Mitra, Varuna, Agni; then he is the well-winged heavenly Garutmat; that which is One the wise call is the well-winged heavenly Garutmat; Mâtaris'van." Many of these it many ways; they call it Agni, Yama, Mâtaris'van." Many of these it many been incorporated in the Upanishads, and are there exterses have been incorporated in the upanishads.

plained by later sophists who wish to represent them as a guarantee for the scholastic doctrines of the Vedanta philosophy. It was in the Upanishads and in the Sûtras of Vyasa that most Sanskrit scholars became first acquainted with these quotations from the Veda, and hence, even after they had been discovered in their original place in the hymns of the Rig-veda-sanhità, a prejudice remained against their antiquity. The ideas which they expressed were supposed to be of too abstract a nature for the uneducated posts of the Vedic age. I am far from defending the opinion of those who maintained the existence of a school of priests and philosophers in the remotest ages of the world, and who discovered the deepest wisdom in the religious mysteries and mythological traditions of the East. But the reaction which these extravagant theoties has produced goes too far, if every thought which touches on the problems of philosophy is to be marked indiscriminately as a modern forgery, if every conception which reminds us of Moses, Plate, or the Apostles, is to be put down as necessarily borrowed from Jewish, Greek or Christian sources, and foisted thence into the collections of the ancient poetry of the Hindus.

There is what Leibnitz called perennis quadra philosophia, a search after truth which was not confined to the schools of priests or philosophers. Its language, no doubt, is less exact than that of an Aristotle, its tenets are vague, and the light which it sheds on the dark depths of human thought resembles more the sheet-lightning of a sombre evening, than the bright rays of a cloudless survise. Yet there is much to be learnt by the historian and the philosopher from these ancient guesses at truth; and we should not deprive ourselves of the new sources which have so unexpectedly been opened for studying the history of man, fearful and wonderful as his structure, by easting wanton doubts on all that conflicts with our own previous conclusions. I add only one more hymn, in which the idea of one God is expressed with such power and decision, that it will make us hesitate before we deny to the Aryan nations an instinctive Monotheism. (Rv. x. 121.)

"In the beginning there arose the Source of golden light—He was the only born Lord of all that is. He stablished the earth, and this sky;—Who is the God to whom we shall offer our sacrifice?

He who gives life, He who gives strength; whose blessing all the bright gods desire; whose shadow is immortality; whose shadow is death;—Who is the God to whom we shall offer our sacrifice?

He who through His power is the only King of the breathing and awakening world;—He who governs all, man and beast;—Who is the God to whom we shall offer our sacrifice?

He whose power these snowy mountains, whose power the sea proclaims, with the distant river —He whose these regions are as it were His two arms;—Who is the God to whom we shall offer our sacrifice?

He through whom the sky is bright and the earth firm—He through whom the heaven was stablished—nay, the highest heaven—He who measured out the light in the air;—Who is the God to whom we shall offer our sacrifice?

He to whom heaven and earth, standing firm by His will, look up, trembling inwardly—He over whom the rising sun shines forth;—Who is the God to whom we shall offer our sacrifice?

Wherever the mighty water-clouds went, where they placed the seed and lit the fire, thence arose He who is the only life of the bright.

gods ;- Who is the God to whom we shall offer our sacrifice?

He who by His might looked even over the water-clouds, the clouds which gave strength and lit the sacrifice, He who is God above all gods;
—Who is the God to whom we shall offer our sacrifice?

May He not destroy us—He the creator of the earth; or He, the righteous, who created the heaven; He who also created the bright and mighty waters;—Who is the God to whom we shall offer our sacri-

fice?"

There is nothing to prove that this hymn is of a particularly ancient date. On the contrary, there are expressions in it, especially the name of Hiranyagarbha, which seem to belong to a later age. Bur even if we assign the lowest possible date to this and similar hymns, certain it is that they existed during the Mantra period, and before the composition of the Brahmanas; certain it is that every verse and every syllable was counted in the Anukramanîs of the Sûtra period. With our received notions on the history of the human mind it may be difficult to account for facts like these; but facts must not be made to evaporate in order to maintain a theory. The difficulty, such as it is, will be felt by all who think seriously and honestly on these problems. But it is better to state this difficulty than to conceal it. Even if we assign all philosophical hymns to the last years of the Mautra period, we have to account, in the 9th century B.C., for thoughts which, like the stems of forest trees, disclose circles within circles, almost impossible to count. There are hymns which are decidedly modern if compared with others: but if the most modern be ascribed to the Mantra period, what must be the date of the earliest relies of the Chhandas age? There can be little doubt, for instance, that the 90th hymn of the 10th book, a hymn which is likewise found in the 31st book of the Vajasaneyi-sanhita, and in the 19th book of the Atharva-veda, is modern both in its character and in its diction. It is full of allusions to the sacrificial ceremonials, it uses technical philosophical terms, it mentions the three seasons in the order of Vasanta, spring, Grishma, summer, and Sarad, autumn; it contains the only passage in the Rig-veda where the four castes are enumerated. The evidence of language for the modern date of this composition is equally strong. Grishma, for instance, the name for the hot season, does not occur in any other hymn of the Rig-veda; and Vasanta also, the name of spring. does not belong to the earliest vocabulary of the Vedic poets. It occurs but once more in the Rig-veda x. 161. 4., in a passage where the three seasons are mentioned in the order of S'arad, autumn, Hemanta, winter, and Vasanta, spring. But in spite of all the indications of a modern date, this hymn, if our argument holds good, must have existed before the beginning of the Brah-

<sup>1</sup> A very careful discussion on this hymn, together with its text, translation, various readings and notes, is to be found in Dr. John Muir's "Original Sanskrit Texts," pp. 6—11.

mana period. I see no possibility how we could account for the allusions to it which occur in the Brahmanas, or for its presence in the Sanhitas of the Vajesaneyins, and Atharvans, unless we admit that this noam formed part of the final collection of the Rivevela-sanhita, the work of the Mantra period. There are no traces anywhere of hymns having been added after that collection was closed, except in the case of the Khilas, and no secret is over made as to their spurious character. Oriental scholars are frequently suspected of a desire to make the literature of the eastern nations appear more ancient than it is to myself. I can truly say that nothing would be to me a more welcome discovery, nothing would remove so many doubts and difficulties, as some suggestion as to the manner in which certain of the Vedic hymns could have been added to the original collection during the Bralimana or Satra periods, or, if possible, by the writers of our MSS., of which most are not older than the loth century. But these MSS., though so modern, are checked by the Anukramania, Every hymn which stands in our MSS, is counted in the Index of Sunaka, who is anterior to the invasion of Alexender. The Sûtras, belonging to the same period as Saunaka, prove the previous existence of every chapter of the Brahmanas: and I doubt whether there is a single hymn in the Sanhita of the Rig veda which could not be checked by some passage of the Brahmanas and Sûtras. The chronological limits assigned to the Sûtra and Brahmana periods will seem to most Sanskrit scholars too narrow rather than too wide, and if we assign but 200 years to the Mantra period, from 800 to 1000 B.G. and an equal number to the Chhandas period, from 1000 to 1200 B.c., we can do so only under the supposition that during the early periods of history the growth of the human mind was more luxuriant than in later times, and that the layers of thought were formed less slowly in the primary than in the tertiary ages of the world.

## APPENDIX.

THE STORY OF SUNAHSEPHA, ACCORDING TO THE SAKHA
OF THE AITAREYINS, COLLATED WITH THE TEXT
IN THE SANKHÂYANA-S'AKHĀ.

The upper line shows the various readings of the Sankhayana-sûtras.
